*Popol Vuh* Dennis Tedlock, 2013-02 *Popol Vuh*, the Quiché Mayan book of creation is not only the most important text in the native language of the Americas, it is also an extraordinary document of the human imagination. It begins with the deeds of Mayan Gods in the darkness of a primeval sea and ends with the radiant splendor of the Mayan Lords who founded the Quiché Kingdom in the Guatemalan highlands. Originally written in Mayan hieroglyphs, it was translated into the Roman alphabet in the 16th century. The new edition of Dennis Tedlock's unabridged, widely praised translation includes new notes and commentary, newly translated passages, newly deciphered hieroglyphs, and over 40 new illustrations.

Goyer, Bob Kane, 2005 Extensive reading improves fluency and there is a real need in the ELT classroom for motivating, contemporary graded material that will instantly appeal to students. *Batman Begins* is based on the 2005 blockbuster movie and will be immediately recognisable to teens of all nationalities.

**The Vanguard of the Atlantic World** James E. Sanders, 2014-09-10 In the nineteenth century, Latin America was home to the majority of the world's democratic republics. Many historians have dismissed these political experiments as corrupt pantomimes of governments of Western Europe and the United States. Challenging that perspective, James E. Sanders contends that Latin America in this period was a site of genuine political innovation and popular debate reflecting Latin Americans' visions of modernity. Drawing on archival sources in Mexico, Colombia, and Uruguay, Sanders traces the circulation of political discourse and democratic practice among urban elites, rural peasants, European immigrants, slaves, and freed blacks to show how and why ideas of liberty, democracy, and universalism gained widespread purchase across the region, mobilizing political consciousness and solidarity among diverse constituencies. In doing so, Sanders reframes the locus and meaning of political and cultural modernity.

How Emotions Are Made Lisa Feldman Barrett, 2017-03-07 Preeminent psychologist Lisa Barrett lays out how the brain constructs emotions in a way that could revolutionize psychology, health care, the legal system, and our understanding of the human mind. "Fascinating . . . A thought-provoking journey into emotion science."—The Wall Street Journal "A singular book, remarkable for the freshness of its ideas and the boldness and clarity with which they are presented."—Scientific American "A brilliant and original book on the science of emotion, by the deepest thinker about this topic since Darwin."—Daniel Gilbert, best-selling author of *Stumbling on Happiness* The science of emotion is in the midst of a revolution on par with the discovery of relativity in physics and natural selection in biology. Leading the charge is psychologist and neuroscientist Lisa Feldman Barrett, whose research overturns the long-standing belief that emotions are automatic, universal, and hardwired in different brain regions. Instead, Barrett shows, we construct each instance of emotion through a unique interplay of brain, body, and culture. A lucid report from the cutting edge of emotion science, *How Emotions Are Made* reveals the profound real-world consequences of this breakthrough for everything from neuroscience and medicine to the legal system and even national security, laying bare the immense implications of our latest and most intimate scientific revolution.

**Carnal Thoughts** Vivian Sobchack, 2004-11-01 In these innovative essays,

Vivian Sobchack considers the key role our bodies play in making sense of today's image-saturated culture. Emphasizing our corporeal rather than our intellectual engagements with film and other media, *Carnal Thoughts* shows how our experience always emerges through our senses and how our bodies are not just visible objects but also sense-making, visual subjects. Sobchack draws on both phenomenological philosophy and a broad range of popular sources to explore bodily experience in contemporary, moving-image culture. She examines how, through the conflation of cinema and surgery, we've all had our eyes done; why we are moved by the movies; and the different ways in which we inhabit photographic, cinematic, and electronic space. *Carnal Thoughts* provides a lively and engaging challenge to the mind/body split by demonstrating that the process of making sense requires an irreducible collaboration between our thoughts and our senses.

*Godot From Zero to Proficiency (Foundations)* Patrick Felicia, 2021-03-11 Get started with Godot and game programming fast without the headaches Godot is a great software to create video games; however, it includes so many options and features that getting started can feel overwhelming. Without my book, most people spend too long trying to learn how to use Godot the hard way. This book is the only one that will get you to learn Godot fast without wasting so much time. This book is the first book in the series "Godot from Zero to Proficiency" where you will learn to code fast and be able to create your own video games with Godot in no time. What you will learn After completing this book, you will be able to: - Know and master the features that you need to create 3D environments for your games. - Quickly create (and navigate through) realistic 3D indoors and outdoors environments. - Create a 3D Maze with lights, walls, and textures. - Create an island with sandy beaches, mountains, and water. - Include and control a car. - Export your games for Mac or PC. Who this book is for This book is for: - Hobbyists who need a book that gets them started with Godot and game development easily. - Parents looking for a book that introduces their children to game programming painlessly. - Teachers looking for a complete and clear resource on programming through the creation of games. - Aspiring indie game developers. How this book is different This is the only book that you need to get started with Godot fast and to enjoy the journey without the frustration. This book includes six chapters that painlessly guide you through the necessary skills to master Godot's interface, use its core features, and create and navigate through realistic 3D environments. It assumes no prior knowledge on your part and ensures that you have all the information and explanations that you need every step of the way. What this book offers This book includes all the features that you need to get started with Godot and game development: - Learn without the headaches: This book assumes that you can't be expected to learn everything at once; this is why you will build all your skills incrementally. - Make your dream of creating your own games come true: This book ensures that you stay motivated by giving you the right amount of information and challenge in each chapter; we all know that it's hard to keep motivated when learning a new skill, so this book always contextualizes the knowledge with an example (so that you feel it's relevant), and also makes sure that you get to challenge yourself, if you need to, with optional challenges present at the end of each chapter. - Progress and feel confident in your skills: You will have the opportunity to learn and to use Godot at your own pace and to become comfortable with its interface. This is because

every single new concept introduced will be explained in great detail so that you never feel lost. All the concepts are introduced progressively so that you don't feel overwhelmed. - Create your own games and feel awesome: With this book, you will build your 3D environments and you will spend more time creating than reading, to ensure that you can apply the concepts covered in each section. All chapters include step-by-step instructions with examples that you can use straight-away. If you want to get started with Godot today, then buy this book now

**Mirrors** Eduardo Galeano, 2009-05-26 Throughout his career, Eduardo Galeano has turned our understanding of history and reality on its head. Isabelle Allende said his works invade the reader's mind, to persuade him or her to surrender to the charm of his writing and power of his idealism. *Mirrors*, Galeano's most ambitious project since *Memory of Fire*, is an unofficial history of the world seen through history's unseen, unheard, and forgotten. As Galeano notes: Official history has it that Vasco Núñez Balboa was the first man to see, from a summit in Panama, the two oceans at once. Were the people who lived there blind?? Recalling the lives of artists, writers, gods, and visionaries, from the Garden of Eden to twenty-first-century New York, of the black slaves who built the White House and the women erased by men's fears, and told in hundreds of kaleidoscopic vignettes, *Mirrors* is a magic mosaic of our humanity.

**Desert in Modern Literature and Philosophy** Aidan Tynan, 2020-06-18 Aidan explores the ways in which Nietzsche's warning that 'the desert grows' has been taken up by Heidegger, Derrida and Deleuze in their critiques of modernity, and the desert in literature ranging from T.S. Eliot to Don DeLillo; from imperial travel writing to postmodernism; and from the Old Testament to salvagepunk.

**The Film Book** Ronald Bergan, 2021 Story of cinema -- How movies are made -- Movie genres -- World cinema -- A-Z directors -- Must-see movies.

**The Five Continents of Theatre** Eugenio Barba, Nicola Savarese, 2019-02-11 The *Five Continents of Theatre* undertakes the exploration of the material culture of the actor, which involves the actors' pragmatic relations and technical functionality, their behaviour, the norms and conventions that interact with those of the audience and the society in which actors and spectators equally take part.

**Voices of a People's History of the United States** Howard Zinn, Anthony Arnove, 2011-01-04 Here in their own words are Frederick Douglass, George Jackson, Chief Joseph, Martin Luther King Jr., Plough Jogger, Sacco and Vanzetti, Patti Smith, Bruce Springsteen, Mark Twain, and Malcolm X, to name just a few of the hundreds of voices that appear in *Voices of a People's History of the United States*, edited by Howard Zinn and Anthony Arnove. Paralleling the twenty-four chapters of Zinn's *A People's History of the United States*, *Voices of a People's History* is the long-awaited companion volume to the national bestseller. For *Voices*, Zinn and Arnove have selected testimonies to living history—speeches, letters, poems, songs—left by the people who make history happen but who usually are left out of history

books—women, workers, nonwhites. Zinn has written short introductions to the texts, which range in length from letters or poems of less than a page to entire speeches and essays that run several pages. *Voices of a People's History* is a symphony of our nation's original voices, rich in ideas and actions, the embodiment of the power of civil disobedience and dissent wherein lies our nation's true spirit of defiance and resilience.

Environment, Trade and Society in Southeast Asia ,2015-03-20 In *Environment, Trade and Society in Southeast Asia: A Longue Durée Perspective*, eleven historians bring their knowledge and insights to bear on the long Braudelien sweep of Southeast Asian history. In doing so they seek both to debunk simplistic assumptions about fragile traditions and transformational modernities, and to identify real repeating patterns in Southeast Asia's past: clientelistic political structures, periodic tectonic and climatic disasters, ethnic occupational specializations, long cycles of economic globalization and deglobalization. Their contributions range across many centuries: from the Austronesian expansion to the Aceh tsunami, and from the Sanskrit cosmopolis to the Asian financial crisis. The book is inspired by, and dedicated to, Peter Boomgaard, a scholar whose work has embodied the Braudelien spirit in Southeast Asian historiography. This title is available online in its entirety in Open Access.

**Asmodeus** Alain René Le Sage,1841

On Being a Photographer David Hurn,Bill Jay,1997 This is a book on how to think and act like a photographer, culled from practical experience and from the lives of many fine photographers past and present.

**Sightwalk** Gueorgui Pinkhassov,1999-11-02 An exquisite collection of photographs by the celebrated Russian artist.

Globalization and the Decolonial Option Walter D. Mignolo,Arturo Escobar,2013-10-18 This is the first book in English profiling the work of a research collective that evolved around the notion of coloniality, understood as the hidden agenda and the darker side of modernity and whose members are based in South America and the United States. The project called for an understanding of modernity not from modernity itself but from its darker side, coloniality, and proposes the de-colonization of knowledge as an epistemological restitution with political and ethical implications. Epistemic decolonization, or de-coloniality, becomes the horizon to imagine and act toward global futures in which the notion of a political enemy is replaced by intercultural communication and towards an-other rationality that puts life first and that places institutions at its service, rather than the other way around. The volume is profoundly inter- and trans-disciplinary, with authors writing from many intellectual, transdisciplinary, and institutional spaces. This book was published as a special issue of *Cultural Studies*.
