Parrots of the World Joseph M. Forshaw, 2010-09-27 From the macaws of South America to the cockatoos of Australia, parrots are among the most beautiful and exotic birds in the world--and also among the most endangered. This stunningly illustrated, easy-to-use field guide covers all 356 species and well-differentiated subspecies of parrots, and is the only guide organized by geographical distribution--Australasian, Afro-Asian, and neotropical. It features 146 superb color plates depicting every kind of parrot, as well as detailed, facing-page species accounts that describe key identification features, distribution, subspeciation, habitat, and status. Color distribution maps show ranges of all subspecies, and field identification is further aided by relevant upperside and underside flight images. This premier field guide also shows where to observe each species in the wild, helping make this the most comprehensive and user-friendly guide to the parrots of the world. The only parrot guide to focus on geographical distribution Covers all 356 species Features 146 color plates depicting all species and well-differentiated subspecies Provides detailed facing-page species accounts that describe key identification features, distribution, subspeciation, habitat, and status Includes color distribution maps Shows where to observe each species in the wild

**Life After Logging** E. Meijaard, Douglas Sheil, Robert Nasi, David Augeri, Barry Rosenbaum, Djoko Iskandar, Titiek Setyawati, Martjan Lammertink, Ike Rachmatika, Anna Wong, Tonny Soehartono, Scott Stanley, Timothy O'Brien, 2005-01-01 This book presents a technical

review of ecological and life history information on a range of Bornean wildlife species, aimed at identifying what makes these species sensitive to timber harvesting practices and associated impacts. It addresses three audiences: 1) those involved in assessing and regulating timber harvesting activities in Southeast Asia, 2) those involved in trying to achieve conservation goals in the region, and 3) those undertaking research to improve multipurpose forest management. This book shows that forest management can be improved in many simple ways to allow timber extraction and wildlife conservation to be more compatible than under current practices. The recommendations can also be valuable to the many governmental and non-governmental organisations promoting sustainable forest management and eco-labelling. Finally, it identifies a number of shortcomings and gaps in knowledge, which the hope can interest the scientific community and promote further research. This review is, an important scientific step toward understanding and improving sustainable forestry practices for long-term biodiversity conservation. Even in the short term, however, significant improvements can be made to improve both conservation and the efficiency of forest management, and there is no need to delay action due to a perceived lack of information. In the longer term it is expected that the recommendations from this review will be implemented, and that further research will continue to help foster an acceptable balance among the choices needed to maintain healthy wildlife populations and biodiversity in a productive forest estate.

**Cultural Techniques** Bernhard Siegert, 2015-05-01 In a crucial shift within posthumanistic media studies, Bernhard Siegert dissolves the concept of media into a network of operations that reproduce, displace, process, and reflect the distinctions fundamental for a given culture. Cultural Techniques aims to forget our traditional understanding of media so as to redefine the concept through something more fundamental than the empiricist study of a medium's individual or collective uses or of its cultural semantics or aesthetics. Rather, Siegert seeks to relocate media and culture on a level where the distinctions between object and performance, matter and form, human and nonhuman, sign and channel, the symbolic and the real are still in the process of becoming. The result is to turn ontology into a domain of all that is meant in German by the word Kultur. Cultural techniques comprise not only self-referential symbolic practices like reading, writing, counting, or image-making. The analysis of artifacts as cultural techniques emphasizes their ontological status as "in-betweens," shifting from first-order to second-order techniques, from the technical to the artistic, from object to sign, from the natural to the cultural, from the operational to the representational. Cultural Techniques ranges from seafaring, drafting, and eating to the production of the sign-signal distinction in old and new media, to the reproduction of anthropological difference, to the study of trompe-l'oeils, grids, registers, and doors. Throughout, Siegert addresses fundamental questions of how ontological distinctions can be replaced by chains of operations that process those alleged ontological distinctions within the ontic. Grounding posthumanist theory both historically and technically, this book opens up a crucial dialogue between new German media theory and American postcybernetic discourses.

Manual of Parrot Behavior Andrew Luescher, 2008-01-09 This authoritative reference, the first of its kind, is a necessary addition to the library of any practitioner or behaviorist who sees avian companion animals. Because of their beauty, intelligence, playfulness and ability in mimicry, parrots are the most widely kept companion birds. It is estimated that more than half of the psittacine cases presented to clinicians are the result of behavioral problems-problems inherent to captivity. Bringing together a host of international experts on avian behavior, Manual of Parrot Behavior explores the many facets of psittacine behavior, both normal and abnormal. The book not only provides readers with a solid understanding of the basic principles of psittacine behavior but also offers useful techniques

of diagnosis and treatment for specific problems. Covers both normal and abnormal parrot behavior Offers practical techniques on diagnosis and treatment of behavior problems Written by a team of international experts on avian behavior A necessary addition to the library of any practitioner of behaviorist who sees avian companion animals

*Marjory Saves the Everglades* Sandra Neil Wallace,2020-09-22 “Vibrant...an ideal starting point for further learning.” —School Library Journal “A lively portrayal of Douglas as a remarkable individual and a significant environmental activist.” —Booklist From acclaimed children’s book biographer Sandra Neil Wallace comes the inspiring and little-known story of Marjory Stoneman Douglas, the remarkable journalist who saved the Florida Everglades from development and ruin. Marjory Stoneman Douglas didn’t intend to write about the Everglades but when she returned to Florida from World War I, she hardly recognized the place that was her home. The Florida that Marjory knew was rapidly disappearing—the rare orchids, magnificent birds, and massive trees disappearing with it. Marjory couldn’t sit back and watch her home be destroyed—she had to do something. Thanks to Marjory, a part of the Everglades became a national park and the first park not created for sightseeing, but for the benefit of animals and plants. Without Marjory, the part of her home that she loved so much would have been destroyed instead of the protected wildlife reserve it has become today.

**Animal Traffic** Rosemary-Claire Collard,2020-08-24 Parrots and snakes, wild cats and monkeys---exotic pets can now be found everywhere from skyscraper apartments and fenced suburban backyards to roadside petting zoos. In *Animal Traffic* Rosemary-Claire Collard investigates the multibillion-dollar global exotic pet trade and the largely hidden processes through which exotic pets are produced and traded as lively capital. Tracking the capture of animals in biosphere reserves in Mexico, Guatemala, and Belize; their exchange at exotic animal auctions in the United States; and the attempted rehabilitation of former exotic pets at a wildlife center in Guatemala, Collard shows how exotic pets are fetishized both as commodities and as objects. Their capture and sale sever their ties to complex socio-ecological networks in ways that make them appear as if they do not have lives of their own. Collard demonstrates that the enclosure of animals in the exotic pet trade is part of a bioeconomic trend in which life is increasingly commodified and objectified under capitalism. Ultimately, she calls for a “wild life” politics in which animals are no longer enclosed, retain their autonomy, and can live for the sake of themselves.

**Infectious Diseases of Wild Birds** Nancy J. Thomas,D. Bruce Hunter,Carter T. Atkinson,2008-01-09 Free-living birds encounter multiple health hazards brought on by viruses, bacteria, and fungi, some which in turn can significantly impact other animal populations and human health. Newly emerging diseases and new zoonotic forms of older diseases have brought increased global attention to the health of wild bird populations. Recognition and management of these diseases is a high priority for all those involved with wildlife. *Infectious Diseases of Wild Birds* provides biologists, wildlife managers, wildlife and veterinary health professionals and students with the most comprehensive reference on infectious viral, bacterial and fungal diseases affecting wild birds. Bringing together contributions from an international team of experts, the book offers the most complete information on these diseases, their history, causative agents, significance and population impact. Focusing on more than just treatment, special emphasis is given to disease processes, recognition and epidemiology.

*Navigating the Future* Monica Minnegal, Peter D. Dwyer, 2017-06-08 *Navigating the Future* draws on long-term ethnographic fieldwork with Kubo people and their neighbours, in a remote area of Papua New Guinea, to explore how worlds are reconfigured as people become increasingly conscious of, and seek to draw into their own lives, wealth and power that had previously lain beyond their horizons. In the context of a major resource extraction project—the Papua New Guinea Liquefied Natural Gas (PNG LNG) Project—taking shape in the mountains to the north, the people in this area are actively reimagining their social world. This book describes changes in practice that result, tracing shifts in the ways people relate to the land, to each other and to outsiders, and the histories of engagement that frame those changes. Inequalities are emerging between individuals in access to paid work, between groups in potential for claiming future royalties, and between generations in access to information. As people at the village of Suabi strive to make themselves visible to the state and to petroleum companies, as legal entities entitled to receive benefits from the PNG LNG Project, they are drawing new boundaries around sets of people and around land and declaring hierarchical relationships between groups that did not exist before. They are struggling to make sense of a bureaucracy that is foreign to them, in a place where the state currently has minimal presence. A primary concern of *Navigating the Future* is with the processes through which these changes have emerged, as people seek to imagine—and work to bring about—a radically different future for themselves while simultaneously reimagining their own past in ways that validate those endeavours.

**Parrots** Mike Parr, Tony Juniper, 2010-07-30 This is the first book created primarily for the field identification of parrots, one of the most familiar and colorful groups of birds. From the mighty macaws to the diminutive pygmy parrots, the 350 species of parrots include cockatoos, parakeets, lovebirds, and Budgerigars. Most are brightly colored or even gaudy, but a few are drab, and some are nocturnal and flightless. Parrots, found throughout most of the warmer regions of the world, occur in greatest numbers in Australasian and South America. This book includes 88 superb color illustrations of every species and most identifiable subspecies of parrot, as well as range maps of their locations. It offers many firsthand insights into the ecology of each species, vocalizations, life cycle characteristics, and geographical variation. It also provides up-to-date information on the conservation status of those species of parrots that are threatened or endangered.

**Self-Mutilation** Barent W. Walsh, Paul M. Rosen, 1988-09-30 Like acts of suicide, homicide, and the sexual abuse of children, self-mutilation is an example of human behavior at its most dysfunctional. Covering the entire spectrum of self-mutilation, from wrist cutting to autocastration and self-inflicted eye removal, this is one of the few books since Karl Menninger's *Man against Himself* (1938) to comprehensively address this disturbing phenomenon. The book is divided into three sections that cover theory, research, and treatment. Part I focuses on the scope of the problem by reviewing the forms of self-mutilation behavior reported in the literature and analyzing its incidence as reported in a number of Western countries. In two particularly important chapters—one theoretical, the other a review of the empirical literature including the authors' own research—the book makes a crucial but difficult distinction between self-mutilative behavior and suicide attempts. The authors conclude that self-mutilation and suicide should be understood and treated as separate clinical problems. In Part II self-mutilation is described as it occurs in different clinical populations. Results from the authors' study of adolescent self-mutilators identifies key childhood and adolescent antecedents to the behavior. Another study by the authors provides the first empirical evidence for the frequently reported phenomenon of self-mutilative contagion. In addition, a detailed case

example of a contagion episode illustrates how such ``clusters'' of self-mutilation develop. This section also offers extended discussion of the distinctive features of self-mutilation in borderline personalities, psychotics, retarded and autistic individuals. Several case examples map the idiosyncratic determinants of these behaviors for each specific group. Part III covers treatment. The authors present new and specific guidelines for the cognitive-behavioral, psychoanalytic, family, and group therapy of mutilators and identify the clinical strategies and responses likely to be counterproductive. The volume ends with a cogent discussion of how these modalities can be integrated into a comprehensive, multimodal treatment program. Designed for a broad range of mental health professionals, including psychologists, social workers, psychiatrists, nurses, and paraprofessionals, SELF-MUTILATION will be invaluable for those affiliated with psychiatric inpatient facilities, group homes, residential treatment centers, and schools. It is also a useful resource for researchers interested in self-destructive behaviors.

**Compensatory Lengthening** Darya Kavitskaya, 2014-06-03 First Published in 2002. This volume is part of the 'Outstanding Dissertations in Linguistics' series, and focuses on phonetics, phonology and diachrony of compensatory lengthening. The term compensatory lengthening (CL) refers to a set of phonological phenomena wherein the disappearance of one element of a representation is accompanied by a corresponding lengthening of another element. This study focuses on descriptive and formal similarities and divergences between CL of vowels triggered by consonant and by vowel loss.

*The Passing of the Aborigines* Daisy Bates, 2022-08-28 Daisy May Bates, CBE (born Margaret Dwyer; 16 October 1859 - 18 April 1951) was an Irish-Australian journalist, welfare worker and lifelong student of Australian Aboriginal culture and society. She was known among the native people as Kabbarli (a kin term found in a number of Australian languages which means grandmother or granddaughter). Daisy Bates conducted fieldwork amongst several Indigenous nations in western and southern Australia. She supported herself largely by writing articles for urban newspapers on such topics as 'native cannibalism' and the 'doomed' fate of Indigenous peoples. Bates also published her work on Indigenous kinship systems, marriage laws, language and religion in books and articles. She was appointed a Commander of the Order of the British Empire (CBE) for Aboriginal welfare work in 1934. (wikipedia.org)
