Geek Love Katherine Dunn,2011-05-25 National Book Award Finalist • Here is the unforgettable story of the Binewskis, a circus-geek family whose matriarch and patriarch have bred their own exhibit of human oddities—with the help of amphetamines, arsenic, and radioisotopes. Their offspring include Arturo the Aquaboy, who has flippers for limbs and a megalomaniac ambition worthy of Genghis Khan . . . Iphy and Elly, the lissome Siamese twins . . . albino hunchback Oly, and the outwardly normal Chick, whose mysterious gifts make him the family’s most precious—and dangerous—asset. As the Binewskis take their act across the backwaters of the U.S., inspiring fanatical devotion and murderous revulsion; as its members conduct their own Machiavellian version of sibling rivalry, *Geek Love* throws its sulfurous light on our notions of the freakish and the normal, the beautiful and the ugly, the holy and the obscene. Family values will never be the same.

The Pro Garth Ennis,2012 Just when you thought Garth Ennis had gone too far, just when you thought it was safe to walk the streets, just when you thought no one would go near the idea of the world's first superhero prostitute... here comes The Pro.

Introduction to Wine Laboratory Practices and Procedures Jean L. Jacobson,2010-10-29 In the beginning, for me, winemaking was a romanticized notion of putting grape juice into a barrel and allowing time to perform its magic as you sat on the veranda watching the sunset on a Tuscan landscape. For some small wineries, this notion might still ring true, but for the majority of wineries commercially producing quality wines, the reality of winemaking is far more complex. The persistent evolution of the wine industry demands continual advancements in technology and education to sustain and promote quality winemaking. The sciences of viticulture, enology, and wine chemistry are becoming more intricate and sophisticated each year. Wine laboratories have become an integral part of the winemaking process, necessitating a knowledgeable staff possessing a multitude of skills. Science incorporates the tools that new-age winemakers are utilizing to produce some of the best wines ever made in this multibillion dollar trade. A novice to enology and wine chemistry can find these subjects daunting and intimidating. Whether you are a home winemaker, a new winemaker, an enology student, or a beginning-to-intermediate laboratory technician, putting all the pieces together can take time. As a winemaker friend once told me, “winemaking is a moving target. ” Introduction to Wine Laboratory Practices and Procedures was written for the multitude of people entering the wine industry and those that wish to learn about wine chemistry and enology.

Drying and Roasting of Cocoa and Coffee Ching Lik Hii,Flávio Meira Borém,2019-06-26 This is the first practical book dedicated to the fundamental and application aspects of two major unit operations in cocoa and coffee processing, namely drying and roasting. The drying and roasting of cocoa and coffee beans play critical roles in governing the formation of flavor precursors in the early stages and also the development of flavor and

aroma in the later stages during processing. Hence, qualities of the finished chocolates and coffee powder products are affected greatly by the dried and roasted beans produced. Drying and Roasting of Cocoa and Coffee covers key topics areas ranging from post-harvest processing, equipment selection, physical and chemical changes during processing, flavor development, grading and dried product quality. The book consists of two parts with topics dedicated to the drying/roasting aspects of cocoa and coffee, respectively. Features Provides a comprehensive review on flavor development during cocoa/coffee processing Discusses the impact of processing parameters on cocoa/coffee quality Presents the new trends in drying/roasting techniques and novel technology Examines the concept of coffee quality in light of both paradigms: the traditional coffee and the specialty coffee grading systems No prior knowledge of cocoa and coffee processing is required to benefit from this book, which is written for a variety of readers. It is suitable for undergraduate and postgraduate students, researchers and industrial practitioners/consultants from various domains in the food and beverage industries.

Creatural Fictions David Herman,2016-04-08 This volume explores how twentieth- and twenty-first-century literary texts engage with relationships between humans and other animals. Written by forward-thinking early-career scholars, as well as established experts in the field, the chapters discuss key texts in the emergent canon of animal narratives, including Franz Kafka's animal stories, Yann Martel's *The Life of Pi*, Zakes Mda's *The Whale Caller*, and others. The volume is divided into four main sections. Two period-focused sections center on modernism and on late-twentieth- and twenty-first-century fiction, while two further sections foreground the more general project of theory building in literary animal studies, examining interconnections among concepts of species, sexuality, gender, and genre. The volume also raises issues that extend beyond the academic community, including ethical dimensions of human-animal relationships and the problems of species loss and diminishing biodiversity.

Sick Building Syndrome Sabah A. Abdul-Wahab,2011-05-03 This volume throws light on the Sick Building Syndrome in Libraries and other public buildings, and the extent to which it is influenced by the internal environment of libraries. One of the signs of this disease is that the person suffers from a set of symptoms closely related to his/her presence in the building, without the identification of any clear causes, and his/her relief of these symptoms when he/she are out of the building. Hence, the book sheds on the extent to which the interior environment impacts upon the health of the people, and the extent to which this is reflected in their performance. The book can be used for teaching, research, and professional reference. It concludes with the recommendation that is essential to observe environmental dimensions when designing library and public buildings, taking into consideration the expected impact of SBS in library and public buildings on people. The significance of the book derives from the fact that it is the first of its kind to examine the issue of the interior environment and SBS of library and public building worldwide.

The Infernal Desire Machines of Doctor Hoffman Angela Carter,1986-03-04 The transformation of Desiderio's city into a mysterious kingdom is instantaneous: Hallucination flows with magical speed in every brain; avenues and plazas are suddenly as fertile as fairy-book forests. And the evil comes, too, as imaginary massacres fill the streets with blood, the dead return to question the living, and profound anxiety drives hundreds to suicide. Behind it all stands Doctor Hoffman, whose gigantic generators crack the immutable surfaces of time and space and plunge civilization into a world without the chains – or structures – of reason. Only Desiderio, immune to mirages and fantasy, can defeat him. But Desiderio's battle will take him to the very brink of undeniable, irresistible desire.

Shadow Boxers John Gattuso,2005 Boxing gyms are uncovered in all of their glorious grunge in these photographs and essays that reveal both the stark reality of success and the possibility of promise in the sport of boxing. This intimate look at the fighters, trainers, and hangers-on who inhabit these gyms brings to life the tough—and surprisingly tender—world of American boxing. Evocative images reveal the pain, sacrifice, and discipline of the sweet science as well as the triumphs, tragedies, and big dreams of the men and women who practice it. A dozen essays by veteran boxing writers such as Katherine Dunn, Carlo Rotella, Kate Sekules, F. X. Toole, Lucius Shepard, Robert Anasi, Loic Wacquant, Joe Rein, and Ralph Wiley explore the community and culture of boxing gyms, an endangered American institution that serves not only as the training ground for the next generation of great fighters, but as a sanctuary in tough neighborhoods, a lifeline for troubled kids, and a repository of a centuries-old tradition of pugilistic knowledge.

Cotton Ginners Handbook W. S. Anthony,1977 Addresses the key cotton ginning issues concerned with facilities, machinery, cleaning, ginning, drying, packaging, and waste collection and disposal as well as ancillary issues concerned with pollution, management, economics, energy, insurance, safety, cotton classification, and textile machinery. Appendices: duties of gin personnel, portable moisture meters and pink bollworm control in gins. Glossary and index. Photos, charts, tables and graphs.

The Palgrave Handbook to Horror Literature Kevin Corstorphine,Laura R. Kremmel,2018-11-07 This handbook examines the use of horror in storytelling, from oral traditions through folklore and fairy tales to contemporary horror fiction. Divided into sections that explore the origins and evolution of horror fiction, the recurrent themes that can be seen in horror, and ways of understanding horror through literary and cultural theory, the text analyses why horror is so compelling, and how we should interpret its presence in literature. Chapters explore historical horror aspects including ancient mythology, medieval writing, drama, chapbooks, the Gothic novel, and literary Modernism and trace themes such as vampires, children and animals in horror, deep dark forests, labyrinths, disability, and imperialism. Considering horror via postmodern theory, evolutionary psychology, postcolonial theory, and New Materialism, this handbook investigates issues of gender and sexuality, race, censorship and morality, environmental studies, and literary versus popular fiction.
