Supply Chain Management: Models, Applications, and Research Directions Joseph Geunes, Panos M. Pardalos, H. Edwin Romeijn, 2002-03-31 This work brings together some of the most up to date research in the application of operations research and mathematical modeling techniques to problems arising in supply chain management and e-Commerce. While research in the broad area of supply chain management encompasses a wide range of topics and methodologies, we believe this book provides a good snapshot of current quantitative modeling approaches, issues, and trends within the field. Each chapter is a self-contained study of a timely and relevant research problem in supply chain management. The individual works place a heavy emphasis on the application of modeling techniques to real world management problems. In many instances, the actual results from applying these techniques in practice are highlighted. In addition, each chapter provides important managerial insights that apply to general supply chain management practice. The book is divided into three parts. The first part contains chapters that address the new and rapidly growing role of the internet and e-Commerce in supply chain management. Topics include e-Business applications and potentials; customer service issues in the presence of multiple sales channels, varying from purely Internet-based to traditional physical outlets; and risk management issues in e-Business in B2B markets.

**Westmoreland** Lewis Sorley, 2011-10-11 "A terrific book, lively and brisk . . . a must read for anyone who tries to understand the Vietnam War." —Thomas E. Ricks Is it possible that the riddle of America's military failure in Vietnam has a one-word, one-man answer? Until we understand Gen. William Westmoreland, we will never know what went wrong in the Vietnam War. An Eagle Scout at fifteen, First Captain of his West Point class, Westmoreland fought in two wars and became Superintendent at West Point. Then he was chosen to lead the war effort in Vietnam for four crucial years. He proved a disaster. Unable to think creatively about unconventional warfare, Westmoreland chose an unavailing strategy, stuck to it in the face of all opposition, and stood accused of fudging the results when it mattered most. In this definitive portrait, prize-winning military historian Lewis Sorley makes a plausible case that the war could have been won were it not for General Westmoreland. An authoritative study offering tragic lessons crucial for the future of American leadership, Westmoreland is essential reading. "Eye-opening and sometimes maddening, Sorley's Westmoreland is not to be missed." —John Prados, author of *Vietnam: The History of an Unwinnable War, 1945-1975*

*Light Alloys* Robert John Hussey, Josephine Wilson, 2013-04-17 Light Alloys Directory and Databook is a world-wide directory of the properties and suppliers of light alloys used in, or proposed for, numerous engineering applications. Alloys covered will include aluminium alloys, magnesium alloys, titanium alloys, beryllium. For the metals considered each section will consist of: a short introduction; a table comparing basic data and a series of comparison sheets. The book will adopt standardised data in order to help the reader in finding and comparing different materials and identifying the required information. All comparison sheets are cross-referenced, so that the user will be able to locate data on a specific product or compare properties easily. The book is designed to complement the existing publications on high performance materials.

**Human Factors in Auditory Warnings** Judy Edworthy, Neville A. Stanton, 2019-01-15 First published in 1999, this book provides answers to many of the problems associated with the design and application of auditory warnings. It represents the position of contemporary auditory warnings research and development in a single unique volume. Application domains include air traffic control, aviation, emergency services, manufacturing, medicine, military and nuclear power. The contributors constitute many key experts in this area, some of whom are psychoacousticians, some psychologists and some ergonomists. Correspondingly, the chapters range from those covering basic topics such as audibility and localization of warnings, through psychological issues concerned with the relationship between design, understanding and the behavioural response, to the more general ergonomic issues of implementing the warnings in a particular context. Although each of the chapters takes a slightly different perspective, they all balance theoretical underpinning with practical application. The editors have undertaken to draw all of the contributions together by providing an overview of warnings research at the beginning of the book and summary of the contributions at the end. This book will appeal to all involved in the research, development, design and implementation of auditory warnings.

**Blowout!** Mario T. García, Sal Castro, 2011-03-21 In March 1968, thousands of Chicano students walked out of their East Los Angeles high schools and middle schools to protest decades of inferior and discriminatory education in the so-called Mexican Schools. During these historic walkouts, or blowouts, the students were led by Sal Castro, a courageous and charismatic Mexican American teacher who encouraged the students to make their grievances public after school administrators and school board members failed to listen to them. The resulting blowouts sparked the beginning of the urban Chicano Movement of the late 1960s and early 1970s, the largest and most widespread civil rights protests by Mexican Americans in U.S. history. This fascinating testimonio, or oral history, transcribed and presented in Castro's voice by historian Mario T. Garcia, is a compelling, highly readable narrative of a young boy growing up in Los Angeles who made history by his leadership in the blowouts and in his career as a dedicated and committed teacher. Blowout! fills a major void in the history of the civil rights and Chicano movements of the 1960s, particularly the struggle for educational justice.

**The Paranoid Parents Guide** Christie Barnes, 2010-09-01 What Did You Worry About Today? Chances Are, You Didn't Need to . . . Paranoid Parents take heart: You're not alone in your sleepless nights. When surveyed by Paranoid Parents founder Christie Barnes, 75 percent of moms and dads said they worried about everything when it came to their kids. Things like: Is this really the right school? Will she get kidnapped at the mall? Are those car seats safe? Will he be bullied at camp? Is that splinter infected? Does he really have ADD or is he just hyper? Is she experimenting with drugs? In our fear-based culture that makes us over-buy, over-protect, and over-parent in an effort to keep our kids safe, Christie Barnes knows the truth: Most parents are wasting their time worrying about the wrong things. From years of research, Barnes will give parents a much-needed reality check, opening their eyes to the real dangers likely to befall their kids with simple, effective tips to prevent them from happening. She will help

paranoid parents to come clean about their biggest fears, reveal the Top Ten real dangers as opposed to the Myth Makers, and offer realistic ways to safeguard kids at every stage without stealing their childhoods. By rallying against our biggest fears with the facts, the Paranoid Parents Guide will help moms and dads enjoy parenthood more, and allow their kids develop the resiliency, independence, and good decision-making skills that are essential—yet lacking—in today's society. So stop worrying about a shark attack . . . because your child is more likely to be injured by a shopping cart. Think that ice hockey is more dangerous than cheering? Think again. Is there ever an age when your kids are safer? (The answer is yes.) Are strangers the real enemy? (Actually, no.) How dangerous is the world we live in? As Barnes will prove, it's easier to enjoy your time with your children when you are prepared; not paranoid.

*The Sixth Station* Linda Stasi,2013-12-01 Some say Demiel ben Yusef is the world's most dangerous terrorist, personally responsible for bombings and riots that have claimed the lives of thousands. Others insist he is a man of peace, a miracle worker, and possibly even the Son of God. His trial in New York City for crimes against humanity attracts scores of protestors, as well as media and religious leaders from around the world. Cynical reporter Alessandra Russo heads to the UN hoping for a piece of the action, but soon becomes entangled in controversy and suspicion when ben Yusef singles her out for attention among all other reporters. As Alessandra begins digging into ben Yusef's past, she is already in more danger than she knows—and when she is falsely accused of murder during her investigation, she is forced to flee New York. On the run from unknown enemies, Alessandra finds herself on the trail of a global conspiracy and a story that could shake the world to its foundations. Is Demiel ben Yusef the Second Coming or the Antichrist? The truth may lie in the secret history of the Holy Family, a group of Templars who defied the church, and a mysterious relic stained with the sacred blood of Christ Himself.

**Northwest Africa** George Frederick Howe,2018 The assault on North Africa on 8 November 1942 led to a bitter conflict that finally culminated in the defeat of the Axis forces in Tunisia seven months later. The campaign was, for the U.S. Army, a school in coalition warfare and an introduction to enemy tactics.
