Sketching, Product Design Presentation Koos Eissen, Roselien Steur, 2014-12-30 From how to sketch to why to sketch

From Research to Manuscript Michael J. Katz, 2006-07-10 From Research to Manuscript, written in simple, straightforward language, explains how to understand and summarize a research project. It is a writing guide that goes beyond grammar and bibliographic formats, by demonstrating in detail how to compose the sections of a scientific paper. This book takes you from the data on your desk and leads you through the drafts and rewrites needed to build a thorough, clear science article. At each step, the book describes not only what to do but why and how. It discusses why each section of a science paper requires its particular form of information, and it shows how to put your data and your arguments into that form. Importantly, this writing manual recognizes that experiments in different disciplines need different presentations, and it is illustrated with examples from well-written papers on a wide variety of scientific subjects. As a textbook or as an individual tutorial, From Research to Manuscript belongs in the library of every serious science writer and editor.

Dinosaur Dioramas to Cut and Assemble Matthew Kalmenoff, 1983-01-01 Contains artwork of dinosaurs and plants to cut out and use to make dioramas of the Cretaceous and Jurassic Periods of the Mesozoic Era. Also contains text about dinosaurs

Teaching Science in Diverse Classrooms Douglas B. Larkin, 2019-08-29 As a distinctive voice in science education writing, Douglas Larkin provides a fresh perspective for science teachers who work to make real science accessible to all K-12 students. Through compelling anecdotes and vignettes, this book draws deeply on research to present a vision of successful and inspiring science teaching that builds upon the prior knowledge, experiences, and interests of students. With empathy for the challenges faced by contemporary science teachers, Teaching Science in Diverse Classrooms encourages teachers to embrace the intellectual task of engaging their students in learning science, and offers an abundance of examples of what high-quality science teaching for all students looks like. Divided into three sections, this book is a connected set of chapters around the central idea that the decisions made by good science teachers help light the way for their students along both familiar and unfamiliar pathways to understanding. The book addresses topics and issues that occur in the daily lives and career arcs of science teachers such as: • Aiming for culturally relevant science teaching • Eliciting and working with students' ideas • Introducing discussion and debate • Reshaping school science with scientific practices • Viewing science teachers as science learners Grounded in the Next Generation Science Standards (NGSS), this is a perfect supplementary resource for both preservice and inservice teachers and teacher educators that addresses the intellectual challenges of teaching science in contemporary classrooms and models how to enact effective, reform
