The Migration Conference 2019 - Book of Abstracts and Programme Fethiye Tilbe, Vildan Mahmutoglu, 2019-06-08

We're pleased to welcome you to the Department of Political Science at the University of Bari "Aldo Moro" for the 7th Migration Conference. The conference is the largest scholarly gathering on migration with a global scope. Human mobility, economics, work, employment, integration, insecurity, diversity and minorities, as well as spatial patterns, culture, arts and legal and political aspects appear to be key areas in the current migration debates and research. Throughout the program of the Migration Conference you will find various key thematic areas covered in 598 presentations by 767 contributors coming from all around the world, from Australia to Canada, China to Colombia, Brazil to Korea, and South Africa to Norway. We are proud to bring together experts from universities, independent research organisations, governments, NGOs and the media. We are also proud to bring you opportunities to meet with some of the leading scholars in the field. This year invited speakers include Fiona B. Adamson, Markus Kotzur, Philip L. Martin, Karsten Paerregaard, Ferruccio Pastore, Martin Ruhs, Jeffrey H. Cohen, and Carlos Vargas Silva. Although the main language of the conference is English, this year we will have linguistic diversity as usual and there will be presentations in French, Italian, Spanish and Turkish. We have maintained over the years a frank and friendly environment where constructive criticism fosters scholarship, while being nice improves networks and quality of the event. We hope to continue with this tradition and you will enjoy the Conference and Bari during your stay. We thank all participants, invited speakers and conference committees for their efforts and contribution. We also thank many colleagues who were interested in and submitted abstracts but could not make it this year. We are particularly grateful to hundreds of colleagues who served as reviewers and helped the selection process. We also thank to those colleagues who organised panels and agreed to chair parallel sessions over three days. We reserve our final thanks to the team of volunteers whose contributions have been essential to the success of the conference. In this regard, special thanks are reserved for our volunteers and team leaders Rosa, Alda, Franco, and Aldo from the University of Bari, Tuncay and Fatma from Regent's University London, Fethiye from Namik Kemal University and Vildan from Galatasaray University, Ege from Middle East Technical University, Mehari from Regent's University London, and Gizem from Transnational Press London. Our final thanks are reserved for the leaders of the University of Bari "Aldo Moro" and the Department of Political Science, President of Puglia Regional Administration and Mayor of City of Bari for hosting the Conference and for their generous support in enriching the Conference programme. Please do not hesitate to get in touch with us through the conference email (migrationscholar@gmail.com). Ibrahim Sirkeci and Michela C. Pellicani

The Migration Conference Chairs

The Migration Conference 2019

The Migration Conference is a global venue for academics, policy makers, practitioners, students and everybody who is interested in intelligent debate and research informed discussions on human mobility and its impacts around the world. The Migration Conference 2019 is the 7th conference in the series and co-organised and hosted by the University of Bari "Aldo Moro", Italy and Transnational Press London. The Migration Conferences were launched at the Regent's Centre for Transnational Studies in 2012 when the first large scale

well attended international peer-reviewed conference with a focus on Turkish migration in Europe in Regent's Park campus of Regent's University London. The migration conferences have been attended by thousands of participants coming from all around the world in London (2012), London (2014), Prague (2015), Vienna (2016), Athens (2017), Lisbon (2018), and Bari (2019).

Refugee Economies Alexander Betts, Louise Bloom, Josiah David Kaplan, Naohiko Omata, 2017 Refugees have rarely been studied by economists. Despite some pioneering research on the economic lives of refugees, there remains a lack of theory and empirical data through which to understand, and build upon, refugees' own engagement with markets. Yet, understanding these economic systems may hold the key to rethinking our entire approach to refugee assistance. If we can improve our knowledge of the resource allocation systems that shape refugees' lives and opportunities, then we may be able to understand the mechanisms through which these market-based systems can be made to work better and turn humanitarian challenges into sustainable opportunities. This book adopts an inter-disciplinary approach, based on original qualitative and quantitative data on the economic life of refugees, in order to begin to build theory on the economic lives of refugees. It focuses on the case of Uganda because it represents a relatively positive case. Unlike other governments in the region, it has taken the positive step to allow refugees the right to work and a significant degree of freedom of movement through its so-called 'Self-Reliance Strategy'. This allows a unique opportunity to explore what is possible when refugees have basic economic freedoms. The book shows that refugees have complex and varied economic lives, often being highly entrepreneurial and connected to the global economy. The implications are simple but profound: far from being an inevitable burden, refugees have the capacity to help themselves and contribute to their host societies - if we let them

Bank Leverage and Monetary Policy's Risk-Taking Channel Mr. Giovanni Dell'Ariccia, Mr. Luc Laeven, Mr. Gustavo Suarez, 2013-06-06 We present evidence of a risk-taking channel of monetary policy for the U.S. banking system. We use confidential data on the internal ratings of U.S. banks on loans to businesses over the period 1997 to 2011 from the Federal Reserve's survey of terms of business lending. We find that ex-ante risk taking by banks (as measured by the risk rating of the bank's loan portfolio) is negatively associated with increases in short-term policy interest rates. This relationship is less pronounced for banks with relatively low capital or during periods when banks' capital erodes, such as episodes of financial and economic distress. These results contribute to the ongoing debate on the role of monetary policy in financial stability and suggest that monetary policy has a bearing on the riskiness of banks and financial stability more generally.

The Arc of Protection T. Alexander Aleinikoff, Leah Zamore, 2019-10-01 The international refugee regime is fundamentally broken. Designed in the wake of World War II to provide protection and assistance, the system is unable to address the record numbers of persons displaced by conflict and violence today. States have put up fences and adopted policies to deny, deter, and detain asylum seekers. People recognized as refugees are routinely denied rights guaranteed by international law. The results are dismal for the millions of refugees around the world who are left with slender prospects to rebuild their lives or contribute to host communities. T. Alexander

Aleinikoff and Leah Zamore lay bare the underlying global crisis of responsibility. The Arc of Protection adopts a revisionist and critical perspective that examines the original premises of the international refugee regime. Aleinikoff and Zamore identify compromises at the founding of the system that attempted to balance humanitarian ideals and sovereign control of their borders by states. This book offers a way out of the current international morass through refocusing on responsibility-sharing, seeing the humanitarian-development divide in a new light, and putting refugee rights front and center.

In the Wake of the Crisis Olivier Blanchard, David Romer, Michael Spence, Joseph E. Stiglitz, 2012-02-24 Prominent economists reconsider the fundamentals of economic policy for a post-crisis world. In 2011, the International Monetary Fund invited prominent economists and economic policymakers to consider the brave new world of the post-crisis global economy. The result is a book that captures the state of macroeconomic thinking at a transformational moment. The crisis and the weak recovery that has followed raise fundamental questions concerning macroeconomics and economic policy. These top economists discuss future directions for monetary policy, fiscal policy, financial regulation, capital-account management, growth strategies, the international monetary system, and the economic models that should underpin thinking about critical policy choices. Contributors Olivier Blanchard, Ricardo Caballero, Charles Collyns, Arminio Fraga, Már Guðmundsson, Sri Mulyani Indrawati, Otmar Issing, Olivier Jeanne, Rakesh Mohan, Maurice Obstfeld, José Antonio Ocampo, Guillermo Ortiz, Y. V. Reddy, Dani Rodrik, David Romer, Paul Romer, Andrew Sheng, Hyun Song Shin, Parthasarathi Shome, Robert Solow, Michael Spence, Joseph Stiglitz, Adair Turner

Economic Transformations Richard G. Lipsey, Kenneth I. Carlaw, Clifford T. Beker, 2005-11-03 This book examines the long term economic growth that has raised the West's material living standards to levels undreamed of by counterparts in any previous time or place. The authors argue that this growth has been driven by technological revolutions that have periodically transformed the West's economic, social and political landscape over the last 10,000 years and allowed the West to become, until recently, the world's only dominant technological force. Unique in the diversity of the analytical techniques used, the book begins with a discussion of the causes and consequences of economic growth and technological change. The authors argue that long term economic growth is largely driven by pervasive technologies now known as General Purpose (GPTs). They establish an alternative to the standard growth models that use an aggregate production function and then introduce the concept of GPTs, complete with a study of how these technologies have transformed the West since the Neolithic Agricultural Revolution. Early modern science is given more importance than in most other treatments and the 19th century demographic revolution is studied with a combination of formal models of population dynamics and historical analysis. The authors argue that once sustained growth was established in the West, formal models can shed much light on its subsequent behaviour. They build non-conventional, dynamic, non-stationary equilibrium models of GPT-driven growth that incorporate a range of phenomena that their historical studies show to be important but which are excluded from other GPT models in the interests of analytical tractability. The book concludes with a study of the

policy implications that follow from their unique approach.

Stable Isotopes in Ecological Research P.W. Rundel, J.R. Ehleringer, K.A. Nagy, 2012-12-06 The analysis of stable isotope ratios represents one of the most exciting new technical advances in environmental sciences. In this book, leading experts offer the first survey of applications of stable isotope analysis to ecological research. Central topics are - plant physiology studies - food webs and animal metabolism - biogeochemical fluxes. Extensive coverage is given to natural isotopes of carbon, hydrogen, oxygen, nitrogen, sulfur, and strontium in both terrestrial and marine ecosystems. Ecologists of diverse research interests, as well as agronomists, anthropologists, and geochemists will value this overview for its wealth of information on theoretical background, experimental approaches, and technical design of studies utilizing stable isotope ratios.

The Tale of Mutsura Wayne P. Lammers, 2021-01-19 Fujiwara Teika is known as the premier poet and literary scholar of the early 13th century. It is not so widely known that he also tried his hand at fiction: Mumyozoshi (Untitled Leaves; ca. 1201) refers to "several works" by Teika and then names Mutsura no miya monogatari (The Tale of Mutsura; ca. 1190) as the only one that can be considered successful. The work is here translated in full, with annotation. Set in the pre-Nara period, The Tale of Mutsura is the story of a young Japanese courtier, Ujitada, who is sent to China with an embassy and has a number of supernatural experiences while there. Affairs of the heart dominate The Tale of Mutsura, as is standard for courtly tales. Several of its other features break the usual mold, however: its time and setting; the military episode that would seem to belong instead in a war tale; scenes depicting the sovereign's daily audiences, in which formal court business is conducted; a substantial degree of specificity in referring to things Chinese; a heavy reliance on fantastic and supernatural elements; an obvious effort to avoid imitating The Tale of Genji as other late-Heian tales had done; and a most inventive ending. The discussion in the introduction briefly touches upon each of these features, and then focuses at some length on how characteristics associated with the poetic ideal of yoen inform the tale. Evidence relating to the date and authorship of the tale is explored in two appendixes.

Forcibly Displaced World Bank, 2017-08-01 The Syrian refugee crisis has galvanized attention to one of the world's foremost challenges: forced displacement. The total number of refugees and internally displaced persons, now at over 65 million, continues to grow as violent conflict spikes. This report, *Forcibly Displaced: Toward a Development Approach Supporting Refugees, the Internally Displaced, and Their Hosts*, produced in close partnership with the United Nations High Commissioner for Refugees (UNHCR), attempts to sort fact from fiction to better understand the scope of the challenge and encourage new thinking from a socioeconomic perspective. The report depicts the reality of forced displacement as a developing world crisis with implications for sustainable growth: 95 percent of the displaced live in developing countries and over half are in displacement for more than four years. To help the displaced, the report suggests ways to rebuild their lives with dignity through development support, focusing on their vulnerabilities such as loss of assets and lack of legal rights and opportunities. It also examines how to help host communities that need to manage the sudden arrival of large numbers of displaced people and that are

under pressure to expand services, create jobs, and address long-standing development issues. Critical to this response is collective action. As work on a new Global Compact on Responsibility Sharing for Refugees progresses, the report underscores the importance of humanitarian and development communities working together in complementary ways to support countries throughout the crisis•from strengthening resilience and preparedness at the onset to creating lasting solutions.

The World View of the Ainu Takako Yamada,2001 This book clarifies that the Ainu world view is based on the complementary and dualistic cosmology of people and kamui (god), with animals playing a symbolic role linking religion and ecology, and suggests the coexistence of people with nature.

Femtosecond Laser-Matter Interaction Eugene G. Gamaly,2011-10-06 This is the first comprehensive treatment of the interaction of femtosecond laser pulses with solids at nonrelativistic intensity. It connects phenomena from the subtle atomic motion on the nanoscale to the generation of extreme pressure and temperature in the interaction zone confined inside a solid. The femtosecond laser-matter interaction has already found numerous applications in industry, medicine, and materials science. However, there is no consensus on the interpretation of related phenomena. With mathematics kept to a minimum, this is a highly engaging and readable treatment for students and researchers in science and engineering. The book avoids complex mathematical formulae, and hence the content is accessible to nontechnical readers. Useful summaries after each chapter provide compressed information for quick estimates of major parameters in planned or performed experiments. The book connects the basic physics of femtosecond laser-solid interactions to a broad range of applications. Throughout the text, basic assumptions are derived from the first principles, and new results and ideas are presented. From such analyses, a qualitative and predictive framework for the field emerges, the impact of which on applications is also discussed.

Origametry Thomas C. Hull,2020-10-08 Written by a world expert on the subject, Origametry is the first complete reference on the mathematics of origami. It is an essential reference for researchers of origami mathematics and applications in physics, engineering, and design. Educators, students, and enthusiasts will also enjoy this fascinating account of the mathematics of folding.

FX Funding Risks and Exchange Rate Volatility–Korea’s Case Mr.Jack Ree,Mr.Kyoungsoo Yoon,Mr.Hail Park,2012-11-07 This paper examines how exchange rate volatility and Korean banks’ foreign exchange liquidity mismatches interacted with each other during the Global Financial Crisis, and whether the vulnerability stemming from this interaction has been reduced since then. Structural and cyclical changes after the crisis, including decreasing demand for currency hedges and the diversifying investor base for bonds, point to a possible weakening of the interaction mechanism; and we find evidences are strongly supportive of this.

Metaphysical Odyssey Into the Mexican Revolution C. M. Mayo,2013-12-12 In a blend of biography, personal essay, and a rendition of deeply researched metaphysical and Mexican history that reads like a novel, award-winning writer and noted literary translator C.M. Mayo provides a rich introduction and the first translation of the secret book by Francisco I. Madero, leader of Mexico's 1910 Revolution and President of Mexico 1911-1913. Says Mexican historian Manuel Guerra de Luna, author of LOS MADERO: LA SAGA LIBERAL, In my

fifteen years of researching the life of President Francisco I. Madero, I have never read a more complete book as the one just written by C.M. Mayo. It will simply surprise any reader. The research is impeccable and the narrative well-rounded. C.M. Mayo is the author of several works on Mexico, including *THE LAST PRINCE OF THE MEXICAN EMPIRE*, a novel based on the true story and named a Library Journal Best Book of 2009.

The Mobility of Displaced Syrians World Bank, 2020-01-27 The war in Syria, now in its eighth year, continues to take its toll on the Syrian people. More than half of the population of Syria remains displaced; 5.6 million persons are registered as refugees outside of the country and another 6.2 million are displaced within Syria's borders. The internally displaced persons include 2 million school-age children; of these, less than half attend school. Another 739,000 Syrian children are out of school in the five neighborhood countries that host Syria's refugees. The loss of human capital is staggering, and it will create permanent hardships for generations of Syrians going forward. Despite the tragic prospects for renewed fighting in certain parts of the country, an overall reduction in armed conflict is possible going forward. However, international experience shows that the absence of fighting is rarely a singular trigger for the return of displaced people. Numerous other factors—including improved security and socioeconomic conditions in origin states, access to property and assets, the availability of key services, and restitution in home areas—play important roles in shaping the scale and composition of the returns. Overall, refugees have their own calculus of return that considers all of these factors and assesses available options. *The Mobility of Displaced Syrians: An Economic and Social Analysis* sheds light on the 'mobility calculus' of Syrian refugees. While dismissing any policies that imply wrongful practices involving forced repatriation, the study analyzes factors that may be considered by refugees in their own decisions to relocate. It provides a conceptual framework, supported by data and analysis, to facilitate an impartial conversation about refugees and their mobility choices. It also explores the diversified policy toolkit that the international community has available—and the most effective ways in which the toolkit can be adapted—to maximize the well-being of refugees, host countries, and the people in Syria.

Architecture as a Way of Seeing and Learning Nerea Amorós Elorduy, 2021-08-16 At the beginning of 2020, 66 long-term refugee camps existed along the East African Rift. Millions of young children have been born at the camps and have grown up there, yet it is unknown how their surrounding built environments affect their learning and development. *Architecture as a Way of Seeing and Learning* presents an architect's take on questions many academics and humanitarians ask. Is it relevant to look at camps through an urban lens and focus on their built environment? Which analytical benefits can architectural and design tools provide to refugee assistance and specifically to young children's learning? And which advantages can assemblage thinking and situated knowledges bring about in analysing, understanding and transforming long-term refugee camps? Responding to the extreme lack of information about East African camps, Nerea Amorós Elorduy has built contextualised knowledge – nuanced, situated and participatory – to describe, study and transform the East African long-term camps, and uncover hidden agencies in refugee assistance. She uses architecture as a means to create new knowledge collectively, include more

local voices and speculate on how to improve the educational landscape for young children. With this book, Amorós Elorduy brings nuance, contextualisation and empathy to the study and management of long-term refugee camps in East Africa. It is empathy, she argues, that will help change mindsets, decolonise humanitarian refugee assistance and its study. Crossing architecture, humanitarian aid and early childhood development, this book offers many practical learnings.

Asset Pricing John H. Cochrane, 2009-04-11 Winner of the prestigious Paul A. Samuelson Award for scholarly writing on lifelong financial security, John Cochrane's *Asset Pricing* now appears in a revised edition that unifies and brings the science of asset pricing up to date for advanced students and professionals. Cochrane traces the pricing of all assets back to a single idea--price equals expected discounted payoff--that captures the macro-economic risks underlying each security's value. By using a single, stochastic discount factor rather than a separate set of tricks for each asset class, Cochrane builds a unified account of modern asset pricing. He presents applications to stocks, bonds, and options. Each model--consumption based, CAPM, multifactor, term structure, and option pricing--is derived as a different specification of the discounted factor. The discount factor framework also leads to a state-space geometry for mean-variance frontiers and asset pricing models. It puts payoffs in different states of nature on the axes rather than mean and variance of return, leading to a new and conveniently linear geometrical representation of asset pricing ideas. Cochrane approaches empirical work with the Generalized Method of Moments, which studies sample average prices and discounted payoffs to determine whether price does equal expected discounted payoff. He translates between the discount factor, GMM, and state-space language and the beta, mean-variance, and regression language common in empirical work and earlier theory. The book also includes a review of recent empirical work on return predictability, value and other puzzles in the cross section, and equity premium puzzles and their resolution. Written to be a summary for academics and professionals as well as a textbook, this book condenses and advances recent scholarship in financial economics.

Singapore in Global History Derek Thiam Soon Heng, Syed Muhd Khairudin Aljunied, 2011 This important overview explores the connections between Singapore's past with historical developments worldwide until present day. The contributors analyse Singapore as a city-state seeking to provide an interdisciplinary perspective to the study of the global dimensions contributing to Singapore's growth. The book's global perspective demonstrates that many of the discussions of Singapore as a city-state have relevance and implications beyond Singapore to include Southeast Asia and the world. This vital volume should not be missed by economists, as well as those interested in imperial history.

Monetary Policy Strategy Frederic S. Mishkin, 2009-08-21 A leading academic authority and policymaker discusses monetary policy strategy from the perspectives of both scholar and practitioner, offering theory, econometric evidence, and extensive case studies. This book by a leading authority on monetary policy offers a unique view of the subject from the perspectives of both scholar and practitioner. Frederic Mishkin is not only an academic expert in the field but also a high-level policymaker. He is especially well positioned to discuss the changes in the conduct of monetary policy in recent

years, in particular the turn to inflation targeting. Monetary Policy Strategy describes his work over the last ten years, offering published papers, new introductory material, and a summing up, "Everything You Wanted to Know about Monetary Policy Strategy, But Were Afraid to Ask," which reflects on what we have learned about monetary policy over the last thirty years. Mishkin blends theory, econometric evidence, and extensive case studies of monetary policy in advanced and emerging market and transition economies. Throughout, his focus is on these key areas: the importance of price stability and a nominal anchor; fiscal and financial preconditions for achieving price stability; central bank independence as an additional precondition; central bank accountability; the rationale for inflation targeting; the optimal inflation target; central bank transparency and communication; and the role of asset prices in monetary policy.

International Corporate Finance, + Website Laurent L. Jacque, 2014-03-24 A thorough introduction to corporate finance from a renowned professor of finance and banking As globalization redefines the field of corporate finance, international and domestic finance have become almost inseparably intertwined. It's increasingly difficult to understand what is happening in capital markets without a firm grasp of currency markets, the investment strategies of sovereign wealth funds, carry trade, and foreign exchange derivatives products. International Corporate Finance offers thorough coverage of the international monetary climate, including Islamic finance, Asian banking, and cross-border mergers and acquisitions. Additionally, the book offers keen insight on global capital markets, equity markets, and bond markets, as well as foreign exchange risk management and how to forecast exchange rates. Offers a comprehensive discussion of the current state of international corporate finance Provides simple rules and pragmatic answers to key managerial questions and issues Includes case studies and real-world decision-making situations For anyone who wants to understand how finance works in today's hyper-connected global economy, International Corporate Finance is an insightful, practical guide to this complex subject.
