Trial of the Clone Zach Weinersmith, 2012-10-09 Trial of the Clone is a choosable pathway gamebook that allows the reader to make choices, interact with the world, and otherwise navigate through over 500 scenes and thousands of potential pathways. Readers can choose to simply read through the story or interact more fully with the book's game by keeping track of statistics, items, and battles. Readers are incentivized to reread the book many times to explore other pathways or to catch some of the many secrets the author has hidden throughout the book. The reader plays as a clone who sets out to find his place in the world, solving challenging puzzles and fighting monsters along the way. Weinersmith's writing is characteristically irreverent and satirical, painting a dystopian future world filled with comical, colorful characters and clever surprises. Trial of the Clone is Zach Weinersmith's first full-length book, and is evident of his sprawling understanding of literature, science, logic, philosophy, and technology. Weinersmith is the sole creator behind Saturday Morning Breakfast Cereal, a daily comic that boasts over 250,000 daily readers and served more than 500,000,000 comics in 2011. This book is published by Breadpig, whose publisher profits will be donated to Fight for the Future.

Tech Stress Erik Peper, Ph.D., Richard Harvey, Ph.D., Nancy Faass, MSW, MPH, 2020-08-25 A fresh, science-backed approach to reframing our often damaging relationship with technology—with tips on ergonomics, optimal screen-time, combatting 'brain drain', and more. Reclaim health, happiness, and sanity in a plugged-in world with this self-help guide for the 21st-century worker suffering from burnout, Zoom fatigue, shortened attention span, and smartphone addiction. Evolution shapes behavior—and as a species, we've evolved to be drawn to the instant gratification, constant connectivity, and the shiny lights, beeps, and chimes of our ever-present devices. In earlier eras, these hardwired evolutionary patterns may have set us up for success, but today they confuse our instincts, leaving us vulnerable and stressed out from fractured attention, missed sleep, skipped meals, aches, pains, and exhaustion. So how can we avoid the pitfalls programmed into modern technology use? Tech Stress offers real, practical tools to avoid the evolutionary traps that trip us up and to address the problems associated with technology overuse. You will find a range of effective strategies and best practices to individualize your workspace (in the office and at home), reduce physical strain, prevent sore muscles, combat brain drain, and correct poor posture. The book also provides fresh insights on reducing stress and enhancing health.

Practical Finite Element Analysis Nitin S. Gokhale, 2008 Highlights of the book: Discussion about all the fields of Computer Aided Engineering, Finite Element Analysis Sharing of worldwide experience by more than 10 working professionals Emphasis on Practical usage and minimum mathematics Simple language, more than 1000 colour images International quality printing on specially imported paper Why this book has been written ... FEA is gaining popularity day by day & is a sought after dream career for mechanical engineers. Enthusiastic engineers and managers who want to refresh or update the knowledge on FEA are encountered with volume of published books. Often professionals realize that they are not in touch with theoretical concepts as being pre-requisite and find it too mathematical and Hi-Fi. Many a times these books just end up being decoration in their book shelves ... All the authors of this book are from IITs & IISc and after joining the industry realized gap between university education and the practical FEA. Over the years

they learned it via interaction with experts from international community, sharing experience with each other and hard route of trial & error method. The basic aim of this book is to share the knowledge & practices used in the industry with experienced and in particular beginners so as to reduce the learning curve & avoid reinvention of the cycle. Emphasis is on simple language, practical usage, minimum mathematics & no pre-requisites. All basic concepts of engineering are included as & where it is required. It is hoped that this book would be helpful to beginners, experienced users, managers, group leaders and as additional reading material for university courses.

Treehouses Elizabeth Kuti, 2000-04-13 A new play from an award-winning playwright, published as part of the innovative Abbey Theatre playscript series On the day of her father's funeral, Eva - a young woman - is still haunted by the betrayal she witnessed from her childhood haven - the treehouse in the garden. On the same day another woman, Magda, relives the ghosts of another hiding place and a different betrayal - ghosts from which she still seeks forgiveness. Interweaving lives and secrets *Treehouses* is a magical tale of refuge, treachery and of love lost and found.

Discursive Design Bruce M. Tharp, Stephanie M. Tharp, 2022-11-22 Exploring how design can be used for good—prompting self-reflection, igniting the imagination, and affecting positive social change. Good design provides solutions to problems. It improves our buildings, medical equipment, clothing, and kitchen utensils, among other objects. But what if design could also improve societal problems by prompting positive ideological change? In this book, Bruce and Stephanie Tharp survey recent critical design practices and propose a new, more inclusive field of socially minded practice: discursive design. While many consider good design to be unobtrusive, intuitive, invisible, and undemanding intellectually, discursive design instead targets the intellect, prompting self-reflection and igniting the imagination. Discursive design (derived from “discourse”) expands the boundaries of how we can use design—how objects are, in effect, good(s) for thinking. Discursive Design invites us to see objects in a new light, to understand more than their basic form and utility. Beyond the different foci of critical design, speculative design, design fiction, interrogative design, and adversarial design, Bruce and Stephanie Tharp establish a more comprehensive, unifying vision as well as innovative methods. They not only offer social criticism but also explore how objects can, for example, be used by counselors in therapy sessions, by town councils to facilitate a pre-vote discussions, by activists seeking engagement, and by institutions and industry to better understand the values, beliefs, and attitudes of those whom they serve. Discursive design sparks new ways of thinking, and it is only through new thinking that our sociocultural futures can change.

Prototype Louise Valentine, 2013-12-19 *Prototype: Design and Craft in the 21st Century* is an edited collection of 13 essays by a diverse, cross-disciplinary body of international scholars and practitioners, which for the first time, brings together critical and speculative thinking on the role the prototype can, and should, play within design, craft and beyond. The range of authors and pioneers is carefully selected and purposefully diverse so as to reflect, extend and lead current debates on the subject. This book offers an alternative way to question design and craft. It also seeks to raise awareness and understanding of design and craft within disciplines where they are not traditionally referenced. This new change of mindset - which emphasises process over product - may well question the disciplinary focus of approach to solving complex problems. As Einstein suggests, if we are to make progress and resolve the problems of our time, we need to change our mindsets from the ones that created the problems in the first place.

Love From Both Sides Stephanie Riseley, 2012-06-01 In this memoir, memorial, and celebration, Stephanie Riseley shares the

deeply emotional and powerfully physical story of the continued relationship between her and her husband Dan after his sudden death. Exploring the ways in which love and forgiveness can transcend the boundaries of life and death, the book intends to change perceptions of the emotional and spiritual relationships two people can share. Problematic marriages and challenging relationships will take on positive new dimensions.

A Theory of Craft Howard Risatti, 2009-12 What is craft? How is it different from fine art or design? In *A Theory of Craft*, Howard Risatti examines these issues by comparing handmade ceramics, glass, metalwork, weaving, and furniture to painting, sculpture, photography, and machine-made design from Bauhaus to the Memphis Group. He describes craft's unique qualities as functionality combined with an ability to express human values that transcend temporal, spatial, and social boundaries. Modern design today has taken over from craft the making of functional objects of daily use by employing machines to do work once done by hand. Understanding the aesthetic and social implications of this transformation forces us to see craft as well as design and fine art in a new perspective, Risatti argues. Without a way of understanding and valuing craft on its own terms, the field languishes aesthetically, being judged by fine art criteria that automatically deny art status to craft objects. Craft must articulate a role for itself in contemporary society, says Risatti; otherwise it will be absorbed by fine art or design and its singular approach to understanding the world will be lost. *A Theory of Craft* is a signal contribution to establishing a craft theory that recognizes, defines, and celebrates the unique blend of function and human aesthetic values embodied in the craft object.

ConsumAuthors Francesco Morace, 2017-01-27 T00:00:00+01:00 Generational nuclei are like those found in atoms: structural dimensions held together by their positive charge which releases a binding energy. Generational nuclei cannot be defined so precisely, but their activity can be observed and tested just like their atomic counterparts. The generational nuclei are identified through ethno-anthropological observation and produce an enormous amount of attractive energy towards both their own generation and others, with a power that shapes future values and behaviours.

Flim-Flam Man Jennifer Vogel, 2010-06-15 Major motion picture *Flag Day* starring Sean Penn and his daughter Dylan Penn is based on this father-daughter story of a charming criminal—told by the daughter who loved him. One frosty winter morning in 1995, Jennifer Vogel opened the newspaper and read that her father had gone on the run. John Vogel, fifty-two, had been arrested for single-handedly counterfeiting nearly \$20 million in U.S. currency—the fourth-largest sum ever seized by federal agents—and then released pending trial. Though Jennifer hadn't spoken to her father in more than four years, the police suspected he might turn up at her Minneapolis apartment. She examined the shadows outside her building, thought she spotted him at the grocery store and the bus stop. He had simply vanished. Framed around the six months her father eluded authorities, Jennifer's memoir documents the police chase—stakeouts, lie detector tests, even a segment on *Unsolved Mysteries*—and vividly chronicles her tumultuous childhood while examining her father's legacy. A lifelong criminal who robbed banks, burned down buildings, scammed investors, and even plotted murder, John Vogel was also a hapless dreamer who wrote a novel, baked lemon meringue pies, and took his ten-year-old daughter to see *Rocky* in an empty theater on Christmas Eve. When it came time to pass his counterfeit bills, he spent them at Wal-Mart for political reasons. Culling from memories, photo albums, public documents, and interviews with the handful of people who knew the real John Vogel, this is an intimate and intensely moving psychological portrait of a charismatic, larger-than-life figure—as told by the daughter

who nearly followed in his footsteps.

Appropriating Technology Ron Eglash, 2004 From the vernacular engineering of Latino car design to environmental analysis among rural women to the production of indigenous herbal cures-groups outside the centers of scientific power persistently defy the notion that they are merely passive recipients of technological products and scientific knowledge. This is the first study of how such outsiders reinvent consumer products-often in ways that embody critique, resistance, or outright revolt. Contributors: Richard M. Collaboration Through Craft Amanda Ravetz, Helen Felcey, Alice Kettle, 2013-11-21 A rich and exciting set of case studies and first-hand accounts from industry professionals bring key debates on the theory and practice of collaboration in contemporary craft up-to-date.

Materials Experience Elvin Karana, Owain Pedgley, Valentina Rognoli, 2013-10-24 There currently exists an abundance of materials selection advice for designers suited to solving technical product requirements. In contrast, a stark gap can be found in current literature that articulates the very real personal, social, cultural and economic connections between materials and the design of the material world. In *Materials Experience: fundamentals of materials and design*, thirty-four of the leading academicians and experts, alongside 8 professional designers, have come together for the first time to offer their expertise and insights on a number of topics common to materials and product design. The result is a very readable and varied panorama on the world of materials and product design as it currently stands. Contributions by many of the most prominent materials experts and designers in the field today, with a foreword by Mike Ashby. The book is organized into 4 main themes: sustainability, user interaction, technology and selection. Between chapters, you will find the results of interviews conducted with internationally known designers. These 'designer perspectives' will provide a 'time out' from the academic articles, with emphasis placed on fascinating insights, product examples and visuals.

Big Mind Geoff Mulgan, 2019-11-12 A new field of collective intelligence has emerged in the last few years, prompted by a wave of digital technologies that make it possible for organizations and societies to think at large scale. This bigger mind--human and machine capabilities working together--has the potential to solve the great challenges of our time. So why do smart technologies not automatically lead to smart results? Gathering insights from diverse fields, including philosophy, computer science, and biology, Big Mind reveals how collective intelligence can guide corporations, governments, universities, and societies to make the most of human brains and digital technologies--Amazon.com.

Shifting Gravity Ute Meta Bauer, Hanru Hou, 2013 The rise in biennials worldwide over the past three decades--and most notably in Asia--provokes a shift away from the traditional centers of contemporary art and signifies a new cultural phenomenon that changes the way we understand the relationship between artistic creation, institutions, localities, and social relations. Biennials provide a platform

for presenting contemporary art from the world over to a traveling group of art professionals, but more importantly to a wide public. Initiated by the Biennial Foundation and hosted by the Gwangju Biennale Foundation in South Korea, the inaugural World Biennial Forum investigated this multiplicity of new centers and gravities along with the heterogeneous practices in large-scale art shows today. This publication collects the presentations and discussions developed during the forum. Keynotes by eminent intellectuals on democracy, aesthetic representation, and cosmopolitanism help us conceive of biennials as an alternative space of political imagination. Case studies with a focus on Asia examine innovative and contextually relevant models of presentations of this kind in the Asia Pacific region. The contributions look back to the history of biennials, or investigate contemporary art's relationship with other disciplines. Biennials featured (selection): Anyang Public Art Project, Biennale of Sydney, Chobi Mela, Emergency Biennale, Istanbul Biennial, Mediacity Seoul, Shanghai Biennale, Taipei Biennial, Tbilisi Triennial, Yokohama Triennial

The Cannibal's Cookbook Brandon Clifford, 2021-03-08 The Cannibal's Cookbook fiercely consumes the body of past cyclopean constructions. It assembles, re-packages, and offers this latent knowledge for your contemporary consumption. It is a manual for the hungry, for those who are not satiated by the careless building practices of the present. With one foot in the past and another in the present, the cookbook bridges the realities of our ancestors and ourselves. We propose a series of architectural recipes after dining on this body of past expertise. The recipes are deciphered from ancient cyclopean masonry systems, but with a contemporary twist. They cannibalize leftover debris--building rubble that typically stuffs our landfills--to construct new buildings
