*X-15 Photo Scrapbook* Tony R. Landis, Dennis R. Jenkins, 2003 The North American X-15 was the last in a line of manned rocket-powered research airplanes built during the 1950s to explore ever-faster and higher flight regimes. This was an era before computers were commonplace, and the only way to investigate the unknown was to go there. The program was launched in 1954 specifically to produce the first hypersonic (velocities greater than five times the speed of sound) manned aircraft. Forward-thinking researchers also decided to design the airplane to fly to the edge of space, long before the manned space program had begun in earnest. An in-depth history of the X-15 program may be found in *Hypersonic: The Story of the North American X-15* by Dennis R. Jenkins and Tony R. Landis. This book is a collection of illustrations that were assembled for *Hypersonic* but would not fit into the finished work. Since many of these are significant and most have never before been published, it was decided to print this scrapbook as a companion volume to *Hypersonic*. With over 350 b/w and 50 color photos, this scrapbook provides an excellent visual look at a very exciting research program. Dimensions (width x height): 9 x 9 inches # of pages 108 # of color

How to Build Sci-fi Model Spacecraft Richard Marmo, 2004

Science fiction is more popular now than it has ever been, as seen by the number of interesting and imaginative science-fiction books, magazines, movies, and television shows produced each year. The scale modeling world has embraced the science-fiction phenomenon by offering a number of detailed and creative scale-model spaceship and diorama kits. In *How To Build Sci-Fi Model Spacecraft*, author Richard Marmo guides readers through a number of step-by-step buildups of styrene and resin kits. He offers helpful advice on subjects from basic kit assembly to more advanced methods like combining kits and customizing kits with unique, scratch-built pieces. Readers will learn the creative methods that allow them to add a personal touch to their kit and increase its overall detail, quality, and accuracy.

*Piper Cubs* Peter M. Bowers, 1993 Traces the history of the Piper Cub, describes each model and its markings, and looks at the many ways the plane has been used.

**X-Planes Photo Scrapbook** Dennis R. Jenkins, 2004 9x9, 450 black & white, photos and 50 color photos The X-Planes conjure up images of Chuck Yeager first breaking the sound barrier in the X-1 or of the black, bullet-shaped X-15 streaking through the skies at over Mach 6. But there have been 48 more X-designations assigned, as well as a host of other experimental aircraft that did not fall into the formal X-series. Some of these investigated very low-speed flight, vertical take-off, or were technology demonstrators for production military aircraft. Others were missiles, or gliders. One was supposed to be a spacecraft. Tony R. Landis and Dennis R. Jenkins have assembled an outstanding collection of photographs documenting the X-Planes. These photographs come from government and company archives as well as personal and public collections. Hundreds of photos - some in color and many never-before-seen - detail the modern history of experimental flight.

Goodman Games,2020-06-30 Lost in the sweeping dunes of an expansive desert! Your band, separated from its caravan during a sandstorm, stumbles upon the ancient ruins of a city, mostly buried in the sands. One of the structures, a prominent step pyramid, juts above the sandy wastes, beckoning for exploration. There must be untold riches secluded inside its dusty halls and crypts. But, more importantly, you desperately hope there is water, food, and relief from the unrelenting sun to be found therein. For without those basic necessities, your band will succumb not to some fell beast, but this harsh environment instead. Onward, as all heroes wish to meet their end while swinging a sword or unleashing arcane magic! So, check your weapons, adjust your armor, and inventory your precious remaining food and water supplies. High adventure awaits in the underground chambers and tiers of a pyramid covered by the sands of time. But what of the peculiar masked humans who rule the upper levels of the pyramid? And what of the dark master that rules these humans from the lower levels of the forsaken halls? An adventure inspired by the classic pulp stories such as Robert E. Howard's famous Conan story Red Nails. This tome is an

homage to the original dungeon crawl and sandbox setting first explored decades ago as B4: The Lost City. Herein, you will find high-quality scans of the original Basic edition adventure module, plus commentary by a variety of gaming luminaries. This includes an interview with Harold Johnson, the module's original developer, who also discusses his work on playtesting, Dragonlance, and other TSR titles. Also, herein is a full fifth edition conversion of the original adventure as well as brand new additional dungeons, such as the fully developed lower pyramid, additional details on the Lost City itself, and the dreaded Lower Catacombs. Although converted for the most recent edition, this material is presented in a distinct early 1980s style, tone, and presentation. This is the perfect setting for a fully playable fifth edition mini-campaign, starting at 1st level and reaching all the way up 7th level or beyond. Made in the USA.
