**Aircraft Design** Daniel P. Raymer,2006 Winner of the Summerfield Book Award Winner of the Aviation-Space Writers Association Award of Excellence. --Over 30,000 copies sold, consistently the top-selling AIAA textbook title This highly regarded textbook presents the entire process of aircraft conceptual design from requirements definition to initial sizing, configuration layout, analysis, sizing, and trade studies in the same manner seen in industry aircraft design groups. Interesting and easy to read, the book has more than 800 pages of design methods, illustrations, tips, explanations, and equations, and extensive appendices with key data essential to design. It is the required design text at numerous universities around the world, and is a favorite of practicing design engineers.

Return From Berlin Robert Grilley,2005-03-01 During the summer of 1944, the US Eighth Air Force was engaged in a ferocious daytime bombing campaign over Europe. This book is the memoir of a B-17 navigator who found himself far from his American home, based in the English countryside of Northamptonshire. His war in the air, flying deep into enemy territory, surviving intense enemy anti-aircraft fire and enemy fighter attacks, portrays the sometimes conflicting emotions of a young man at war. The book also relates how the friendship with their eight year-old daughter, a relationship that becomes a symbol of survival.

**OKB Tupolev** E. Gordon,Vladimir Rigmant,2005 A History of the Design Bureau and its Aircraft Yefim Gordon & Vladimir Rigmant The origins of the design bureau that was to bear his name can be traced back to the appointment of Andrey Nikolayevich Tupolev as head of the TsAGI's Aviation Department in 1918. Over the years, nearly 300 projects have evolved within the OKB. Nearly 90 reached the prototype construction stage, with more than 40 types put into series production. In the 1930s, the TB-1 (ANT-4) and TB-3 (ANT-6) bombers, the latter being the world's first heavy strategic bomber, paved the way for the long line of large multi-engined aircraft both civil and military for which the OKB is justly famed. Wartime production of the SB and Tu-2 plus the remarkable 'reverse engineering' of the Boeing B-29 that resulted in the Tu-4 led on to the jet Tu-16 and prop Tu-95 bombers. These, in turn were adapted for civil purposes as the Tu-104 and Tu-114 airliners. The supersonic Tu-22 and Tu-22M bombers and the Tu-144 airliner, a move into pilotless aircraft and a host of imaginative but unbuilt projects complete a fascinating work.

**Flying The Big Jets (4th Edition)** Stanley Stewart,2014-09-30 Flying the Big Jets presents the facts that people want to know about the world of the big jets. How does a large aircraft fly? How long is the take-off run at maximum weight? How much fuel is carried on a transatlantic flight? How do the radios work? What aircraft maintenance is required? How often are the tyres changed? What is the life style of a pilot? The answers to these and a thousand other questions are given in sufficient detail to satisfy the most inquisitive of readers. Chapter by chapter the reader is taken gently from the basics of the big jets to the sophistication of the 'glass cockpit' in preparation for the pilot's seat on a Boeing 777 flight from London to Boston. Flying the Big Jets is a comprehensive book that reveals as never before the every-day working environment of the modern long-haul airline pilot. Written by a pilot with over 15,000 flying hours on heavy jets during a 30-year career in commercial aviation, this title is a comprehensive text book taking the reader into the 'glass cockpit' of a Boeing 777. It is also a guide to the principles of flight, the art of navigation and meteorology, and an appreciation of the role played by Air Traffic Control in modern airline operations. An absorbing read for that next long-haul flight. WINGSPAN

**Secret Aircraft Designs of the Third Reich** David Myhra,1998 In Secret Aircraft Designs of the Third Reich aircraft biographer David Myhra gives the reader much more than pictures of proposed German aircraft projects, although this work is richly illustrated by state-of-the-art digital images by Mario Merino. The total number of German projects is in excess of 400. Blohm und Voss tops the list with over 200 project designs. The reader is introduced to the men behind these proposed aircraft. One will discover Woldemar Voigt's frustration with his Me P.1101 and why it simply would not jell. The reader will learn why Dr. Günther of Gotha lobbied the RLM to take his Go P.60 designs and scrap the Horten Ho 229. We see why critics of design genius Alexander Lippisch said that he was a man who had a new design almost every day but fails to put most of them into the air. Myhra describes the shameful handling of Hugo Junkers, the father of German aviation, by the Gestapo. It was Junkers who said that ideas for advanced aircraft projects were about as cheap as blueberries. To an idea must be added materials, resources, and time. And time in all the secret projects was short, very short. Although over 400 aircraft projects were on the drawing board when the war in Europe ended in May 1945, only a handful were in the prototype stage. This outstanding book also offers a superb collection of photographs of scale models from contributors throughout the world, and digital images by Mario Merino and Andreas Ott that offer a one-of-a-kind look at secret German designs.

EA-6B Prowler Model Glenn Hoover,2021-04-13 This book contains detailed instructions on building the Grumman EA-6B Prowler 1/48 scale model aircraft from Kinetic (Kit K48044). These instructions can also be used for kit K48022. In addition to the kit's instructions, there are several aftermarket kits. AM 48114 Wolfpack Radar & Avionics Resin kit, AM 48672 eduard Exterior photo etch, AM 48680 eduard Wing Fold photo etch, AM 48681 eduard Undercarriage photo etch, AM 48684 eduard Electronics Equipment Cage photo etch, AM 49519 eduard Interior photo etch, AM 49520 eduard Seatbelts photo etch. Can you imagine merging all of these instructions? Well, I've done that for you and more. I take the model kit instructions from Kinetic along with the eduard and Wolfpack AM sets and break them up into individual steps. The aftermarket steps are colored gray making them easy to skip if you just have the basic model. This book provides a little history of the EA-6B Prowler, a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 1,178 steps and 163 plus figures over 226 pages that tell you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (i.e., either Kinetic or AM) along with a block to mark that you completed the step. I provide an index of the individual sprue parts that show where in the book the part is mentioned. This index was a great way to make sure that no pieces were overlooked. Finally, there are several pages of in-process photos with assembly tips and the final photos of my build for reference. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. I hope you find this book useful. See a 25-page sample along with photos of finished models and other books at glennhoovermodels.com.

**JG 26** Donald Caldwell,2023-04-03 Jagdgeschwader 26, the German elite fighter unit, was more feared by the Allies than any other Luftwaffe group. Based on extensive archival research in Europe, personal combat diaries and

interviews with more than 50 surviving pilots, Caldwell has assembled a superb day-to-day chronicle of JG 26 operations, from its first air victory in 1939 to its final combat patrol in 1945. A microcosm of World War II exists in the rise and fall of this famous fighter wing. For the first two years of the war it was an even match between the Spitfires and Hurricanes of the Royal Air Force and the Luftwaffe's Messerschmitts and Focke Wulfs; but the scales tipped in favor of the Allies in 1943 with the arrival of the Eighth US Air Force and its peerless P-51 Mustang. The book has been endorsed by the top fighter commanders of three air forces: the RAF (Johnnie Johnson), the USAAF (Hub Zemke), and the Luftwaffe (Adolf Galland) and is considered essential reading for anyone interested in the aerial war of 1941-45.

**Achtung-Panzer!** Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**Development of the B-52** Lori S. Hawthorne-Tagg,2004

**Round the Bend** Nevil Shute,2023-03-24 Round the Bend follows the life of Tom Cutter, an Englishman who becomes a pilot and settles in the Middle East after World War II. Tom starts an air freight business and becomes fascinated by the spiritual beliefs of the local Muslim population, which leads him to start his own religion called The Way. Through his travels and teachings, Tom attracts a group of devoted followers and becomes a spiritual leader. However, his unconventional beliefs and practices lead to conflict with some of the more traditional religious and political authorities in the region. Despite the challenges he faces, Tom remains committed to his beliefs and the pursuit of a more peaceful and harmonious world. The novel explores themes of religion, spirituality, cultural differences, and the clash between tradition and modernity.

**The Vought F4U Corsair** Martin W. Bowman,2019-12-27 This fully illustrated history of the iconic American fighter plane examines its development and combat experience through WWII and beyond. First flown in 1940, the Vought F4U Corsair was the fastest fighter in the world and the fastest US aircraft of any description. Powered by a huge 18-cylinder Pratt and Whitney Double Wasp engine, the first Corsairs were capable of speeds up to 417 miles per hour. This figure would rise to nearly 450mph in later versions. The F4U entered service with the US Navy in September 1942 and over time was extensively used by the US Marines, Royal Navy and Royal New Zealand Air Force. Famous squadrons that flew these planes-like VMF-214 'The Black Sheep' and VF-17 'Jolly Rogers'-maintained their superiority over the Japanese for the rest of the war. After the Second World War the Corsair was used with distinction by the French in Indo-China and again by the US Navy in Korea. Since then, Corsairs have remained a favorite among warbird enthusiasts the world over. This comprehensive book examines the engineering of the Corsairs alongside a detailed history of their development and usage in combat. Illustrated with scores of rare and previously unpublished photographs, Vought F4U Corsair is the perfect book for any fan of the 'bent wing bird'.

**Lockheed Aircraft Since 1913** René J. Francillon,1987

**Aircraft of WWI** Jack Herris,2010-04-01 Illustrated with detailed artworks of combat aircraft and their markings, 'The Essential Aircraft Identification Guide: Aircraft of WWI' is a comprehensive study of the aircraft that fought in the Great War of 1914-18. Arranged chronologically by theater of war and campaign, this book offers a complete organizational breakdown of the units on all the fronts, including the Eastern and Italian Fronts. Each campaign includes a compact history of the role and impact of aircraft on the course of the conflict, as well as orders of battle, lists of commanders and campaign aces such as Manfred von Richtofen, Eddie Rickenbacker, Albert Ball and many more.

**Moon Shot** Alan Shepard,Deke Slayton,Jay Barbree,2011-05-03 New York Times bestseller for fans of First Man: A "breathtaking" insider history of NASA's space program—from astronauts Alan Shepard and Deke Slayton (Entertainment Weekly). On October 4, 1957, the Soviet Union launched Sputnik I, and the space race was born. Desperate to beat the Russians into space, NASA put together a crew of the nation's most daring test pilots: the seven men who were to lead America to the moon. The first into space was Alan Shepard; the last was Deke Slayton, whose irregular heartbeat kept him grounded until 1975. They spent the 1960s at the forefront of NASA's effort to conquer space, and Moon Shot is their inside account of what many call the twentieth century's greatest feat—landing humans on another world. Collaborating with NBC's veteran space reporter Jay Barbree, Shepard and Slayton narrate in gripping detail the story of America's space exploration from the time of Shepard's first flight until he and eleven others had walked on the moon.

**The Illustrated Directory of Fighting Aircraft of World War II** Bill Gunston,1999-01 Specs for more than 160 aircraft, with illustrations and period photos to detail paint schemes. Ideal for scale and R/C modelers.

**A Mighty Fortress** Charles Alling,2002 A Mighty Fortress is the personal account of the Captain and crew of a lead bomber in the enormous formation raids made by the 8th Airforce during the last few months of the Second World War. It is an extraordinary tale of heroism and bravery on the part of the entire crew of just one B17 amongst hundreds - but the one B17 that meant most to them. Flying a total of 27 missions before the war came to an end in May 1945, Alling tells, with great restraint, the story of what it was like to be there, over the skies of enemy territory, constantly on the look out for German fighters; of the enormity of some of the raids they were part of and the consequences for those on the ground; of the planes around them that fell out of the sky under enemy attack, the horror and the determination to succeed. The book gives a unique insight into the lives of one crew of one plane as the War neared its end. Charles B. Alling received the Distinguished Flying Cross and the Air Medal with four Oak Leaf Clusters during the Second World War. He graduated from Yale University in 1947. In 1988, he retired and studied Ethics at Oxford University Graduate School in England. In 1989, he founded the Alling Institute for Ethics. The institute is affiliated with The Foundation for Leadership and Ethics in New York City of which Alling is Chairman Emeritus. Alling serves on the Board of Visitors of the Air University at Maxwell Air Force Base in Montgomery, Alabama, an appointment by former Secretary of Defense, Bill Cohen. He lives in Kennebunk, Maine. In a fascinating way, Chuck Alling recalls his days as a pilot flying B-17's over Germany. He is truly a member of 'The Greatest Generation' and from his book, written from the heart, people can learn a lot about the laughs and the tears of World War II. - Former President George H. W. Bush

Owens weaves a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
