The English of Tourism Georgeta Rață, 2013-01-03 The English of Tourism is a collection of essays on the English specific to the Tourism Industry. The approach is a linguistic one: the different aspects of the English used in the field of tourism (tourism industry, types of tourism, travel agencies, Internet sites of travel agencies, eco-tourism, travel) and in tourism-related fields (accommodation, advertising, entertainment, food services, hospitality, transportation) are analysed from a morphological (combination, derivation), syntactical (nominal phrases, verbal phrases), lexical and lexicographical, semantic (homonymy, semantic fields, synonymy, terminology), pragmatic (academic discourse, idiom, metaphor), etymological (etymon, Latin heritage), and contrastive (Croatian-Romanian, English-Croatian, English-Romanian, French-English, Romanian-English) points of view. This book will appeal to people employed in industries including hotels, transportation, events, food and beverage, parks and recreation, as well as to professors, researchers, students, and translators from Croatian-, English-, French-, and Romanian-speaking countries, active in their own countries or abroad. The types of academic readership it will appeal to include: academic teaching staff, researchers and students in the field of tourism, of tourism-related fields – accommodation, advertising, entertainment, food services, hospitality, and transportation – and of languages.

Bioenergy Resources and Technologies Abul Kalam Azad, Mohammad Masud Kamal Khan, 2021-03-10 Bioenergy Resources and Technologies presents advanced approaches and applications of bioenergy resources, with a strong focus on environmental sustainability. Chapters on the applications of bioenergy, the implementation of bioenergy as an alternative fuel, and future energy security make this an invaluable and unique resource to further advance the field. This book provides new information and novel techniques across a variety of bioenergy applications, with the book's authors addressing key uses for bioenergy resources as an alternative fuel. Various case studies and examples help demonstrate meaning and provide additional clarity. Social and economic aspects are included for each technology discussed, along with a number of research works and their findings in a diverse mix of areas including energy, environmental science, biotechnology, chemical engineering and mechanical engineering. Researchers and professionals in these disciplines will gain knowledge on the underlying concepts, technologies, fuel applications and solutions to global environmental issues using bioenergy resources. Presents technical and social issues surrounding the latest bioenergy technologies Explores solutions to global sustainability goals through bioenergy applications and the future of energy security Includes experimental investigations of engine performance, emissions and combustion phenomena using different types of oxygenated fuel

Quay Brothers Ronald S. Magliozzi, Ron Magliozzi, Edwin Carels, Brothers Quay, 2012 Identical twins Stephen and Timothy Quay are internationally renowned moving image artists and designers who for over thirty years have been in the avant-garde of stop-motion puppet animation. Creating work in the tradition of Czech surrealists Jan van Kármáj and Jiří Trnka, Russian animator Yuri Norstein and Polish animator Walerian Borowczyk, they practice a design aesthetic influenced by Polish graphic artists such as Jan Lenica, Roman Ciesiewicz, Franciszek Starowieyski and Henryk Tomaszewski. Since 1971, they have produced over forty-five moving images, including features, music videos, dance films, documentaries and signature personal works, and have designed sets and projections for opera, drama and concert performances. Published to accompany an exhibition at The Museum of Modern Art the first presentation of the Quay Brothers work in all their fields of creative activity this richly illustrated publication presents their betterknown films as well as previously unseen moving image works and a little-known body of works on paper, including graphic design, drawings, typography and notebooks for films.

Managing Technological Innovation: Tools And Methods Daim Tugrul U,2017-03-09 The management of technological innovation is both an art, as well as a science; the process involves the know-how and technological core skills to deliver the functionality on the one hand, and (with an ear on the ground) the ability to identify changes in technologies to come up with new innovations on the other. This requires, as a result, frameworks, system tools, and methodologies to improve the yield in innovations. Managing Technological Innovation provides a set of tools and case studies for R&D managers to effectively manage technological innovations — from the identifying of technological needs to the launch of the product. The book is divided into five parts. Part 1 addresses the policies and strategies necessary to provide direction to R&D organizations in the management of technological innovation. Part 2 focuses on technological assessment; presenting the methods available to better matching of technologies to strategic directions, supported with case studies to illustrate the evaluation methods. Part 3 covers the development and building of technological portfolios with new products, as well as mitigation strategies. Part 4 focus on the execution phase of built portfolios — the development of new products. And finally, Part 5 rounds up with a study on the factors which impact the diffusion of technological innovations into the market place. This book is a practical guide for R&D professions and designers, as well as a case study reference for graduate students in pursuit of their project work.

The Worldwide Crisis in Fisheries Colin W. Clark,Colin Whitcomb Clark,2006 New management programs are suggested, to improve the state of the world's fisheries.

Review of Fisheries in OECD Countries: Policies and Summary Statistics 2001 OECD,2001-10-05 This publication describes major developments affecting fisheries in OECD countries, including changes in government policies, trade, and fisheries and aquaculture production. This edition contains a special chapter on fishing capacity and a special study on the Russian Federation.

Child Welfare Research Review Richard P. Barth,1994 This volume culls the most important and provocative research and policy analysis in the child welfare field and is an essential guide for understanding the burgeoning field of children's services.

Measuring and Assessing Capacity in Fisheries John Ward,Sean Pascoe,2004 This paper reviews the main concepts involved in the assessment and management of fishing capacity, including the problem of overcapacity and the role that fisheries management has played in contributing to this development in the past. It discusses methods for estimating current and desired levels of capacity, and analyses the effectiveness of various capacity management programmes around the world.

Language and Power Benedict R. O'G. Anderson,2006 In this lively book, Benedict R. O'G. Anderson explores the cultural and political contradictions that have arisen from two critical facts in Indonesian history: that while the Indonesian nation is young, the Indonesian nation is ancient originating in the early seventeenth-century Dutch conquests; and that contemporary politics are conducted in a new language. Bahasa Indonesia, by peoples (especially the Javanese) whose cultures are rooted in medieval times. Analyzing a spectrum of examples from classical poetry to public monuments and cartoons, Anderson deepens our understanding of the interaction between modern and traditional notions of power, the

mediation of power by language, and the development of national consciousness. *Language and Power*, now republished as part of Equinox Publishing's Classic Indonesia series, brings together eight of Anderson's most influential essays over the past two decades and is essential reading for anyone studying the Indonesian country, people or language. Benedict Anderson is one of the world's leading authorities on Southeast Asian nationalism and particularly on Indonesia. He is Professor of International Studies and Director of the Modern Indonesia Project at Cornell University, New York. His other works include *Imagined Communities: Reflections on the Origin and Spread of Nationalism* and *The Spectre of Comparisons: Nationalism, Southeast Asia, and the World*.

Leonardo's Universe Bülent Atalay, Keith Wamsley, 2008 When the seeds of modern thought were planted in 15th-century Italy, no one sowed more of them than Leonardo da Vinci. For the millions of readers today who ponder the mysteries behind his sketch-filled notebooks and enigmatic paintings, National Geographic presents *Leonardo's Universe*. This richly visual reference reveals the spellbinding Renaissance world like no other, painting a vivid picture of the historic backdrop of this astounding period that revolutionized art, science, philosophy, and politics.--BOOK JACKET.

Alternative Fuels and Advanced Vehicle Technologies for Improved Environmental Performance Richard Folkson, Steve Sapsford, 2022-07-27 *Alternative Fuels and Advanced Vehicle Technologies for Improved Environmental Performance: Towards Zero Carbon Transportation*, Second Edition provides a comprehensive view of key developments in advanced fuels and vehicle technologies to improve the energy efficiency and environmental impact of the automotive sector. Sections consider the role of alternative fuels such as electricity, alcohol and hydrogen fuel cells, as well as advanced additives and oils in environmentally sustainable transport. Other topics explored include methods of revising engine and vehicle design to improve environmental performance and fuel economy and developments in electric and hybrid vehicle technologies. This reference will provide professionals, engineers and researchers of alternative fuels with an understanding of the latest clean technologies which will help them to advance the field. Those working in environmental and mechanical engineering will benefit from the detailed analysis of the technologies covered, as will fuel suppliers and energy producers seeking to improve the efficiency, sustainability and accessibility of their work. Provides a fully updated reference with significant technological advances and developments in the sector Presents analyses on the latest advances in electronic systems for emissions control, autonomous systems, artificial intelligence and legislative requirements Includes a strong focus on updated climate change predictions and consequences, helping the reader work towards ambitious 2050 climate change goals for the automotive industry

The Biblically Defined Process That Brings Fear of the Enemy Into A Person's Life Rachel Little Dove, 2009-03-16 This is Volume Two of The WAR ON FEAR Series. In this book, you will find out what the Bible says about how FEAR originated with mankind. And, you will also see God's foundational solution to FEAR found in the Scriptures. This book was written because we want you learn how to become free from the operation of fear in your life. God Bless you!

A Life Beyond Boundaries Benedict Anderson, 2018-08-21 An intellectual memoir by the author of the acclaimed *Imagined Communities* Born in China, Benedict Anderson spent his childhood in California and Ireland, was educated in England and finally found a home at Cornell University, where he immersed himself in the growing field of Southeast Asian studies. He was expelled from Suharto's Indonesia after revealing the military to be behind the attempted coup of 1965, an event which prompted reprisals that killed up to a million communists and their supporters. Banned from the country for thirty-five years, he continued his research in Thailand and the Philippines, producing a very fine study of the Filipino novelist and patriot José Rizal in *The Age of Globalization*. In *A Life Beyond Boundaries*, Anderson recounts a life spent open to the world. Here he reveals the joys of learning languages, the importance of fieldwork, the pleasures of translation, the influence of the New Left on global thinking, the satisfactions of teaching, and a love of world literature. He discusses the ideas and inspirations behind his best-known work, *Imagined Communities* (1983), whose

complexities changed the study of nationalism. Benedict Anderson died in Java in December 2015, soon after he had finished correcting the proofs of this book. The tributes that poured in from Asia alone suggest that his work will continue to inspire and stimulate minds young and old.

Internet of Things Rajkumar Buyya, Amir Vahid Dastjerdi, 2016-05-11 *Internet of Things: Principles and Paradigms* captures the state-of-the-art research in Internet of Things, its applications, architectures, and technologies. The book identifies potential future directions and technologies that facilitate insight into numerous scientific, business, and consumer applications. The Internet of Things (IoT) paradigm promises to make any electronic devices part of the Internet environment. This new paradigm opens the doors to new innovations and interactions between people and things that will enhance the quality of life and utilization of scarce resources. To help realize the full potential of IoT, the book addresses its numerous challenges and develops the conceptual and technological solutions for tackling them. These challenges include the development of scalable architecture, moving from closed systems to open systems, designing interaction protocols, autonomic management, and the privacy and ethical issues around data sensing, storage, and processing. Addresses the main concepts and features of the IoT paradigm Describes different architectures for managing IoT platforms Provides insight on trust, security, and privacy in IoT environments Describes data management techniques applied to the IoT environment Examines the key enablers and solutions to enable practical IoT systems Looks at the key developments that support next generation IoT platforms Includes input from expert contributors from both academia and industry on building and deploying IoT platforms and applications

Daily Hope for Hurting Hearts Greg Laurie, 2010-01-15 The Bible calls human life a vapor. A mist. A wisp of fog. A flower that springs up in the morning and fades away by mid-afternoon. We like to think we have years to pursue our goals, raise our families, and make a difference in the world. But we just don't know. The fact is, our stay on earth is really very brief. And when a loved one unexpectedly steps out of this life into eternity, it shakes us to the core. We ask ourselves: Is heaven real? Will I see him-will I see her- again? Will we be together again? How can I know for sure? Pastor Greg Laurie crafted many of the devotionals in this book after the sudden departure of his son Christopher to heaven. Each day offers comfort to bruised hearts, perspective in times of confusion and pain, and a hope that will sustain us through this life and beyond.

The State of World Fisheries and Aquaculture 2010 Food and Agriculture Organization of the United Nations, 2010 Against a backdrop of global economic uncertainty, this issue of *The State of World Fisheries and Aquaculture* highlights the major role and challenges facing fisheries and aquaculture worldwide. With a steadily rising demand for fish and fish products, the supply of fish as human food hit a record high in 2008, underlining its significance in contributing to food security and nutrition as a source of high-quality, affordable animal protein in particular. International trade in fish also topped previous values, pointing to the sector's continued important contribution to economic expansion and human well-being. Aquaculture, despite a falling growth rate in recent years, remains the fastest-growing animal-food-producing sector and is set to overtake capture fisheries as a source of food fish. Overall production of the sector continues to grow. This publication analyses and reviews the latest available global statistics and trends in fisheries and aquaculture. It explores the important, yet often underestimated, role of inland fisheries, particularly in many small communities where they make a vital contribution to poverty alleviation and livelihood security. A broader look at the issues affecting fisheries and aquaculture emphasizes the growing need to focus on the many facets of policy and governance and examines the impacts of climate change, biodiversity loss, quality certification and product traceability on the sector. Also published in Arabic, Chinese, French, Russian and Spanish.
