Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

The 100-gun Ship, Victory John McKay,2013-10-15 An example of the ultimate sailing warship--the three-decker First Rate-Victory was the most popular and successful 100-gun ship of the period, and the flagship of Nelson at Trafalgar. First published in 1987 in the acclaimed Anatomy of the Ship series, 100 Gun Ship Victory is now available in paperback for the first time. The titles in this series are acknowledged for the detailed information they provide about historic ships and this volume presents detailed descriptions and illustrations of the HMS Victory, including a pictorial section with numerous close-up photographs and on-board views of ship equipment and spaces. Three hundred perspective and three-view drawings, with fully descriptive keys, illustrate every detail of the ship, including hull construction, masts and yards, armament, rigging, decoration and fittings. These accurate and comprehensive drawings offer ship buffs, historians, and model makers a full view of the ship and her position in the development of the First Rate.

Architects of Buddhist Leisure Justin Thomas McDaniel,2017-04-01 Buddhism, often described as an austere religion that condemns desire, promotes denial, and idealizes the contemplative life, actually has a thriving leisure culture in Asia. Creative religious improvisations designed by Buddhists have been produced both within and outside of monasteries across the region—in Nepal, Japan, Korea, Macau, Hong Kong, Singapore, Laos, Thailand, and Vietnam. Justin McDaniel looks at the growth of Asia’s culture of Buddhist leisure—what he calls “socially disengaged Buddhism”—through a study of architects responsible for monuments, museums, amusement parks, and other sites. In conversation with noted theorists of material and visual culture and anthropologists of art, McDaniel argues that such sites highlight the importance of public, leisure, and spectacle culture from a Buddhist perspective and illustrate how “secular” and “religious,” “public” and “private,” are in many ways false binaries. Moreover, places like Lek Wiriyaphan’s Sanctuary of Truth in Thailand, Suối Tiên Amusement Park in Saigon, and Shi Fa Zhao’s multilevel museum/ritual space/tea house in Singapore reflect a growing Buddhist ecumenism built through repetitive affective encounters instead of didactic sermons and sectarian developments. They present different Buddhist traditions, images, and aesthetic expressions as united but not uniform, collected but not concise: Together they form a gathering, not a movement. Despite the ingenuity of lay and ordained visionaries like Wiriyaphan and Zhao and their colleagues Kenzo Tange, Chan-soo Park, Tadao Ando, and others discussed in this book, creators of Buddhist leisure sites often face problems along the way. Parks and museums are complex adaptive systems that are changed and influenced by budgets, available materials, local and global economic conditions, and visitors. Architects must often compromise and settle at local optima, and no matter what they intend, their buildings will develop lives of their own. Provocative and theoretically innovative, *Architects of Buddhist Leisure* asks readers to question the very category of

“religious” architecture. It challenges current methodological approaches in religious studies and speaks to a broad audience interested in modern art, architecture, religion, anthropology, and material culture. The Arcades Project Walter Benjamin,1999 Focusing on the arcades of 19th-century Paris--glass-roofed rows of shops that were early centers of consumerism--Benjamin presents a montage of quotations from, and reflections on, hundreds of published sources. 46 illustrations.

The Man Who Mistook His Wife for a Hat Oliver Sacks,2021-09-14 In his most extraordinary book, the bestselling author of *Awakenings* and poet laureate of medicine” (The New York Times) recounts the case histories of patients inhabiting the compelling world of neurological disorders, from those who are no longer able to recognize common objects to those who gain extraordinary new skills. Featuring a new preface, Oliver Sacks’s *The Man Who Mistook His Wife for a Hat* tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects; whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks’s splendid and sympathetic telling, his patients are deeply human and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine’s ultimate responsibility: “the suffering, afflicted, fighting human subject.”

Passages in Modern Sculpture Rosalind E. Krauss,1981-02-26 Studies major works by important sculptors since Rodin in the light of different approaches to general sculptural issues to reveal the logical progressions from nineteenth-century figurative works to the conceptual work of the present.

The Onion Book of Known Knowledge The Onion,2012-10-23 Are you a witless cretin with no reason to live? Would you like to know more about every piece of knowledge ever? Do you have cash? Then congratulations, because just in time for the death of the print industry as we know it comes the final book ever published, and the only one you will ever need: The Onion's compendium of all things known. Replete with an astonishing assemblage of facts, illustrations, maps, charts, threats, blood, and additional fees to edify even the most simple-minded book-buyer, THE ONION BOOK OF KNOWN KNOWLEDGE is packed with valuable information-such as the life stages of an Aunt; places to kill one's self in Utica, New York; and the dimensions of a female bucket, or pail. With hundreds of entries for all 27 letters of the alphabet, THE ONION BOOK OF KNOWN KNOWLEDGE must be purchased immediately to avoid the sting of eternal ignorance.

The Five Continents of Theatre Eugenio Barba,Nicola Savarese,2019-02-11 The Five Continents of Theatre undertakes the exploration of the material culture of the actor, which involves the actors’ pragmatic relations and technical functionality, their behaviour, the norms and conventions that interact with those of the audience and the society in which actors and spectators equally take part.

Listening Is an Act of Love Dave Isay,2007-11-08 A New York Times Bestseller “Each interview is a revelation.” —USA Today “As heartwarming as a holiday pumpkin pie and every bit as homey . . . what emerges in these compelling pages is hard-won wisdom and boundless humanity.” —Seattle Post-Intelligencer As heard on NPR, a wondrous nationwide celebration of our shared humanity StoryCorps founder and legendary radio producer Dave Isay selects the most memorable stories from StoryCorps' collection, creating a moving portrait of American life. The voices here connect us to real

people and their lives—to their experiences of profound joy, sadness, courage, and despair, to good times and hard times, to good deeds and misdeeds. To read this book is to be reminded of how rich and varied the American storybook truly is, how resistant to easy categorization or stereotype. We are our history, individually and collectively, and *Listening Is an Act of Love* touchingly reminds us of this powerful truth. Dave Isay's latest book, *Callings*, published in 2016 from Penguin Press.

Detransition, Baby Torrey Peters, 2021-01-12 NATIONAL BESTSELLER • The lives of three women—transgender and cisgender—collide after an unexpected pregnancy forces them to confront their deepest desires in “one of the most celebrated novels of the year” (Time) “Reading this novel is like holding a live wire in your hand.”—Vulture Named one of the Best Books of the Year by more than twenty publications, including The New York Times Book Review, Entertainment Weekly, NPR, Time, Vogue, Esquire, Vulture, and Autostraddle PEN/Hemingway Award Winner • Finalist for the Lambda Literary Award, the National Book Critics Circle Award, and the Gotham Book Prize • Longlisted for The Women’s Prize • Roxane Gay’s Audacious Book Club Pick • New York Times Editors’ Choice Reese almost had it all: a loving relationship with Amy, an apartment in New York City, a job she didn't hate. She had scraped together what previous generations of trans women could only dream of: a life of mundane, bourgeois comforts. The only thing missing was a child. But then her girlfriend, Amy, detransitioned and became Ames, and everything fell apart. Now Reese is caught in a self-destructive pattern: avoiding her loneliness by sleeping with married men. Ames isn't happy either. He thought detransitioning to live as a man would make life easier, but that decision cost him his relationship with Reese—and losing her meant losing his only family. Even though their romance is over, he longs to find a way back to her. When Ames's boss and lover, Katrina, reveals that she's pregnant with his baby—and that she's not sure whether she wants to keep it—Ames wonders if this is the chance he's been waiting for. Could the three of them form some kind of unconventional family—and raise the baby together? This provocative debut is about what happens at the emotional, messy, vulnerable corners of womanhood that platitudes and good intentions can't reach. Torrey Peters brilliantly and fearlessly navigates the most dangerous taboos around gender, sex, and relationships, gifting us a thrillingly original, witty, and deeply moving novel.

The Day of the Mountain Timothy Neat, Anne Michaels, 2016 Since entering his eighth decade Neat has concentrated his wide-ranging creativity on the act of drawing, in sketchbooks. His prime subject is people - the common man, writers, artists, travellers, prisoners: he also addresses war, landscape, and the ancient past with visionary understanding. Of the four hundred drawings being published, only three have been publicly seen. In this book Neat, the artist, can be seen for the first time - championed by the great art critic John Berger and renowned writer Anne Michaels: these drawings are revelatory. This special signed edition, produced to the highest specification, is limited to 150 copies and is guaranteed to appeal to collectors of fine art and belle-lettres in Scotland and across Europe. Neat's books include *The Summer Walkers*, *Part Seen Part Imagined*, a two volume biography of Hamish Henderson and, most recently, *These Faces*, a collection of photographs and drawings (2013).

Wolves of Croton: The Untold Story of Milo John Abdo, 2020-10-12 An epic tale of the “Father of Progressive Resistance Training”, told by Olympian and fitness Hall-of-Famer John Abdo. A USA TODAY bestseller! Thousands of years after his death, Milo of Croton is still undisputedly revered to be the strongest man who ever lived. This dominant Olympian wrestler routinely entered packed stadiums carrying a full-grown bull across his back. As he paced the track, Milo welcomed his cheering fans to slap the loins and tug the tail of his colossal bovine pet. Esteemed for his unfathomable prowess, through progressive adaptations adhering to unorthodox conditioning methodologies, Milo of Croton — whose name remains prominent in sports today — is regarded by us moderns as the ‘Father of Progressive Resistance Training.’ Within the pages of this book, based on historical accounts, readers learn how Milo accomplished his monumental wrestling achievements — a career that amazingly endured an unparalleled three decades. An epic odyssey of inspirational and motivational magnitude, ‘Wolves of Croton - The Untold Story of Milo’ details Milo’s genetic and epigenetic influencers.

Attend Milo's strength conditioning sessions and wrestling practices, learn the origins of modern-day strength training and the achievement of peak performance, then step into the arena and watch Milo mangle his opponents inside the pit. Travel with Milo from his enigmatic beginnings to his epic athletic events, then onto the battlefield where Milo commands an army comprised of Crotonian athlete-soldiers against a formidable foe of superior numerical advantage. A tale of athleticism and leadership, this meticulously-research and fact-based story will be sure to both motivate and entertain.

Mirror of the World Julian Bell,2010-05-25 "Exuberant, astute, and splendidly illustrated history of world art . . . draws fascinating parallels between artistic developments in Western and non-Western art."—Publishers Weekly In this beautifully written story of art, Julian Bell tells a vivid and compelling history of human artistic achievements, from prehistoric stone carvings to the latest video installations. Bell, himself a painter, uses a variety of objects to reveal how art is a product of our shared experience and how, like a mirror, it can reflect the human condition. With hundreds of illustrations and a uniquely global perspective, Bell juxtaposes examples that challenge and enlighten the reader: dancing bronze figures from southern India, Romanesque sculptures, Baroque ceilings, and jewel-like Persian manuscripts are discussed side by side. With an insider's knowledge and an unerring touch, Bell weaves these diverse strands into an invaluable introduction to the wider history of world art.

Renaissance Fun Philip Steadman,2021-04-13 Renaissance Fun is about the technology of Renaissance entertainments in stage machinery and theatrical special effects; in gardens and fountains; and in the automata and self-playing musical instruments that were installed in garden grottoes. How did the machines behind these shows work? How exactly were chariots filled with singers let down onto the stage? How were flaming dragons made to fly across the sky? How were seas created on stage? How did mechanical birds imitate real birdsong? What was 'artificial music', three centuries before Edison and the phonograph? How could pipe organs be driven and made to play themselves by waterpower alone? And who were the architects, engineers, and craftsmen who created these wonders? All these questions are answered. At the end of the book we visit the lost 'garden of marvels' at Pratolino with its many grottoes, automata and water jokes; and we attend the performance of Mercury and Mars in Parma in 1628, with its spectacular stage effects and its music by Claudio Monteverdi – one of the places where opera was born. Renaissance Fun is offered as an entertainment in itself. But behind the show is a more serious scholarly argument, centred on the enormous influence of two ancient writers on these subjects, Vitruvius and Hero. Vitruvius's Ten Books on Architecture were widely studied by Renaissance theatre designers. Hero of Alexandria wrote the Pneumatics, a collection of designs for surprising and entertaining devices that were the models for sixteenth and seventeenth century automata. A second book by Hero On Automata-Making – much less well known, then and now – describes two miniature theatres that presented plays without human intervention. One of these, it is argued, provided the model for the type of proscenium theatre introduced from the mid-sixteenth century, the generic design which is still built today. As the influence of Vitruvius waned, the influence of Hero grew.

The Nature of Spectacle Jim Igoe,2017-09-12 A thoughtful treatise on how popular representations of nature, through entertainment and tourism, shape how we imagine environmental problems and their solutions--Provided by publisher.

Telematic Embrace Roy Ascott,2003 Annotation Telematic Embrace combines a provocative collection of writings from 1964 to the present by the preeminent artist and art theoretician Roy Ascott, with a critical essay by Edward Shanken that situates Ascott's work within a history of ideas in art, technology, and philosophy.

Retromania Simon Reynolds,2011-07-19 The influential rock critic and author of Rip It Up and Start Again traces society's obsession with retro music as reflected by reunion tours and expanded re-releases of classic albums, expressing his concern that our culture's disproportionate focus on past music eras is compromising the distinctiveness of today's sound. Original. 15,000 first printing.

Architectonics of Game Spaces Andri Gerber,Ulrich Götz,2020-03-31 What consequences does the design of the virtual yield for architecture

and to what extent can the nature of architecture be used productively to turn game-worlds into sustainable places - over here, in »reality«? This pioneering collection gives an overview of contemporary developments in designing video games and of the relationships such practices have established with the design of architecture. Due to their often simulatory nature, games reveal constructions of reality while positively impacting spatial ability and allowing for alternative avenues to complex topics and processes of negotiation. Granting insight into the merging of the design of real and virtual environments, this volume offers an invaluable platform for further debate.
