Mobilizing the Past for a Digital Future Erin Walcek

Averett, Jody Michael Gordon, Derek B Counts, 2016-10-19 *Mobilizing the Past* is a collection of 20 articles that explore the use and impact of mobile digital technology in archaeological field practice. The detailed case studies present in this volume range from drones in the Andes to iPads at Pompeii, digital workflows in the American Southwest, and examples of how bespoke, DIY, and commercial software provide solutions and craft novel challenges for field archaeologists. The range of projects and contexts ensures that *Mobilizing the Past for a Digital Future* is far more than a state-of-the-field manual or technical handbook. Instead, the contributors embrace the growing spirit of critique present in digital archaeology. This critical edge, backed by real projects, systems, and experiences, gives the book lasting value as both a glimpse into present practices as well as the anxieties and enthusiasm associated with the most recent generation of mobile digital tools. This book emerged from a workshop funded by the National Endowment for the Humanities held in 2015 at Wentworth Institute of Technology in Boston. The workshop brought together over 20 leading practitioners of digital archaeology in the U.S. for a weekend of conversation. The papers in this volume reflect the discussions at this workshop with significant additional content. Starting with an expansive introduction and concluding with a series of reflective papers, this volume illustrates how tablets, connectivity, sophisticated software, and powerful computers have transformed field practices and offer potential for a radically transformed discipline.

Biopharmaceuticals Gary Walsh, 2013-04-29 The latest edition of this highly acclaimed textbook, provides a comprehensive and up-to-date overview of the science and medical applications of

biopharmaceutical products. Biopharmaceuticals refers to pharmaceutical substances derived from biological sources, and increasingly, it is synonymous with 'newer' pharmaceutical substances derived from genetic engineering or hybridoma technology. This superbly written review of the important areas of investigation in the field, covers drug production, plus the biochemical and molecular mechanisms of action together with the biotechnology of major biopharmaceutical types on the market or currently under development. There is also additional material reflecting both the technical advances in the area and detailed information on key topics such as the influence of genomics on drug discovery.

Sagmeister & Walsh: Beauty Stefan Sagmeister, Jessica Walsh, 2018-11-19 Acclaimed designers Sagmeister & Walsh explore the essence of beauty and the transformative power of beautiful design In this groundbreaking highly visual book, world-renowned designers Stefan Sagmeister and Jessica Walsh set out on a mission: to find out what beauty is and the many ways that it impacts our lives. They turn to philosophy, history, and science to understand why we are drawn to beauty and how it influences the way we feel and behave. Determined to translate their findings into action, Sagmeister & Walsh show us how beauty can improve the world.

Dimensions of Human Behavior Elizabeth D. Hutchison, 2018-07-26 Updated Edition of a Best Seller! Dimensions of Human Behavior: Person and Environment presents a current and comprehensive examination of human behavior using a multidimensional framework. Author Elizabeth D. Hutchison explores the biological dimension and the social factors that affect human development and behavior, encouraging readers to connect their own personal experiences with social trends in order to recognize the unity of person and

environment. Aligned with the 2015 curriculum guidelines set forth by the Council on Social Work Education (CSWE), the substantially updated Sixth Edition includes a greater emphasis on culture and diversity, immigration, neuroscience, and the impact of technology. Twelve new case studies illustrate a balanced breadth and depth of coverage to help readers apply theory and general social work knowledge to unique practice situations. The companion volume, *Dimensions of Human Behavior: The Changing Life Course*, Sixth Edition, builds on the dimensions of person and environment with the dimension of time and demonstrates how they work together to produce patterns in life course journeys.

Essays in the History of Irish Education Brendan

Walsh, 2016-09-29 This book provides a complete overview of the development of education in Ireland including the complex issue of how religion can coexist with education and how a national identity can be aided through Irish language teaching. It also offers a comprehensive exploration of the development, issues, challenges and future of education in Ireland within the context of historical studies.

Free Culture Lawrence Lessig, 2015-11-13 How big media uses technology and the law to lock down culture and control creativity. *Free Culture* is an entertaining and important look at the past and future of the cold war between the media industry and new technologies. - Marc Andreessen, cofounder of Netscape. *Free Culture* goes beyond illuminating the catastrophe to our culture of increasing regulation to show examples of how we can make a different future. These new-style heroes and examples are rooted in the traditions of the founding fathers in ways that seem obvious after reading this book. Recommended reading to those trying to unravel the shrill hype around 'intellectual property.' - Brewster Kahle, founder of the

Pandemic Exposures Fassin Didier, Marion Fourcade, 2021-11 An illuminating, indispensable analysis of a watershed moment and its possible aftermath. For people and governments around the world, the onset of the COVID-19 pandemic seemed to place the preservation of human life at odds with the pursuit of economic and social life. Yet this naive alternative belies the complexity of the entanglements the crisis has created and revealed not just between health and wealth but also around morality, knowledge, governance, culture, and everyday subsistence. Didier Fassin and Marion Fourcade have assembled an eminent team of scholars from across the social sciences to reflect on the myriad ways SARS-CoV-2 has entered, reshaped, or exacerbated existing trends and structures in every part of the globe. The contributors show how the disruptions caused by the pandemic have both hastened the rise of new social divisions and hardened old inequalities and dilemmas. An indispensable volume, *Pandemic Exposures* provides an illuminating analysis of this watershed moment and its possible aftermath.

The Shining Wall Melissa Ferguson, 2019-04-01 Full size image In a ruined world, where wealthy humans push health and longevity to extremes and surround themselves with a shining metal wall, privilege and security is predicated on the services of cloned Neandertals, and the exploitation of women in the shanty towns and wastelands beyond the fortress city. This is the frightening yet moving story of orphaned Alida and her younger sister Graycie, and their struggle for survival in the Demi-Settlements outside the wall.

When the sisters are forced to enter the City by very different means they risk being separated forever. Cloned Neandertal officer, Shuqba is exiled to a security outpost in the Demi-Settlements when she fails to adhere to the impossible standards set for her species within the City. Will she offer a lifeline to Alida or betray her? The Shining Wall is at once a frightening parable of our unjust world of haves and have nots, a richly imagined yet thrilling story of technological control and the fight for survival, and a paean to female friendship and power.

'Gripping from the word GO. A fearlessly feminist imagining of the entire fractured human genus in a future none of us should ever have to face. The Shining Wall enshrines familiar relationships even as it destroys genre tropes about a woman's role in a ruined world. Leave it to a new voice like this to set the post-apocalyptic construction on its ear. A triumph of realistic science fiction.' — Meg Elison, author of *The Book of the Unnamed Midwife* 'Gritty and voicey, perhaps prescient, this is a gripping dystopia from a shining new voice.' — Marlee Jane Ward, author of *Welcome to Orphancorp* and *Psynode*

Transportation Decision Making Kumares C. Sinha, Samuel Labi, 2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects. Performing an economic efficiency evaluation that accounts for such

factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decision making. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is an ideal coursebook for the subject of transportation systems analysis and evaluation.

Bullshit Jobs David Graeber, 2019-05-07 From bestselling writer David Graeber—"a master of opening up thought and stimulating debate" (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013, David Graeber asked this question in a playful, provocative essay titled "On

the Phenomenon of Bullshit Jobs.” It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society’s most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. “Clever and charismatic” (The New Yorker), Bullshit Jobs gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into an avocation and “a thought-provoking examination of our working lives” (Financial Times).

Irish Education John Coolahan, 1981

The Conspirators' Hierarchy John Coleman, 1997 This work argues for the existence of a committee of 300, an elite body which controls every aspect of politics, religion, commerce and industry, answerable to no one except itself. It maintains that the confusion of social and moral values in the free world has been deliberately created.

White Cargo Don Jordan, Michael Walsh, 2008-03-08 White Cargo is the forgotten story of the thousands of Britons who lived and died in bondage in Britain's American colonies. In the seventeenth and eighteenth centuries, more than 300,000 white people were shipped to America as slaves. Urchins were swept up from London's streets to labor in the tobacco fields, where life expectancy was no more than two years. Brothels were raided to provide breeders for Virginia. Hopeful migrants were duped into signing as indentured servants,

unaware they would become personal property who could be bought, sold, and even gambled away. Transported convicts were paraded for sale like livestock. Drawing on letters crying for help, diaries, and court and government archives, Don Jordan and Michael Walsh demonstrate that the brutalities usually associated with black slavery alone were perpetrated on whites throughout British rule. The trade ended with American independence, but the British still tried to sell convicts in their former colonies, which prompted one of the most audacious plots in Anglo-American history. This is a saga of exploration and cruelty spanning 170 years that has been submerged under the overwhelming memory of black slavery. *White Cargo* brings the brutal, uncomfortable story to the surface.

The Restoration of Engravings, Drawings, Books, and Other Works on Paper Max Schweidler, 2006 Ever since its original publication in Germany in 1938, Max Schweidler's *Die Instandsetzung von Kupferstichen, Zeichnungen, Büchern usw* has been recognized as a seminal modern text on the conservation and restoration of works on paper. To address what he saw as a woeful dearth of relevant literature and in order to assist those who have 'set themselves the goal of preserving cultural treasures,' the noted German restorer composed a thorough technical manual covering a wide range of specific techniques, including detailed instructions on how to execute structural repairs and alterations that, if skilfully done, can be virtually undetectable. By the mid-twentieth century, curators and conservators of graphic arts, discovering a nearly invisible repair in an old master print or drawing, might comment that the object had been 'Schweidlerized.' This volume, based on the authoritative revised German edition of 1949, makes Schweidler's work available in English for the first time, in a meticulously edited and annotated critical

edition. The editor's introduction places the work in its historical context and probes the philosophical issues the book raises, while some two hundred annotati

Community/public Health Nursing Mary Albrecht Nies, Melanie McEwen, 2007 Community/Public Health Nursing: Promoting the Health of Populations, 4th Edition focuses on the issues and responsibilities of contemporary community/public health nursing. Its emphasis on working with populations combined with the unique upstream preventive approach prepares the reader to assume an active role in caring for the health of clients in community and public settings. Plus, the new full-color design highlights special features and enhances content. Features photo-novellas to engage students and demonstrate applications of important community health nursing concepts. Provides detailed case studies that emphasize community aspects of all steps of the nursing process to promote the community perspective in all health situations. Examines issues of social justice and discusses how to target inequalities in arenas such as education, jobs, and housing to prepare students to function in a community-focused health care system. Demonstrates the use of theoretical frameworks common to community and public health nursing showing how familiar and new theory bases can be used to solve problems and challenges in the community. Illustrates real-life situations with highlighted Clinical Examples depicting today's community/public health care. Discussion of Levels of Prevention presented within the Case Studies address specific applications for each level. Provides Learning Activities at the end of each chapter to challenge students to apply chapter material outside the classroom. Includes a disaster management and preparedness chapter to examine this important new area of concern and responsibility in community health. Offers

content on forensic nursing to explore this new subspecialty in community health. Summarizes research study findings pertinent to chapter topics in Research Highlights boxes. Highlights specific ethical issues in Ethical Insights boxes. Presents Healthy People 2010 objectives in feature boxes in appropriate chapters. Provides a Media Resources section at the front of each chapter that details the numerous Evolve components available to students. Chapter outline added to the front of chapters makes locating information in the chapter easier.
