Paper Pups 2 from PaperMade adds more pups, stories and scenes to the first breakout hit Paper Pups (powerHouse Books, 2013) based on the popular paper toy book series. Featuring eight new Pups, scenery and more stories--each character and scene is pre-cut and pre-scored so they simply punch out, fold up, and turn into adorable 3D objects, with easy instructions right on the page. Paper Pups 2 is designed to work on its own or in combination with Paper Pups, allowing for more imagination, more story time and more trouble the Pups can get into together! All PaperMade books masterfully combine paper craft with advanced paper engineering so no glue, tape or tools are ever needed! Paper Pups 2 make the best companions for anyone age 7 to 101--and come with 3 unique settings and story starters to make paper stories come to life in 3D.

**Terrestrial Mammal Conservation: Global Evidence for the Effects of Interventions for Terrestrial Mammals Excluding Bats and Primates** Nick A. Littlewood,Ricardo Rocha,Rebecca K. Smith,Philip A. Martin,Sarah L. Lockhart,Rebecca F. Schoonover,Elspeth Wilman,Andrew J. Bladon,Katie A. Sainsbury,Stuart Pimm,William J. Sutherland,2020-11-30 Terrestrial Mammal Conservation provides a thorough summary of the available scientific evidence of what is known, or not known, about the effectiveness of all of the conservation actions for wild terrestrial mammals across the world (excluding bats and primates, which are covered in separate synopses). Actions are organized into categories based on the International Union for Conservation of Nature classifications of direct threats and conservation actions. Over the course of fifteen chapters, the authors consider interventions as wide ranging as creating uncultivated margins around fields, prescribed burning, setting hunting quotas and removing non-native mammals. This book is written in an accessible style and is designed to be an invaluable resource for anyone concerned with the practical conservation of terrestrial mammals. The authors consulted an international group of terrestrial mammal experts and conservationists to produce this synopsis. Funding was provided by the MAVA Foundation, Arcadia and National Geographic Big Cats Initiative. Terrestrial Mammal Conservation is the seventeenth publication in the Conservation Evidence Series, linked to the online resource [www.ConservationEvidence.com](http://www.ConservationEvidence.com). Conservation Evidence Synopses are designed to promote a more evidence-based approach to biodiversity conservation. Others in the series include Bat Conservation, Primate Conservation, Bird Conservation and Forest Conservation and more are in preparation. Expert assessment of the evidence summarised within synopses is provided online and within the annual publication What Works in Conservation.

*Manifestly Haraway* Donna J. Haraway,2016-04-01 Electrifying, provocative, and controversial when first published thirty years ago, Donna Haraway's "Cyborg Manifesto" is even more relevant today, when the divisions that she so eloquently challenges—of human and machine but also of gender, class, race, ethnicity, sexuality, and location—are increasingly complex. The subsequent "Companion Species Manifesto," which further questions the human–nonhuman disjunction, is no less urgently needed in our time of environmental crisis and profound polarization. Manifestly Haraway brings together these momentous manifestos to expose the continuity and ramifying force of Haraway's thought, whose significance emerges with engaging immediacy in a sustained conversation between the author and her long-term friend and colleague Cary Wolfe. Reading cyborgs and companion species through and with each other, Haraway and Wolfe join in a wide-ranging exchange on the history and meaning of the manifestos in the context of biopolitics, feminism, Marxism, human–nonhuman relationships, making kin, literary tropes, material semiotics, the negative way of knowing, secular Catholicism, and more. The

conversation ends by revealing the early stages of Haraway's "Chthulucene Manifesto," in tension with the teleologies of the doleful Anthropocene and the exterminationist Capitalocene. Deeply dedicated to a diverse and robust earthly flourishing, Manifestly Haraway promises to reignite needed discussion in and out of the academy about biologies, technologies, histories, and still possible futures.

*Cheetahs: Biology and Conservation*, 2017-11-28 Cheetahs: Biology and Conservation reports on the science and conservation of the cheetah. This volume demonstrates the interdisciplinary nature of research and conservation efforts to study and protect the cheetah. The book begins with chapters on the evolution, genetics, physiology, ecology and behavior of the species, as well as distribution reports from range countries. These introductory chapters lead into discussions of the challenges facing cheetah survival, including habitat loss, declining prey base, human-wildlife conflict, illegal trade, and newly-emerging threats, notably climate change. This book also focuses on conservation strategies and solutions, including environmental education and alternative livelihoods. Chapters on the role of captive cheetahs to conservation and the long-term research of the species are included, as are a brief discussion of the methods and analyses used to study the cheetah. The book concludes with the conservation status and future outlook of the species. Cheetahs: Biology and Conservation is a valuable resource for the regional and global communities of cheetah conservationists, researchers, and academics. Although cheetah focussed the book provides information relevant to the study of broader topics such as wildlife conservation, captive breeding, habitat management, conservation biology and animal behaviour. Cover photograph by Angela Scott Includes chapters by the world's leading cheetah researchers and practitioners, who have focused their efforts on this high-profile species of conservation concern Provides findings as a combination of scientific detail and basic explanations so that they can be available not only to cheetah researchers and conservationists, but also to policy makers, business leaders, zoo managers, academics, students, and people interested in the cheetah and its future Presents the current knowledge of the species, helping lay the foundations and best practices for cheetah conservation and research worldwide Additional protocols and forms (which were provided by authors) can be found at the Cheetahs: Biology and Conservation companion site: <https://www.elsevier.com/books-and-journals/book-companion/9780128040881>

The North American Model of Wildlife Conservation Shane P. Mahoney, Valerius Geist, 2019-09-10 The foremost experts on the North American Model of Wildlife Conservation come together to discuss its role in the rescue, recovery, and future of our wildlife resources. At the end of the nineteenth century, North America suffered a catastrophic loss of wildlife driven by unbridled resource extraction, market hunting, and unrelenting subsistence killing. This crisis led powerful political forces in the United States and Canada to collaborate in the hopes of reversing the process, not merely halting the extinctions but returning wildlife to abundance. While there was great understanding of how to manage wildlife in Europe, where wildlife management was an old, mature profession, Continental methods depended on social values often unacceptable to North Americans. Even Canada, a loyal colony of England, abandoned wildlife management as practiced in the mother country and joined forces with like-minded Americans to develop a revolutionary system of wildlife conservation. In

time, and surviving the close scrutiny and hard ongoing debate of open, democratic societies, this series of conservation practices became known as the North American Model of Wildlife Conservation. In this book, editors Shane P. Mahoney and Valerius Geist, both leading authorities on the North American Model, bring together their expert colleagues to provide a comprehensive overview of the origins, achievements, and shortcomings of this highly successful conservation approach. This volume • reviews the emergence of conservation in late nineteenth–early twentieth century North America • provides detailed explorations of the Model's institutions, principles, laws, and policies • places the Model within ecological, cultural, and socioeconomic contexts • describes the many economic, social, and cultural benefits of wildlife restoration and management • addresses the Model's challenges and limitations while pointing to emerging opportunities for increasing inclusivity and optimizing implementation Studying the North American experience offers insight into how institutionalizing policies and laws while incentivizing citizen engagement can result in a resilient framework for conservation. Written for wildlife professionals, researchers, and students, this book explores the factors that helped fashion an enduring conservation system, one that has not only rescued, recovered, and sustainably utilized wildlife for over a century, but that has also advanced a significant economic driver and a greater scientific understanding of wildlife ecology. Contributors: Leonard A. Brennan, Rosie Cooney, James L. Cummins, Kathryn Frens, Valerius Geist, James R. Heffelfinger, David G. Hewitt, Paul R. Krausman, Shane P. Mahoney, John F. Organ, James Peek, William Porter, John Sandlos, James A. Schaefer

The Intelligence of Dogs Stanley Coren, 2006-01-05 Combining heroic stories of dogs with the latest scientific and psychological information, this book has provoked controversy with its lists that rank more than 100 breeds and its exciting new insights into the thoughts, emotions, and inner lives of dogs.

**Miklós Radnóti** Miklós Radnóti, 2014-06-04 This book contains the complete poems in Hungarian and in English translation of Hungary's great modern poet, Miklós Radnóti, murdered at the age of 35 during the Holocaust. His earliest poems, the six books published during his lifetime, and the poems published posthumously after World War II are included. There is a foreword by Győző Ferencz, one of Hungary's foremost experts on Radnóti's poems, and accompanying essays by the author on dominant themes and recurring images, as well as the relevance of Radnóti's work to Holocaust literature.

**Amphibian Conservation** Rebecca K. Smith, William J. Sutherland, 2014-05-16 Amphibian Conservation is the fourth in the series of Synopses of Conservation Evidence, linked to the online resource [www.ConservationEvidence.com](http://www.ConservationEvidence.com). This synopsis is part of the Conservation Evidence project and provides a useful resource for conservationists. It forms part of a series designed to promote a more evidence-based approach to biodiversity conservation. Others in the series include bee, bird, farmland and bat conservation and many others are in preparation. Approximately 32% of the 7,164+ amphibian species are currently threatened with extinction and at least 43% of species are declining. Despite this, until recently amphibians and their conservation had received little attention. Although work is now being carried out to conserve many species, often it is not adequately documented. This book brings together and summarises the available scientific evidence and experience relevant to the practical conservation of amphibians. The authors consulted an international group of amphibian experts and conservationists to produce a thorough summary of what is known, or not known, about the effectiveness of amphibian conservation actions across

the world. The book is packed with literature summaries and citations; a veritable information goldmine for graduate students and researchers. It also admirably provides decision makers with a well-researched resource of proven interventions that can be employed to stem/reverse the decline of amphibian populations.

**Starlight and Time** D. Russell Humphreys,1996-10 The Bible says the universe is just thousands of years old, and yet we can see stars that are billions of light-years away. Until now, creation scientists have not had a satisfactory answer to this puzzle, but the new cosmology outlined in this book offers a fresh and scientifically sound solution. Though he challenges some traditional creationist theories, Dr. Humphreys takes Scripture very straightforwardly, upholding its inerrancy and the idea of a young universe as he explains days one through four of creation week.

**Livestock Protection Dogs** Orysia Dawydiak,David E. Sims,2004 Orysia Dawydiak and David Sims have achieved international fame for their pioneering work with livestock protection dogs. For years they have championed the age-old practice of using dogs to guard herds and flocks. With the environmental damage caused by poisons and traps, livestock guardian dogs provide an ecologically sound, safe and economical alternative for farmers and ranchers trying to reduce their losses. This complete guide will tell you all you need to know, including the authors' revolutionary discoveries on temperament testing these breeds. This extraordinary book is chock full of useful information.

The Invention of the Modern Dog Michael Worboys,Julie-Marie Strange,Neil Pemberton,2018-10-15 The story of the thoroughly Victorian origins of dog breeds. For centuries, different types of dogs were bred around the world for work, sport, or companionship. But it was not until Victorian times that breeders started to produce discrete, differentiated, standardized breeds. In *The Invention of the Modern Dog*, Michael Worboys, Julie-Marie Strange, and Neil Pemberton explore when, where, why, and how Victorians invented the modern way of ordering and breeding dogs. Though talk of breed was common before this period in the context of livestock, the modern idea of a dog breed defined in terms of shape, size, coat, and color arose during the Victorian period in response to a burgeoning competitive dog show culture. The authors explain how breeders, exhibitors, and showmen borrowed ideas of inheritance and pure blood, as well as breeding practices of livestock, horse, poultry and other fancy breeders, and applied them to a species that was long thought about solely in terms of work and companionship. The new dog breeds embodied and reflected key aspects of Victorian culture, and they quickly spread across the world, as some of Britain's top dogs were taken on stud tours or exported in a growing international trade. Connecting the emergence and development of certain dog breeds to both scientific understandings of race and blood as well as Britain's posture in a global empire, *The Invention of the Modern Dog* demonstrates that studying dog breeding cultures allows historians to better understand the complex social relationships of late-nineteenth-century Britain.

Italian Gothic Horror Films, 1980-1989 Roberto Curti,2019-02-15 The Italian Gothic horror genre underwent many changes in the 1980s, with masters such

as Mario Bava and Riccardo Freda dying or retiring and young filmmakers such as Lamberto Bava (Macabro, Demons) and Michele Soavi (The Church) surfacing. Horror films proved commercially successful in the first half of the decade thanks to Dario Argento (both as director and producer) and Lucio Fulci, but the rise of made-for-TV products has resulted in the gradual disappearance of genre products from the big screen. This book examines all the Italian Gothic films of the 1980s. It includes previously unpublished trivia and production data taken from official archive papers, original scripts and interviews with filmmakers, actors and scriptwriters. The entries include a complete cast and crew list, plot summary, production history and analysis. Two appendices list direct-to-video releases and made-for-TV films.
