Cultures and Globalization Helmut K Anheier, Yudhishthir Raj Isar, 2008-09-17
The world's cultures and their forms of creation, presentation and preservation are deeply affected by globalization in ways that are inadequately documented and understood. The Cultures and Globalization series is designed to fill this void in our knowledge. In this series, leading experts and emerging scholars track cultural trends connected to globalization throughout the world, resulting in a powerful analytic tool-kit that encompasses the transnational flows and scapes of contemporary cultures. Each volume presents data on cultural phenomena through colourful, innovative information graphics to give a quantitative portrait of the cultural dimensions and contours of globalization. This second volume The Cultural Economy analyses the dynamic relationship in which culture is part of the process of economic change that in turn changes the conditions of culture. It brings together perspectives from different disciplines to examine such critical issues as: • the production of cultural goods and services and the patterns of economic globalization • the relationship between the commodification of the cultural economy and the aesthetic realm • current and emerging organizational forms for the investment, production, distribution and consumption of cultural goods and services • the complex relations between creators, producers, distributors and consumers of culture • the

policy implications of a globalizing cultural economy By demonstrating empirically how the cultural industries interact with globalization, this volume will provide students of contemporary culture with a unique, indispensable reference tool.

Measuring and Visualizing Learning in the Information-Rich Classroom Peter Reimann,Susan Bull,Michael Kickmeier-Rust,Ravi Vatrapsu,Barbara

Wasson,2015-11-19 Integrated information systems are increasingly used in schools, and the advent of the technology-rich classroom requires a new degree of ongoing classroom assessment. Able to track web searches, resources used, task completion time, and a variety of other classroom behaviors, technology-rich classrooms offer a wealth of potential information about teaching and learning. This information can be used to track student progress in languages, STEM, and in 21st Century skills, for instance. However, despite these changes, there has been little change in the kind of data made available to teachers, administrators, students, and parents. Measuring and Visualizing Learning in the Information-Rich Classroom collects research on the implementation of classroom assessment techniques in technology-enhanced learning environments. Building on research conducted by a multinational and multidisciplinary team of learning technology experts, and specialists from around the globe, this book addresses these discrepancies. With contributions from major researchers in education technology, testing and assessment, and education psychology, this book contributes to a holistic approach for building the information infrastructure of the 21st Century school.

The Arts of Making in Ancient Egypt Gianluca Miniaci, Juan Carlos Moreno Garcia, Stephen Quirke, Andréas Stauder, 2018 This book provides an innovative analysis of the conditions of ancient Egyptian craftsmanship in the light of the archaeology of production, linguistic analysis, visual representation and ethnographic research. During the past decades, the imaginative figure of ancient Egyptian material producers has moved from workers to artisans and, most recently, to artists. In a search for a fuller understanding of the pragmatics of material production in past societies, and moving away from a series of modern preconceptions, this volume aims to analyse the mechanisms of material production in Egypt during the Middle Bronze Age (2000-1550 BC), to approach the profile of ancient Egyptian craftsmen through their own words, images and artefacts, and to trace possible modes of circulation of ideas among craftsmen in material production. The studies in the volume address the mechanisms of ancient production in Middle Bronze Age Egypt, the circulation of ideas among craftsmen, and the profiles of the people involved, based on the material traces, including depictions and writings, the ancient craftsmen themselves left and produced.

A Double Burden Uzi Rebhun, Dani Kranz, Heinz Sünker, 2022-11-01 Critically analyzing Israeli-Jewish migration to Germany, A Double Burden combines complementary approaches from the social sciences—quantitative, qualitative,

and ethnographic research—to track migrants' reasons for moving, their families' reactions, their settlement in the new country, and their social and economic integration, construction of identity, and perceptions of old and new antisemitism in Germany. Each chapter is placed within a relevant theoretical framework, the entire discussion set against the background of present-day international migration in general, migration to Germany in particular, and the Jewish experience in unified Germany. Rich with empirical evidence and presented with exceptional clarity and accessibility, *A Double Burden* will appeal to scholars of migration studies, the Israeli Diaspora, and German-Jewish life, as it also illuminates trauma and memory among third-generation Holocaust survivors.
