Boeing Helicopters CH-47 Chinook David A. Anderton, Jay Miller, 1989-01-01

Computational Modeling of the CH-47 Helicopter in Hover, 2007 This paper describes installed rotor performance computations for the CH-47 Chinook tandem-rotor helicopter. The computations were performed with a Reynolds-Averaged Navier-Stokes flow solver using overset structured grids to resolve the flow around the rotors, the fuselage, and the resulting rotor wake system. The calculations model all six rotor blades discretely while resolving the rotor motions relative to the fuselage in a time-accurate manner. The computational performance predictions are compared to Boeing flight test data and show good agreement with the experimental measurements. In addition, the computational results provide a wealth of data on the interactions between the rotor wake system and the fuselage that can't be easily obtained in any other way.

Airmobility 1961-1971 Ltj John J. Tolson, 2011-09-26 This is the exciting story of the development of U.S. airmobile power from theory to practice, involving air transport, fixed wing aircraft, and attack helicopters culminating in Vietnam War operations. It includes analysis of airmobile combat operations; doctrinal and interservice disputes; equipment descriptions; and the organization of combat and support units. It also includes data about airmobility in South Vietnam's army and it features personal reflections of the author, who was at the center of airmobility development and who commanded large airmobile units. John J. Tolson in June 1939 participated in the first tactical air movement of ground forces by the U.S. Army. He was in all combat jumps of the 503d Parachute Infantry Regiment during World War II, became an Army aviator in 1957, and served as Director of Army Aviation and Commandant of the Army Aviation School. From April 1967 to July 1968 he commanded the 1st Cavalry Division (Airmobile), Vietnam. (Includes many maps and photographs)

The Smell of Kerosene National Aeronautics and Space Administration, Donald L. Mallick, Peter W. Merlin, 2023-12-28 This book puts the reader in the pilot's seat for a day at the office unlike any other. The Smell of Kerosene tells the dramatic story of a NASA research pilot who logged over 11,000 flight hours in more than 125 types of aircraft. Donald Mallick gives the reader fascinating first-hand description of his early naval flight training, carrier operations, and his research flying career with NASA. After transferring to the NASA Flight Research Center, Mallick became involved with projects that further pushed the boundaries of aerospace technology. These included the giant delta-winged XB-70 supersonic airplane, the wingless M2-F1 lifting body vehicle, and triple-sonic YF-12 Blackbird. Mallick also test flew the Lunar Landing Research Vehicle and helped develop techniques used in training astronauts to land on the Moon.

Marines and Helicopters, 1946-1962 Eugene W. Rawlins, USMC Lieutenant Colonel Eugene Rawlins, William J. Sambito, 2014-06-06 During the early stages of helicopter development, when helicopters were able to lift just slightly more than their own weight, the military services were eagerly seeking to obtain a variety of larger, more useful helicopters. The youthful helicopter industry expressed optimism, although at times unrealistic, in its ability to meet the military requirements. The development of the helicopter program within the Marine Corps was sparked by the foresight and imagination of the officers of the period. While early helicopters provided stepping stones for an orderly progression of the program, the slowness of the technical advances and the periods of financial austerity after World War II and Korea prevented the Marine Corps from developing the vertical envelopment concept as rapidly as desired. The program gained interest and momentum, however, as a result of the success of helicopters in Korea. As Lieutenant General Gerald C. Thomas stated: Indeed, the helicopter gave clear evidence, from its first tactical employment, that a major advance in combat was at hand. This history, which traces the development of helicopters in the Marine Corps from 1946 to 1962, offers a tribute to the creative vision and planning of a handful of Marine officers who conceived of the vertical assault concept in amphibious operations at a time when suitable aircraft to make it work did not exist. The story of the subsequent struggle to procure and develop those aircraft, to refine a doctrine for their employment, and to familiarize the Marine Corps with their use is an interesting and vital part of modern Marine Corps history. The documentary basis for this monograph was primarily the official records of the Marine Corps and Navy Department, but considerable use was made of interviews and correspondence with key individuals involved in all phases of helicopter development.

Smart Helicopter Rotors Ranjan Ganguli, Dipali Thakkar, Sathyamangalam Ramanarayanan Viswamurthy, 2015-12-16 Exploiting the properties of piezoelectric materials to minimize vibration in rotor-blade actuators, this book demonstrates the potential of smart helicopter rotors to achieve the smoothness of ride associated with jet-engined, fixed-wing aircraft. Vibration control is effected using the concepts of trailing-edge flaps and active-twist. The authors' optimization-based approach shows the advantage of multiple trailing-edge flaps and algorithms for full-authority control of dual trailing-edge-flap actuators are presented. Hysteresis nonlinearity in piezoelectric stack actuators is highlighted and compensated by use of another algorithm. The idea of response surfaces provides for optimal placement of trailing-edge flaps. The concept of active twist involves the employment of piezoelectrically induced shear actuation in rotating beams. Shear is then demonstrated for a thin-walled aerofoil-section rotor blade under feedback-control vibration minimization. Active twist is shown to be significant in reducing vibration caused by dynamic stall. The exposition of ideas, materials and algorithms in this monograph is supported by extensive reporting of results from numerical simulations of smart helicopter rotors. This monograph will be a valuable source of reference for researchers and engineers with backgrounds in aerospace, mechanical and electrical engineering interested in smart materials and vibration control. Advances in Industrial Control aims to report and encourage the transfer of technology in control engineering. The rapid development of control technology has an impact on all areas of the control discipline. The series offers an opportunity for researchers to present an extended exposition of new work in all aspects of industrial control.

Marines and Helicopters, 1962-1973 William R. Falls, 1995-07 Traces the development of helicopters in the Marine Corps from 1962 to 1973. Portrays accurately the difficulties faced and the obstacles conquered by the men who developed helicopters in the Marine Corps. Over 100 figures, maps, photos, and tables.

Ch-47 Chinook in Action David Doyle, 2018-02-14 The Boeing Vertol CH-47 Chinook heavy-lift helicopter has become an icon. Its tandem, contra-rotating rotors whirling above an aluminum fuselage punctuated by round porthole windows make this battlefield beast easily recognizable. Its status is owed to its long service life of more than 55 years. Experts predict its longevity will ultimately reach a century of service for heavy lift and use as a flying bus to deliver troops to the fight. This all-new volume explores the development and the U.S. military service of 13 models of Chinook from 1958 to date. Included is extensive coverage of the CH-47's use in Vietnam through Desert Storm and into current operations in Iraq and Afghanistan. Additional coverage is provided of the helicopters use during

various disaster relief efforts in the United States and around the world. More than 160 archival color photos, augmented by 48 vintage black and white images and numerous line drawings, present a clear and concise illustrated history of this iconic helicopter.

Principles of Helicopter Aerodynamics with CD Extra Gordon J. Leishman, 2006-04-24 Written by an internationally recognized teacher and researcher, this book provides a thorough, modern treatment of the aerodynamic principles of helicopters and other rotating-wing vertical lift aircraft such as tilt rotors and autogiros. The text begins with a unique technical history of helicopter flight, and then covers basic methods of rotor aerodynamic analysis, and related issues associated with the performance of the helicopter and its aerodynamic design. It goes on to cover more advanced topics in helicopter aerodynamics, including airfoil flows, unsteady aerodynamics, dynamic stall, and rotor wakes, and rotor-airframe aerodynamic interactions, with final chapters on autogiros and advanced methods of helicopter aerodynamic analysis. Extensively illustrated throughout, each chapter includes a set of homework problems. Advanced undergraduate and graduate students, practising engineers, and researchers will welcome this thoroughly revised and updated text on rotating-wing aerodynamics.

Multiservice Helicopter Sling Load Coast Guard, 2019-06-21 Multiservice Helicopter Sling Load: Basic Operations And Equipment COMDTINST M13482.2B; TM 4-48.09 (FM 4-20.197); MCRP 4-11.3E; NTP 3-04.11; AFMAN 11-223 On the Cover: K9 Piper is one of the very special dogs that keep airports safe. You can find Piper's social media accounts by searching: @airportsk9. This manual is one of a series of manuals for aviation and ground personnel who perform helicopter sling load missions ashore or aboard ship. These manuals are a coordinated effort of the US Army, US Marine Corps, US Navy, US Air Force, and US Coast Guard. All services participate in the sling load certification program begun by the Army in 1984. These manuals include standardized rigging procedures and other information from that program. Efforts were made to standardize ground crew and hookup procedures and terminology. The terms helicopter and aircraft refer to vertical lift aircraft that participate in sling load operations. Where service-unique requirements apply to an entire chapter or body of text, the service initials are at the beginning of the chapter or text. Otherwise the initials are at the end of the applicable sentence. The information in this manual will familiarize personnel with the sling sets, cargo nets, and other sling load equipment in the DOD inventory. It will also acquaint them with the helicopters used for sling load and provide basic procedures for rigging and hooking up loads. Rigging equipment and procedures described in this manual may not be authorized for all aircraft or services because of equipment or service restrictions. This manual does not provide details on aviation operations nor does it present detailed data that is normally contained in unit standing operating procedures (SOPs). Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

Apache AH-64 Boeing (McDonnell Douglas) 1976-2005 Chris Bishop, 2011-07-20 The Boeing (McDonnell Douglas, formerly Hughes) AH-64A Apache is the US Army's primary attack helicopter, and the most advanced helicopter gunship flying today. The most expensive rotary-winged aircraft ever built when it was introduced in the early 1980s, it has since proved its worth on battlefields all over the world, seeing action in the Gulf War, Afghanistan, Bosnia, Kosovo and the recent conflict in Iraq. This book examines the design, development and deployment of a quick-reacting, airborne weapons system that can fight close and deep to destroy, disrupt, or delay enemy forces.

The Mull of Kintyre Review Mull of Kintyre Review, 2011-07-13 The Review team were appointed to examine all available evidence relating to the findings of the RAF Board of Inquiry in the fatal accident on 2 June 1994 in which RAF Chinook helicopter ZD576 crashed on the Mull of Kintyre, killing all 29 on board. The accident resulted in one of the worst peacetime accident and dealt a severe blow to the services and agencies of which the passengers were important members. The investigating Board were unable to determine a definite cause of the accident despite detailed analysis. They, however, concluded that the most probable cause was the selection by the pilots of an inappropriate rate of climb which was insufficient to enable them to safely overfly the high ground of the Mull of Kintyre. The finding has been and remains controversial. The unfairness to deceased aircrew in disciplinary procedures was recognised and the Air Force Board has accepted the introduction of a provision which created a very high standard of proof in relation to findings of negligence. Because of the absence of a cockpit recorder and flight data recorder it cannot be known what was going on in the cockpit in the moments before the crash. The Reviewing Officers' approach to this gap in the evidence was to apply to both pilots what amounted to a presumption of negligence which was inconsistent with the standard of proof. In conclusion this Review recommends that the findings of pilot negligence be set aside; that the Ministry of Defence should consider offering an apology the pilots' families; and that the Ministry of Defence should reconsider its policy and procedures for the transport of personnel

Optimizing Small Multi-Rotor Unmanned Aircraft Stephen D. Prior, 2018-09-18 This design guide was written to capture the author's practical experience of designing, building and testing multi-rotor drone systems over the past decade. The lack of one single source of useful information meant that the past 10 years has been a steep learning curve, a lot of self-tuition and many trial and error tests. Lessons learnt the hard way are not always the best way to learn. This book will be useful for the amateur drone pilot who wants to build their own system from first principles, as well as the academic researcher investigating novel design concepts and future drone applications.

War Stories Conrad M. Leighton, 2016-04-21 As a GI reporter for the 1st Air Cavalry Division in Vietnam, the author--an enlisted man writing primarily for enlisted men--chronicled the experiences of combat soldiers in newspaper and magazine articles. His stories gave the Army's version of events, sprinkled with human interest and humor. They include his observations and photographs of jungle missions, life on firebases, struggles in the rear and his own survival as a harried frontline journalist. He also wrote almost daily letters home to his parents--personal dispatches filled with frank commentary and poignant, at times disturbing, anecdotes. His stories and letters are combined here in chronological order, providing a richly detailed narrative of combat in Vietnam.
