The Matica and Beyond ,2020-05-06 The Matica and Beyond is a comparative study of the cultural associations established to further national movements in nineteenth-century Europe by publishing literary and scientific texts in the national language.

Socialist Modern Katherine Pence,Paul Betts,2008 This book explores the ways in which modernity shaped the relationship between socialist state and society in East Germany. The reunification of Germany in 1989 may have put an end to the experiment in East German communism, but its historical assessment is far from over. Where most of the literature over the past two decades has been driven by the desire to uncover the relationship between power and resistance, complicity and consent, more recent scholarship has tended to concentrate on the everyday history of East German citizens. experience of life in East Germany, with a particular view toward addressing the question: what did modernity mean for East German state and society? As such, the collection moves beyond the conceptual divide between state-level politics and everyday life so as to bring into sharper focus the specific contours of the GDR's unique experiment in Cold War socialism. What unites all the essays is the question of how the very tensions around socialist modernity shaped the views, memories and actions of East Germans over four decades. the Cold War, Eastern Europe, the history of communism, European social history and the history of everyday life, gender history, as well as modernity and socialist popular culture.

Experiments Past Jodi Reeves Flores,Roeland Paardekooper,2014 With Experiments Past the important role that experimental archaeology has played in the development of archaeology is finally uncovered and understood. Experimental archaeology is a method to attempt to replicate archaeological artefacts and/or processes to test certain hypotheses or discover information about those artefacts and/or processes. It has been a key part of archaeology for well over a century, but such experiments are often embedded in wider research, conducted in isolation or never published or reported. Experiments Past provides readers with a glimpse of experimental work and experience that was previously inaccessible due to language, geographic and documentation barriers, while establishing a historical context for the issues confronting experimental archaeology today. This volume contains formal papers on the history of experimental methodologies in archaeology, as well as personal experiences of the development of experimental archaeology from early leaders in the field, such as Hans-Ole Hansen. Also represented in these chapters are the histories of experimental approaches to taphonomy, the archaeology of boats, building structures and agricultural practices, as well as narratives on how experimental archaeology has developed on a national level in several European countries and its role in encouraging a wide-scale interest and engagement with the past.

The Palgrave Concise Historical Atlas of World War II M. Folly,2004-10-06 The Palgrave Concise Historical Atlas of the Second World War explores in graphical form, the causes, course, and consequences of this global war. Clear two-colour maps and diagrams are accompanied by a facing page of explanatory text addressing not just battles and campaigns, but also clarifying the key social, economic and political aspects of the war. These tend to get less coverage in conventional military history atlases, but are vital for understanding the totality of the war experience and its enduring legacy. Students and general readers will find it a useful and accessible introduction to the war in all its facets, from its origins to its legacy.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Towards Effective Place Brand Management Gregory Ashworth,Mihalis Kavaratzis,2010-01-01 Many facets of place branding, such as identities, image, promotion or sense of place, have been around for a long time. However, the need to analyse their nature in the context of branding and to examine their relationships in detail has grown rapidly in the last decade or so, as places all over the world have put branding activities higher than ever in their agenda. This important new book examines and clarifies key aspects of the recently popularised concept of place branding, expounding many controversies, confusions and discords in the field. The expert contributors clarify several unresolved issues surrounding the application of place branding, in particular its multiple goals. They provide a detailed analysis of the role of local communities in place branding strategies, and illustrate not only how, but also why brand management should be implemented. Case studies from a range of jurisdictions and cultural and political viewpoints are drawn upon, each illustrating an array of issues or techniques in specific economic, cultural and geographical contexts. This book provides a theoretically informed but practically oriented overview and discussion of the increasingly popular field of place branding as an instrument of place management. As such, it will strongly appeal to both academics and practitioners in the fields of place marketing, place branding, local development, tourism planning and development, tourism marketing, cultural geography, urban and regional planning. Consultants in local authorities, national and regional tourism boards will also find this to be a fascinating read.

Once a Year ,2016 Once a Year: Some Traditional British Customs was first published in 1977 establishing Homer Sykes as one of the UK's leading young photographers. Over a period of almost seven years he travelled the country photographing around 100 traditional British customs, with over 80 appearing in the book. Though inspired by the 19th century photographer Benjamin Stone, Homer Sykes approached the events with a distinctly modern sensibility, creating dynamic images which focus mainly on the tradition that is being re-enacted against a background of everyday life.

Visual Communication for Landscape Architecture Trudi Entwistle,Edwin Knighton,2017-09-01 Visual Communication for Landscape Architecture demonstrates not only how and where a range of visual communication skills are needed to inform a design process, but also why they are essential in order to make presentations both informative and memorable. It illustrates how representational techniques can be sensitively applied in different contexts appropriate to a diverse range of design challenges, and encourages experimentation with contemporary techniques, both 2D and 3D. Developing a professional but creative design portfolio is explored in relation to creating e-portfolios

and websites. A total of 12 contemporary case studies enable readers to contextualize the methods and techniques explored in each chapter through exploring real-life examples of winning projects by successful landscape architecture practices, making this title an inspirational resource for both budding – and practising – landscape architects.

Masterplanning Futures Lucy Bullivant, 2012-11-12 Winner of the Urban Design Group's 2014 Book of the Year Award! In the past, spatial masterplans for cities have been fixed blueprints realized as physical form through conventional top down processes. These frequently disregarded existing social and cultural structures, while the old modernist planning model zoned space for home and work. At a time of urban growth, these models are now being replaced by more adaptable, mixed use plans dealing holistically with the physical, social and economic revival of districts, cities and regions. Through today's public participative approaches and using technologically enabled tools, contemporary masterplanning instruments embody fresh principles, giving cities a greater resilience and capacity for social integration and change in the future. Lucy Bullivant analyses the ideals and processes of international masterplans, and their role in the evolution of many different types of urban contexts in both the developed and developing world. Among the book's key themes are landscape-driven schemes, social equity through the reevaluation of spatial planning, and the evolution of strategies responding to a range of ecological issues and the demands of social growth. Drawing on first-hand accounts and illustrated throughout with colour photographs, plans and visualizations, the book includes twenty essays introduced by an extensive overview of the field and its objectives. These investigate plans including one-north Singapore, Masdar City in Abu Dhabi, Xochimilco in Mexico City and Waterfront Seattle, illuminating their distinct yet complementary integrated strategies. This is a key book for those interested in today's multiscale masterplanning and conceptually advanced methodologies and principles being applied to meet the challenges and opportunities of the urbanizing world. The author's research was enabled by grants from the Commission for Architecture and the Built Environment (CABE), the SFA (the Netherlands Architecture Fund), the Danish Embassy and support from the Alfred Herrhausen Society.

Sinkholes and Subsidence Tony Waltham, Fred G. Bell, Martin G. Culshaw, 2007-03-15 Sinkholes and Subsidence provides a twenty-first century account of how the various subsidence features in carbonate and evaporite rocks cause problems in development and construction in our living environment. The authors explain the processes by which different types of sinkholes develop and mature in karst terrains. They consider the various methods used in site investigations, both direct and indirect, to locate the features associated with these hazards and risks, highlighting the value of hazard mapping. Various ground improvement techniques and the special types of foundation structures which deal with these problems are covered in the second half of the text. This book is supplemented with a wealth of actual case studies and solutions, written by invited experts.

Ancient Europe Stuart Piggott, 2017-09-05 This book interprets the main lines of European prehistory from the first agricultural communities in the sixth or even seventh millennium B.C. until the incorporation of much of barbarian Europe within the Roman Empire. It traces the beginnings of animal domestication and plant cultivation in ancient Western Asia, and the transmission of these skills by movements of peoples or by assimilation, in the European continent. The early technology of working in copper, and later in bronze, is discussed. Metal winning and working, and trade in raw materials and finished products, brought social and political repercussions to barbarian and civilised peoples alike. The spread of the Indo-European languages is considered in its archaeological context, as is the formation of the Celtic peoples, soon to acquire iron technology and to become the main barbarian component in Europe, side-by-side with the civilised Mediterranean societies, Greek, Etruscan or Roman. The later Celtic world of Europe and the British Isles is examined, and an attempt made to estimate the contribution of the older barbarian world to the Europe, which emerged from the ruins of the Roman Empire, geographically, the book ranges over the whole European field, from the Atlantic shores to the Urals and the Caucasus. While it does not pretend to be a prehistory of Europe within the period chosen, the book does bring together and discuss for the first time much scattered and often little-known archaeological evidence. This book is organized in a manner that will permit it being read on two levels. For the general non-specialist reader, the text and illustrations should give a sufficient idea of the nature of the theme and of the evidence, and of the development of the barbarian cultures side-by-side with the civilizations of antiquity, as their precursors and their subsequent counterparts. For the archaeological student however the text is documented with rather full references and notes at the end of each chapter.

Planning and Place in the City Marichela Sepe, 2013 In this volume, Marichela Sepe explores the preservation, reconstruction and enhancement of cultural heritage and place identity. She outlines the history of the concept of placemaking, and sets out the range of different methods of analysis and assessment that are used to help pin down the nature of place identity.

Customer Relationship Management Francis Buttle, 2009 This title presents an holistic view of CRM, arguing that its essence concerns basic business strategy - developing and maintaining long-term, mutually beneficial relationships with strategically significant customers - rather than the operational tools which achieve these aims.

Jugovzhodna Slovenija v starejši Železni dobi / South Eastern Slovenia in the Early Iron Age Janez Dular, 2007-01-01 The territory of present-day Slovenia reached one of its economic and cultural peaks in the 1st millennium BC, when the Hallstatt Culture prospered, its achievements being comparable with the most developed cultures in Ancient Europe. This culture arose from Urnfield Culture roots under the influence of the Mediterranean world~they adopted the new technology of iron production, implemented a new social pattern and fully developed their artistic inspiration.

Dynamic Urban Design Michael A. von Hausen, 2013-01-04 Advance Praise for Dynamic Urban Design “Finally, in one book a complete guide to the theory, practice, and potential of urban design by one of Canada's preeminent urban designers.” —David R. Witty, former dean, School of Architecture, University of Manitoba, Canada “Michael von Hausen has given us a clear and hopeful path to the creation of a sustainable urbanism, one that will be inspiring and instructive to practitioners, students, and all those who are focused on the most fundamental issue of our time.” —Jim Adams, architect and principal, McCann Adams Studio, Austin, Texas “Dynamic Urban Design establishes Michael von Hausen as a sustainable urban design authority. Sharing insights taken from six millennia ... von Hausen articulates a clearly understandable and masterfully illustrated process.” —Kevin Harris, architect and principal, Kevin Harris Architect, Baton Rouge, Louisiana Whether we are practicing urban designers or interested citizens, virtually all of us want to live in communities that are safe, attractive, and healthy. Yet our good intentions face conflicting goals. How are we going to improve community health, reduce crime, and improve mobility in cities while at the same time expanding our cities to accommodate growth? How are we going to do all this with seemingly limited financial resources? How do we do more with less, live within our means, and still create a higher quality of life? The list of challenges is almost endless. Urban design is emerging as a critical interface that brings various professions together to address these challenges and improve our communities. For future human survival and quality of life, the world needs a more inclusive, rigorous, socially inspired, and comprehensive urban design model integrated with sustainable development. This book delivers that model—a reference guide for doing it right.

The European Iron Age John Collis, 2003-09-16 This ambitious study documents the underlying features which link the civilizations of the Mediterranean - Phoenician, Greek, Etruscan and Roman - and the Iron Age cultures of central Europe, traditionally associated with the Celts. It deals with the social, economic and cultural interaction in the first millennium BC which culminated in the Roman Empire. The book has three principle themes: the spread of

iron-working from its origins in Anatolia to its adoption over most of Europe; the development of a trading system throughout the Mediterrean world after the collapse of Mycenaean Greece and its spread into temperate Europe; and the rise of ever more complex societies, including states and cities, and eventually empires. Dr Collis takes a new look at such key concepts as population movement, diffusion, trade, social structure and spatial organization, with some challenging new views on the Celts in particular.

The Stuckists Frank Milner,2004 Stuckists are pro contemporary figurative painting with ideas, and anti conceptual art, mainly because of the poverty of its concepts. This book accompanies the first major national exhibition by the Stuckists, held during the third Liverpool Biennial, 2004.

Hypogene Karst Regions and Caves of the World Alexander Klimchouk,Arthur N. Palmer,Jo De Waele,Augusto S. Auler,Philippe Audra,2017-08-17 This book illustrates the diversity of hypogene speleogenetic processes and void-conduit patterns depending on variations of the geological environments by presenting regional and cave-specific case studies. The cases include both well-known and newly recognized hypogene karst regions and caves of the world. They all focus on geological, hydrogeological, geodynamical and evolutionary contexts of hypogene speleogenesis. The last decade has witnessed the boost in recognition of the possibility, global occurrence, and practical importance of hypogene karstification (speleogenesis), i.e. the development of solutional porosity and permeability by upwelling flow, independent of recharge from the overlying or immediately adjacent surface. Hypogene karst has been identified and documented in many regions where it was previously overlooked or misinterpreted. The book enriches the basis for generalization and categorization of hypogene karst and thus improves our ability to adequately model hypogene karstification and predict related porosity and permeability. It is a book which benefits every researcher, student, and practitioner dealing with karst.
