The Avro Arrow Palmiro Campagna,2024-02-06 "No one has done more than Palmiro Campagna to document the story of Canada's extraordinary Avro Arrow ... This latest work sheds new light on the Arrow's fascinating saga." — ANDREW CHAIKIN, author of A Man on the Moon An expanded edition of the bestselling book, including newly discovered American records that shed further light on the disastrous cancellation of the Avro Arrow. The controversial cancellation of the Avro Arrow — an extraordinary achievement of Canadian military aviation — continues to inspire debate today. When the program was scrapped in 1959, all completed aircraft and those awaiting assembly were destroyed, along with tooling and technical information. Was abandoning the program the right decision? Did Canada lose more than it gained? Brimming with information to fill the gaps in the Arrow's troubled history, this new edition also brings to light recently discovered documents that answer whether the United States government wished Canada to continue the development of what was considered the world's most advanced interceptor aircraft.

Avro Arrow Arrowheads,2004 The illustrated memoir of the most advanced fighter jet of the 1950s. At its creation in the mid-1950s, the Avro Arrow was a fighter jet without equal. This Cold War aircraft was twenty years ahead of its time. Unfortunately, political realities resulted in the complete termination of the Arrow project. Cancellation of the Arrow called for the destruction of all photos, drawings, models, specifications and tooling. Even the aircraft themselves were disassembled and destroyed. Avro Arrow is a fascinating historical record with an extensive collection of rare and highly prized photos, drawings and diagrams. Using two hundred images, the book traces the story of the Arrow from its inception to roll out and flight test, including advanced proposals for the development of future version. Primary sources include: Taped interviews, test pilots' firsthand impressions, Avro officials and many plant personnel Surviving company records Declassified government documents. Diagrams offer stunning details such as the North American strategic defense zones and interception tactics proposed for bomber attacks. This book concentrates solely on the vision, design and technical excellence of the airplane itself rather than the politics of its demise.

The Birth of NASA Manfred "Dutch" von Ehrenfried,2016-03-23 This is the story of the work of the original NASA space pioneers; men and women who were suddenly organized in 1958 from the then National Advisory Committee on Aeronautics (NACA) into the Space Task Group. A relatively small group, they developed the initial mission concept plans and procedures for the U. S. space program. Then they boldly built hardware and facilities to accomplish those missions. The group existed only three years before they were transferred to the Manned Spacecraft Center in Houston, Texas, in 1962, but their organization left a large mark on what would follow.Von Ehrenfried's personal experience with the STG at Langley uniquely positions him to describe the way the group was structured and how it reacted to the new demands of a post-Sputnik era. He artfully analyzes how the growing space program was managed and what techniques enabled it to develop so quickly from an operations perspective. The result is a fascinating window into history, amply backed up by first person documentation and interviews.

Runway Safety Iain McCreary, 2010-10-31 This report is the single best analysis of runway safety, FOD, and on-runway strikes presently available. It is data driven, values neutral, and draws together information from airlines, airports, regulators, and service/technology. It, for the first time, knits together an industry-wide perspective that allows like-for-like comparison of runway safety incidents, including incursions and excursions. Chapters detail the characteristics and statistics behind strike damage; direct and indirect costs; expected costs for the leading airlines and airports; a step-by-step airport investment case; an airline investment case; and details on the minimum required performance standards for scanning systems. The results are compelling and, for many readers, surprising. Long held assumptions about what is and is not important, about what works to reduce risks and what does not, are turned upside down. Structured for easy reading, and quickly digestible with tools to support your own analyses, the report is quickly becoming 'required reading' in the aviation community. Whether read by a regulator, airport operator, airline, service provider, or technology vendors, this report has the answers to your questions about FOD, bird strikes, and automated runway scanning.

Introduction to UAV Systems Paul Fahlstrom, Thomas Gleason, 2012-07-11 Unmanned aerial vehicles (UAVs) have been widely adopted in the military world over the last decade and the success of these military applications is increasingly driving efforts to establish unmanned aircraft in non-military roles. *Introduction to UAV Systems*, 4th edition provides a comprehensive introduction to all of the elements of a complete Unmanned Aircraft System (UAS). It addresses the air vehicle, mission planning and control, several types of mission payloads, data links and how they interact with mission performance, and launch and recovery concepts. This book provides enough information to encourage a student to learn more; to provide a specialist with a basic appreciation of the technical issues that drive other parts of the system and interact with their specialty; or to help a program manager understand system-level tradeoffs and know what questions to ask. Key features: Comprehensive overview of all elements of a UAS and of how they interact. Introduces the underlying concepts of key subsystems. Emphasizes system-integration issues and how they relate to subsystem design choices. Practical discussion of issues informed by lessons learned in UAV programs. *Introduction to UAV Systems*, 4th edition is written both for newcomers to the subject and for experienced members of the UAV community who desire a comprehensive overview at the system level. As well as being a primary text for an introductory course on UAS or a supplementary text in a course that goes into more depth in one of the individual technologies involved in a UAS, this book is a useful overview for practicing engineers, researchers, managers, and consultants interested in UAV systems.

The English Electric Lightning Martin W. Bowman, 2018-01-30 A photo-packed history of this Cold War-era supersonic fighter aircraft. The early 1950s were a boom time for British aviation. The lessons of six years of war had been learned, and much of the research into jet engines, radar, and aerodynamics had begun to reach fruition. In Britain, jet engine technology led the world while wartime developments into swept-wing design in Germany and their transonic research program were used to give western design teams a quantum leap in aircraft technology. The English Electric Lightning emerged at this time. This supersonic fighter aircraft of

the Cold War era is perhaps best remembered for its amazing takeoff performance, its exceptional rate of climb, and its immense speed. Here, Martin Bowman takes us on a photographic journey, illustrating the various landmarks of the Lightning's impressive operational history.

Fall of an Arrow Murray Peden, 2003-04-01 On February 20, 1959, Prime Minister John Diefenbaker announced to the House of Commons the cancellation of the CF-105 Arrow. Its development costs to that time were \$340 million. The Arrow was to be the world's unsurpassed interceptor aircraft. Yet within two months of the Prime Minister's announcement, six completed aircraft were dismantled and all papers and documents associated with the project were destroyed. Here is the history and development of the Arrow - the plane that would make Canada the leader in supersonic flight technology. The Arrow was designed to fly at twice the speed of sound and carry the most advanced missile weapons system. Here are the stories of the men and women who were in the vanguard of the new technology - who had come from England, Poland, and the United States to make aviation history.

Storms of Controversy Palmiro Campagna, 2010-04-22 The development of the Avro Arrow was a remarkable Canadian achievement. Its mysterious cancellation in February 1959 prompted questions that have long gone unanswered. What role did the Central Intelligence Agency play in the scrapping of the project? Who in Canada's government was involved in that decision? What, if anything, did Canada get in return? Who ordered the blowtorching of all the prototypes? And did Arrow technology find its way into the American Stealth fighter/bomber program? When *Storms of Controversy* was first published in 1992, its answers to these questions sent a shock wave across the country. Using never-before-released documents, the book exploded the myth that design flaws, cost overruns, or obsolescence had triggered the demise of the Arrow. Now, in this fully revised fourth edition, complete with two new appendices, the bestselling book brings readers up-to-date on the CF-105 Arrow, the most innovative, sophisticated aircraft the world had seen by the end of the 1950s.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Canada's World War II Aces Larry Gray, 2006 They were the heroes of the skies, and their stories continue to amaze and inspire us. In Spitfire cockpits or Lancaster gun turrets, these young men flew and fought for freedom. The stories of Canada's top pilots of the Second World War continue to amaze and inspire us. From Dick Audet, the only Spitfire pilot to ever claim five kills in a single sortie

to Russell Russ Bannock who shot down 19 V-1 rocket bombs in his Mosquito fighter-bomber.

The Strategic Air War Against Germany, 1939-1945 British Bombing Survey Unit, 1998 At the close of the Second World War both the RAF and the United States Army Air Forces sent teams of investigators to the continent of Europe to try and assess the effectiveness of Allied strategic bombing. The British Survey was originally classified and is published here for the first time. By combining the original Report and an analysis of its strengths and weaknesses, together with a short history of the genesis of the British Survey, this work is an important contribution to the continuing historical debate over the effects of the strategic bombing offensive in the Second World War.

Flight Artworks Gary Eason, 2015-09-18 Collected in book form for the first time - and also available as an ebook - are some of Gary Eason's acclaimed Flight Artworks: carefully researched and crafted photorealistic pictures of historical air combat. This first volume presents images of WWII scenes, selected from artworks created since 2011. From my point of view as a pilot for the last 43 years and an RAF fighter pilot for 30 years, the realism he captures is uncanny - Squadron Leader Clive Rowley MBE RAF (Retd) Third edition, September 2015
