Teaching on a Shoestring Helen Lewis, Russell Grigg, 2018-09-14 In *Teaching on a Shoestring: An A to Z of everyday objects to enthuse and engage children and extend learning in the early years*, Russell Grigg and Helen Lewis explore the educational value of familiar objects and suggest practical activities to help develop young learners' cross-curricular skills. We take many everyday objects for granted. But in a time of ever-tightening school budgets these objects can be invaluable in affording low-cost, high-impact opportunities for learning. With these value-for-money principles in mind, Russell and Helen have packed this practical A to Z handbook to the brim with fun facts, inspiring ideas and exciting activities to help teachers make the best use of familiar objects as launch pads for effective learning. Underpinned by solid theory, *Teaching on a Shoestring* investigates the learning potential of twenty-six inexpensive, readily available resources from apples to ice cubes to zebra-patterned fabric and shows how they can be exploited to develop in young learners the four skills widely regarded as essential in the twenty-first century: communication, collaboration, critical thinking and creativity. The book is organised into two parts: covering theory, then practice. In Part 1 the authors examine the nature of an object-rich learning environment and discuss the benefits of enquiry-based learning, in which the emphasis is upon promoting collaboration, dialogue and higher-order thinking in real-world contexts. In Part 2 the learning opportunities around the twenty-six objects are laid out in detail to illustrate how they can be put into practice. While the book focuses on object-based pedagogy employed with the under-sevens age category, many of the principles can also be applied with older children. There is a common format for the enquiry into each object, arranged into the following sections: In a nutshell key background information about the object in its broader context; Did you know? interesting facts about the object; Ready key vocabulary, resources and health and safety factors to consider; Steady learning goals and intentions; Go activities which show how teachers can develop the four skills of communication, collaboration, critical thinking and creativity around the object; Other ideas follow-up cross-curricular ideas; and Find out more websites and other references for further information. Suitable for early years educators and anyone who works with young children.

**Strengthening Forensic Science in the United States** National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Out of the Dust (Scholastic Gold)** Karen Hesse, 2012-09-01 Acclaimed author Karen Hesse's Newbery Medal-winning novel-in-verse explores the life of fourteen-year-old Billie Jo growing up in the dust bowls of Oklahoma. *Out of the Dust* joins the Scholastic Gold line, which features award-winning and beloved novels. Includes exclusive bonus content! Dust piles up like snow across the prairie. . . . A terrible accident has transformed Billie Jo's life, scarring her inside and out. Her mother is gone. Her father can't talk about it. And the one thing that might make her feel better -- playing the piano -- is impossible with her wounded hands. To make matters worse, dust storms are devastating the family farm and all the farms nearby. While others flee from the dust bowl, Billie Jo is left to find peace in the bleak landscape of Oklahoma -- and in the surprising landscape of her own heart.

A River of Words Jen Bryant, 2008-07-09 2009 Caldecott Honor Book An ALA Notable Book A New York Times Best Illustrated Children's Book A Charlotte Zolotow Honor Book NCTE Notable Children's Book When he wrote poems, he felt as free as the Passaic River as it rushed to the falls. Willie's notebooks filled up, one after another. Willie's words gave him freedom and peace, but he also knew he needed to earn a living. So he went off to medical school and became a doctor -- one of the busiest men in town! Yet he never stopped writing poetry. In this picture book biography of William Carlos Williams, Jen Bryant's engaging prose and Melissa Sweet's stunning mixed-media illustrations celebrate the amazing man who found a way to earn a living and to honor his calling to be a poet.

**Biomedical Visualisation** Ourania Varsou,Paul M. Rea,Michelle Welsh,2022-12-16 This book focuses on the challenges to biomedical education posed by the lockdowns and restrictions to on campus teaching brought about by the COVID-19 pandemic and highlights the tools and digital visualization technologies that have been successfully developed and used for remote teaching. Biomedical education for science, medical, dental and allied health professionals relies on teaching visual and tactile knowledge using practice-based approaches. This has been delivered for decades via on-campus lectures, workshops and laboratories, teaching practical skills as well as fundamental knowledge and understanding. However, the arrival of the COVID-19 pandemic meant that education across the globe had to pivot very quickly to be able to deliver these skills and knowledge in a predominantly online environment. This brought with it many challenges, as Higher Education staff, had to adapt to deliver these visual subjects remotely. This book addresses the challenges and solutions faced by Higher Education staff in teaching visual content in distance education. Chapters include literature reviews, original research, and pedagogical reflections for a wide range of biomedical subjects, degrees such as medicine, dentistry and veterinary sciences with examples from undergraduate and postgraduate settings. The goal of the book is to provide a compendium of expertise based on evidence gathered during the COVID-19 pandemic, as well as reflections on the challenges and lessons learned from this dramatic shift in teaching. It also presents new examples of best practices that have emerged from this experience to ensure that they are not lost as we return to on-campus learning in a new era of biomedical teaching. This book will be of interest to anyone looking for a helpful reference point when designing online or blended teaching for visual practice-based subjects.
