On the Origin of Species Illustrated Charles Darwin, 2020-09-30 On the Origin of Species (or, more completely, On the Origin of Species by Means of Natural Selection, or the Preservation of Favoured Races in the Struggle for Life), [3] published on 24 November 1859, is a work of scientific literature by Charles Darwin which is considered to be the foundation of evolutionary biology.[4] Darwin's book introduced the scientific theory that populations evolve over the course of generations through a process of natural selection. It presented a body of evidence that the diversity of life arose by common descent through a branching pattern of evolution. Darwin included evidence that he had gathered on the Beagle expedition in the 1830s and his subsequent findings from research, correspondence, and experimentation

Marine Mammal Welfare Andy Butterworth, 2017-06-19 Marine mammals attract human interest – sometimes this interest is benign or positive – whale watching, conservation programmes for whales, seals, otters, and efforts to clear beaches of marine debris are seen as proactive steps to support these animals. However, there are many forces operating to affect adversely the lives of whales, seals, manatees, otters and polar bears – and this book explores how the welfare of marine mammals has been affected and how they have adapted, moved, responded and sometimes suffered as a result of the changing marine and human world around them. Marine mammal welfare addresses the welfare effects of marine debris, of human traffic in the oceans, of noise, of hunting, of whale watching and tourism, and of

some of the less obvious impacts on marine mammals – on their social structures, on their behaviours and migration, and also of the effects on captivity for animals kept in zoos and aquaria. There is much to think and talk about – how marine mammals respond in a world dramatically influenced by man, how are their social structures affected and how is their welfare impacted?

The Mystique of Transmission Wendi L. Adamek, 2007-05-15 The *Mystique of Transmission* is a close reading of a late-eighth-century Chan/Zen Buddhist hagiographical work, the *Lidai fabao ji* (Record of the Dharma-Jewel Through the Generations), and is its first English translation. The text is the only remaining relic of the little-known Bao Tang Chan school of Sichuan, and combines a sectarian history of Buddhism and Chan in China with an account of the eighth-century Chan master Wuzhu in Sichuan. Chinese religions scholar Wendi Adamek compares the *Lidai fabao ji* with other sources from the fourth through eighth centuries, chronicling changes in the doctrines and practices involved in transmitting medieval Chinese Buddhist teachings. While Adamek is concerned with familiar Chan themes like patriarchal genealogies and the ideology of sudden enlightenment, she also highlights topics that make *Lidai fabao ji* distinctive: formless practice, the inclusion of female practitioners, the influence of Daoist metaphysics, and connections with early Tibetan Buddhism. The *Lidai fabao ji* was unearthed in the early twentieth century in the Mogao caves at the Silk Road oasis of Dunhuang in northwestern China. Discovery of the Dunhuang manuscripts has been compared with the discovery of the Dead Sea Scrolls, as these documents have radically changed our understanding of medieval China and Buddhism. A crucial volume for students and scholars, *The Mystique of Transmission* offers a rare glimpse of a lost world and fills

an important gap in the timeline of Chinese and Buddhist history.

The Phoenix Joseph Nigg, 2016-11-04 An “insightful cultural history of the mythical, self-immolating bird” from Ancient Egypt to contemporary pop culture by the author of *The Book of Gryphons* (Library Journal). The phoenix, which rises again and again from its own ashes, has been a symbol of resilience and renewal for thousands of years. But how did this mythical bird come to play a part in cultures around the world and throughout human history? Here, mythologist Joseph Nigg presents a comprehensive biography of this legendary creature. Beginning in ancient Egypt, Nigg’s sweeping narrative discusses the many myths and representations of the phoenix, including legends of the Chinese, where it was considered a sacred creature that presided over China’s destiny; classical Greece and Rome, where it appears in the writings of Herodotus and Ovid; medieval Christianity, in which it came to embody the resurrection; and in Europe during the Renaissance, when it was a popular emblem of royals. Nigg examines the various phoenix traditions, the beliefs and tales associated with them, their symbolic and metaphoric use, and their appearance in religion, bestiaries, and even contemporary popular culture, in which the ageless bird of renewal is employed as a mascot and logo. “An exceptional work of scholarship.”—Publishers Weekly

Grimoire For The Apprentice Wizard Oberon Zell-Ravenheart, 2004-02-04 Here is the book Merlin could have given a young Arthur . . . if only it had existed. Out of the millions of Harry Potter fans worldwide, there are tens of thousands who want to really do the magical things J.K. Rowling writes about. But would-be wizards must rely on information passed down from wizard elders. Is there a Hogwarts anywhere in the real world? A real Albus

Dumbledore? Where is the book these aspiring wizards need? Luckily for all those fans, Oberon Zell-Ravenheart, today's foremost genuine wizard, has written the essential handbook. What's more, he has gathered some of the greatest names in Wicca—including Ellen Evert Hopman, Raymond Buckland, Raven Grimassi, Patricia Telesco, Jesse Wolf Hardin, Morning Glory Zell-Ravenheart, and many more into a modern-day "Grey Council" to publish for the first time everything an aspiring wizard needs to know. Lurking within the pages of *Grimoire for the Apprentice Wizard* are: Biographies of famous wizards of history and legend Detailed descriptions of magickal tools and regalia (with full instructions for making them) Rites and rituals for special occasions A bestiary of mythical creatures The Laws of Magick Myths and stories of gods and heroes Lore and legends of the stars and constellations Instruction for performing amazing illusions, special effects, and many other wonders of the magical multiverse Praise for *Grimoire for the Apprentice Wizard* "I can't think of a better, more qualified person to write a Handbook for Apprentice Wizards. Oberon is a Wizard." —Raymond Buckland, author of *Buckland's Complete Book of Witchcraft* "Oberon is not only extremely learned in the magickal arts but he communicates that knowledge with wit and charm." —Fiona Horne, author of *Witch: A Magickal Journey* and star of *Mad, Mad, Mad House*

Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge

experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

The Five Senses Michel Serres, 2016-10-20 Marginalized by the scientific age the lessons of the senses have been overtaken by the dominance of language and the information revolution. With *The Five Senses* Serres traces a topology of human perception, writing against the Cartesian tradition and in praise of empiricism, he demonstrates repeatedly, and lyrically, the sterility of systems of knowledge divorced from bodily experience. The fragile empirical world, long resistant to our attempts to contain and catalog it, is disappearing beneath the relentless accumulations of late capitalist society and information technology. Data has replaced sensory pleasure, we are less interested in the taste of a fine wine than in the description on the bottle's label. What are we, and what do we really know, when we have forgotten that our senses can describe a taste more accurately than language ever could? The book won the inaugural Prix Médicis Essai in 1985. The Revelations edition includes an introduction by Steven Connor.

Everyone in Silico Jim Munroe,2017-08-14 In Vancouver in 2036, people are tired of the rain. They're willing to give up a lot for guaranteed sunshine, a life with no wasted hours. A life free of crime and disease. A life that ends when you want it to, not when some faceless entity decides it's your time. Those who don't buy in - the poor, the old, the paranoid - have to watch as their loved ones, their friends, and their jobs leave the city. They have to watch as the latest prestige technology, Self, changes everything - not just the world but humanity itself. On the bright side, the rents have dropped. And in several unexpected ways, resistance is growing. This fascinating work of fiction tells what can happen when the cyberworld becomes more important than the real world.Munroe is a Canadian science fiction author, who publishes his works independently under the imprint No

Media Kings. He was managing editor at the magazine Adbusters in the 1990s, before publishing his debut novel *Flyboy Action Figure Comes With Gasmask* in 1999. The following he release *Angry Young Spaceman* through his No Media Kings imprint and, in the U.S., *Four Walls Eight Windows*. A couple of years later he published *Everyone in Silico*, which was promoted partly by Munroe's attempt to invoice corporations mentioned in the novel for product placement. Munroe's most recent books are graphic novels set in post-Rapture Chicago and Detroit. Munroe was the founder of Perpetual Motion Roadshow, a North American indie touring circuit that sent 100 writers, performers and musicians on the road between 2003-2007. A former video games columnist for *Eye Weekly*, he is a founding board member of the Hand Eye Society and has produced projects such as the *Torontron*.
