The Science of Battlestar Galactica Patrick Di Justo, Kevin Grazier, 2010-10-19 The official guide to the science behind the Battlestar Galactica universe Battlestar Galactica (BSG) has been called the best show on television, and as real as science fiction gets. It has dealt with issues of religious freedom, patriotism, terrorism, genetic engineering, and the ultimate science fiction question: what does it mean to be human? While the re-imagined BSG may not be packed with cool techie tools (the bad guys don't even have laser guns for frak's sake!), this book shows that the science in the series has a lot to say about the use of science and technology in our lives today. What are the principles behind artificial gravity and sublight propulsion? Are Cylons men or machines? How are humanoid Cylons able to interface with computers? By tackling these and other intriguing questions, *The Science of Battlestar Galactica* takes us billions of miles away from Earth so that we can turn around and see ourselves from a different perspective. Tackles fans' most pressing BSG questions, from how an FTL drive might work to how the 12 colonies of Kobol could co-exist to the principles behind Gaius Baltar's Cylon-detector. Features behind-the-scenes anecdotes, quotes from the BSG

Series Bible, and over 60 photos Includes a foreword by BSG co-executive producer, Jane Espenson, and an afterword by actor, Richard Hatch, who played Tom Zarek in the reimagined series and Captain Apollo in the classic series Co-written by BSG's scientific advisor and a Wired contributing editor Packed with must-know details and scientific background, this thought-provoking book will help you see Battlestar Galactica as never before.

AI for Everyone? Pieter Verdegem,2021-09-20 We are entering a new era of technological determinism and solutionism in which governments and business actors are seeking data-driven change, assuming that Artificial Intelligence is now inevitable and ubiquitous. But we have not even started asking the right

questions, let alone developed an understanding of the consequences. Urgently needed is debate that asks and answers fundamental questions about power. This book brings together critical interrogations of what constitutes AI, its impact and its inequalities in order to offer an analysis of what it means for AI to deliver benefits for everyone. The book is structured in three parts: Part 1, AI: Humans vs. Machines, presents critical perspectives on human-machine dualism. Part 2, Discourses and Myths About AI, excavates metaphors and policies to ask normative questions about what is 'desirable' AI and what conditions make this possible. Part 3, AI Power and Inequalities, discusses how the implementation of AI creates important challenges that urgently need to be addressed. Bringing together scholars from diverse disciplinary backgrounds and regional contexts, this book offers a vital intervention on one of the most hyped concepts of our times.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is

kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Limiting Outer Space Alexander C.T. Geppert, 2018-04-18

Limiting Outer Space propels the historicization of outer space by

focusing on the Post-Apollo period. After the moon landings, disillusionment set in. Outer space, no longer considered the inevitable destination of human expansion, lost much of its popular appeal, cultural significance and political urgency. With the rapid waning of the worldwide Apollo frenzy, the optimism of the Space Age gave way to an era of space fatigue and planetized limits. Bringing together the history of European astroculture and American-Soviet spaceflight with scholarship on the 1970s, this cutting-edge volume examines the reconfiguration of space imaginaries from a multiplicity of disciplinary perspectives. Rather than invoking oft-repeated narratives of Cold War rivalry and an escalating Space Race, *Limiting Outer Space* breaks new ground by exploring a hitherto underrated and understudied decade, the Post-Apollo period.

The High Frontier Gerard K. O'Neill, 1989

Smallville Role Playing Game Margaret Weis Productions, Ltd., 2010-08

The Cambridge History of Science Fiction Gerry Canavan, Eric Carl Link, 2018-12-31 The first science fiction course in the American academy was held in the early 1950s. In the sixty years since, science fiction has become a recognized and established

literary genre with a significant and growing body of scholarship.

The Cambridge History of Science Fiction is a landmark volume as the first authoritative history of the genre. Over forty contributors with diverse and complementary specialties present a history of science fiction across national and genre boundaries, and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past. Science fiction as a literary genre is the central focus of the volume, but fundamental to its story is its non-literary cultural manifestations and influence. Coverage thus includes transmedia manifestations as an integral part of the genre's history, including not only short stories and novels, but also film, art, architecture, music, comics, and interactive media.

Encyclopedia of Television Shows, 1925 Through 2007: F-L

Vincent Terrace, 2009 This work represents decades of research and television's entire history. While documentation regarding cast and personnel is now often found online, descriptions of the shows from authoritative sources are still not widely available. Terrace fills that gap with this work, which covers more than 9,350 shows and constitutes the most comprehensive documentation of TV series ever published--Provided by publisher.

Memoir John McGahern, 2009-02-19 John McGahern's astounding memoir of his childhood: 'A glowing masterpiece.' Hilary Mantel 'The one Irish writer everyone should read.' Colm Tóibín As wise and compelling a book as any of his elegiac and graceful novels.' David Mitchell 'I have admired, even loved, McGahern's work since his first novel ... Memoir strips the skin off his fiction as he faces a desperate early life with great force and tenderness.' Melvyn Bragg This is the story of John McGahern's childhood, his mother's death, his father's anger and violence, and how, through his discovery of books, his dream of becoming a writer began. At the heart of Memoir is a son's unembarrassed tribute to his mother.

His memory of walks with her through the narrow lanes to the country schools where she taught and his happiness as she named for him the wild flowers on the bank remained conscious and unconscious presences for the rest of his life. A classic family story, told with exceptional restraint and tenderness, Memoir cannot fail to move all those who read it. 'Magnificent ... Stand[s] supreme in the Irish canon.' Irish Times 'Profoundly beautiful.' Daily Telegraph 'Extraordinary, spellbinding, spiritual.' Irish Independent 'In a tremendously distinguished career, he has never written more movingly, or with a sharper eye.' Andrew Motion, Guardian

Gothic Landscapes Sharon Rose Yang, Kathleen

Healey, 2016-11-15 This book is about the ways that Gothic literature has been transformed since the 18th century across cultures and across genres. In a series of essays written by scholars in the field, the book focuses on landscape in the Gothic and the ways landscape both reflects and reveals the dark elements of culture and humanity. It goes beyond traditional approaches to the Gothic by pushing the limits of the definition of the genre. From landscape painting to movies and video games, from memoir to fiction, and from works of different cultural origins and perspectives, this volume traverses the geography of the

Gothic revealing the anxieties that still haunt humanity into the twenty-first century.

Classic of History (Part 1 & 2: The Book of Thang & The Books of Yü) Confucius, 2013-09-05 This carefully crafted ebook: *Classic of History (Part 1 & 2: The Book of Thang & The Books of Yü)* is formatted for your eReader with a functional and detailed table of contents. Originally called *Shu* (Book), *The Classic of History* got the name in the Han Dynasty, meaning a book of previous generations. It is China's earliest compilation of documentary records related to events in ancient history of China. Since the Han Dynasty, *The Classic of History* has been regarded as a classic on feudal Chinese politics and philosophy. It served as both a textbook for the emperors and an authoritative and classic code that children from noble families and scholar-bureaucrats must follow. *The Classic of History* had a great impact in Chinese history. Confucius (551–479 BC) was a Chinese teacher, editor, politician, and philosopher of the Spring and Autumn period of Chinese history.

Literary Lapses Stephen Leacock, 1910 Collection of Leacock's comic writings. Includes such classic stories as the man who is seized by fear as he opens a bank account; the awful case of the

young man who dies because he cannot tell a lie; the astonishing tale of the baby who ate thirteen Christmas dinners, and many other tales that have become part of the world's comic literature.

The Book of Pook Pook,2018-03-19 The complete collection of writings by the legend himself!A few years ago there was a man who posted on a PUA forum called So Suave and had his own blog called Pook's Mill. His basic message was that the PUA techniques were too simple, and focused on external manipulations, and focusing on others rather than focusing on yourself and your own masculinity.Sadly Pook disappeared from the scene, but his teachings live on in this ebook.

The Colour Of Walls Thomas King,2012-12-18 Harper Stevenson wants crisp, white, clean walls in his office. But walls have a history and a memory that can't simply be painted over. A Short History of Indians in Canada, Thomas King's bestselling collection of twenty tales, is a comic tour de force, showcasing the author at his hilarious and provocative best. With his razor-sharp observations and mystical characters, including the ever-present and ever-changing Coyote, King pokes a sharp stick into the gears of the Native myth-making machine, exposing the underbelly of both historical and contemporary Native-White relationships.

Through the laughter, these stories shimmer brightly with the universal truths that unite us. HarperCollins brings great works of literature to life in digital format, upholding the highest standards in ebook production and celebrating reading in all its forms. Look for more titles in the HarperCollins short-stories collection to build your digital library.
