Introduction to UAV Systems Paul Fahlstrom, Thomas Gleason, 2012-07-11 Unmanned aerial vehicles (UAVs) have been widely adopted in the military world over the last decade and the success of these military applications is increasingly driving efforts to establish unmanned aircraft in non-military roles. Introduction to UAV Systems, 4th edition provides a comprehensive introduction to all of the elements of a complete Unmanned Aircraft System (UAS). It addresses the air vehicle, mission planning and control, several types of mission payloads, data links and how they interact with mission performance, and launch and recovery concepts. This book provides enough information to encourage a student to learn more; to provide a specialist with a basic appreciation of the technical issues that drive other parts of the system and interact with their specialty; or to help a program manager understand system-level tradeoffs and know what questions to ask. Key features: Comprehensive overview of all elements of a UAS and of how they interact. Introduces the underlying concepts of key subsystems. Emphasizes system-integration issues and how they relate to subsystem design choices. Practical discussion of issues informed by lessons learned in UAV programs. Introduction to UAV Systems, 4th edition is written both for newcomers to the subject and for experienced members of the UAV community who desire a comprehensive overview at the system level. As well as being a primary text for an introductory course on UAS or a supplementary text in a course that goes into more depth in one of the individual technologies involved in a UAS, this book is a useful overview for practicing engineers, researchers, managers, and consultants interested in UAV systems.

Luftwaffe Secret Projects Walter Schick, Ingolf Meyer, 1997 Designs from Germany's aerodynamics engineers detail proposed military aircraft, including wing span and area, aspect ratio, length, height, weight, speed, and armament.

Healthy Bastards Dave Baldwin, 2010-12-01 The lowdown on men's health from New Zealand's most adventurous GP. If laughter is the best medicine then Dr Dave Baldwin's Healthy Bastards is the essential prescription for every bloke who wants to know more about his health. Using his trademark humour and plain language, Dr Dave takes the pain out of illness by explaining all the common health problems and major diseases that affect the average male bloke. You'll also find out how the different parts of the body work, and how to fix or avoid your particular complaint. Summaries and key points mean you don't even have to read the whole chapter! A GP for more than 20 years, flying doctor Dave has written this accessible guide for the everyday Kiwi bloke.

Trichier Alessandra Ceretto,

Secret Aircraft Designs of the Third Reich David Myhra,1998 In *Secret Aircraft Designs of the Third Reich* aircraft biographer David Myhra gives the reader much more than pictures of proposed German aircraft projects, although this work is richly illustrated by state-of-the-art digital images by Mario Merino. The total number of German projects is in excess of 400. Blohm und Voss tops the list with over 200 project designs. The reader is introduced to the men behind these proposed aircraft. One will discover Woldemar Voigt's frustration with his Me P.1101 and why it simply would not jell. The reader will learn why Dr. Günther of Gotha lobbied the RLM to take his Go P.60 designs and scrap the Horten Ho 229. We see why critics of design genius Alexander Lippisch said that he was a man who had a new design almost every day but fails to put most of them into the air. Myhra describes the shameful handling of Hugo Junkers, the father of German aviation, by the Gestapo. It was Junkers who said that ideas for advanced aircraft projects were about as cheap as blueberries. To an idea must be added materials, resources, and time. And time in all the secret projects was short, very short. Although over 400 aircraft projects were on the drawing board when the war in Europe ended in May 1945, only a handful were in the prototype stage. This outstanding book also offers a superb collection of photographs of scale models from contributors throughout the world, and digital images by Mario Merino and Andreas Ott that offer a one-of-a-kind look at secret German designs.

Shot Over Into the Shotover Richard J. Waugh,2018 In New Zealand de Havilland DH89 Rapides/Dominies have been continuously flying longer than any other aircraft type - for over 80 years - and with no fatalities. But experienced pilot Brian Waugh's Dominie was forced down by engine failure into Queenstown's Shotover River. This book tells the absorbing story of this unusual accident. The subsequent intrigue involved engine reliability issues, an inadequate accident investigation, and how Waugh, a licensed aircraft engineer, while recovering from his injuries, happened by chance to inspect one of the engines being dismantled for overhaul. What he discovered led him to relentlessly advocate for a proper investigation ...--Publisher's description.

Hoki to Haast Richard J. Waugh,Kynaston Charitable Trust,2009-12 New Zealand's first licensed airline to fly scheduled services, operated the Hokitika to Haast route on the scenic West Coast of the South Island. Air Travel (NZ) Ltd was launched in 1934 by legendary pilot Bert Mercer, the first Kiwi to achieve 10,000 flying hours. The airline also pioneered airmail, air-ambulance, alpine tourist flying and versatile freight work. Illustrated by many rare photographs this book tells the story of de Havilland Fox Moths, Dragonflies and Dominies and how these biplanes became indispensable to the isolated people of South Westland. The sturdy fabric covered, wooden and wire aircraft flew in demanding weather, mostly fully loaded, to landing strips on beaches, riverbeds and in the bush. After Mercer's tragic death, National Airways Corporation (NAC) and West Coast Airways continued the air service with Chief Pilots Norm Suttie, Frank Molloy and Brian Waugh. The world's longest running de Havilland biplane air service lasted until 1967; an unforgettable mix of excitement and routine, romance and tragedy, ably demonstrating the growing role of aviation for ordinary New Zealanders.

B2-246 ,2017-04-23 The book chronicles the last thirty days of the authors stay in prison. It's a day-to-day

look at life on the inside. The author had to use his words wisely and move wisely as well to stay out of harms way and able to be released on time other than be held accountable for more jail time. A book for everyone and readers of all backgrounds.

Flying Blind Peter Robison, 2022-10-11 NEW YORK TIMES BUSINESS BEST SELLER • A suspenseful behind-the-scenes look at the dysfunction that contributed to one of the worst tragedies in modern aviation: the 2018 and 2019 crashes of the Boeing 737 MAX. An authoritative, gripping and finely detailed narrative that charts the decline of one of the great American companies (New York Times Book Review), from the award-winning reporter for Bloomberg. Boeing is a century-old titan of industry. It played a major role in the early days of commercial flight, World War II bombing missions, and moon landings. The planemaker remains a cornerstone of the U.S. economy, as well as a linchpin in the awesome routine of modern air travel. But in 2018 and 2019, two crashes of the Boeing 737 MAX 8 killed 346 people. The crashes exposed a shocking pattern of malfeasance, leading to the biggest crisis in the company's history—and one of the costliest corporate scandals ever. How did things go so horribly wrong at Boeing? *Flying Blind* is the definitive exposé of the disasters that transfixed the world. Drawing from exclusive interviews with current and former employees of Boeing and the FAA; industry executives and analysts; and family members of the victims, it reveals how a broken corporate culture paved the way for catastrophe. It shows how in the race to beat the competition and reward top executives, Boeing skimped on testing, pressured employees to meet unrealistic deadlines, and convinced regulators to put planes into service without properly equipping them or their pilots for flight. It examines how the company, once a treasured American innovator, became obsessed with the bottom line, putting shareholders over customers, employees, and communities. By Bloomberg investigative journalist Peter Robison, who covered Boeing as a beat reporter during the company's fateful merger with McDonnell Douglas in the late '90s, this is the story of a business gone wildly off course. At once riveting and disturbing, it shows how an iconic company fell prey to a win-at-all-costs mentality, threatening an industry and endangering countless lives.
