The Targeter Nada Bakos,2019-06-04 A CIA analyst's revealing and utterly engrossing account of the world of high-stakes foreign intelligence and her role within the campaign to stop top-tier targets inside Al-Qaida (Joby Warrick). In 1999, 30-year-old Nada Bakos moved from her lifelong home in Montana to Washington, D.C., to join the CIA. Quickly realizing her affinity for intelligence work, Nada was determined to rise through the ranks of the agency first as an analyst and then as a Targeting Officer, eventually finding herself on the frontline of America's war against Islamic extremists. In this role, Nada was charged with determining if Iraq had a relationship with 9/11 and Al-Qaida, and finding the mastermind behind this terrorist activity: Abu Musab al-Zarqawi. Her team's analysis stood the test of time, but it was not satisfactory for some members of the Administration. In a tight, tension-packed narrative that takes the reader from Langley deep into Iraq, Bakos reveals the inner workings of the Agency and the largely hidden world of intelligence gathering post 9/11. Entrenched in the world of the CIA, Bakos, along with her colleagues, focused on leading U.S. Special Operations Forces to the doorstep of one of the world's most wanted terrorists. Filled with on-the-ground insights and poignant personal anecdotes, The Targeter shows us the great personal sacrifice that comes with intelligence work. This is Nada's story, but it is also an intimate chronicle of how a group of determined, ambitious men and women worked tirelessly in the heart of the CIA to ensure our nation's safety at home and abroad.

Handbook of Military Industrial Engineering Adedeji B. Badiru,Marlin U. Thomas,2009-02-25 In light of increasing economic and international threats, military operations must be examined with a critical eye in terms of process design, management, improvement, and control. Vanguard of Valor Combat Studies Institute Press,2012-02 From the foreword by Genral (ret.) David Petraeus: In 2010, as the scale and tempo of Coalition operations in Afghanistan increased, so did the need for historical accounts of small-unit actions. As commander of the International Security Assistance Force (ISAF), I commissioned the Combat Studies Institute to research and write the cases collected in this volume and in those that will follow. By capturing key insights from both lethal and non-lethal operations, I hoped these accounts would be of immediate utility to sergeants and lieutenants at the center of future operations. The eight actions described in these pages take the reader through a wide range of platoon-level operations, from an intense firefight near Kandahar to an intricate civic action project in Kunar Province. Drawing from dozens of Soldier interviews, these accounts vividly depict the actions themselves and offer critical insights of greatest benefit to the small-unit actions leaders of today and tomorrow. The US Army always has prided itself as an institution of constant learning, strongly committed to drawing lessons from its past. This volume from the Combat Studies Institute is an excellent example of that long and honorable tradition. I hope that you will find the actions n Vanguard of Valor to be both instructive and compelling. I am sure that you will find them to be inspirational.

The Transformation of the Armed Forces Michele Nones,Alessandro Marrone,2012 Information technology (IT) has had, and will continue to have, a deep impact on the defence sector. The most advanced countries, not only the U.S. but also France, Great Britain and Italy, over the past few years have undergone a transormation of their armed forces aimed at exploiting the strategic advantages of IT. The goal pursued in Europe, and also promoted by NATO, is Network Enabled Capability (NEC). That is combining equipment and soldiers, as well as different doctrinal, procedural, technical and organizational elements, into a single network to obtain their interaction in order to achieve substantial strategic superiority. In practice, this also occurs with a strong, efficient and secure telecommunications network, and through netcentric modernization of armed forces' capability and systems aimed at connecting them to the net. This research paper analyzes the military netcentric modernization and transformation programs - still in progress - in France, Britain and Italy, with special focus on the joint program led by the Italian army called Forza NEC. Opportunities and challenges of Forza NEC have been considered according to the Italian armed force's requirements, developed during two decades of experience in international military operations, as well as in the light of the evolution of strategic doctrine at a European and transatlantic level. Particular attention has been devoted to the interaction between industry and the armed forces, and to the involvement of many Italian companies in different Forza NEC activities, as it represents one of the pillars of the procurement program.

The 2008 Battle of Sadr City David E. Johnson,M. Wade Markel,Brian Shannon,2013-12-18 In 2008, U.S. and Iraqi forces defeated an uprising in Sadr City, a district of Baghdad with ~2.4 million residents. Coalition forces' success in this battle helped consolidate the Government of Iraq's authority, contributing significantly to the attainment of contemporary U.S. operational objectives in Iraq. U.S. forces' conduct of the battle illustrates a new paradigm for urban combat and indicates capabilities the Army will need in the future.

With The 1st Marine Division In Iraq, 2003 Groen Michael S.,2018-11 With the 1st Marine Division in Iraq, 2003: No Greater Friend, No Worse EnemyThe events chronicled here capture the story of the Marines of the Blue Diamond as they prepared for war, conquered and army, and liberated a nation. From across America and beyond, they chose the demanding path, to become Marines. These Marines marched in the ranks of this national treasure that we call the 1st Marine Division. And, at a time when timid souls or cynical pundits grew loudest, these men shouldered their weapons and moved without hesitation against the enemy. Our victory was not inevitable. It was the courage, unselfishness, and skill of the young men of Blue Diamond to whom we owe our victory.

Our History Is the Future Nick Estes,2019-03-05 Winner of the Oakland “Blue Collar” PEN Award A work of history, a manifesto, and an intergenerational story of resistance that shows how two centuries of Indigenous struggle created the movement proclaiming “Water is Life” In 2016, a small protest encampment at the Standing Rock reservation in North Dakota, initially established to block construction of the Dakota Access oil pipeline, grew to be the largest Indigenous protest movement in the twenty-first century, attracting tens of thousands of Indigenous and non-Native allies from around the world. Its slogan “Mni Wiconi”—Water is Life—was about more than just a pipeline. Water Protectors knew this battle for Native sovereignty had already been fought many times before, and that, even after the encampment was gone, their anti-colonial struggle would continue. In Our History is the Future, Nick Estes traces traditions of Indigenous resistance leading to the #NoDAPL movement from the days of the Missouri River trading forts through the Indian Wars, the Pick-Sloan dams, the American Indian Movement, and the campaign for Indigenous rights at the United Nations. While a historian by trade, Estes also draws on observations from the encampments and from growing up as a citizen of the Oceti Sakowin (the Nation of the Seven Council Fires), making Our History is the Future at once a work of history, a personal story, and a manifesto.

Predator Empire Ian G. R. Shaw,2016-08-15 What does it mean for human beings to exist in an era of dronified state violence? How can we understand the rise of robotic systems of power and domination? Focusing on U.S. drone warfare and its broader implications as no other book has to date, Predator Empire argues that we are witnessing a transition from a labor-intensive “American empire” to a machine-intensive “Predator Empire.” Moving from the Vietnam War to the War on Terror and beyond, Ian G. R. Shaw reveals how changes in military strategy, domestic policing, and state surveillance have come together to enclose our planet in a robotic system of control. The rise of drones presents a series of “existential crises,” he suggests, that are reengineering not only spaces of violence but also the character of the modern state. Positioning drone warfare as part of a much longer project to watch and enclose the human species, he shows that for decades—centuries even—human existence has slowly but surely been brought within the artificial worlds of “technological civilization.” Instead of incarcerating us in prisons or colonizing territory directly, the Predator Empire locks us inside a worldwide system of electromagnetic enclosure—in which democratic ideals give way to a system of totalitarian control, a machinic “rule by Nobody.” As accessibly written as it is theoretically ambitious, Predator Empire provides up-to-date information about U.S. drone warfare, as well as an in-depth history of the rise of drones.

The Counterrevolution Bernard E. Harcourt,2018-02-27 A distinguished political theorist sounds the alarm about the counterinsurgency strategies used to govern Americans Militarized police officers with tanks and drones. Pervasive government surveillance and profiling. Social media that distract and track us. All of these, contends Bernard E. Harcourt, are facets of a new and radical governing paradigm in the United States--one rooted in the modes of warfare originally developed to suppress anticolonial revolutions and, more recently, to prosecute the war on terror. The Counterrevolution is a penetrating and disturbing account of the rise of counterinsurgency, first as a military strategy but increasingly as a way of ruling ordinary Americans. Harcourt shows how counterinsurgency's principles--bulk intelligence collection, ruthless targeting of minorities, pacifying propaganda--have taken hold domestically despite the absence of any radical uprising. This counterrevolution against phantom enemies, he argues, is the tyranny of our age. Seeing it clearly is the first step to resisting it effectively.

The End of Policing Alex S. Vitale,2017-10-01 How the police endanger us and why we need to find an alternative Recent years have seen an explosion of protest and concern about police brutality and repression—especially after long-held grievances in Ferguson, Missouri, erupted in months of violent protest following the police killing of Brown. Much of the conversation has focused on calls for enhancing police accountability, increasing police diversity, improving police training, and emphasizing community policing. Unfortunately, none of these is likely to produce results, because they fail to get at the core of the problem. The problem is policing itself—the dramatic expansion of the police role over the last forty years. This book attempts to jog public discussion of policing by revealing the tainted origins of modern policing as a tool of social control and demonstrating how the expanded role of the police is inconsistent with community empowerment, social justice—even public safety. Drawing on first-hand research from across the globe, Alex Vitale shows how the implementation of alternatives to policing, like drug legalization, regulation, and harm reduction instead of the policing of drugs, has led to reductions in crime, spending, and injustice.
