It's an easy to understand paradigm that provides writers and filmmakers the interconnecting, powerful storytelling elements they need. We Don't Need Roads Caseen Gaines, 2015-06-23 A behind-the-scenes look at the making of the iconic Back to the Future trilogy—the perfect movie gift for fans of the

franchise, actors, writers, and filmmakers who contributed to this beloved pop culture phenomenon. Long before Marty McFly and Doc Brown traveled through time in a flying DeLorean, director Robert Zemeckis, and his friend and writing partner Bob Gale, worked tirelessly to break into the industry with a hit. During their journey to realize their dream, they encountered unprecedented challenges and regularly took the difficult way out. For the first time ever, the story of how these two young filmmakers struck lightning is being told by those who witnessed it. *We Don't Need Roads* draws from over 500 hours of interviews, including original interviews with Zemeckis, Gale, Christopher Lloyd, Lea Thompson, Huey Lewis, and over fifty others who contributed to one of the most popular and profitable film trilogies of all time. The book includes a 16-page color photo insert with behind-the-scenes pictures, concept art, and more. With a focus not only on the movies, but also the lasting impact of the franchise and its fandom, *We Don't Need Roads* is the ultimate read for anyone who has ever wanted to ride a Hoverboard, hang from the top of a clock tower, travel through the space-time continuum, or find out what really happened to Eric Stoltz after the first six weeks of filming. So, why don't you make like a tree and get outta here—and start reading! *We Don't Need Roads* is your density. “What fun! Deeply researched and engagingly written...the book *Back to the Future* fans have been craving for decades. Geekily enthusiastic and chock full of never-before-heard tales of what went on both on and off the screen, *We Don't Need Roads* is a book worthy of the beloved trilogy itself.”—Brian Jay Jones, author of the national bestseller *Jim Henson: The Biography* “A very compelling and enjoyable history of our trilogy. For me, reading it was like going back in time. And—Great Scott—there were even a few anecdotes that I'd never

heard!”—Bob Gale, co-creator, co-producer, and co-writer of the Back to the Future trilogy

The Time Machine and Other Stories H. G.

Wells, 2016-09-14 This book is a collection of eight short stories written by H. G. Wells. The Short Stories of H. G. Wells constitutes a must-have for lovers of the short story form and is not to be missed by fans of Wells' fantastic work. Herbert George Wells (1866 - 1946) was a prolific English writer who wrote in a variety of genres, including the novel, politics, history, and social commentary. Today, he is perhaps best remembered for his contributions to the science fiction genre thanks to such novels as *The Time Machine* (1895), *The Invisible Man* (1897), and *The War of the Worlds* (1898). The Father of Science Fiction was also a staunch socialist, and his later works are increasingly political and didactic. The stories include: *The Time Machine*, *The Empire of the Ants*, *A Vision of Judgement*, *The Land Ironclads*, *The Beautiful Suit*, *The Door in the Wall*, *The Pearl of Love*, and *The Country of the Blind*. Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this book now in an affordable, modern, high-quality edition complete with a specially commissioned new biography of the author.

Hazards of Time Travel Joyce Carol Oates, 2018-11-27

An ingenious, dystopian novel of one young woman's resistance against the constraints of an oppressive society, from the inventive imagination of Joyce Carol Oates "Time travel" — and its hazards—are made literal in this astonishing new novel in which a recklessly idealistic girl dares to test the perimeters of her tightly controlled (future) world and is punished by being sent back in time to a region of North America — "Wainscotia, Wisconsin"—that existed eighty years before. Cast adrift in time in this idyllic Midwestern town she is set upon a course of

“rehabilitation”—but cannot resist falling in love with a fellow exile and questioning the constraints of the Wainscotia world with results that are both devastating and liberating. Arresting and visionary, *Hazards of Time Travel* is both a novel of harrowing discovery and an exquisitely wrought love story that may be Joyce Carol Oates’s most unexpected novel so far.

The Willpower Instinct Kelly McGonigal, 2013-12-31
Based on Stanford University psychologist Kelly McGonigal's wildly popular course *The Science of Willpower*, *The Willpower Instinct* is the first book to explain the science of self-control and how it can be harnessed to improve our health, happiness, and productivity. Informed by the latest research and combining cutting-edge insights from psychology, economics, neuroscience, and medicine, *The Willpower Instinct* explains exactly what willpower is, how it works, and why it matters. For example, readers will learn:

- Willpower is a mind-body response, not a virtue. It is a biological function that can be improved through mindfulness, exercise, nutrition, and sleep.
- Willpower is not an unlimited resource. Too much self-control can actually be bad for your health.
- Temptation and stress hijack the brain's systems of self-control, but the brain can be trained for greater willpower
- Guilt and shame over your setbacks lead to giving in again, but self-forgiveness and self-compassion boost self-control.
- Giving up control is sometimes the only way to gain self-control.
- Willpower failures are contagious—you can catch the desire to overspend or overeat from your friends—but you can also catch self-control from the right role models.

In the groundbreaking tradition of *Getting Things Done*, *The Willpower Instinct* combines life-changing prescriptive advice and complementary exercises to help readers with goals ranging from losing weight to more patient parenting,

less procrastination, better health, and greater productivity at work.

All Our Wrong Todays Elan Mastai, 2018-02-20
“Entertainingly mixes thrills and humor.”—Entertainment Weekly “[An] amazing debut novel....Dazzling and complex....Fearlessly funny storytelling.”—The Washington

Post “Instantly engaging....A timeless, if mind-bending, story about the journeys we take, populated by friends, family, lovers, and others, that show us who we might be, could be—and maybe never should be—that eventually leads us to who we are.”—USA Today

Elan Mastai's acclaimed debut novel is a story of friendship and family, of unexpected journeys and alternate paths, and of love in its multitude of forms. It's 2016, and in Tom Barren's world, technology has solved all of humanity's problems—there's no war, no poverty, no under-ripe avocados.

Unfortunately, Tom isn't happy. He's lost the girl of his dreams. And what do you do when you're heartbroken and have a time machine? Something stupid. Finding himself stranded in a terrible alternate reality—which we immediately recognize as our 2016—Tom is desperate to fix his mistake and go home. Right up until the moment he discovers wonderfully unexpected versions of his family, his career, and the woman who may just be the love of his life. Now Tom faces an impossible choice. Go back to his perfect but loveless life. Or stay in our messy reality with a soulmate by his side. His search for the answer takes him across continents and timelines in a quest to figure out, finally, who he really is and what his future—our future—is supposed to be. Filled with humor and heart and packed with insight, intelligence, and mind-bending invention, *All Our Wrong Todays* is a powerful and moving story of life, loss, and love.

Saving Marty Paul Griffin, 2017-09-19 Fans of Because of Winn Dixie will adore this warm and heart-wrenching story of the friendship between a boy and a pig who thinks it's a dog. Eleven-year-old Lorenzo Ventura knows heroes are rare—like his father, who died in the war, or his friend Paloma Lee, who fearlessly pursues her dream of being a famous musician. Renzo would never describe himself as a hero, but his chance comes when he adopts Marty, a runt piglet. Marty is extraordinary—he thinks he's a dog and acts like one too—and his bond with Renzo is truly one of a kind. At first, the family farm seems like the perfect home for Marty, but as he approaches 350 pounds, it becomes harder for Renzo to convince his mom that a giant pig makes a good pet. So when Marty causes a dangerous (and expensive) accident, Renzo knows Marty's time is up. He'd do anything and everything for his best friend, but will everything be enough to save Marty? Paul Griffin masterfully melds the heartrending and the hopeful in this unforgettable story about the power of friendship . . . and the unsung heroes all around us.

Time Travel For Sale Dan Arthur Busby, 2022-02-27 Time Travel For Sale is a sequel to Lost in Time: Trapped In A Prehistoric World. Jimmy is a scientist who has invented a time machine, and is sent by the government to the Cretaceous period by his own invention for a false murder

accusation. There, he is forced to remake another time machine in that primitive environment. When this is finally accomplished, he and his two friends find their way to a utopia of the future. They are fortunate enough to meet a government worker named Tom who has devoted his life to rediscovering time travel technology. He offers Jimmy a deal he can't refuse to share his scientific secrets.

Ultimately the two men open a business of tours to prehistoric times. The pair become wealthy from their blossoming business. However, the mayor has gotten them to sign a contract allowing him to control their business. He wants them to charge hunters to accompany them on safaris where they will find and kill dinosaurs of any chosen time period. This presents some very serious safety issues.

The Lost Journals of Nikola Tesla Tim R. Swartz, 2012-02
NEWLY REVISED EDITION! HERE NOW -- IN THIS EXPANDED WORK -- ARE SOME OF THE MOST BIZARRE EXPERIMENTS CARRIED OUT BY THE WORLD'S GREATEST ELECTRICAL WIZARD UNDER THE MOST HUSH-HUSH OF CIRCUMSTANCES. EXPERIMENTS DEALING WITH. . . TIME TRAVEL, ALTERNATIVE AND FREE ENERGY, AS WELL AS A POSSIBLE NAZI FLYING SAUCER CONNECTION. Nikola Tesla was the genius credited for creating much of modern, electrical technology. Yet, his contributions have been largely forgotten. An examination of Nikola Tesla's lost papers -- some of which were confiscated by the U.S. government after his death -- shows that Tesla was interested in and experimented with many concepts that have been regarded until recently as wild ideas. It's no surprise that Tesla was loath to speak of these kinds of interests -- after all, even now these areas of study still come under fire by the majority of mainstream scientists who refuse to use their imaginations and intellect and scorn such matters with terms such as voodoo science and

unadulterated quackery. It is now known that there have been a number of top-secret programs that were devoted to either investigating or, shockingly enough, actively using technology based on some of Tesla's more unorthodox ideas. Both the United States and Russia have active Particle Beam and RF (radio-frequency) weaponry that has been in operation since the early 1970s -- all as a result of Tesla's early 19th and 20th Century experiments. To say that there are other black budget projects involving Tesla-based research would vastly underestimate the total amount of research and development being conducted right now by many countries worldwide. And these are the projects that we know about. Who knows how many deep, dark, secret projects are being conducted right now with science that could be decades, even hundreds of years, beyond what civilian science knows about today? This work exposes such topics as: Reverse Gravity -- Free Energy -- Contact With Hidden Dimensions -- Mysterious Radio Signals From Space -- Earth Changes -- Freak Weather Patterns -- Electric Death Rays -- UFOs -- Particle Beam Weapons and much, much more.
