Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Naylor, 2010-05-18 Find a Penny pick it up and all day long you'll have good luck...except, of course, if that Penny is charming and pretty and funny, and the person picking her up just happens to be your boyfriend. Alice McKinley's freshman year is not as "lucky" as she was hoping it would be. But she's is trying to look on the bright side. There are worse things than being single for a semester... for a school year...for the whole summer.... At least Alice can count on her best friends for support—in theory, anyway. Lately they haven't been all that there-for-her. In fact, it seems like Pam and Liz are suddenly involved in intense, secret conversations whenever Alice is around. Single is starting to feel a whole lot like solo.

Natural Houses Arthur Andersson, Chris Wise, 2010-04-07 For Arthur Andersson and Chris Wise, the fundamental elements that give buildings meaning are found in nature. Imbuing day-to-day activities with poetry and awe, their designs address both pragmatic needs and the psychological yearning for refuge and contemplation, centering and escape, joy and comfort. Their work is best experienced through the senses. Tactility, expressed through an eloquence of craft, the use of textured materials, and the logical design of structural systems, gives their buildings a rightness within the landscape. In their hands, daylight becomes a building material. Small wall apertures, three-sided dormers, clerestories, and other details grab, bend, and thread sunlight from one end of their houses to the other. Full of light and atmosphere, the houses are the physical embodiment of the great Charles Moore's influential tenet that architecture is about enhancing a sense of place. Natural Houses presents seven of the Austin, Texas-based firm's exquisitely crafted projects. Precise and cool, with forms often derived from the American vernacular of barns and cottages, these are painstakingly crafted houses made from regionally appropriate and aesthetically timeless

materials. Natural Houses presents a range of sites and residences—from a small cabin in the woods to a multibuilding camp. Sited on a cliff, the House Above Lake Austin uses terraces to descend its steeply hilly site. The building's simple materials celebrate the site and climate not by drawing attention to themselves, but by blending in. The stone foundation is similarly tied to the natural stone of the mountain. Smooth plaster walls above the stone foundation appear to have been chiseled from the rock itself. In a deceptively simple boathouse the walls fold down to become impromptu diving platforms. Exceptional photography captures the light and atmosphere of each project setting and illustrates how the firm rigorously expresses the design concept through detailing and construction. An introduction by Rick Sundberg of Olson Sundberg Kundig Allen Architects and essays by Jen Renzi and Frederick Steiner chart the firm's evolution and influences.
