Modern Romance Aziz Ansari, Eric Klinenberg, 2016-06-14 The #1 New York Times Bestseller "An engaging look at the often head-scratching, frequently infuriating mating behaviors that shape our love lives." –Refinery 29 A hilarious, thoughtful, and in-depth exploration of the pleasures and perils of modern romance from Aziz Ansari, the star of *Master of None* and one of this generation's sharpest comedic voices At some point, every one of us embarks on a journey to find love. We meet people, date, get into and out of relationships, all with the hope of finding someone with whom we share a deep connection. This seems standard now, but it's wildly different from what people did even just decades ago. Single people today have more romantic options than at any point in human history. With technology, our abilities to connect with and sort through these options are staggering. So why are so many people frustrated? Some of our problems are unique to our time. "Why did this guy just text me an emoji of a pizza?" "Should I go out with this girl even though she listed Combos as one of her favorite snack foods? Combos?!" "My girlfriend just got a message from some dude named Nathan. Who's Nathan? Did he just send her a photo of his penis? Should I check just to be sure?" But the transformation of our romantic lives can't be explained by technology alone. In a short period of time, the whole culture of finding love has changed dramatically. A few decades ago, people would find a decent person who lived in their neighborhood. Their families would meet and, after

deciding neither party seemed like a murderer, they would get married and soon have a kid, all by the time they were twenty-four. Today, people marry later than ever and spend years of their lives on a quest to find the perfect person, a soul mate. For years, Aziz Ansari has been aiming his comic insight at modern romance, but for *Modern Romance*, the book, he decided he needed to take things to another level. He teamed up with NYU sociologist Eric Klinenberg and designed a massive research project, including hundreds of interviews and focus groups conducted everywhere from Tokyo to Buenos Aires to Wichita. They analyzed behavioral data and surveys and created their own online research forum on Reddit, which drew thousands of messages. They enlisted the world's leading social scientists, including Andrew Cherlin, Eli Finkel, Helen Fisher, Sheena Iyengar, Barry Schwartz, Sherry Turkle, and Robb Willer. The result is unlike any social science or humor book we've seen before. In *Modern Romance*, Ansari combines his irreverent humor with cutting-edge social science to give us an unforgettable tour of our new romantic world.

On Freedom Maggie Nelson, 2021-09-09 'One of the most electrifying writers at work in America today, among the sharpest and most supple thinkers of her generation' OLIVIA LAING What can freedom really mean? In this invigorating, essential book, Maggie Nelson explores how we might think, experience or talk about the concept in ways that are responsive to our divided world. Drawing on pop culture, theory and the intimacies and plain exchanges of daily life,

she follows freedom - with all its complexities - through four realms: art, sex, drugs and climate. On Freedom offers a bold new perspective on the challenging times in which we live. 'Tremendously energising' Guardian 'This provocative meditation...shows Nelson at her most original and brilliant' New York Times 'Nelson is such a friend to her reader, such brilliant company... Exhilarating' Literary Review * A New York Times Notable Book * * A Guardian and TLS 'Books of 2021' Pick *

So Close to Being the Sh*t, Y'all Don't Even Know Retta, 2018-05-29 In her hilarious book of essays, Parks and Recreation star Retta shares the stories that led to her success in Hollywood. In *So Close to Being the Sh*t, Y'all Don't Even Know*, Parks and Recreation star Retta takes us on her not-so-meteoric rise from roaches to riches (well, rich enough that she can buy \$15,000 designer handbags yet scared enough to know she's always a heartbeat away from ramen with American cheese). Throwing her hard-working Liberian parents for a loop, Retta abandons her plan to attend med school after graduating Duke University to move to Hollywood to star in her own sitcom—like her comedy heroes Lucille Ball and Roseanne. Say what? Word. Turns out Retta might actually be on to something. After winning Comedy Central's stand-up competition, she should be ready for prime time—but a fear of success derails her biggest dream. Whether reminiscing about her days as a contract chemist at GlaxoSmithKline, telling “dirty” jokes to Mormons, feeling like the odd man out on Parks, fending off racist trolls on Twitter,

flirting with Michael Fassbender, or expertly stalking the cast of Hamilton, Retta's unique voice and refreshing honesty will make you laugh, cry, and laugh so hard you'll cry. Her eponymous sitcom might not have happened yet, but by the end of So Close to Being the Sh*t, you'll be rooting for Retta to be the next one-named wonder to take over your television. And she just might inspire you to reach for the stars, too.

Model Order Reduction Techniques with Applications in Electrical Engineering L. Fortuna,G. Nunnari,A. Gallo,2012-12-06 Model Order Reduction Techniques focuses on model reduction problems with particular applications in electrical engineering. Starting with a clear outline of the technique and their wide methodological background, central topics are introduced including mathematical tools, physical processes, numerical computing experience, software developments and knowledge of system theory. Several model reduction algorithms are then discussed. The aim of this work is to give the reader an overview of reduced-order model design and an operative guide. Particular attention is given to providing basic concepts for building expert systems

for model reduction.

Poverty and Famines Amartya Sen, 1983-01-20 The main focus of this book is on the causation of starvation in general and of famines in particular. The author develops the alternative method of analysis—the 'entitlement approach'—concentrating on ownership and exchange, not on food supply. The book also provides a general analysis of the characterization and measurement of poverty. Various approaches used in economics, sociology, and political theory are critically examined. The predominance of distributional issues, including distribution between different occupation groups, links up the problem of conceptualizing poverty with that of analyzing starvation.

Well Completion Design Jonathan Bellarby, 2009-04-13 Completions are the conduit between hydrocarbon reservoirs and surface facilities. They are a fundamental part of any hydrocarbon field development project. They have to be designed for safely maximising the hydrocarbon recovery from the well and may have to last for many years under ever changing conditions. Issues include: connection with the reservoir rock, avoiding sand production, selecting the correct interval, pumps and other forms of artificial lift, safety and integrity, equipment selection and installation and future well interventions. * Course book based on course well completion design by TRACS International * Unique in its field: Coverage of offshore, subsea, and landbased completions in all of the major hydrocarbon basins of the world. * Full colour

Faithful Education Ali Riaz, 2008-09-03 In the wake of the terrorist attacks on September 11, 2001, discussions on ties between Islamic religious education institutions, namely madrassahs, and transnational terrorist groups have featured prominently in the Western media. In the frenzied coverage of events, however, vital questions have been overlooked: What do we know about the madrassahs? Should Western policymakers be alarmed by the recent increase in the number of these institutions in Muslim countries? Is there any connection between them and the global jihad? Ali Riaz responds to these questions through an in-depth examination of the madraassahs in Pakistan, Bangladesh, and India. In *Faithful Education*, he examines these institutions and their roles in relation to current international politics.

Lost Islamic History Firas Alkhateeb, 2017-11-15 Islam has been one of the most powerful religious, social and political forces in history. Over the last 1400 years, from origins in Arabia, a succession of Muslim polities and later empires expanded to control territories and peoples that ultimately stretched from southern France to East Africa and South East Asia. Yet many of the contributions of Muslim thinkers, scientists and theologians, not to mention rulers, statesmen and soldiers, have been occluded. This book rescues from oblivion and neglect some of these personalities and institutions while offering the reader a new narrative of this lost Islamic history. The Umayyads, Abbasids, and Ottomans feature in the story, as do Muslim Spain, the savannah kingdoms of West Africa and the Mughal Empire, along with the

later European colonization of Muslim lands and the development of modern nation-states in the Muslim world. Throughout, the impact of Islamic belief on scientific advancement, social structures, and cultural development is given due prominence, and the text is complemented by portraits of key personalities, inventions and little known historical nuggets. The history of Islam and of the world's Muslims brings together diverse peoples, geographies and states, all interwoven into one narrative that begins with Muhammad and continues to this day.

Imperial Hubris Michael Scheuer, 2004-06-30 Though U.S. leaders try to convince the world of their success in fighting al Qaeda, one anonymous member of the U.S. intelligence community would like to inform the public that we are, in fact, losing the war on terror. Further, until U.S. leaders recognize the errant path they have irresponsibly chosen, he says, our enemies will only grow stronger. According to the author, the greatest danger for Americans confronting the Islamist threat is to believe-at the urging of U.S. leaders-that Muslims attack us for what we are and what we think rather than for what we do. Blustering political rhetoric.

Palestinian Identity Rashid Khalidi, 2010 Reprint of work originally published in 1997. New introduction by the author.

A Brief History of Pakistan James Wynbrandt, 2009 From the Publisher: A Brief History of Pakistan attempts to answer these questions in a concise yet thorough account. By illuminating the nation's past, this book offers readers

a detailed perspective of Pakistan today and enables them to consider soundly how the country, once a birthplace of civilization, might change in the future.

Elements of Programming Interviews Adnan Aziz,Tsung-Hsien Lee,Amit Prakash,2012-10-11 The core of EPI is a collection of over 300 problems with detailed solutions, including 100 figures, 250 tested programs, and 150 variants. The problems are representative of questions asked at the leading software companies. The book begins with a summary of the nontechnical aspects of interviewing, such as common mistakes, strategies for a great interview, perspectives from the other side of the table, tips on negotiating the best offer, and a guide to the best ways to use EPI. The technical core of EPI is a sequence of chapters on basic and advanced data structures, searching, sorting, broad algorithmic principles, concurrency, and system design. Each chapter consists of a brief review, followed by a broad and thought-provoking series of problems. We include a summary of data structure, algorithm, and problem solving patterns.

Theory in Archaeology Peter J. Ucko,2005-08-10 Theory in Archaeology tackles important questions about the diversity in archaeological theory and practice which face the discipline in the 1990s. What is the relationship between theory and practice? How does 'World' archaeological theory differ from 'European'? Can one be a good practitioner without theory? This unique book brings together contributors from many different countries and

continents to provide the first truly global perspective on archaeological theory. They examine the nature of material culture studies and look at problems of ethnicity, regionalism, and nationality. They consider, too, another fundamental of archaeological inquiry: can our research be objective, or must 'the past' always be a relativistic construction? Theory in Archaeology is an important book whose authors bring together very different perceptions of the past. Its wide scope and interest will attract an international readership among students and academics alike.

The Science of Relationships Gary W. Lewandowski, 2011

Muhammad Martin Lings, 1991 Acclaimed worldwide as the definitive biography of the Prophet Muhammad in the English language, Martin Lings' Muhammad: His Life Based to the Earliest Sources is unlike any other. Based on Arabic sources of the eighth and ninth centuries, of which some important passages are translated here for the first time, it owes the freshness and directness of its approach to the words of men and women who heard Muhammad speak and witnessed the events of his life. Martin Lings has an unusual gift for narrative. He has adopted a style which is at once extremely readable and reflects both the simplicity and grandeur of the story. The result is a book which will be read with equal enjoyment by those already familiar with Muhammad's life and those coming to it for the first time. Muhammad: His Life Based to the Earliest Sources was given an award by the government of Pakistan, and selected as the best biography of the Prophet in English at the

National Seerat Conference in Islamabad in 1983.

The author discusses advantages to both researchers and librarians and provides current examples of innovative uses of e-books in academic contexts.
