**Mental Science** T. Troward,2019-03-15 There are certain Oriental schools of thought, together with various Western offshoots from them, which are entirely founded on the principle of annihilating all desire. Reach that point at which you have no wish for anything and you will find yourself free, is the sum and substance of their teaching; and in support of this they put forward a great deal of very specious argument, which is all the more likely to entangle the unwary, because it contains a recognition of many of the profoundest truths of Nature. But we must bear in mind that it is possible to have a very deep knowledge of psychological facts, and at the same time vitiate the results of our knowledge by an entirely wrong assumption in regard to the law which binds these facts together in the universal system; and the injurious results of misapprehension upon such a vital question are so radical and far-reaching that we cannot too forcibly urge the necessity of clearly understanding the true nature of the point at issue. Stripped of all accessories and embellishments, the question resolves itself into this: Which shall we choose for our portion, Life or Death? There can be no accommodation between the two; and whichever we select as our guiding principle must produce results of a kind proper to itself.

**Album Cover Album** Roger Dean, Storm Thorgerson, 2008-10-28 A stunningly designed review of the greatest album cover designs, spanning the classic period from the 1950s to the 1970s, *Album Cover Album* first hit the bestseller charts in 1977. This led to the release of six follow-up hits, inspired a host of imitations, and generated a long-playing sub-genre in art and design publishing. *Album Cover Album* is edited and compiled by two designers who were among the most innovative pioneers of the work that it celebrates. Storm Thorgerson's *Hipgnosis* earned world renown for the epic photo shoots and iconic designs that went so perfectly with the music of Pink Floyd. Meanwhile, Roger Dean's dreamscapes and unique typography became as much a part of the rock generation as the Yes albums they adorned. *Album Cover Album* features their selection of more than 600 sleeves in full color, and showcases the astonishing diversity and excellence of design that the medium produced in its first three decades. This new edition retains the lavish 12-inch format of the original and replays the ingeniously themed compositions of each page. The album is given a fresh spin by a new preface from Peter Gabriel and new forewords by Storm Thorgerson and John Wetton, plus a 21st-century typographic facelift. The result is a celebration of the enduring appeal of vinyl.

**Your Hidden Power** Thomas Troward, 2019-01-09 The Kabbalists tell us of the lost word, the

word of power which mankind has lost. To him who discovers this word all things are possible. Is this mirific word really lost? Yes, and No. It is the open secret of the universe, and the Bible gives us the key to it. It tells us, The Word is nigh thee, even in thy mouth and in thy heart. It is the most familiar of all words, the word which in our heart we realise as the centre of our conscious being, and which is in our mouth a hundred times a day. It is the word I AM. Because I am what I am, I may be what I will to be. My individuality is one of the modes in which the Infinite expresses itself, and therefore I am myself that very power which I find to be the innermost within of all things.

**The Hidden Power and Other Essays** Thomas Troward,2017-10 Excerpt: To realise fully how much of our present daily life consists in symbols is to find the answer to the old, old question, What is Truth? And in the degree in which we begin to recognise this we begin to approach Truth. The realisation of Truth consists in the ability to translate symbols, whether natural or conventional, into their equivalents; and the root of all the errors of mankind consists in the inability to do this, and in maintaining that the symbol has nothing behind it. The great duty incumbent on all who have attained to this knowledge is to impress upon their fellow men that there is an inner side to things, and that until this inner side is known, the things themselves are not known. There is an inner and an outer side to everything; and the quality of the superficial mind which causes it to fail in the attainment of Truth is its willingness to rest content with the outside only. So long as this is the case it is impossible for a man to grasp the import of his own relation to the universal, and it is this relation which constitutes all that is signified by the word Truth. So long as a man fixes his attention only on the superficial it is impossible for him to make any progress in knowledge. He is denying that principle of Growth which is the root of all life, whether spiritual intellectual, or material, for he does not stop to reflect that all which he sees as the outer side of things can result only from some germinal principle hidden deep in the centre of their being. Expansion from the centre by growth according to a necessary order of sequence, this is the Law of Life of which the whole universe is the outcome, alike in the one great solidarity of cosmic being, as in the separate individualities of its minutest organisms. This great principle is the key to the whole riddle of Life, upon whatever plane we contemplate it; and without this key the door from the outer to the inner side of things can never be opened. It is

therefore the duty of all to whom this door has, at least in some measure, been opened, to endeavour to acquaint others with the fact that there is an inner side to things, and that life becomes truer and fuller in proportion as we penetrate to it and make our estimates of all things according to what becomes visible from this interior point of view. In the widest sense everything is a symbol of that which constitutes its inner being, and all Nature is a gallery of arcana revealing great truths to those who can decipher them. But there is a more precise sense in which our current life is based upon symbols in regard to the most important subjects that can occupy our thoughts: the symbols by which we strive to represent the nature and being of God, and the manner in which the life of man is related to the Divine life. The whole character of a man's life results from what he really believes on this subject: not his formal statement of belief in a particular creed, but what he realises as the stage which his mind has actually attained in regard to it. Has a man's mind only reached the point at which he thinks it is impossible to know anything about God, or to make any use of the knowledge if he had it? Then his whole interior world is in the condition of confusion, which must necessarily exist where no spirit of order has yet begun to move upon the chaos in which are, indeed, the elements of being, but all disordered and neutralising one another. Has he advanced a step further, and realised that there is a ruling and an ordering power, but beyond this is ignorant of its nature? Then the unknown stands to him for the terrific, and, amid a tumult of fears and distresses that deprive him of all strength to advance, he spends his life in the endeavour to propitiate this power as something naturally adverse to him, instead of knowing that it is the very centre of his own life and being.
