Analytic Combinatorics Philippe Flajolet, Robert Sedgewick, 2009-01-15 Analytic combinatorics aims to enable precise quantitative predictions of the properties of large combinatorial structures. The theory has emerged over recent decades as essential both for the analysis of algorithms and for the study of scientific models in many disciplines, including probability theory, statistical physics, computational biology, and information theory. With a careful combination of symbolic enumeration methods and complex analysis, drawing heavily on generating functions, results of sweeping generality emerge that can be applied in particular to fundamental structures such as permutations, sequences, strings, walks, paths, trees, graphs and maps. This account is the definitive treatment of the topic. The authors give full coverage of the underlying mathematics and a thorough treatment of both classical and modern applications of the theory. The text is complemented with exercises, examples, appendices and notes to aid understanding. The book can be used for an advanced undergraduate or a graduate course, or for self-study.

Gesture-Based Communication in Human-Computer Interaction Antonio Camurri, Gualtiero Volpe, 2011-04-02 Research on the multifaceted aspects of modeling, analysis, and synthesis of human gesture is receiving growing interest from both the academic and industrial communities. On one hand, recent scientific developments on cognition, on affect/emotion, on multimodal interfaces, and on multimedia have opened new perspectives on the integration of more sophisticated models of gesture in computersystems. On the other hand, the consolidation of new technologies enabling “disappearing” computers and (multimodal) interfaces to be integrated into the natural environments of users are making it realistic to consider tackling the complex meaning and subtleties of human gesture in multimedia systems, enabling a deeper, user-centered, enhanced physical participation and experience in the human-machine interaction process. The research programs supported by the European Commission and several national institutions and governments individuated in recent years strategic fields strictly concerned with gesture research. For example, the DG Information Society of the European Commission (www.cordis.lu/ist) supports several initiatives, such as the “Disappearing Computer” and “Presence” EU-IST FET (Future and Emerging Technologies), the IST program “Interfaces & Enhanced Audio-Visual Services” (see for example the project MEGA, Multisensory - pressive Gesture Applications, www.megaproject.org), and the IST strategic - jective “Multimodal Interfaces.” Several EC projects and other funded research are represented in the chapters of this book. A wider range of applications can benefit from advances in research on gesture, from consolidated areas such as surveillance to new or emerging fields such as therapy and rehabilitation, home consumer goods, entertainment, and audiovisual, cultural and artistic applications, just to mention only a few of them.

A New Literacies Sampler Michele Knobel, Colin Lankshear, 2007 The study of new literacies is quickly emerging as a major research field. This book «samples» work in the broad area of new literacies research along two dimensions. First, it samples some typical examples of new literacies - video gaming, fan fiction writing, weblogging, role play gaming, using websites to participate in affinity practices, memes, and other social activities involving mobile technologies. Second, the studies collectively sample from a wide range of approaches potentially available for researching and studying new literacies from a sociocultural perspective. Readers will come away with a rich sense of what new literacies are, and a generous appreciation of how they are being researched.

Accelerando Charles Stross, 2005-07-05 The Singularity. It is the era of the posthuman. Artificial intelligences have surpassed the limits of human intellect. Biotechnological beings have rendered people all but extinct. Molecular nanotechnology runs rampant,

replicating and reprogramming at will. Contact with extraterrestrial life grows more imminent with each new day. Struggling to survive and thrive in this accelerated world are three generations of the Macx clan: Manfred, an entrepreneur dealing in intelligence amplification technology whose mind is divided between his physical environment and the Internet; his daughter, Amber, on the run from her domineering mother, seeking her fortune in the outer system as an indentured astronaut; and Sirhan, Amber's son, who finds his destiny linked to the fate of all of humanity. For something is systematically dismantling the nine planets of the solar system. Something beyond human comprehension. Something that has no use for biological life in any form...

Usable Pasts Tad Tuleja, 1997-06 An eclectic collection of essays on creative use, manipulation, and invention of traditions by groups of many sizes and types: ethnic, regional, religious, organizational, and national.

Arachidonic Acid in Cell Signaling Daniele Piomelli, 2013-04-17 This book is about the arachidonic acid cascade, its biochemistry, its pharmacology, and its roles in signal transduction. Arachidonic acid may serve as an intracellular second messenger in many cell types, as well as precursor for biologically active molecules such as the eicosanoids (a family of oxygenated metabolites that may act as second messengers or as local mediators), and anandamide (an endogenous cannabinoid substance). Dysfunctions in the arachidonic acid cascade underlie a number of serious pathological conditions, making these biochemical pathways the target for drugs of clinical value.

Diagrammatic Representation and Inference Amrita Basu, Gem Stapleton, Sven Linker, Catherine Legg, Emmanuel Manalo, Petrucio Viana, 2021-09-21 This book constitutes the refereed proceedings of the 12th International Conference on the Theory and Application of Diagrams, Diagrams 2021, held virtually in September 2021. The 16 full papers and 25 short papers presented together with 16 posters were carefully reviewed and selected from 94 submissions. The papers are organized in the following topical sections: design of concrete diagrams; theory of diagrams; diagrams and mathematics; diagrams and logic; new representation systems; analysis of diagrams; diagrams and computation; cognitive analysis; diagrams as structural tools; formal diagrams; and understanding thought processes. 10 chapters are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Biomechanics of Skeletal Muscles Vladimir M. Zatsiorsky, Boris I. Prilutsky, 2012-04-10 Richly illustrated and presented in clear, concise language, *Biomechanics of Skeletal Muscles* is an essential resource for those seeking advanced knowledge of muscle biomechanics. Written by leading experts Vladimir Zatsiorsky and Boris Prilutsky, the text is one of the few to look at muscle biomechanics in its entirety—from muscle fibers to muscle coordination—making it a unique contribution to the field. Using a blend of experimental evidence and mechanical models, *Biomechanics of Skeletal Muscles* provides an explanation of whole muscle biomechanics at work in the body in motion. The book first addresses the mechanical behavior of single muscles—from the sarcomere level up to the entire muscle. The architecture of human muscle, the mechanical properties of tendons and passive muscles, the biomechanics of active muscles, and the force transmission and shock absorption aspects of muscle are explored in detail. Next, the various issues of muscle functioning during human motion are addressed. The transformation from muscle force to joint movements, two-joint muscle function, eccentric muscle action, and muscle coordination are analyzed. This advanced text assumes some knowledge of algebra and calculus; however, the emphasis is on understanding physical concepts. Higher-level computational descriptions are placed in special sections in the later chapters of the book, allowing those with a strong mathematical background to explore this material in more detail. Readers who choose to skip over these sections will find that the book still provides a strong conceptual

understanding of advanced topics. Biomechanics of Skeletal Muscles also contains numerous special features that facilitate readers' comprehension of the topics presented. More than 300 illustrations and accompanying explanations provide an extensive visual representation of muscle biomechanics. Refresher sidebars offer brief reminders of mathematical and biomechanical concepts, and From the Literature sidebars present practical examples that illustrate the concepts under discussion. Chapter summaries and review questions provide an opportunity for reflection and self-testing, and reference lists at the end of each chapter provide a starting point for further study. Biomechanics of Skeletal Muscles offers a thorough explanation of whole muscle biomechanics, bridging the gap between foundational biomechanics texts and scientific literature. With the information found in this text, readers can prepare themselves to better understand the latest in cutting-edge research. Biomechanics of Skeletal Muscles is the third volume in the Biomechanics of Human Motion series. Advanced readers in human movement science gain a comprehensive understanding of the biomechanics of human motion as presented by one of the world's foremost researchers on the subject, Dr. Vladimir Zatsiorsky. The series begins with Kinematics of Human Motion, which details human body positioning and movement in three dimensions; continues with Kinetics of Human Motion, which examines the forces that create body motion and their effects; and concludes with Biomechanics of Skeletal Muscles, which explains the action of the biological motors that exert force and produce mechanical work during human movement.

Ultraviolet Grasslands: 2E Luka Rejec, 2023-02 Welcome to Ultraviolet Grasslands: 2E the roleplaying game of heroes on a strange trip through mythic steppes in search of lost time, broken space, and deep riffs. Ultraviolet Grasslands is a tabletop role-playing game book, half setting, half adventure, and half epic trip; inspired by psychedelic heavy metal, the Dying Earth genre, and classic Oregon Trail games. It leads a group of 'heroes' into the depths of a vast and mythic steppe filled with the detritus of time and space and fuzzy riffs.

English in Mind Level 5 Student's Book with DVD-ROM Herbert Puchta, Jeff Stranks, Peter Lewis-Jones, 2012-02-09 This second edition updates a course which has proven to be a perfect fit for classes the world over. Engaging content and a strong focus on grammar and vocabulary combine to make this course a hit with both teachers and students. Popular course features have been refreshed with new content, including the imaginative reading and listening topics, 'Culture in Mind', and 'Everyday English' sections. New for the second edition is a DVD-ROM with the Level 5 Student's Book containing games, extra exercises and videos featuring the photostories' characters as well as a 'Videoke' record-yourself function. There is a full 'Vocabulary bank' at the back of the book which expands upon lexical sets learned in the units.

The Return of the Real Hal Foster, 1996-09-25 In *The Return of the Real* Hal Foster discusses the development of art and theory since 1960, and reorders the relation between prewar and postwar avant-gardes. Opposed to the assumption that contemporary art is somehow belated, he argues that the avant-garde returns to us from the future, repositioned by innovative practice in the present. And he poses this retroactive model of art and theory against the reactionary undoing of progressive culture that is pervasive today. After the models of art-as-text in the 1970s and art-as-simulacrum in the 1980s, Foster suggests that we are now witness to a return to the real—to art and theory grounded in the materiality of actual bodies and social sites. If *The Return of the Real* begins with a new narrative of the historical avant-gard, it concludes with an original reading of this contemporary situation—and what it portends for future practices of art and theory, culture and politics.

The Practice of Everyday Life Michel de Certeau, 2011-11 Michel de Certeau considers the uses to which social representation and modes of social behavior are put by individuals and groups, describing the tactics available to the common man for reclaiming his own autonomy from the all-pervasive forces of commerce, politics, and culture. In exploring the public meaning of ingeniously defended private meanings, de Certeau draws on an immense theoretical literature in analytic philosophy, linguistics, sociology, semiology, and anthropology—to speak of an apposite use of imaginative literature.

The EXODUS Incident Peter Schattschneider, 2021-05-21 In the near future, Earth is suffering from climate change, famines, and fundamentalism. A global nuclear war is imminent. Interstellar probes from the Breakthrough Starshot project initiated by J. Milner and S. Hawking have discovered a habitable planet in the stellar system Proxima Centauri, just in time for the exodus of the elites. On board the EXODUS starship, the crew starts to experience strange things. The voyage to Atlantis, the new home for mankind, enters a mysterious and disquieting territory, where conspiracy theories about what is real and what is virtual emerge. THE EXODUS INCIDENT is a novel about an interstellar journey, which connects science to virtual realities and epistemology. In the guise of a final investigative report, a scientific treatise discusses the physics and mathematics behind the story: the starship, the fusion thruster, the target planet, and the journey, addressing anomalous effects which involve relativistic speed and deep space environments.

Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today’s consumer that will captivate anyone who’s been seduced—or turned off—by marketers’ relentless attempts to win our loyalty, our money, and our minds.

Essentials of Shinto Stuart Picken, 1994-11-22 Shinto is finally receiving the attention it deserves as a fundamental component of Japanese culture. Nevertheless, it remains a remarkably complex and elusive phenomenon to which Western categories of religion do not readily apply. A knowledge of Shinto can only proceed from a basic understanding of Japanese shrines and civilization, for it is closely intermingled with the Japanese way of life and continues to be a vital natural religion. This book is a convenient guide to Shinto thought. As a reference work, the volume does not offer a detailed critical study of all aspects of Shinto. Instead, it overviews the essential teachings of Shinto and provides the necessary cultural and historical context for understanding Shinto as a dynamic force in Japanese civilization. The book begins with an historical overview of Shinto, followed by a discussion of Japanese myths. The volume then discusses the role of shrines, which are central to Shinto rituals. Other portions of the book discuss the various Shinto sects and the evolution of Shinto from the Heian period to the present. Because Japanese terms are central to Shinto, the work includes a glossary.

The A-Z Encyclopedia of Alcohol and Drug Abuse Thomas Nordegren, 2002 With more than 30.000 entries The A-Z

Encyclopedia on Alcohol and Substance Abuse is the most complete and comprehensive reference book in the field of Substance Abuse. A useful handbook and working tool for drug abuse professionals. The Spiral Cage Al Davison, 2003 Born with severe spina bifida, doctors considered Al Davison a hopeless case, condemned to the 'spiral cage' of his own DNA. In Al's own words and pictures, this book movingly portrays his struggle to overcome 'disability' and the prejudice that surrounds it.

Computational Thinking Education Siu-Cheung Kong, Harold Abelson, 2019-07-04 This book is open access under a CC BY 4.0 license. This book offers a comprehensive guide, covering every important aspect of computational thinking education. It provides an in-depth discussion of computational thinking, including the notion of perceiving computational thinking practices as ways of mapping models from the abstraction of data and process structures to natural phenomena. Further, it explores how computational thinking education is implemented in different regions, and how computational thinking is being integrated into subject learning in K-12 education. In closing, it discusses computational thinking from the perspective of STEM education, the use of video games to teach computational thinking, and how computational thinking is helping to transform the quality of the workforce in the textile and apparel industry.

Anthropocene Or Capitalocene? Jason W. Moore, 2016 The Earth has reached a tipping point and we are entering an era of unprecedented turbulence in humanity's relationship within the web of life. But just what is that relationship, and how do we make sense of this extraordinary transition? *Anthropocene or Capitalocene?* offers answers to these questions. The contributors to this book diagnose the problems of Anthropocene thinking and propose an alternative: the global crises of the 21st century are rooted in the Capitalocene; not the Age of Man but the Age of Capital.
