A Year with Swollen Appendices Brian

Eno, 2020-11-17 The diary and essays of Brian Eno republished twenty-five years on with a new introduction by the artist in a beautiful hardback edition. 'One of the seminal books about music . . . an invaluable insight into the mind and working practices of one of the industry's undeniable geniuses.' GUARDIAN At the end of 1994, Brian Eno resolved to keep a diary. His plans to go to the cinema, theatre and galleries fell quickly to the wayside. What he did do - and write - however, was astonishing: ruminations on his collaborative work with David Bowie, U2, James and Jah Wobble, interspersed with correspondence and essays dating back to 1978. These 'appendices' covered topics from the generative and ambient music Eno pioneered to what he believed the role of an artist and their art to be, alongside adroit commentary on quotidian tribulations and happenings around the world. This beautiful 25th-anniversary hardcover edition has been redesigned in the same size as the diary that eventually became this book. It features two ribbons, pink paper delineating the appendices (matching the original edition) and a two-tone paper-over-board cover, which pays homage to the original design. An intimate insight into one of the most influential creative artists of our time, *A Year with Swollen Appendices* is an essential classic.

Rebellion in Brunei Harun Abdul Majid, 2007-06-27

Brunei has long been associated with massive oil resources and the stability that its wealth can guarantee. But little is known of the revolt of 1962 that might have changed the fortunes of the sultanate and the fate of Southeast Asia. In theory, Brunei is a constitutional sultanate, but in practice it is an absolute monarchy. Since the

1962 rebellion, a state of emergency has been in force and the Sultan has ruled by decree. It is a small state in a region dominated by the superpower of China and its size is a significant factor in determining the country's policy towards defence and security - territorially, politically and economically. This is the first comprehensive history of the Brunei Rebellion, which was the trigger for the Indonesia-Malaysia confrontation of the 1960s and of critical importance in understanding the history of the region. Harun Abdul Majid explores the turmoil throughout Southeast Asia that was the backdrop to the rebellion and analyses how Brunei not only survived but actually emerged from this turbulent period as a stronger and more coherent political state. Among other issues, he asks: how did events affect the position of the Sultan and the people of Brunei? How did the relationship with the United Kingdom evolve? And what happened next? The revolt of 1962 was a small, armed uprising in support of a Borneo Federation consisting of Brunei, Sarawak and North Borneo. It opposed the Malaysian Federation, which was seen as a buttress of British and Western imperial interest. In a period of great tension between the West and the Communist world, China viewed the rebellion as a national liberation war and it was quickly suppressed by the British Emergency Force. But although the rebellion itself was short-lived, the consequences for the region's international relations within Asia and with the West - especially given Brunei's emergence as a significant oil producer - were far-reaching.

Principles of Helicopter Aerodynamics with CD Extra Gordon J. Leishman, 2006-04-24 Written by an internationally recognized teacher and researcher, this book provides a thorough, modern treatment of the aerodynamic principles of helicopters and other rotating-wing vertical lift aircraft such as

tilt rotors and autogiros. The text begins with a unique technical history of helicopter flight, and then covers basic methods of rotor aerodynamic analysis, and related issues associated with the performance of the helicopter and its aerodynamic design. It goes on to cover more advanced topics in helicopter aerodynamics, including airfoil flows, unsteady aerodynamics, dynamic stall, and rotor wakes, and rotor-airframe aerodynamic interactions, with final chapters on autogiros and advanced methods of helicopter aerodynamic analysis. Extensively illustrated throughout, each chapter includes a set of homework problems. Advanced undergraduate and graduate students, practising engineers, and researchers will welcome this thoroughly revised and updated text on rotating-wing aerodynamics.

Film Theory Thomas Elsaesser, Malte Hagener, 2015-03-12 What is the relationship between cinema and spectator? This is the key question for film theory, and one that Thomas Elsaesser and Malte Hagener put at the center of their insightful and engaging book, now revised from its popular first edition. Every kind of cinema (and every film theory) first imagines an ideal spectator, and then maps certain dynamic interactions between the screen and the spectator's mind, body and senses. Using seven distinctive configurations of spectator and screen that move progressively from 'exterior' to 'interior' relationships, the authors retrace the most important stages of film theory from its beginnings to the present—from neo-realist and modernist theories to psychoanalytic, 'apparatus,' phenomenological and cognitivist theories, and including recent cross-overs with philosophy and neurology. This new and updated edition of *Film Theory: An Introduction through the Senses* has been extensively revised and rewritten throughout, incorporating discussion of contemporary films

like Her and Gravity, and including a greatly expanded final chapter, which brings film theory fully into the digital age.

Against Global Apartheid Patrick Bond, 2003 In 'Against Global Apartheid', Patrick Bond reveals the extent of the economic and human damage caused by policies implemented by World Bank and the IMF in developing countries, particularly South Africa, and argues that there is another way to more socially just economic development.

Claiming the Stones, Naming the Bones Elazar Barkan, Ronald Bush, 2003-01-09 These fourteen essays address controversies over a variety of cultural properties, exploring them from perspectives of law, archeology, physical anthropology, ethnobiology, ethnomusicology, history, and cultural and literary study. The book divides cultural property into three types: Tangible, unique property like the Parthenon marbles; intangible property such as folktales, music, and folk remedies; and communal representations, which have lead groups to censor both outsiders and insiders as cultural traitors.

Building an Inclusive Development Community Karen Heinicke-Motsch, Susan Sygall, 2004 * An essential resource for all development agencies seeking to include people with disabilities* User-friendly tools and practical advice from experienced practitioners There are four hundred million people with disabilities living in developing countries today. All too often they live in poverty and isolation. If development is to truly address the needs of the poor and marginalized, the inclusion of people with disabilities is crucial. Building an Inclusive Development Community is a toolkit for development

agencies and others concerned with the participation of people with disabilities at all levels and in all areas of the international development process. The manual is organized into issues and includes helpful worksheets, best practice examples, resources and much more.

Cruelty and Utopia Jean-François

Lejeune, 2005-02-03 This landmark collection of illustrated essays explores the vastly underappreciated history of America's other cities -- the great metropolises found south of our borders in Central and South America. Buenos Aires, So Paulo, Mexico City, Caracas, Havana, Santiago, Rio, Tijuana, and Quito are just some of the subjects of this diverse collection. How have desires to create modern societies shaped these cities, leading to both architectural masterworks (by the likes of Luis Barragn, Juan O'Gorman, Lcio Costa, Roberto Burle Marx, Carlos Ral Villanueva, and Lina Bo Bardi) and the most shocking favelas? How have they grappled with concepts of national identity, their colonial history, and the continued demands of a globalized economy? Lavishly illustrated, *Cruelty and Utopia* features the work of such leading scholars as Carlos Fuentes, Edward Burian, Lauro Cavalcanti, Fernando Oayrzn, Roberto Segre, and Eduardo Subirats, along with artwork ranging from colonial paintings to stills from Chantal Akerman's film *From the Other Side*. Also included is a revised translation of Spanish King Philip II's influential planning treatise of 1573, the *Laws of the Indies*, which did so much to define the form of the Latin American city.

Satellite Remote Sensing for Archaeology Sarah

H. Parcak, 2009-03-31 This handbook is the first comprehensive overview of the field of satellite remote sensing for archaeology and how it can be applied to ongoing archaeological fieldwork projects across the globe. It provides a survey of

the history and development of the field, connecting satellite remote sensing in archaeology to broader developments in remote sensing, archaeological method and theory, cultural resource management, and environmental studies. With a focus on practical uses of satellite remote sensing, Sarah H. Parcak evaluates satellite imagery types and remote sensing analysis techniques specific to the discovery, preservation, and management of archaeological sites. Case studies from Asia, Central America, and the Middle East are explored, including Xi'an, China; Angkor Wat, Cambodia and Egypt's floodplains. In-field surveying techniques particular to satellite remote sensing are emphasized, providing strategies for recording ancient features on the ground observed from space. The book also discusses broader issues relating to archaeological remote sensing ethics, looting prevention, and archaeological site preservation. New sensing research is included and illustrated with the inclusion of over 160 satellite images of ancient sites. With a companion website (www.routledge.com/textbooks/9780415448789) with further resources and colour images, *Satellite Remote Sensing for Archaeology* will provide anyone interested in scientific applications to uncovering past archaeological landscapes a foundation for future research and study.

Quarrying Opencast and Alluvial Mining John Sinclair, 2012-12-06 Quarrying and all other branches of surface mining rather than diminishing in importance have become of more and more consequence economically, industrially and particularly with the depletion of high-grade deep-mined mineral reserves. Low-grade minerals require low cost extraction and this in many cases necessitates very expensive mechanized equipment with the cost of individual units running into millions of pounds in the case of large scale operations with high productivity. There has been, and there still is, a tendency for the smaller single quarries to be amalgamated into groups with large financial resources and therefore with the ability to purchase these expensive machines so necessary to make operations viable. This in turn requires wider administrative and technical knowledge in executives of these groups and as these often handle a wide range of products from widely differing systems of working, this technical knowledge should embrace the exploitation of many different types of deposits. There is, at present, a great dearth throughout the world of such qualified executives as is apparent from advertisements of vacancies in the technical press. It would appear that these industries offer an attractive career to the widely qualified and experienced technologist in these fields. This book deals with methods of working in the surface extractive industries, quarry management and power supply-but does not deal with related ancillary processes except where these affect quarrying operations.

Art in the Anthropocene Etienne Turpin, Dr Heather Davis, 2015-06-11 Taking as its premise that the proposed epoch of the Anthropocene is necessarily an aesthetic event, this collection explores the relationship between contemporary art and knowledge production in an era of ecological crisis. Art in the Anthropocene brings together a multitude of disciplinary conversations, drawing together artists, curators, scientists, theorists and activists to address the geological reformation of the human species. With contributions by Amy Balkin, Ursula Biemann, Amanda Boetzkes, Lindsay Bremner, Joshua Clover & Juliana Spahr, Heather Davis, Sara Dean, Elizabeth Ellsworth & Jamie Kruse (smudge studio), Irmgard Emmelhainz, Anselm Franke, Peter Galison, Fabien Giraud, & Ida Soulard, Laurent Gutierrez & Valerie Portefaix (MAP Office), Terike Haapoja & Laura Gustafsson, Laura Hall, Ilana Halperin, Donna Haraway & Martha Kenney, Ho Tzu Nyen, Bruno Latour, Jeffrey Malecki, Mary Mattingly, Mixrice (Cho Jieun & Yang Chulmo), Natasha Myers, Jean-Luc Nancy & John Paul Ricco, Vincent Normand, Richard Pell & Emily Kutil, Tomas Saraceno, Sasha Engelmann & Bronislaw Szerszynski, Ada Smailbegovic, Karolina Sobocka, Richard Streitmatter-Tran & Vi Le, Anna-Sophie Springer, Sylvere Lotringer, Peter Sloterdijk, Zoe Todd, Etienne Turpin, Pinar Yoldas, and Una Chaudhuri, Fritz Ertl, Oliver Kellhammer & Marina Zurkow. This book is also available as an open access publication through the Open Humanities Press: <http://openhumanitiespress.org/art-in-the-anthropocene.html>

Modern Tort Law V.H. Harpwood, 2009-06-02 Modern Tort Law is a comprehensive, accessible and up-to-date introduction to the law of torts. Now in its seventh edition, Vivienne Harpwood's popular, student-friendly text explains the principles of all aspects of tort law in a lively and thought-

provoking manner. The broad coverage of modern tort law makes this an ideal textbook for any undergraduate tort law course. Students are encouraged to understand and apply the principles of tort law effectively throughout and particular attention is paid to the context within which the law is evolving, making these topics both accessible and enjoyable. This seventh edition has been revised and updated to take into account developments since publication of the previous edition including in the areas of privacy, negligence, personal injury and defamation. Human Rights issues are integrated throughout the text rather than treating the topic in isolation, in line with the way the subject is commonly taught. Now more accessible and student-friendly, it includes: advice on further reading at the end of each chapter which is intended to point students towards sources of further study and critical debate new chapter introductions, rewritten to reflect learning outcomes. Modern Tort Law is now supported by a Companion Website which offers lecturer resources available to adopters of the book, including 'think points' designed to encourage reflection and debate and PowerPoints of diagrams and flowcharts contained within the text. A dedicated student section also offers weblinks, a guide to key Tort law cases, a flashcard glossary and a test bank of multiple choice questions.
