Nithi Sathāpitānon, Brian Mertens

Borobudur John N. Miksic,1990 This glorious ninth-century Buddhist monument – the largest Buddhist monument in the world – stands in the midst of the lush Kedu plain of central Java in Indonesia, where it is visited annually by over a million people. Borobudur consists of over a thousand exquisite relief sculptures extending along its many terraces for a total distance of more than a mile. The monument is constructed to symbolically represent the pilgrimage to enlightenment. The visitor ascends Borobudur, past scenes depicting the world of desire, through the life story of the Buddha and the heroic deeds of other famous enlightened beings, finally arriving at the great circular terraces at the very top of the structure, symbolizing the formless world of emptiness and the attainment of enlightenment. With over eighty color photographs and an informative text, this book celebrates the art and architecture of this famous Buddhist monument. This is the first volume to be published since the ten-year restoration and reconstruction of Borobudur was completed in 1985. In addition to illuminating the archaeological history, religious symbolism, and cultural context of the monument, it presents a detailed description of the sculptured panels and their significance in Buddhist history and philosophy. This book not only provides a scholarly introduction to Borobudur and its historical context, but it also retells – in text and stunning color photographs – the major stories illustrated in the hundreds of bas-relief panels that rank among the masterpieces of Asian and Buddhist art. --

All-That-Is Waving in Resonance with the Vibes Llan Starkweather,2007-08 The vibrational energies of earth harmonically support the electromagnetic force of all living things and the game we play of reality. Holographic and quantum theory affirm that the observer and the observed are one: the body is actually blinking on and off and is sensitive to the entire range of electromagnetic frequencies. While technology in the hands of a secret government, with its overt and covert hold on minds and bodies, is careening down the telescoping aisle of time, it is accompanied by a tremendous acceleration of possible consciousness toward Knowing that the reality that we intend for ourselves is indeed tentatively located in but a few grids within the holographic infinity that Matters, the All-That-Is: by our pranic energy there manifest we yet create our own reality. This book is a piece of the ever-growing network of dissent urgently seeking a window denied by all media to a consciousness of compassion for All-That-Is. Global agony comes to dominate a book about earth and human energies.

The Palaeolithic Origins of Human Burial Paul Pettitt,2013-08-21 Humans are unique in that they expend considerable effort and ingenuity in disposing of the dead. Some of the recognisable ways we do this are visible in the Palaeolithic archaeology of the Ice Age. The Palaeolithic Origins of Human Burial takes a novel approach to the long-term development of human mortuary activity – the various ways we deal with the dead and with dead bodies. It is the first comprehensive survey of Palaeolithic mortuary activity in the English language. Observations in the modern world as to how chimpanzees behave towards their dead allow us to identify ‘core’ areas of behaviour towards the dead that probably have very deep evolutionary antiquity. From that point, the palaeontological and archaeological records of the Pliocene and Pleistocene are surveyed. The core chapters of the book survey the mortuary activities of early hominins, archaic members of the genus Homo, early Homo sapiens, the Neanderthals, the Early and Mid Upper Palaeolithic, and the Late Upper Palaeolithic world. Burial is a striking component of Palaeolithic mortuary activity, although existing examples are odd and this probably does not reflect what modern societies believe burial to be, and modern ways of thinking of the dead probably arose only at the very end of the Pleistocene. When did symbolic aspects of mortuary ritual evolve? When did the dead themselves become symbols? In discussing such questions, The Palaeolithic Origins of Human Burial offers an engaging contribution to the debate on modern human origins. It is illustrated throughout, includes up-to-date examples from the Lower to Late Upper Palaeolithic, including information hitherto unpublished.

Gods, Guardians, and Lovers Vishakha N. Desai, Darielle Mason, 1993 Celestial lovers, guardian deities, gods, goddesses, semidivine and human forms bedeck the magnificent, elaborately sculpted medieval temples of northern India. This handsome catalog of an exhibition at the Asia Society in New York City explains that each temple, rich in symbolism and sacred geometry, was viewed as a microcosmic model of cosmic creation and order. Led by Desai, director of the Asia Society Galleries, and Mason of Boston's Museum of Fine Arts, six scholars discuss the historical background, patterns of royal patronage, architectural placement of images and Hindu stories and hymns as keys to the cult of temple images and to the medieval worship service, an elaborate multisensory experience. Nearly 200 color and black-and-white plates document a major architectural and sculptural legacy.

The Art of Ancient India Susan L. Huntington, John C. Huntington, 2014-01-01 To scholars in the field, the need for an up-to-date overview of the art of South Asia has been apparent for decades. Although many regional and dynastic genres of Indic art are fairly well understood, the broad, overall representation of India's centuries of splendor has been lacking. The Art of Ancient India is the result of the author's aim to provide such a synthesis. Noted expert Sherman E. Lee has commented: "Not since Coomaraswamy's History of Indian and Indonesian Art (1927) has there been a survey of such completeness." Indeed, this work restudies and reevaluates every frontier of ancient Indic art _ from its prehistoric roots up to the period of Muslim rule, from the Himalayan north to the tropical south, and from the earliest extant writing through the most modern scholarship on the subject. This dynamic survey--generously complemented with 775 illustrations, including 48 in full color and numerous architectural ground plans, and detailed maps and fine drawings, and further enhanced by its guide to Sanskrit, copious notes, extensive bibliography, and glossary of South Asian art terms--is the most comprehensive and most fully illustrated study of South Asian art available. The works and monuments included in this volume have been selected not only for their artistic merit but also in order to both provide general coverage and include transitional works that furnish the key to an all encompassing view of the art. An outstanding portrayal of ancient India's highest intellectual and technical achievements, this volume is written for many audiences: scholars, for whom it provides an up-to-date background against which to examine their own areas of study; teachers and students of college level, for whom it supplies a complete summary of and a resource for their own deeper investigations into Indic art; and curious readers, for whom it gives a broad-based introduction to this fascinating area of world art.

Overtourism Harald Pechlaner, Elisa Innerhofer, Greta Erschbamer, 2019-09-02 Overtourism explores a growing phenomenon in tourism that is currently creating tensions in both urban and rural tourist destinations worldwide. This volume proposes a framework for a series of possible solutions and management strategies for dealing with overtourism and the various negative impacts that large quantities of tourists can impose. Questioning the causes of this phenomenon - such as increased prosperity and mobility, technological development, issues of security and stigma for certain parts of the world, and so on - this book supposes that better visitor management strategies and distribution of tourists can offset the negative impacts of overtourism. Individual chapters focus on a range of destinations including Venice, Barcelona and Dubrovnik, as well as UNESCO cultural and natural heritage sites, where local political actors and public authorities are not always able to deal with the situation effectively. Integrating research and practice, this book will be of great interest to upper-level students, researchers and academics in tourism, development studies, cultural studies and sustainability, as well as professionals in the field of tourism management.
