Queer Attachments Professor Sally R Munt, 2012-12-28 Why is shame so central to our identity and to our culture? What is its role in stigmatizing subcultures such as the Irish, the queer or the underclass? Can shame be understood as a productive force? In this lucid and passionately argued book, Sally R. Munt explores the vicissitudes of shame across a range of texts, cultural milieux, historical locations and geographical spaces – from eighteenth-century Irish politics to Philip Pullman's *His Dark Materials* trilogy, from contemporary US academia to the aesthetics of Tracey Emin. She finds that the dynamics of shame are consistent across cultures and historical periods, and that patterns of shame are disturbingly long-lived. But she also reveals shame as an affective emotion, engendering attachments between bodies and between subjects – queer attachments. Above all, she celebrates the extraordinary human ability to turn shame into joy: the party after the fall. *Queer Attachments* is an interdisciplinary synthesis of cultural politics, emotions theory and narrative that challenges us to think about the queerly creative proclivities of shame.

Hollywood Highbrow Shyon Baumann, 2018-06-05 Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie art. Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art.

In Other Worlds A.A. Attanasio,2014-02-27 One star-chained evening in a Manhattan bathroom, Carl Schirmer spontaneously combusts! His body transforms into light, mysteriously snatched from his banal life by an alien intelligence 130 billion years in the future. There, all spacetime is collapsing into a cosmic black hole, the Big Crunch - and a bold, cosmic destiny awaits Carl. Rebuilt from the remnants of his light by extraterrestrials for a cryptic purpose, he awakens in time's last world, the strangest of all - the World. At the edge of infinity, Carl discovers the Foke, nomadic humans who travel among the floating islands of the World. The Foke teach him how to live - and love - at the end of time, and he loses his heart to his plucky guide, the beautiful Evoë. Their life together in this blissful kingdom that knows no aging or disease brings them to rapture - until Evoë falls prey to the zotl, a spidery intelligence who hunt the Foke and eat the chemical by-products of their pain. In order to save his beloved from a gruesome death, Carl must return to Earth - 130 billion years earlier - where he is shocked to discover that the Earth he's come back to is not the one he left. Can he meet the harsh demands of his task before the zotl find him and begin ravishing the Earth? Author's Note: The volumes of this series can each be read independently of the others. The feature that unifies them is their individual observations of science fiction's sub-genre: space opera, which the editors David G. Hartwell and Kathryn Cramer define as colorful, dramatic, large-scale science fiction adventure, competently and sometimes beautifully written, usually focused on a sympathetic, heroic central character and plot action, and usually set in the relatively distant future, and in space or on other worlds, characteristically optimistic in tone. It often deals with war, piracy, military virtues, and very large-scale action, large stakes.
