*Fundamentals of Tractor Design* Karl Theodor Renius, 2019-10-28 This textbook offers a comprehensive review of tractor design fundamentals. Discussing more than hundred problems and including about six hundred international references, it offers a unique resource to advanced undergraduate and graduate students, researchers and also practical engineers, managers, test engineers, consultants and even old-timer fans. Tractors are the most important pieces of agricultural mechanization, hence a key factor of feeding the world. In order to address the educational needs of both less and more developed countries, the author included fundamentals of simple but proved designs for tractors with moderate technical levels, along with extensive information concerning modern, premium tractors. The broad technical content has been structured according to five technology levels, addressing all components. Relevant ISO standards are considered in all chapters. The book covers historical highlights, tractor project management (including cost management), traction mechanics, tires (including inflation control), belt ground drives, and ride dynamics. Further topics are: chassis design, diesel engines (with emission limits and installation instructions), all important types of transmissions, topics in machine element design, and human factors (health, safety, comfort). Moreover, the content covers tractor-implement management systems, in particular ISOBUS automation and hydraulic systems. Cumulative damage fundamentals and tractor load spectra are described and implemented for dimensioning and design verification. Fundamentals of energy efficiency are discussed for single tractor components and solutions to reduce the tractor CO2 footprint are suggested.

**State Corporate Control in Transition** Piotr Kozarzewski, 2021-10-18 Since the global financial crisis of 2008-2009, there has been a growing interest among policy makers towards the more active role of the state in the enterprise sector. This book provides valuable insight into the changing role of state-owned enterprises in economic policy, a topic at the cross section of several interrelated, but usually independent research streams first of all transition research, varieties of capitalism literature, public choice approach and institutionalism studies. With the existing literature on state ownership concentrating on the developed economies and on selected emerging economies, this book fills an important gap in focusing on the post-communist transition countries. The Polish experience is looked at in a comparative perspective of selected transition countries, which deserve special attention as they had to cope with a radical change of their economic policies towards the enterprise sector. This book will be valuable reading for academics in economic policy, transition economics, and institutional economics, and policy makers and practitioners in EU bodies and emerging economies.

*Struggle Over Identity* Nelly Bekus, 2010-01-01 Rejecting the cliché about “weak identity and underdeveloped nationalism,” Bekus argues for the co-existence of two parallel concepts of Belarusianness—the official and the alternative one—which mirrors the current state of the Belarusian people more accurately and allows for a different interpretation of the interconnection between the democratization and nationalization of Belarusian society. The book describes how the ethno-symbolic nation of the Belarusian nationalists, based on the cultural capital of the Golden Age of the Belarusian past (17th century) competes with the “nation” institutionalized and reified by the numerous civic rituals and social practices under the auspices of the actual Belarusian state. Comparing the two concepts not only provides understanding of the logic that dominates Belarusian society’s self-description models, but also enables us to evaluate the chances of alternative Belarusianness to win this unequal struggle over identity.

War and Memory in Russia, Ukraine and Belarus Julie Fedor, Markku Kangaspuro, Jussi Lassila, Tatiana Zhurzhenko, 2017-12-05 This edited collection contributes to the current vivid multidisciplinary debate on East European memory politics and the post-communist instrumentalization and re-mythologization of World War II memories. The book focuses on the three Slavic countries of post-Soviet Eastern Europe – Russia, Ukraine and Belarus –

the epicentre of Soviet war suffering, and the heartland of the Soviet war myth. The collection gives insight into the persistence of the Soviet commemorative culture and the myth of the Great Patriotic War in the post-Soviet space. It also demonstrates that for geopolitical, cultural, and historical reasons the political uses of World War II differ significantly across Ukraine, Russia and Belarus, with important ramifications for future developments in the region and beyond. The chapters 'Introduction: War and Memory in Russia, Ukraine and Belarus', 'From the Trauma of Stalinism to the Triumph of Stalingrad: The Toponymic Dispute over Volgograd' and 'The "Partisan Republic": Colonial Myths and Memory Wars in Belarus' are published open access under a CC BY 4.0 license at [link.springer.com](http://link.springer.com). The chapter 'Memory, Kinship, and Mobilization of the Dead: The Russian State and the "Immortal Regiment" Movement' is published open access under a CC BY-NC-ND 4.0 license at [link.springer.com](http://link.springer.com).

**The Political Economy of Hungary** Adam Fabry, 2019-04-03 This book explores the political economy of Hungary from the mid-1970s to the present. Widely considered a 'poster boy' of neoliberal transformation in post-communist Eastern Europe until the mid-2000s, Hungary has in recent years developed into a model 'illiberal' regime. Constitutional checks-and-balances are non-functioning; the independent media, trade unions, and civil society groups are constantly attacked by the authorities; there is widespread intolerance against minorities and refugees; and the governing FIDESZ party, led by Prime Minister Viktor Orbán, controls all public institutions and increasingly large parts of the country's economy. To make sense of the politico-economical roller coaster that Hungary has experienced in the last four decades, Fabry employs a Marxian political economy approach, emphasising competitive accumulation, class struggle (both between capital and labour, as well as different 'fractions of capital'), and uneven and combined development. The author analyses the neoliberal transformation of the Hungarian political economy and argues that the drift to authoritarianism under the Orbán regime cannot be explained as a case of Hungarian exceptionalism, but rather represents an outcome of the inherent contradictions of the variety of neoliberalism that emerged in Hungary after 1989.

*Sustainable Agricultural Mechanization: A Framework for Africa* Food and Agriculture Organization of the United Nations, African Union, 2019-03-13 This framework presents ten interrelated principles/elements to guide Sustainable Agricultural Mechanization in Africa (SAMA). Further, it presents the technical issues to be considered under SAMA and the options to be analysed at the country and sub regional levels. The ten key elements required in a framework for SAMA are as follows: The analysis in the framework calls for a specific approach, involving learning from other parts of the world where significant transformation of the agricultural mechanization sector has already occurred within a three-to-four decade time frame, and developing policies and programmes to realize Africa's aspirations of Zero Hunger by 2025. This approach entails the identification and prioritization of relevant and interrelated elements to help countries develop strategies and practical development plans that create synergies in line with their agricultural transformation plans. Given the unique characteristics of each country and the diverse needs of Africa due to the ecological heterogeneity and the wide range of farm sizes, the framework avoids being prescriptive.

**Models of Capitalism in the European Union** Beáta Farkas, 2016-09-07 This book uses comparative economic analysis to provide a common conceptual framework for all current European Union member states. Based on empirical investigation, the author identifies the Nordic, North-western, Mediterranean, and Central and Eastern models of capitalism on the threshold of the 2008 global financial and economic crisis. The chapters also examine the resulting institutional responses to the crisis and the methods of crisis management adopted by each member state. The analysis reveals that the crisis has not triggered radical institutional change but, instead, highlighted deep institutional differences not between the old and new member states, but between the Nordic, North-western, Mediterranean, and Central and Eastern European countries. These institutional differences are so significant that they require the rethinking of European integration theory. Models of Capitalism in the European Union serves as a useful handbook for academics, advanced students, policy-makers and advisors who are interested in European economic issues.

*Scars, Marks & Tattoos* Jacqueline Caruso, 2021-03-31 I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to catch my breath and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

**The European Union and its Eastern Neighbours** Elena Korosteleva, 2012-05-15 This book explores the EU's relations with its eastern neighbours. Based on extensive original research – including surveys, focus-groups, a study of school essays and in-depth interviews with key people in Belarus, Ukraine, Moldova, Russia and in Brussels – it assesses why the EU's initiatives have received limited legitimacy in the neighbourhood. The European Neighbourhood Policy of 2004, and the subsequent Eastern Partnership of 2009 heralded a new form of relations with the EU's neighbours – partnership based on joint ownership and shared values – which would complement if not entirely replace the EU's traditional governance framework used for enlargement. These initiatives have, however, received a mixed response from the EU's eastern neighbours. The book shows how the key elements of partnership have been forged mainly by the EU, rather than jointly, and examines the idea and application of external governance, and how this has been over-prescriptive and confusing.

Varieties of Capitalism in Post-Communist Countries D. Lane, M. Myant, 2016-01-23 This book sets the experiences of former communist countries as they head towards capitalism against the 'varieties of capitalism' paradigm, and provides a framework for comparing transformation processes, demonstrating how differing heritages of communist and pre-communist pasts are leading to different kinds of capitalist economies.

**International Code of Conduct on Pesticide Management** Food and Agriculture Organization of the United Nations, World Health Organization, 2023-04-29 The objective of this guidance on fulfilling the reporting requirements of Article 12 of the Code of Conduct is to obtain a regular flow of information on its observance to strengthen implementation of the Code, to provide data for its future revisions and improvement, and, most importantly, to improve the protection of human health and the environment related to pesticide use and management in agriculture and public health. The guidance was prepared in compliance with the FAO/WHO International Code of Conduct on Pesticide Management, which sets out a framework and voluntary standards of conduct for stakeholders in pesticide management, in particular governments and the pesticide industry. Endorsed by FAO, WHO, governments, pesticide producers, non-governmental organizations and other stakeholders, the Code outlines their shared responsibility to promote best practice and risk reduction throughout the pesticide life cycle. The Code of Conduct thereby establishes the commitment and moral obligation of stakeholders to comply with the agreed standards of conduct and to assume their respective responsibilities. These include governments' responsibility to promote pesticide risk reduction and the industry's responsibility to produce products that are adapted to the context of their use and to provide stewardship of those products throughout their life cycle. This guidance was prepared with the support of the FAO/WHO Joint Meeting on Pesticide Management (JMPM) to provide further guidance on the provisions of the Code of Conduct related to its observance and implementation. It reflects the joint FAO/WHO approach to pesticide management, thus addressing the topic in both agricultural and public health settings.

**State Capitalism** Joshua Kurlantzick, 2016-03-08 The end of the Cold War ushered in an age of American triumphalism best characterized by the Washington Consensus: the idea that free markets, democratic institutions, limitations on government involvement in the economy, and the rule of law were the foundations of prosperity and stability. The last fifteen years, starting with the Asian financial crisis, have seen the gradual erosion of that consensus. Many commentators have pointed to the emergence of a powerful new rival model: state capitalism. In state capitalist regimes, the government typically owns firms in strategic industries. Not beholden to private-sector shareholders, such firms are allowed to operate with razor-thin

margins if the state deems them strategically important. China, soon to be the world's largest economy, is the best known state capitalist regime, but it is hardly the only one. In *State Capitalism*, Joshua Kurlantzick ranges across the world--China, Thailand, Brazil, Russia, South Africa, Turkey, and more--and argues that the increase in state capitalism across the globe has, on balance, contributed to a decline in democracy. He isolates some of the reasons for state capitalism's resurgence: the fact that globalization favors economies of scale in the most critical industries, and the widespread rejection of the Washington Consensus in the face of the problems that have plagued the world economy in recent years. That said, a number of democratic nations have embraced state capitalism, and in those regimes, state-backed firms like Brazil's Embraer have enjoyed considerable success. Kurlantzick highlights the mixed record and the evolving nature of the model, yet he is more concerned about the negative effects of state capitalism. When states control firms, whether in democratic or authoritarian regimes, the government increases its advantage over the rest of society. The combination of new technologies, the perceived failures of liberal economics and democracy in many developing nations, the rise of modern kinds of authoritarians, and the success of some of the best-known state capitalists have created an era ripe for state intervention. *State Capitalism* offers the sharpest analysis yet of what state capitalism's emergence means for democratic politics around the world.

**Tumor Microenvironment** Alexander Birbrair, 2020-02-10 Revealing essential roles of the tumor microenvironment in cancer progression, this volume focuses on non-hematopoietic cells within the tumor microenvironment. Further, it teaches readers about the roles of distinct constituents of the tumor microenvironment and how they affect cancer development. Topics include fibroblasts, adipocytes, mesenchymal stem cells, stellate cells, and more. Taken alongside its companion volumes, *Tumor Microenvironment: Non-Hematopoietic Cells* updates us on what we know about the different aspects of the tumor microenvironment as well as future directions. Useful for introducing the newer generation of researchers to the history of how scientists focused in the tumor microenvironment and how this knowledge is currently applied for cancer treatments, it will be essential reading for advanced cell biology and cancer biology students as well as researchers seeking an update on research in the tumor microenvironment. All of the chapter authors are renowned international experts in the cancer biology field in specific subfields that will be the focus of their chapters.

*Belarus* Andrew Wilson, 2021-03-09 A comprehensive and revelatory history of modern Belarus - from independence to 2020's contested election In 2020 Belarus made headlines around the world when protests erupted in the aftermath of a fraught presidential election. Andrew Wilson explores both Belarus's complicated road to nationhood and its politics and economics since it gained independence in 1991. Two new chapters reveal the extent of Aliaksandr Lukashenka's grip on power, the growth of the opposition movement and the violent crackdown that followed the vote. Wilson also examines the prospects for Europe as a whole of either Lukashenka's downfall or his survival with Russian support. "Andrew Wilson has done all students of European politics a great service by making the history of Belarus comprehensible and by showing how the future of Belarus might be different than its present."—Timothy Snyder, author of *Bloodlands: Europe Between Hitler and Stalin*

*International Economic Sanctions* William H Kaempfer, Anton D Lowenberg, 1992-09-16 The incidence of sanctioning behaviour is generally on the increase internationally. This study introduces, analyzes and seeks to clarify the issues that are fundamental to an understanding of the subject. The authors argue that only a public-choice analysis, with its emphasis on politics, can answer three important questions about sanctions: why, in the light of their weak economic impacts, are they being used more and more frequently?; why is it that they take the particular forms they do?; and why are they often successful even when their economic impact is slight?

**Postcommunist Belarus** Stephen White, Elena A. Korosteleva, John Löwenhardt, 2005 Belarus is one of the least studied European states to emerge from the collapse of the Soviet Union in 1991. In fact, few Western specialists paid much attention to its affairs during the Soviet era. Nevertheless, Belarus constitutes an important and sensitive border region between Russia and the western part of the continent. In Postcommunist

Belarus, a stellar group of contributors examines the issues and the search for identity that Belarus has confronted in the period leading up to and following independence. The country is run in an authoritarian fashion by President Alexander Lukashenko and many observers, both inside and outside Belarus, would use the term dictatorship to describe his rule. Belarusian authorities prefer to emphasize the strong support of the people for the president and his cautious approach to economic reform. It seems unlikely that the country can hold out permanently against the wider pressures of democratization and economic reform that are transforming its neighbors. The country's situation offers political scientists many facets for comparison with established models. Belarus is grappling with challenges that are conceptual and psychological as much as they are political, economic, and social. Through new research, the contributors to Postcommunist Belarus offer an important, coherent, and comparative perspective on this little-known country.

**Belarus** D. Marples, 1996-06-23 Belarus: From Soviet Rule to Nuclear Catastrophe examines the principal effects of Soviet rule on Belarus as the prelude to a detailed analysis of the medical and social consequences of the nuclear accident at Chernobyl. It places these problems into the contemporary political context and assesses the ability of the newly-independent state to deal with a disaster of such dimensions.
