Elements of Ethology D. Wood-Gush, 2012-12-06 The object of this book is to introduce ethology to agricultural and veterinary students. Today ethology covers many approaches to the study of animal behaviour which are connected by one unifying concept: all behaviour must be considered in relation to the ecology and evolutionary

history of the species under investigation. This may seem to some to put domesticated animals beyond the scope of classical ethology but, while domestication has involved some behavioural changes, we shall see that much of the behaviour of our species of farm livestock differs little from that of their putative ancestors. It is assumed that students using this book will already have studied some physiology. It is also assumed that they are, essentially, practically minded and with this factor in mind I have discussed behaviour in terms of its function, introducing the principles of ethology within functional categories of behaviour. In order to best illustrate these principles I have taken examples from a variety of species and not confined myself to farm livestock and domestic animals, for fundamental ethological research with these species has been patchy. However at the end of each chapter I have given a list of papers pertaining to farm livestock so that the principles of ethology can be seen in a more practical context and to develop this approach further I have also added some practical problems for discussion at the end of each chapter.

From the New York Times bestselling photographer of *Beaches*, Gray Malin, comes *Be Our Guest!*, Malin's first children's picture book, compiled from his acclaimed series of photographs Gray Malin at the Parker Palm Springs. **Building Character with True Stories from Nature** Barbara A. Lewis, 2012-08-27 This flexible resource combines character education with analogies to powerful stories from nature. The heart of each of the book's twenty-five lessons is an engaging story, written to kids, describing a particular animal or plant and its distinctive qualities. Busy classroom teachers will like this book's accessibility and flexibility. Kids can read a story individually or in groups, or follow along as the teacher reads it aloud. Accompanying each story, teachers will find several activities—most of them quick, easy, and requiring few supplies—that further investigate animals or plants and the connections between their qualities and human behaviors. Every lesson examines several main character traits, providing starting points and sample questions for discussing and exploring analogies between events in

nature and human acts of character. Features include a chart cross-referencing lessons to specific character traits and a list of further resources. Digital content contains all of the book's reproducible forms, including a color photo of each plant and animal, plus a complete bonus lesson.

**"Stand Back," Said the Elephant, "I'm Going to Sneeze!"** Patricia Thomas,1990-04-23 All the animals are in a panic. The elephant's sneeze would blow the monkeys out of the trees, the feathers off the birds, the stripes off the zebra. Even the fish and the fly, the crocodile and the kangaroo, know what a catastrophe that sneeze would be. Please don't sneeze! they beg. . . . The classic story of an enormous sneeze in the marking, told in sprightly nonsense verse, has been newly illustrated in full color to delight a new generation of fans.
