The Smell of Kerosene National Aeronautics and Space Administration,Donald L. Mallick,Peter W. Merlin,2023-12-28 This book puts the reader in the pilot's seat for a day at the office unlike any other. The Smell of Kerosene tells the dramatic story of a NASA research pilot who logged over 11,000 flight hours in more than 125 types of aircraft. Donald Mallick gives the reader fascinating first-hand description of his early naval flight training, carrier operations, and his research flying career with NASA. After transferring to the NASA Flight Research Center, Mallick became involved with projects that further pushed the boundaries of aerospace technology. These included the giant delta-winged XB-70 supersonic airplane, the wingless M2-F1 lifting body vehicle, and triple-sonic YF-12 Blackbird. Mallick also test flew the Lunar Landing Research Vehicle and helped develop techniques used in training astronauts to land on the Moon.

Evaluation of Iroquois UH-1B Stability and Control L. R. Ward,AIRCRAFT RESEARCH AND DEVELOPMENT UNIT EDINBURGH (Australia),1982 The purpose of this investigation was to evaluate the forward flying qualities of the Iroquois UH-1B helicopter for the Training and SAR missions as conducted by the Royal Australian Air Force. Several unsatisfactory handling characteristics were identified. Highly undesirable features included the rapidly divergent longitudinal long term response in maximum power climbs; excessive vibration levels; coupling of sideslip to pitching moments; excessive trim changes when transitioning from climb to descent; and non-linearities in the collective fixed static longitudinal stability gradients in maximum power climbs. Undesirable features included the level flight gust response; longitudinal control response in level flight; lateral-directional oscillation; and adverse yaw. Possible causes of the extremely divergent longitudinal long term response in high powered climbs and the sideslip-pitch coupling are discussed.

Panama 1989-90 Gordon L. Rottman,2012-09-20 In December 1989 US Army forces, supported by the US Air Force and US Navy, participated in Operation 'Just Cause'--the invasion of Panama. A combination of airborne, helicopter and ground assaults quickly secured key objectives and eliminated organized resistance. Beginning with a brief history of US-Panama relations and the development of the Panamanian Defense Forces, this book focuses principally on the military aspects of Operation 'Just Cause', and ends with a summary of the conflict's aftermath. Numerous photographs, and detailed color plates depict the actions of the armed forces units that executed this difficult, and controversial, operation.

Wiring Vietnam Anthony J. Tambini,2007-05-30 During the Vietnam War, the U.S. Army deployed electronic sensors along the Ho Chi Minh Trail in Laos, Cambodia, North Vietnam, and South Vietnam in order to detect and track troop and vehicle movements. At approximately 8,100 miles in length, monitoring this sophisticated logistics network_consisting of roads, trails, vehicle parks, petroleum pipelines, and storage areas_was no mean task. Since the work was classified as 'Secret' until only recently, a comprehensive story of the electronic sensors used in Southeast Asia has never been completely told. Wiring Vietnam: The Electronic Wall relates the history of the electronic detection system that was deployed during the Vietnam War. Author Anthony Tambini covers everything from the sensors used to detect seismic signals from nearby troop and vehicle movements to audio sensors that were deployed to pick up conversations of troops as well as traffic noise of vehicles to engine ignition detectors. Beginning with the conception, development, and implementation of these sensors, Tambini then relates how, ultimately, the various signals the sensors collected were transmitted to orbiting aircraft that would process and retransmit the signals onward to a base in Thailand. There the data underwent further analysis for possible targets that could be attacked from the air. Anthony Tambini, a member of the 25th Tactical Fighter Squadron based at Ubon, Thailand in the late 1960s, was part of an organization that dropped these sensors. His firsthand perspective, along with rarely seen photographs of the actual sensors used, will provide those interested in the Vietnam War and modern warfare with a clear picture of an undocumented side of history.

Aerodynamics, Aeronautics, and Flight Mechanics Barnes W. McCormick,1995 Designed for introductory courses in aerodynamics, aeronautics and flight mechanics, this text examines the aerodynamics, propulsion, performance, stability and control of an aircraft. Major topics include lift, drag, compressible flow, design information, propellers, piston engines, turbojets, statics, dynamics, automatic stability and control. Two new chapters have been added to this edition on helicopters, V/STOL aircraft, and automatic control.

Expect Resistance ,2008 Expect Resistance is not one but three books, each of which may be read as a complete work unto itself. The first book, printed in standard black ink, continues the inquiry into modern life and its discontents begun in Days of War, Nights of Love, Just as that book included improved versions of texts originally published between 1996 and 1999, this book draws on CrimethInc. material from 2000 to 2004, painstakingly refined and augmented with a great deal of new content. The second book, in red ink, is a composite account, related by three narrators, of the adventures and tribulations that inevitably ensue when people pursuing their dreams enter into conflict with the world as it is.

The Military Balance 2020 International Institute for Strategic Studies,2020-02-14 Amid continuing conflict and broadening insecurity, The Military Balance provides essential facts and analysis for decision-makers and for better informed public debate. The Military Balance is widely recognised as the best unclassified source of defense information on personnel, equipment and budgets for every country.

Adapting, Transforming, and Modernizing Under Fire Inigo Guevara Moyano,U. S. Army War College,Strategic Studies Institute,2013-06-03 Since President Felipe Calderon took office in December 2006, Mexico has embarked upon the implementation of a culture of law and security that has triggered a war with organized crime. This war has involved all sectors of society and has activated a series of renovations in its armed forces, which to date remain the most trusted institutions in Mexican society. This groundbreaking Letort Paper is an important contribution to an understanding of the structure, culture, motivators, and challenges of the Mexican military in the 21st century. Mr. Iñigo Guevara Moyano, a Mexican researcher and writer, provides a clear picture of doctrinal and structural transformations, adaptations, and improvement that the Mexican armed forces have endured over the past 5 years. Mr. Moyano focuses on how the counternarcotic role has impacted its organization, deployments, and operations, and how it has generated new doctrinal and equipment requirements.

Sea Harrier Over the Falklands Commander 'Sharkey' Ward, DSC, AFC, RN,1993-08-05 Sharkey Ward commanded 801 Naval Air Squadron, HMS Invincible, during the Falkland War of April to June 1982, and was senior Sea Harrier adviser to the command on the tactics, direction and progress of the air war. He flew over 60 war missions, achieved three air-to air kills, and took part in or witnessed a total of ten kills; he was also the leading night pilot, and was decorated with the Distinguished Service Cross for gallantry. But what, after all, could 20 Sea Harriers, operating from a flight-deck bucketing about in the South Atlantic, do against more than 200 Argentine military aircraft flown by pilots who, as the raids against the British shipping proved, displayed enormous skill and almost suicidal gallantry? The world knows the answer – now. What is puzzling, therefore, is this book's truthful depiction of the attitudes of some senior non-flying naval officers, and of the RAF, towards the men (and indeed the machine) that made possible the victory in the Falklands. This first-hand account charts, in detail, the naval pilots' journey to the South Atlantic, and how they took on and triumphantly conquered the challenges they faced. It is a dramatic story, leavened with accounts of the air-to-air fighting and of life in a squadron at sea and on a war footing. But it is also a tale of inter-Service rivalry, bureaucratic interference, and the less-than-generous attitudes of a number of senior commanders who should certainly have known better; indeed, some of them might even have lost the war through a lack of understanding of air warfare. The author attempts to put the record straight.

Encyclopedia of Modern U.S. Military Weapons Timothy M. Laur,Steven L. Llanso,1998-07 An accessible encyclopedia of military weapons represents a collaboration with The Army, Navy, and Air Force Times, and covers each weapon system, its evolution, development, and combat experience.

History as Policy Ron Huisken,Meredith Thatcher,2007-12-01 The fortieth anniversary of the Strategic and Defence Studies Centre's founding provided the opportunity to assemble many of Australia's leading analysts and commentators to review some of the more significant issues that should define Australian defence policy. ... The papers collected in this volume are not informed by a common view of where Australia should focus its defence policy, but all address themes that should figure prominently in this difficult but essential task--Provided by publisher.

Skycrane John A. McKenna,2010 The Skycrane was the last creation of aircraft design pioneer Igor Sikorsky. In SKYCRANE: Igor Sikorsky's Last Vision, former Sikorsky Aircraft Executive Vice President John A. McKenna traces the development of this remarkable helicopter from original concept and early sketches to standout performer for the military and private industry. Responsible for building the first S-64 Skycrane in 1961 and for supporting its Army and commercial programs, McKenna has written a comprehensive history chronicling a radically designed helicopter that many thought would not succeed. Indeed, initial versions generated no orders. But General Harry Kinnards vision and advocacy resulted in the Skycranes support of combat operations in Vietnam as part of the groundbreaking concept of supporting Army troops with helicopters rather than trucks. In 1971 Erickson Lumber Company acquired the first Skycrane intended for commercial use to move timber deep in American forests. Owner Jack Erickson later acquired the world manufacturing and support rights to the aircraft creating Erickson Air-Crane Inc. A half century after its first flight the Skycrane continues to save lives, provide essential services, and earn daily profits worldwide. Beautifully illustrated with scores of historical photographs, SKYCRANE features interviews with engineers who designed and tested the helicopter and with Army pilots who flew it during combat in Vietnam. This engagingly written work is the definitive history of a unique and important aircraft.

Air War in the Falklands 1982 Chris Chant,2013-01-20 The war fought between the United Kingdom and Argentina in 1982, for the possession of the Falkland Islands was probably the last 'colonial' war that will ever be undertaken by the British. This book shows how the key to British success was the speed with which the British gained and then maintained air superiority over the islands and the waters around then with their small force of Sea Harrier STOVL warplanes, which operated from two aircraft carriers. Though subsonic, the Sea Harrier and its Sidewinder AAM were a combination altogether superior to Argentina's mix of supersonic and subsonic warplanes with older weapons, and this advantage was emphasised by the significantly greater tactical acuity of the British pilots. The Argentine pilots fought with considerable piloting skill and enormous courage, and scored a number of stunning successes against British warships, but ultimately they could not prevent the British landing and the following land campaign that resulted in complete Argentine defeat.
