**Mapping Global Theatre Histories** Mark Pizzato,2019-05-02 This textbook provides a global, chronological mapping of significant areas of theatre, sketched from its deepest history in the evolution of our brain's 'inner theatre' to ancient, medieval, modern, and postmodern developments. It considers prehistoric cave art and built temples, African trance dances, ancient Egyptian and Middle-Eastern ritual dramas, Greek and Roman theatres, Asian dance-dramas and puppetry, medieval European performances, global indigenous rituals, early modern to postmodern Euro-American developments, worldwide postcolonial theatres, and the hyper-theatricality of today's mass and social media. Timelines and numbered paragraphs form an overall outline with distilled details of what students can learn, encouraging further explorations online and in the library. Questions suggest how students might reflect on present parallels, making their own maps of global theatre histories, regarding geo-political theatrics in the media, our performances in everyday life, and the theatres inside our brains.

**Theatrical Worlds (Beta Version)** Charles Mitchell,2014 From the University of Florida College of Fine Arts, Charlie Mitchell and distinguished colleagues from across America present an introductory text for theatre and theoretical production. This book seeks to give insight into the people and processes that create theater. It does not strip away the feeling of magic but to add wonder for the artistry that make a production work well. -- Open Textbook Library.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Esoteric Principles Of Vedic Astrology Bepin Behari, This book presents the ancient Hindu astrology in its occult and esoteric aspects. Traditional practitioners often failed to defend the veracity of the subject and dispel the scepticism of modern intellectuals. The ancient revelations have been restated here to meet contemporary requirements. The ancient seers presented Vedic Astrology under various assumptions and in allegorical and symbolic languages. They assumed polydimensional extension of human consciousness which was closely related with planetary impulses. Apart from the general approach to this ancient science, the study presents in depth the astrological description of the nature of man. It also provides deeper implications of various planetary combinations. Advanced practitioners as well as general readers will find the book informative, illuminating and highly rewarding.

**Achtung-Panzer!** Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**Flutter Echo** David Toop,2019 David Toop has become one of our most significant touchstones of contemporary music writing and reportage. Employing intensified studies into World Music in relation to popular (as well as marginalized) contemporary trends, Toop has created one of the most distinctive publishing histories of modern music thinking for our times. Flutter Echo is his memoir of a life enchanted with all aspects of music both composed and abstract. Toop's personal growth as a practicing musician, visual artist, and witness to some of the most significant events in modern music history is a completely fascinating view into a world of considered thought and random access. From recording for Brian Eno's Obscure Records imprint in 1975 to co-publishing the radical music magazines Musics and Collusion to developing music programming for BBC to releasing recordings he personally made of Yanomami Shaman rituals to working with artists such as creative pop icon Bjork and Jamaican dub pioneer Prince Far-I, Toop has experienced one of the most interesting and dynamic timelines in the dynamic world of our contemporary sound world. Player, listener, scholar, reporter, communitarian, parent, iconoclast--David Toop brings his own life in music to focus in a remarkable, wonder-filled, engaging read.

Critical Theory of Communication Christian Fuchs,2016-10-10 This book contributes to the foundations of a critical theory of communication as shaped by the forces of digital capitalism. One of the world's leading theorists of digital media Professor Christian Fuchs explores how the thought of some of the Frankfurt School's key thinkers can be deployed for critically understanding media in the age of the Internet. Five essays that form the heart of this book review aspects of the works of Georg LukAcs, Theodor W. Adorno, Herbert Marcuse, Axel Honneth and Ju rgen Habermas and apply them as elements of a critical theory of communication's

foundations. The approach taken starts from Georg Lukacs Ontology of Social Being, draws on the work of the Frankfurt School thinkers, and sets them into dialogue with the Cultural Materialism of Raymond Williams. Critical Theory of Communication offers a vital set of new insights on how communication operates in the age of information, digital media and social media, arguing that we need to transcend the communication theory of Habermas by establishing a dialectical and cultural-materialist critical theory of communication.

**Introduction to Critical Theory** David Held,2023-04-28 The writings of the critical theorists caught the imagination of students and intellectuals in the 1960s and 1970s. They became a key element in the formation and self-understanding of the New Left, and have been the subject of continuing controversy. Partly because of their rise to prominence during the political turmoil of the sixties, and partly because they draw on traditions rarely studied in the Anglo-American world, the works of these authors are often misunderstood. In this book David Held provides a much-needed introduction to, and evaluation of, critical theory. He is concerned mainly with the thought of the Frankfurt school—Horkheimer, Adorno, Marcuse, in particular—and with Habermas, one of Europe's leading contemporary thinkers. Several of the major themes considered are critical theory's relation to Marx's critique of the political economy, Freudian psychoanalysis, aesthetics, and the philosophy of history. There is also a discussion of critical theory's substantive contribution to the analysis of capitalism, culture, the family, and the individual, as well as its contribution to epistemology and methodology. Held's book will be necessary reading for all concerned with understanding and evaluating one of the most influential intellectual movements of our time.

**Flatline Constructs** Mark Fisher,2018-02 Donna Haraway's celebrated observation that our machines are disturbingly lively, while we ourselves are frighteningly inert has given this issue a certain currency in contemporary cyber-theory. But what is in- teresting about Haraway's remark - its challenge to the oppositional think- ing that sets up free will against determinism, vitalism against mechanism - has seldom been processed by a mode of theorizing which has tended to reproduce exactly the same oppositions. These theoretical failings, it will be argued here, arise from a resistance to pursuing cybernetics to its limits (a failure evinced as much by cyberneticists as by cultural theorists, it must be added). Unraveling the implications of cybernetics, it will be claimed, takes us out to the Gothic flatline. The Gothic flatline designates a zone of radical immanence. And to theorize this flatline demands a new approach, one committed to the theorization of immanence. This thesis calls that approach Gothic Materialism.

**Concurrent/simultaneous Engineering** Paul G. Ranky,1994 Part 0 is a simulated 3D eBook on DVD, approximately 400 screens, is an interactive browser readable multimedia electronic book, containing several important text, diagrams, images, calculations, interactive 3D & 360 degree panorama objects, video clips, spreadsheets etc., the design team needs to calculate with using their own data. Parts 1 to 3 are DVD videos taped in the USA, Europe, Hong Kong, China and Japan, illustrating the importance of industrial design with ergonomics with several examples. Key subjects introduced include the following: What is industrial design? What is ergonomics, or in other words human factors engineering? What is aesthetics and how does it fit into the subject area? What is usability, and why is this important for industrial design and ergonomics? Why is fashion, and also the cultural setting within which the particular fashion style is implemented and practiced important in industrial design with ergonomics? How does art fit into all this?, and others.--Site web de l'éditeur.
