Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Tortured Cardboard Philip E. Orbanes,2019-07-23 The term “tortured cardboard” sums up what happens to cardboard when making a board game (bound, cut, folded, punched). And, as you’ll learn, great board games often reflect whatever “tortures” culture. Each gained immortality after a chaotic beginning and a chance survival. Why? Because—be it chess, backgammon, Clue®, Monopoly®, Scrabble®, Settlers of Catan®, or one of ten others featured in this book—each is replete with “lessons” applicable to achievement in your life. As the twenty-first century gathers momentum, our love affair with board games continues to strengthen. They involve us, they refine social skills, and they teach great lessons applicable in real life. “Tortuous” is the journey of every great board game, from birth in chaotic times, through survival by mere chance, to raging popularity and eventual immortality. Tortured Cardboard reveals how the great ones came to endure and—all fun aside—how each teaches us something about our own behavior while providing “rules” that can work in your life.

Girls in the Windows ,2013-11-12 Ormond Gigli had an illustrious career as a photojournalist over the course of some 40 years and took many magnificent photographs—but one photograph has eclipsed all the others. It was a photograph he conceived for himself, without an editorial assignment. It is the incomparable *Girls in the Windows* of 1960. *Girls in the Windows: And Other Stories* is the first book to survey the work of Ormond Gigli and escorts the viewer behind the façade of that incredible photograph—to understand its genesis and to celebrate its remarkable achievement—in addition to creating a portal into the rest of Gigli's brilliant career. This beautifully illustrated volume showcases Gigli's celebrity and fashion photographs, and includes his innovative work in the worlds of theater, film, and dance, as well as his little-known travel photography and photojournalism. Gigli, a master of photo art direction, orchestrated his photo shoots like an accomplished film director, and his portraits are intimate and revealing as a result, his set work inventive and at times even playful. His engagement with his subjects was unparalleled, among whom are included Sophia Loren, Gina Lollobrigida, Anna Moffo, Anita Ekberg, Marcel Duchamp, Willem de Kooning, John F. Kennedy, Halston, Marlene Dietrich, Leslie Caron, Judy Garland, Liza Minnelli, Barbra Streisand, Laurence Olivier, Alan Bates, Richard Burton, Louis Armstrong, Miles Davis, and many more. Many of these images have not been widely seen since they were first published decades ago. In addition to the photographs, Gigli contributes his personal account of the making of many of the pictures, evoking long-ago encounters that resulted in such timeless images. This handsome volume highlights a significant body of work, captures a vital aspect of the great age of photojournalism, and places in context an iconic image of the postwar era at the height of its prosperity and on the verge of transformation.

Previously on X-Men Eric Lewald,2017-11 In late 1992, on small budgets and under tight schedules, the cast and crew of X-Men: The Animated Series crafted a television show that, despite an industry full of naysayers, immediately shot to #1. The Life and Death of Fritz the Cat R. There But Not Jose Davila,2013-11-19 How many buildings around the world have such distinctive designs that simply their outline, and nothing else, is enough to identify them? Artist Jose Dávila has physically cut out, from photographs, 90 of the world's most famous and beloved buildings and structures, from ancient marvels to contemporary gems. Long interested in the relationship between built space and physical place, Dávila saw that by focusing on just the silhouette of major architectural works, while still within their immediate environment, their grandeur was heightened beyond their undeniable visual allure. Following in the footsteps of his appropriationist forbears from the 1970s and 80s such as Sherrie Levine and Richard Prince, and staking a claim for the hand-produced in today's digital world, Dávila starts with structures so well-known they're often taken for granted, and reformats each with a renewed awareness occurring as a result. By cutting the images out by hand, he stays connected to the idea of physically manipulating space--just as architecture itself does. There is no better way to see how a piece of architecture fits in with its surroundings than to observe its pure white silhouette--the effect allows for a whole new, enlightening experience. A unique appreciation for architectural form and creative genius develops when the viewer is confronted with the blank space where a building used to be, but now, on the page, is not.
