**Buck Rogers in the 25th Century** Phil Nowlan,2009 Continuing the adventures of Buck Rogers and Wilma Deering in the 25th century, this volume picks up the continuity where Volume One left off, with the next adventure of the world's original and best science-fiction strip. Includes a special 16-page color section with an introductory essay by noted science-fiction writer and pop culture historian Ron Goulart.

**Advanced Calculus** Lynn Harold Loomis,Shlomo Sternberg,2014-02-26 An authorised reissue of the long out of print classic textbook, Advanced Calculus by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention Differential and Integral Calculus by R Courant, Calculus by T Apostol, Calculus by M Spivak, and Pure Mathematics by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds.

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bracingly confronts our present, and offers a transcendent vision for a way forward.

**Flying beyond the stall** Douglas A. Joyce, 2014 The X-31 Enhanced Fighter Maneuverability Demonstrator was unique among experimental aircraft. A joint effort of the United States and Germany, the X-31 was the only X-plane to be designed, manufactured, and flight tested as an international collaboration. It was also the only X-plane to support two separate test programs conducted years apart, one administered largely by NASA and the other by the U.S. Navy, as well as the first X-plane ever to perform at the Paris Air Show. Flying Beyond the Stall begins by describing the government agencies and private-sector industries involved in the X-31 program, the genesis of the supermaneuverability concept and its initial design breakthroughs, design and fabrication of two test airframes, preparation for the X-31's first flight, and the first flights of Ship #1 and Ship #2. Subsequent chapters discuss envelope expansion, handling qualities (especially at high angles of attack), and flight with vectored thrust. The book then turns to the program's move to NASA's Dryden Flight Research Center and actual flight test data. Additional tasking, such as helmet-mounted display evaluations, handling quality studies, aerodynamic parameter estimation, and a tailless study are also discussed. The book describes how, in the aftermath of a disastrous accident with Ship #1 in 1995, Ship #2 was prepared for its outstanding participation in the Paris Air Show. The aircraft was then shipped back to Edwards AFB and put into storage until the late 1990s, when it was refurbished for participation in the U. S. Navy's VECTOR program. The book ends with a comprehensive discussion of lessons learned and includes an Appendix containing detailed information.

**The Space Vampires** , 2013-04-02 Circa 2100 A scourge of sex and death from an alien spaceship WHEN CAPTAIN CARLSEN ENTERED THE VAST DERELICT SPACESHIP, he was shaken by the discovery of its immobilized humanoid passengers. Later, after three of the strange aliens had been transported to Earth, his foreboding was more than justified. The creatures were energy vampires whose seductive embraces were fatal, whose lust for vitality was boundless. As they took over the willing bodies of their victims and sexual murders spread terror throughout the land, Carlsen worked toward their destruction—even while he was erotically drawn to the most beautiful vampire of all! Thoroughly intriguing -Chicago Sun-Times (1976) New slant on horror...unique rendering of the age-old enigma of the kiss of death -Chicago Tribune (1976) COLIN WILSON is the author of more than 100 fiction and nonfiction books. The Outsider (1956), published at the age of 24, earned him worldwide critical acclaim. The Space Vampires, his fifty-first book, was translated into Spanish, Japanese, French, Dutch and Swedish and was later adapted for screen in the movie LIFEFORCE, directed by Tobe Hooper (SALEM'S LOT, POLTERGEIST, THE TEXAS CHAIN SAW MASSACRE). The movie failed however to capture the true spirit of the cult classic reprinted here by popular demand.

**The Beautiful Struggle** Ta-Nehisi Coates, 2009-01-06 An exceptional father-son story from the National Book Award-winning author of Between the World and Me about the reality that tests us, the myths that sustain us, and the love that saves us. Paul Coates was an enigmatic god to his sons: a Vietnam vet who rolled with the Black Panthers, an old-school disciplinarian and new-age believer in free love, an autodidact who launched a publishing company in his basement dedicated to telling the true history of African civilization. Most of all, he was a wily tactician whose mission was to carry his sons across the shoals of inner-city adolescence—and through the collapsing civilization of Baltimore in the Age of Crack—and into the safe arms of Howard University, where he worked so his children could attend for free. Among his brood of seven, his main challenges were Ta-Nehisi, spacey and sensitive and almost comically miscalibrated for his environment, and Big Bill, charismatic and all-too-ready for the challenges of the streets. The Beautiful Struggle follows their divergent paths through this turbulent period, and their father's steadfast efforts—assisted by mothers, teachers, and a body of myths, histories, and rituals conjured from the past to meet the needs of a troubled present—to keep them whole in a world that seemed bent on their destruction. With a remarkable ability to reimagine both the lost world of his father's generation and the terrors and wonders of his own youth, Coates offers readers a small and beautiful epic about boys trying to become men in black America and beyond. Praise for The Beautiful Struggle “I grew up in a Maryland that lay years, miles and worlds away from the one whose summers and sorrows Ta-Nehisi Coates evokes in this memoir with such tenderness and science; and the greatest proof of the power of this work is the way that, reading it, I felt that time, distance and barriers of race and class meant nothing. That in telling his story he was telling my own story, for me.”—Michael Chabon, bestselling author of The Yiddish Policemen's Union and The Amazing Adventures of Kavalier & Clay “Ta-Nehisi Coates is the young James Joyce of the hip hop generation.”—Walter Mosley

**Demonic Grounds** Katherine McKittrick, 2006 In a long overdue contribution to geography and social theory, Katherine McKittrick offers a new and powerful interpretation of black women's geographic thought. In Canada, the

Caribbean, and the United States, black women inhabit diasporic locations marked by the legacy of violence and slavery. Analyzing diverse literatures and material geographies, McKittrick reveals how human geographies are a result of racialized connections, and how spaces that are fraught with limitation are underacknowledged but meaningful sites of political opposition. *Demonic Grounds* moves between past and present, archives and fiction, theory and everyday, to focus on places negotiated by black women during and after the transatlantic slave trade. Specifically, the author addresses the geographic implications of slave auction blocks, Harriet Jacobs's attic, black Canada and New France, as well as the conceptual spaces of feminism and Sylvia Wynter's philosophies. Central to McKittrick's argument are the ways in which black women are not passive recipients of their surroundings and how a sense of place relates to the struggle against domination. Ultimately, McKittrick argues, these complex black geographies are alterable and may provide the opportunity for social and cultural change. Katherine McKittrick is assistant professor of women's studies at Queen's University.

**Wonders All Around** Bruce McCandless III, 2021-07-13 The Man You Never Knew You Knew It's one of the most powerful and popular images in the history of space exploration: an astronaut in a snow-white spacesuit, untethered and floating alone in an expanse of blue. Bruce McCandless II is the man in that spacesuit, and *Wonders All Around: The Incredible True Story of Astronaut Bruce McCandless II and the First Untethered Flight in Space* is the thoroughly engrossing, extensively researched story of his inspiring life and groundbreaking accomplishments, as told by his son, a gifted writer and storyteller. Bruce McCandless II, a Navy fighter pilot, joined NASA in 1966. He was Houston's capsule communicator—the person talking to the astronauts—as Apollo 11's Neil Armstrong made his giant leap for mankind in 1969. McCandless supported subsequent Apollo flights and developed technology and techniques his fellow astronauts used during the Skylab program, working behind the scenes until he was chosen to ride Challenger into space on the tenth shuttle mission. When he stepped into the cosmos to test the Manned Maneuvering Unit, he became a space flight icon. But the road to that incredible feat was not the sure bet it should have been for such a gifted man. Bruce McCandless II was an astronaut for 24 years, and his story encompasses the development of the space agency itself—the changes in focus, in personnel, in approach, and in the city of Houston that grew up with it. *Wonders All Around* is more than a catalogue of McCandless's extraordinary achievements, which included work on the design, deployment, and repair of the Hubble Space Telescope. It is also a tale of perseverance and devotion. Recounted with insight and humor, this book explores the relationship between a father and a son, men of two very different generations. And finally, it is an exploration of the mindset of one unique individual, and the courage, imagination, and tenacity that propelled him and his country to their place in the forefront of space history. From *Wonders All Around: Bruce McCandless* turned his Jeep around and screeched out of the cul-de-sac in front of our house for the ten-minute drive to the space center. The moon, a waxing crescent, was standing thirty degrees above the western horizon, and my father slipped into a sort of reverie as he sped toward it on NASA Road One. The moon floated serene and imperturbable in front of him like a black-and-white photograph of itself, Earth's gravitational remora, her pale silent sister, movie star and legend, goddess and mirage. Bruce McCandless had just turned thirty-two. He was an engineer, a true son of science, a distant nephew of Sir Isaac Newton. He knew the formulas required for achieving orbital velocity, could tell you the fuel mixtures you needed, the stages and timing of rocket-booster separations. He brushed sentiments away like so many spider webs. But even he was having trouble believing that human beings—his colleagues and friends—were up there in the sky, getting ready to do something no one had ever done before. He was going to be part of it. He would be talking to two men as they walked on the moon. The young astronaut hadn't quite reached his lifelong goal of touching the lunar surface, but he was close. He was almost there. He could feel it.
