An Introduction to Community Development Rhonda Phillips,Robert Pittman,2014-11-26 Beginning with the foundations of community development, An Introduction to Community Development offers a comprehensive and practical approach to planning for communities. Road-tested in the authors' own teaching, and through the training they provide for practicing planners, it enables students to begin making connections between academic study and practical know-how from both private and public sector contexts. An Introduction to Community Development shows how planners can utilize local economic interests and integrate finance and marketing considerations into their strategy. Most importantly, the book is strongly focused on outcomes, encouraging students to ask: what is best practice when it comes to planning for communities, and how do we accurately measure the results of planning practice? This newly revised and updated edition includes: increased coverage of sustainability issues, discussion of localism and its relation to community development, quality of life, community well-being and public health considerations, and content on local food systems. Each chapter provides a range of reading materials for the student, supplemented with text boxes, a chapter outline, keywords, and reference lists, and new skills based exercises at the end of each chapter to help students turn their learning into action, making this the most user-friendly text for community development now available.

Retooling for an Aging America Institute of Medicine,Board on Health Care Services,Committee on the Future Health Care Workforce for Older Americans,2008-09-27 As the first of the nation's 78 million baby boomers begin reaching age 65 in 2011, they will face a health care workforce that is too small and woefully unprepared to meet their specific health needs. Retooling for an Aging America calls for bold initiatives starting immediately to train all health care providers in the basics of geriatric care and to prepare family members and other informal caregivers, who currently receive little or no training in how to tend to their aging loved ones. The book also recommends that Medicare, Medicaid, and other health plans pay higher rates to boost recruitment and retention of geriatric specialists and care aides. Educators and health professional groups can use Retooling for an Aging America to institute or increase formal education and training in geriatrics. Consumer groups can use the book to advocate for improving the care for older adults. Health care professional and occupational groups can use it to improve the quality of health care jobs.

A Town Like Alice Nevil Shute,2010-02-09 From the hugely acclaimed author of *On the Beach*—a tale of love and war that follows its enterprising heroine from the Malayan jungle during World War II to the rugged Australian outback. • “Entertaining ... Dramatic ... Shute is a natural and effective story-teller.” —The New York Times Jean Paget, a young Englishwoman living in Malaya, is captured by the invading Japanese and forced on a brutal seven-month death march with dozens of other women and children. A few years after the war, Jean is back in England, the nightmare behind her. However, an unexpected inheritance inspires her to return to Malaya to give something back to the villagers who saved her life. But it turns out that they have a gift for her as well: the news that the young Australian soldier, Joe Harmon, who had risked his life to help the women, had miraculously survived. Jean’s search for Joe leads her to a desolate Australian outpost called Willstown, where she finds a challenge that will draw on all the resourcefulness and spirit that carried her through her war-time ordeals.

Nutrition and Physical Degeneration: A Comparison of Primitive and Modern Diets and Their Effects Weston A. Price,Trung Nguyen,2016-01-08 The answers for perfect teeth, unblemished skin, and pristine hair are in this book. Dr. Price was 75 years ahead of his time. In this book, he demonstrates that isolated groups of people living in accordance with Nature have the best overall physical and mental health. Diseases inflicting “modern” humans are unheard of in most of these study groups. Dr. Weston Andrew Price, DDS, was called the “Isaac Newton of Nutrition” and the “Darwin of Nutrition.” This edition of Dr. Price’s classic is modernized with the epub format. It is easier to read on smartphones and tablets. It also includes updated statistics and additional images. Dr. Price shows that illness, disease, behavior, criminality, anemia, voice, and even cheek-line, are all within the domain of Nutrition. “If civilized man is to survive, he must incorporate the fundamentals of primitive nutritional wisdom into his modern lifestyle.” —Dr. Weston A. Price, DDS

Bioterrorism and Biocrimes W. Seth Carus,Center for Counterproliferation Research,2002 The working paper is divided into two main parts. The first part is a descriptive analysis of the illicit use of biological agents by criminals and terrorists. It draws on a series of case studies documented in the second part. The case studies describe every instance identifiable in open source materials in which a perpetrator used, acquired, or threatened to use a biological agent. While the inventory of cases is clearly incomplete, it provides an empirical basis for addressing a number of important questions relating to both biocrimes and bioterrorism. This material should enable policymakers concerned with bioterrorism to make more informed decisions. In the course of this project, the author has researched over 270 alleged cases involving biological agents. This includes all incidents found in open sources that allegedly occurred during the 20th Century. While the list is certainly not complete, it provides the most comprehensive existing unclassified coverage of instances of illicit use of biological agents.
