Why We Make Things and Why it Matters Peter Korn,2015-02-05 Why do we make things? Why do we choose the emotionally and physically demanding work of bringing new objects into the world with creativity and skill? Why does it matter that we make things well? What is the nature of work? And what is the nature of a good life? This January, whether you're honing your craft or turning your hand to a new skill, discover the true value in what it means to be a craftsman in a mass-produced world. Part memoir, part polemic, part philosophical reflection, this is a book about the process of creation. For woodworker Peter Korn, the challenging work of bringing something new and meaningful into the world through one's own efforts is exactly what generates authenticity, meaning, and fulfilment, for which many of us yearn. This is not a 'how-to' book in any sense, Korn wants to get at the 'why' of craft in particular, and the satisfaction of creative work in general, to understand its essential nature. How does the making of objects shape our identities? How do the products of creative work inform society? In short, what does the process of making things reveal to us about ourselves? Korn draws on four decades of hands-on experience to answer these questions eloquently in this heartfelt, personal and revealing book. 'If you are in the building trade or just love creating things as a hobby, you will find this book fascinating' The Sun

Nineteen Eighty-Four George Orwell,2021-01-09 Nineteen Eighty-Four: A Novel, often published as 1984, is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, Nineteen Eighty-Four centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.
