Airline Operations and Management Gerald N. Cook, Bruce G. Billig, 2023-05-04 Airline Operations and Management: A Management Textbook presents a survey of the airline industry, with a strong managerial perspective. It integrates and applies the fundamentals of several management disciplines, particularly operations, marketing, economics and finance, to develop a comprehensive overview. It also provides readers with a solid historical background, and offers a global perspective of the industry, with examples drawn from airlines around the world. Updates for the second edition include: Fresh data and examples A range of international case studies exploring real-life applications New or increased coverage of key topics such as the COVID-19 pandemic, state aid, and new business models New chapters on fleet management and labor relations and HRM Lecture slides for instructors This textbook is for advanced undergraduate and graduate students of airline management, but it should also be useful to entry and junior-level airline managers and professionals seeking to expand their knowledge of the industry beyond their functional area.

Airport Systems: Planning, Design and Management 2/E Richard de Neufville, Amedeo Odoni, Peter Belobaba, Tom Reynolds, 2013-04-23 THE MOST PRACTICAL, COMPREHENSIVE GUIDE TO THE PLANNING, DESIGN, AND MANAGEMENT OF AIRPORTS--UPDATED BY LEADING PROFESSIONALS With the accelerated rate of change occurring throughout the aviation industry, this edition is a timely and very effective resource for ensuring both airport professionals and those interested in airports acquire a comprehensive understanding of the changes taking place, and how they impact airports and the communities they serve. A must read. -- James M. Crites, Executive Vice President of Operations, Dallas/Fort Worth International Airport Airport Systems has been a must read for my management team and my graduate students because of its outstanding comprehensiveness and clarity. Now further enhanced by an expanded treatment of both environmental and air carrier issues, it promises to retain its place as the foremost text in the airport planning, engineering and management field. -- Dr. Lloyd McCoomb, retired CEO Toronto-Pearson Airport, Chair of Canadian Air Transport Security Authority The chapter on Dynamic Strategic Planning should be required reading for every airport CEO and CFO. As de Neufville and Odoni emphasise, the aviation world is constantly changing and airport master planning must evolve to be more strategic and adaptable to ever changing conditions. -- Dr. Michael Tretheway, Chief Economist, InterVISTAS Consulting Group Over the past decade, the airport industry has evolved considerably. Airport technology has changed. New research has taken place. The major airlines have consolidated, changing demand for airport services. In order to reflect these and other major shifts in the airport industry, some of the world's leading professionals have updated the premier text on airport design - making it, now more than ever, the field's most comprehensive resource of its kind. NEW TO THIS EDITION: Chapter-ending conclusions, with reference material, and exercises Coverage of the latest aircraft technology and air traffic control Advances in the design, planning, and management of airports Additional chapter on Aircraft Impact on Airports Updated environmental regulations and international rules Two contributing authors from Massachusetts Institute of Technology

Introduction to Air Transport Economics Bijan Vasigh, Ken Fleming, 2016-05-06 Introduction to Air Transport Economics: From Theory to Applications uniquely merges the institutional and technical aspects of the aviation industry with their theoretical economic underpinnings. In one comprehensive textbook it applies economic theory to all aspects of the aviation industry, bringing together the numerous and informative articles and institutional developments that have characterized the field of airline economics in the last two decades as well as adding a number of areas original to an aviation text. Its integrative approach offers a fresh point of view that will find favor with many students of aviation. The book offers a self-contained theory and applications-oriented text for any individual intent on entering the aviation industry as a practicing professional in the management area. It will be of greatest relevance to undergraduate and graduate students interested in obtaining a more complete understanding of the economics of the aviation industry. It will also appeal to many professionals who seek an accessible and practical explanation of the underlying economic forces that shape the industry. The second edition has been extensively updated throughout. It features new coverage of macroeconomics for managers, expanded analysis of modern revenue management and pricing decisions, and also reflects the many significant developments that have occurred since the original's publication. Instructors will find this modernized edition easier to use in class, and suitable to a wider variety of undergraduate or graduate course structures, while industry practitioners and all readers will find it more intuitively organized and more user friendly.

English in Global Aviation Eric Frigal,Elizabeth Mathews,Jennifer Roberts,2019-11-14 Taking readers step-by-step through the major issues surrounding the use of English in the global aviation industry, this book provides a clear introduction to turning research into practice in the field of English for Specific Purposes (ESP), specifically Aviation English, and a valuable case study of applied linguistics in action. With both cutting-edge research and evidence-based practice, the critical role of English in aviation is explored across a variety of contexts, including the national and global policies impacting training and language assessment for pilots, air-traffic controllers, ground staff, and students. English in Global Aviation teaches readers how to apply linguistic research to real world, practical settings. The book uses a range of corpus-based findings and related research to provide an effective analysis of the language needs of the aviation industry and an extended look at linguistic principles in action. Readers are presented with case studies, transcriptions, radiotelephony, and a clear breakdown of the common vocabulary and phrasal patterns of aviation discourse. Students and teachers of both linguistics and aviation will discover the requirements and challenges of successful intercultural communication in this industry, as well as insights into how to teach, develop, and assess aviation English language courses.

Air transport - tourism nexus: A destination management perspective Maya Georgieva Ivanova,2017-06-18 The aim of current research monograph is to provide a deeper view of the complex relationship between the air transport and tourism industries. The adopted point of view – a destination perspective – enables one to go into a more detailed exploration of the topic and to consider issues that usually remain invisible at the strategic managers' level. The elaborated destination analysis framework and the identification of common points between aviation and tourism set the groundwork for further examination of the air transport-tourism nexus. Therefore, the book would be useful both for students and researchers in the field of tourism, hospitality and destination management, and for practitioners and destination management representatives who may find interesting insights and ideas for improvement. The monograph would be suitable also for managers and representatives from the air transport industry by providing them with the other point of view – that of the local tourist destination – to consider in their strategic growth and negotiation process.

Black Lightning: The Legacy of the Lockheed Blackbirds Jeannette Remak, Black Lightning—The Legacy of the Lockheed Blackbirds Revised edition of The Archangel and the Oxcart Black Lightning—The Legacy of the Lockheed Blackbirds—brings to life the unique and mesmerizing story of Kelly Johnson's Lockheed Blackbirds; The A-12 Cygnus, M-21/D-21 mother daughter reconnaissance drone, the YF-12 Interceptor and of course, the magnificent SR-71. As the Cold War became more deadly, the United States needed to find answers to the Soviet Union and their dangerous games. As the USSR progressed in technology, the United States had a need to know what was happening on the other side of the Iron Curtain. The spy on the ground was not viable anymore. The CIA had to find an answer to replace that spy. Aerial Reconnaissance in the U.S. was in trouble. The USAF was recycling its WWII methods of aerial reconnaissance. The Silent Warriors, those who took those reconnaissance missions unbeknownst to family and many in the military itself, were crews that were becoming casualties of the USSR MiGs faster than anyone thought possible. A new answer was needed and that answer was speed. Lockheed and the CIA came up with the speed, Mach 3 speed for the first time in aerial reconnaissance and aviation history. Black Lightning—The Legacy of the Lockheed Blackbirds tells the story of the men and aircraft that covered enemy territory, alone, and unarmed. These CIA pilots and their speed hungry aircraft returned the photographic material for the U.S. faster than ever before. Black Lightning—The Legacy of the Lockheed Blackbirds documents the history of the fastest aircraft ever known and the men that flew them.

Air Force F-16 Aircraft Engine Aerosol Emissions Under Cruise Altitude Conditions National Aeronautics and Space Administration,2018-08-27 Selected results from the June 1997 Third Subsonic Assessment Near-Field Interactions Flight (SNIF-III) Experiment are documented. The primary objectives of the SNIF-III experiment were to determine the partitioning and abundance of sulfur species and to examine the formation and growth of aerosol particles in the exhaust of F-16 aircraft as a function of atmospheric and aircraft operating conditions and fuel sulfur concentration. This information is, in turn, being used to address questions regarding the fate of aircraft fuel sulfur impurities and to evaluate the potential of their oxidation products to perturb aerosol concentrations and surface areas in the upper troposphere. SNIF-III included participation of the Vermont and New Jersey Air National Guard F-16's as source aircraft and the Wallops Flight Facility T-39 Sabreliner as the sampling platform. F-16's were chosen as a source aircraft because they are powered by the modern F-100 Series 220 engine which is projected to be representative of future commercial aircraft engine technology. The T-39 instrument suite included sensors for measuring volatile and non-volatile condensation nuclei (CN), aerosol size distributions over the range from 0.1 to 3.0 (micro)m, 3-D winds, temperature, dewpoint, carbon dioxide (CO₂), sulfur dioxide (SO₂), sulfuric acid (H₂SO₄), and nitric acid (HNO₃).Anderson, Bruce E. and Cofer, W.
