**Bmp-2** Ryszard Kominek,2009-12-15 \* Includes free decals and masking foil \* Packed with photos in color and black and white The BMP-2 is a second-generation, amphibious infantry fighting vehicle introduced in the 1980s in the Soviet Union, following the BMP-1 of the 1960s. Although the BMP-1 was a revolutionary design, its main armament quickly became obsolete. Therefore the Soviet Union decided to produce an updated and improved version of the BMP-1 with the main emphasis on improving the main armament. In 1972 work got underway to develop an improved version of the BMP-1. This photo album of the BMP-2 contains color photos with English/Polish photo captions. Contains external and internal views of the Russian BMP-2 Infantry Fighting Vehicle, and includes free decals. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. Includes extra features such as decals and masking foil.

**BMP Infantry Fighting Vehicle 1967-94** Steven J. Zaloga,2013-06-20 The Russian BMP infantry fighting vehicle (IFV) was one of the most significant innovations in infantry tactics in the latter half of the 20th century. Built in response to the threat of nuclear warfare, it was the world's first IFV, providing the infantry squad with unprecedented firepower, mobility and protection. With over 55,000 manufactured since 1966, the BMP is also numerically one of the most important armoured vehicles ever built. This richly illustrated book examines the development and design of the BMP, detailing its armaments, performance in combat and variants.

**Bmp-1** Mirosław Skwiot,2009-12-15 \* Includes free decals and masking foil \* Packed with color photos The BMP-1 was the world's first mass-produced infantry fighting vehicle, a revolutionary design combining the properties of an armored personnel carrier and a light tank. The Soviet military leadership saw any future wars as being conducted with nuclear, chemical and biological weapons, where unprotected infantry would soon be either killed or incapacitated by radiation or chemical and biological agents. A vehicle like the BMP would allow infantry to operate from the relative safety of its armored, radiation shielded interior in contaminated areas and to fight alongside it in uncontaminated areas. It would increase infantry squad mobility, provide fire support to them, and also be able to fight alongside main battle tanks. This book is an invaluable album of detailed photographs for the modeler. Bernard Kempinsky, 2012-12-26

**Bradley vs BMP** Mike Guardia, 2016-07-19 In the mid-1960s, the Soviet Union unveiled the BMP-1, the first true "infantry fighting vehicle." A revolutionary design, the BMP marked a significant departure from the traditional "armored personnel carrier," sporting a lower silhouette and a higher-caliber armament than rival APCs. One of the most fearsome light-armored vehicles of its day, it caused great consternation on the other side of the Iron Curtain as the Americans scrambled to design a machine to rival the BMP. The result was the M2 Bradley; however, the American type seemed to be at an immediate disadvantage, with a higher profile, lighter armaments, and a lack of speed compared to the BMP. This book examines the first time these Cold War icons clashed--not on the plains of Europe, but in the deserts of southern Iraq during the first Gulf War. It examines how the Americans were able to combat the BMP in Iraq--despite their apparent disadvantages--investigating the impact of better-trained crews and stronger C&C structures on the eventual outcome. Featuring specially commissioned full-color artwork, this is the absorbing story of the origins, development, and combat performance of the BMP and Bradley, culminating in the bloody battles of the first Gulf War.

**Raising Red Flags** N.R. Jenzen-Jones, Jonathan Ferguson, 2014-11-18 This report examines the significant range of arms and munitions carried and employed throughout the conflict by armed individuals on all sides. It also examines, somewhat less extensively, the range of armoured vehicles and aircraft observed in the conflict. This report examines over 100 distinct weapons systems, over 60 different types of munitions, and over 70 different models of armoured fighting vehicles, as well as miscellaneous associated materiel, in the context of the ongoing conflict in Ukraine. Particular attention is paid to items which may indicate flows of arms and munitions into and within the affected areas of Ukraine. Beginning with an assessment of the arms and munitions employed during the initial unrest in Kiev, in February 2012, the report documents relevant materiel up until the time of publication

We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have

to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a SDVOSB. <https://usgovpub.com>

*Russia and the Arms Trade* Ian Anthony, Stockholm International Peace Research Institute, 1998 For this study, a group of Russian authors were commissioned to describe and assess the arms trade policies and practices of Russia under new domestic and international conditions. The contributors, drawn from the government, industry, and academic communities, offer a wide range of reports on the political, military, economic, and industrial implications of Russian arms transfers, as well as specific case studies of key bilateral arms transfer relationships.

**Russia's Military Modernisation: An Assessment** The International Institute for Strategic Studies (IISS), 2020-09-29 This new IISS Strategic Dossier examines the recent development of Moscow's armed forces and military capabilities. It analyses the aspirations underpinning Russia's military reform programme and its successes as well as its failures. The book also provides insights into Russia's operational use of its armed forces, including in the intervention in Syria, the goals and results of recent state armament programmes, and the trajectory of future developments. This full-colour volume includes more than 50 graphics, maps and charts and over 70 images, and contains chapters on: Russia's armed forces since the end of the Cold War Strategic forces Ground forces Naval forces Aerospace forces Russia's approach to military decision-making and joint operations Economics and industry At a time when Russia's relations with many of its neighbours are increasingly strained, and amid renewed concern about the risk of an armed clash, this dossier is essential reading for understanding the state, capabilities and future of Russia's armed forces.

*M1 Abrams vs T-72 Ural* Steven J. Zaloga, 2011-01-01 The Gulf War bore witness to a number of deadly encounters between these two great adversaries. Heavily armoured, highly mobile and capable of killing at over 2500m the M1 Abrams is, to this day, a veritable fighting machine. Superior to both Iraq's Soviet era T-55 and T-62 tanks, nearly all sources claim that no Abrams tank has ever been destroyed by enemy fire. Despite entering service in 1980, the M1 Abrams remained untested in combat until the Gulf War in 1991, where it was to be confronted by its archenemy the Iraqi-assembled Soviet-designed T-72. Entering production in 1971, the T-72 arguably outstripped its contemporaries in a balance of mobility, protection and firepower. By the time of Operation Desert Storm, however, the tables had turned and the tank suffered due to low quality ammunition and poorly trained crews. In this fascinating study, Steven Zaloga pits these two great fighting machines against one another, plotting the development of the Cold War until both tanks met in combat in the deserts of Iraq and Kuwait.

**Love My Rifle More than You: Young and Female in the U.S. Army** Kayla Williams, Michael E. Staub, 2006-09-17 "Brave, honest, and necessary."—Nancy Pearl, NPR Seattle Kayla Williams is one of the 15 percent of the U.S. Army that is female, and she is a great storyteller. With a voice that is "funny, frank and full of gritty details" (New York Daily News), she tells of enlisting under Clinton; of learning Arabic; of the sense of duty that fractured her relationships; of being surrounded by bravery and bigotry, sexism and fear; of seeing 9/11 on Al-Jazeera; and of knowing she would be going to war. With a passion that makes her memoir "nearly impossible to put down" (Buffalo News) Williams shares the powerful gamut of her experiences in Iraq, from caring for a wounded civilian to aiming a rifle at a child. Angry at the bureaucracy and the conflicting messages of today's military, Williams offers us "a raw, unadulterated look at war" (San Antonio Express News) and at the U.S. Army. And she gives us a woman's story of empowerment and self-discovery.

**The Tanks of August** Ruslan Pukhov, 2010 The publication of this book coincides with the second anniversary of the armed conflict between Russia and Georgia on August 8-12, 2008, now dubbed the Five Day War. The conflict was triggered by Georgia's ambitious and nationalistic president, Mikhail Saakashvili, who attempted a blitzkrieg to conquer the former Georgian autonomy of South Ossetia, which had proclaimed independence. That attempt led to a military intervention by Russia, which acted as the guarantor of peace in the region, and the first official war between Russia and one of the former Soviet republics. This work contains six essays, from a primarily Russian perspective, which provide an in-depth analysis of the political, social, economic, and military context for and causes of the war, the nature of wartime military operations, the human and material costs of the brief struggle, and the war's likely implications for the future.
