Naomi Klein

The Shock Doctrine Naomi Klein, 2010-04-01 The bestselling author of No Logo shows how the global free market has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term disaster capitalism. Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic shock treatment, losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.

Born to Run Christopher McDougall, 2010-12-09 A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of Born to Run lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then

take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

Liar's Poker Michael Lewis, 2010-03-15 The time was the 1980s. The place was Wall Street. The game was called Liar's Poker. Michael Lewis was fresh out of Princeton and the London School of Economics when he landed a job at Salomon Brothers, one of Wall Street's premier investment firms. During the next three years, Lewis rose from callow trainee to bond salesman, raking in millions for the firm and cashing in on a modern-day gold rush. *Liar's Poker* is the culmination of those heady, frenzied years—a behind-the-scenes look at a unique and turbulent time in American business. From the frat-boy camaraderie of the forty-first-floor trading room to the killer instinct that made ambitious young men gamble everything on a high-stakes game of bluffing and deception, here is Michael Lewis's knowing and hilarious insider's account of an unprecedented era of greed, gluttony, and outrageous fortune.

Car Crash Culture M. Brottman, 2016-04-30 A morbidly fascinating and articulate collection of essays, this book explores the grim underside of America's cult of the automobile and the disturbing, frequently conspiratorial, speculations that arise whenever the car becomes the cause or the site of human death. Through analysis of fatal celebrity car accidents and other examples of death by automobile, as well as through personal memoir and forensic reports, cultural critics ponder our very human fascination with the car crash. Topics include the roles and experiences of passengers and bystanders, car crash conspiracy theories, the automobile as a site of murder, studies of car crash cinema, and psychological interpretations of the notion of the 'accident.' The book features original essays by such underground icons as Kenneth Anger and Adam Parfrey.

Saturday Night Live, Hollywood Comedy, and American Culture J. Whalley, 2010-06-21 Saturday Night Live, Hollywood Comedy, and American Culture sheds new light on the ways in which Saturday Night Live's confrontational, boundary-pushing approach spilled over into film

production, contributing to some of the biggest hits in Hollywood history, such as National Lampoon's Animal House, Ghostbusters, and Beverly Hills Cop. Jim Whalley also considers how SNL has adapted to meet the needs of subsequent generations, launching the film careers of Mike Myers, Adam Sandler, Will Ferrell and others in the process. Supported by extensive archival research, some of Hollywood's most popular comedians are placed into the contexts of film and television comic traditions and social and cultural trends in American life.

Fences and Windows Naomi Klein, 2010-08-27 *Fences and Windows: Dispatches from the Front Lines of the Globalization Debate* brings together two years of Naomi Klein’s writings and tracks the globalization conflict from Seattle to September 11th and beyond. Since the publication of *No Logo*, Naomi Klein has continued tirelessly as a brilliant and informed contributor to contemporary debate. *Fences and Windows: Dispatches from the Front Lines of the Globalization Debate*, intended as a companion to *No Logo*, includes her most notable essays, speeches and articles on issues from NAFTA to Genetically Modified Organisms to the violence in Genoa. It offers introduction and explanation, looking at where the movement has come from and where it is going. More than any other single voice, Naomi Klein articulates the concerns and complaints of a generation: about

economic fundamentalism, the criminalization of dissent and the effects of Free Trade. But this book also reflects on the nature of resistance: the street protests that shocked and energized millions, carnival-style subversion and the apparent disorganization that is anti-globalization's great strength. *Fences and Windows: Dispatches from the Front Lines of the Globalization Debate* is provocative, intelligent and passionate, a document, in its own right, of a unique time in our history.

Topological Geometrodynamics Matti Pitkanen, 2016-03-03 Topological geometrodynamics (TGD) is a modification of the theory of general relativity inspired by the problems related to the definition of inertial and gravitational energies in the earlier hypotheses. TGD is also a generalization of super string models. TGD brings forth an elegant theoretical projection of reality and builds upon the work by renowned scientists (Wheeler, Feynman, Penrose, Einstein, Josephson to name a few). In TGD, Physical space-time planes are visualized as four-dimensional surfaces in a certain 8-dimensional space (H). The choice of H is fixed by symmetries of standard model and leads to a geometric mapping of known classical fields and elementary particle numbers. TGD differs from Einstein's geometrodynamics in the way space-time planes or 'sheets' are lumped together. Extending the theory based on fusing number concepts implies a further generalisation of the space-time concept allowing the identification of space-time correlates of cognition and intentionality. Additionally, zero energy ontology forces an extension of quantum measurement theory to a theory of consciousness and a hierarchy of phases is identified. Dark matter is thus predicted with far reaching implications for the understanding of consciousness and living systems. Therefore, it sets a solid foundation for modeling our universe in geometric terms. *Topological Geometrodynamics: An Overview* explains basic and advanced concepts about TGD. The book covers introductory information and classical TGD concepts before delving into twistor-space theory, particle physics, infinite-dimensional spinor

geometry, generalized number theory, Planck constants, and the applications of TGD theory in research. The book is a valuable guide to TDG theory for researchers and advanced graduates in theoretical physics and cosmology.
