Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Zanele Muholi Yasufumi Nakori, Allen Sarah, 2020 Born in South Africa in 1972, Zanele Muholi came to prominence in the early 2000s with photographs that sought to envision black lesbian, gay, bisexual, trans, queer, and intersex lives beyond deviance or victimhood. Muholi's work challenges hetero-patriarchal ideologies and representations, presenting the participants in their photographs as confident and beautiful individuals bravely existing in the face of prejudice, intolerance, and, frequently, violence. While Muholi's intimate photographs of others launched their international career, their intense self-portraits solidified it. The illustrations include images from the key series Muholi has produced over the past 20 years, as well as never-before-published and recent works. This book, and the exhibition it accompanies, present the full breadth of Muholi's photographic and activist practice. Exhibition: Tate Modern, London, UK (29.04-18.10.2020) / Maison Européenne de la Photographie, Paris, France (11.2020-02.2021) / Martin Gropius Bau, Berlin, Germany (03-07.2021) / Bildmuseet, Umea, Sweden (10.2021-03.2022).

Polarimetric SAR Imaging Yoshio Yamaguchi, 2020-08-18 Radar polarimetry has been highly sought after for its use in the precise monitoring of Earth's surface. Polarimetric SAR Imaging explains the basic concepts of polarimetry and its diverse applications including: deforestation, tree classification, landslide detection, tsunamis, volcano eruptions and ash distribution, snow accumulation, rice field monitoring, urban area exploration, ship detection, among other applications. The explanations use actual data sets taken by Advanced Land Observing Satellite (ALOS and ALOS2). With the increasing problems presented by climate change, there is a growing need for detailed earth observation using polarimetric data. As the treatment of vector nature

of radar waves is complex, there is a gap between the theory and the application. Polarimetric SAR Imaging: Theory and Applications addresses and fills this gap. Features: Provides cutting-edge polarimetric applications for earth observation with full color images. Includes detailed descriptions of theory, equations, expansions, and flowcharts, and numerous real examples. Explains concepts, data analysis, and applications in simple and clear language aimed at an intuitive comprehension. Provides specific and unique examples of PolSAR images derived from actual space and airborne systems (ALOS/ALOS2, PiSAR-x/L) Covers the wide range of the radar polarimetry, especially the decomposition of the polarimetry data, an original method developed by the author using the Japanese polarimetric SAR data Illustrated in full color using images generated by polarimetric techniques, this book is easy to understand and use for both student and expert, and is an excellent resource both in the classroom and in the field.

Leon of Juda Robert Frank, 2017 *Leon of Juda* is the seventh book in Robert Frank's (born 1924) acclaimed series of visual diaries, which combine iconic photos from throughout his career with the more personal pictures he makes today. Here, still lifes taken in Frank's home in Bleecker Street, New York, and landscapes around his house in Mabou, Nova Scotia, jostle alongside spontaneous portraits of friends, colleagues and his wife, the artist June Leaf, as well as vintage postcards. With these images Frank creates a seemingly casual layout that recalls the look and spirit of a private album or scrapbook. Equally humble and ambitious, *Leon of Juda* shows how the past tempers Frank's present and how his life is not only documented in, but shaped by, bookmaking.

A History of Cornell Morris Bishop, 2014-10-15 Cornell University is

fortunate to have as its historian a man of Morris Bishop's talents and devotion. As an accurate record and a work of art possessing form and personality, his book at once conveys the unique character of the early university—reflected in its vigorous founder, its first scholarly president, a brilliant and eccentric faculty, the hardy student body, and, sometimes unfortunately, its early architecture—and establishes Cornell's wider significance as a case history in the development of higher education. Cornell began in rebellion against the obscurantism of college education a century ago. Its record, claims the author, makes a social and cultural history of modern America. This story will undoubtedly entrance Cornellians; it will also charm a wider public. Dr. Allan Nevins, historian, wrote: I anticipated that this book would meet the sternest tests of scholarship, insight, and literary finish. I find that it not only does this, but that it has other high merits. It shows grasp of ideas and forces. It is graphic in its presentation of character and idiosyncrasy. It lights up its story by a delightful play of humor, felicitously expressed. Its emphasis on fundamentals, without pomposity or platitude, is refreshing. Perhaps most important of all, it achieves one goal that in the history of a living university is both extremely difficult and extremely valuable: it recreates the changing atmosphere of time and place. It is written, very plainly, by a man who has known and loved Cornell and Ithaca for a long time, who has steeped himself in the traditions and spirit of the institution, and who possesses the enthusiasm and skill to convey his understanding of these intangibles to the reader. The distinct personalities of Ezra Cornell and first president Andrew Dickson White dominate the early chapters. For a vignette of the founder, see Bishop's description of his first buildings

(Cascadilla, Morrill, McGraw, White, Sibley): At best, he writes, they embody the character of Ezra Cornell, grim, gray, sturdy, and economical. To the English historian, James Anthony Froude, Mr. Cornell was the most surprising and venerable object I have seen in America. The first faculty, chosen by President White, reflected his character: his idealism, his faith in social emancipation by education, his dislike of dogmatism, confinement, and inherited orthodoxy; while the romantic upstate gothic architecture of such buildings as the President's house (now Andrew D. White Center for the Humanities), Sage Chapel, and Franklin Hall may be said to portray the taste and Soul of Andrew Dickson White. Other memorable characters are Louis Fuertes, the beloved naturalist; his student, Hugh Troy, who once borrowed Fuertes' rhinoceros-foot wastebasket for illicit if hilarious purposes; the more noteworthy and the more eccentric among the faculty of succeeding presidential eras; and of course Napoleon, the campus dog, whose talent for hailing streetcars brought him home safely—and alone—from the Penn game. The humor in A History of Cornell is at times kindly, at times caustic, and always illuminating.

From Research to Operations in Weather Satellites and Numerical Weather Prediction National Research Council, Commission on Geosciences, Environment, and Resources, Board on Atmospheric Sciences and Climate, 2000-09-07 This workshop report examines the capability of the forecast system to efficiently transfer weather and climate research findings into improved operational forecast capabilities. It looks in particular at the Environmental Modeling Center of the National Weather Service and environmental observational satellite programs. Using these examples, the report identifies several shortcomings in the capability to transition from research to operations. Successful transitions from R&D to operational implementation requires (1) understanding of the importance (and risks) of the transition, (2) development and maintenance of appropriate transition plans, (3) adequate resource provision, and (4) continuous feedback (in both directions) between the R&D and operational activities.

Goya's War Janis A. Tomlinson, Kathleen Stewart Howe, 2013 This book draws on the most recently scholarship by art historians and historians on the context and meaning of Goya's series of eighty aquatint etchings, the *Desastres de la Guerra*, much of it made available for the first time in English. Goya scholar Janis Tomlinson re-orders the sequence of the posthumously published 1863 edition to illustrate the artist's stylistic evolution as well as the etchings' relation to their historical context. Kathleen Stewart Howe discusses the enduring influence of these prints in contemporary art. All eighty etchings of the first edition (1863) are reproduced in full-page, color illustrations.

Omaha Sketchbook Gregory Halpern, 2019-08-31 For the last fifteen years, Gregory Halpern has been photographing in Omaha, Nebraska, steadily compiling a lyrical, if equivocal, response to the American Heartland. In loosely-collaged spreads that reproduce his construction-paper sketchbooks, Halpern takes pleasure in cognitive dissonance and unexpected harmonies, playing on a sense of simultaneous repulsion and attraction to the place. *Omaha Sketchbook* is ultimately a meditation on America, on the men and boys who inhabit it, and on the mechanics of aggression, inadequacy, and power.

Goya Francisco Goya, Goya (ART), Stephanie Loeb Stepanek, Frederick Ilchman, Janis A. Tomlinson, 2014 Francisco Goya has been widely celebrated as the most important Spanish artist of the late eighteenth and early nineteenth centuries, the last of the Old Masters and the first of the Moderns, and an astute observer of the human condition in all its complexity. The many-layered and shifting meanings of his imagery have made him one of the most studied artists in the world. Few, however, have made the ambitious attempt to explore his work as a painter, printmaker, and draftsman across media and

the timeline of his life. This book does just that, presenting a comprehensive and integrated view of Goya through the themes that continually challenged or preoccupied him, and revealing how he strove relentlessly to understand and describe human behavior and emotions even at their most orderly or disorderly extremes. Derived from the research for the largest Goya art exhibition in North America in a quarter century, this book takes a fresh look at one of the greatest artists in history by examining the fertile territory between the two poles that defined the range of his boundlessly creative personality.

Telex Iran Gilles Peress, Ghulām Ḥusayn Sā'idī, 1997 *Telex : Iran* is an extraordinarily personal document of a public event. The photographs Gilles Peress took over a five-week period during the 1979/80 seizure of the American embassy in Tehran form neither a study nor an analysis. Peress didn't plan to go to Iran: the instant imagery, the caricatures of fanatics on his TV got to him. He felt the need to understand for himself the apparent madness about which the Western media could only generalize

Introducing Transformational Grammar Jamal Ouhalla, 1999 The first edition of this book quickly established itself as one of the clearest and most readable introductions to generative grammar. Together with a complete introduction to the principles of Universal Grammar, it traced the major shifts of perspective that have influenced the developments of the theory over the last forty years. This revised and expanded new edition introduces students with no previous training to Transformational Grammar. Covering the framework known as Principles and Parameters as well as the more recent framework known as Minimalism, it includes a range of new exercises, making it ideal for students at all levels.

Gilles Peress and Chris Klatell: Annals of the North Chris

Klatell, 2020-09-29 An almanac to the world of Gilles Peress' *Whatever You Say, Say Nothing*, delineating the decades of conflict in Northern Ireland. In *Annals of the North*, New York-based photographer Gilles Peress (born 1946) and writer and lawyer Chris Klatell combine essays, stories, photographs, documents and testimonies to open up for the reader the complicated and contradictory storylines that emerged from the conflict in the North of Ireland. Weighed down by 800 years of colonization but only the size of Connecticut (with half its population), Northern Ireland provides a remarkably intimate stage set. Interweaving text and image, *Annals of the North* examines the multifaceted struggle between Irish Republicans and Nationalists, Protestant Unionists and Loyalists, and the imperial British, to explore broader themes of empire, retribution and betrayal, as well as the tense dialectic between the ordinary demands of everyday life and periodic explosions of violence. The book is at once wide-ranging yet deeply personal and political, alternately dense and humorous, legal and literary.

Liberty Theater Rosalind Solomon, 2018 *Liberty Theater* by Rosalind Fox Solomon brings together her photographs made in the Southern United States from the 1970s to 1990s, never before published together as a group. Solomon's images depict a complex terrain of social and emotional issues inherited over generations: a world of class and gender divisions, implied and overt racism, competing notions of liberty, and lurking violence. Journeying through Alabama, Georgia, Florida, Louisiana, Mississippi, Tennessee, and South California, Solomon draws attention to cultural idiosyncrasies, paradoxes and theatrical displays: a Daughter of the Confederacy sits in costume with a china doll from her collection; a dead

tree stump, fenced and suspended with wires is elevated to the status of a Civil War monument; African American boys examine a vitrine of guns as two white police manikins loom behind them. Poised between act and re-enactment, the animate and the inanimate, Solomon's images reveal how history becomes a vernacular performance and identity a form of theatre.--
