X-15 Photo Scrapbook Tony R. Landis, Dennis R. Jenkins, 2003 The North American X-15 was the last in a line of manned rocket-powered research airplanes built during the 1950s to explore ever-faster and higher flight regimes. This was an era before computers were commonplace, and the only way to investigate the unknown was to go there. The program was launched in 1954 specifically to produce the first hypersonic (velocities greater than five times the speed of sound) manned aircraft. Forward-thinking researchers also decided to design the airplane to fly to the edge of space, long before the manned space program had begun in earnest. An in-depth history of the X-15 program may be found in *Hypersonic: The Story of the North American X-15* by Dennis R. Jenkins and Tony R. Landis. This book is a collection of illustrations that were assembled for *Hypersonic* but would not fit into the finished work. Since many of these are significant and most have never before been published, it was decided to print this scrapbook as a companion volume to *Hypersonic*. With over 350 b/w and 50 color photos, this scrapbook provides an excellent visual look at a very exciting research program. Dimensions (width x height): 9 x 9 inches # of pages 108 # of color photographs: 400 b/w & color photos

X-Planes Photo Scrapbook Dennis R. Jenkins, 2004 9x9, 450 black & white, photos and 50 color photos The X-Planes conjure up images of Chuck Yeager first breaking the sound barrier in the X-1 or of the black, bullet-shaped X-15 streaking through the skies at over Mach 6. But there have been 48 more X-designations assigned, as well as a host of other experimental aircraft that did not fall into the formal X-series. Some of these investigated very low-speed flight, vertical take-off, or were technology demonstrators for production military aircraft. Others were missiles, or gliders. One was supposed to be a spacecraft. Tony R. Landis and Dennis R. Jenkins have assembled an outstanding collection of photographs documenting the X-Planes. These photographs come from government and company archives as well as personal and public collections. Hundreds of photos - some in color and many never-before-seen - detail the modern history of experimental flight.
