Textiles for Advanced Applications Bipin Kumar,Suman Thakur,2017-09-20 This book presents a global view of the development and applications of technical textiles with the description of materials, structures, properties, characterizations, functions and relevant production technologies, case studies, challenges, and opportunities. Technical textile is a transformative research area, dealing with the creation and studies of new generations of textiles that hoist many new scientific and technological challenges that have never been encountered before. The book emphasizes more on the principles of textile science and technology to provide solutions to several engineering problems. All chapter topics are exclusive and selectively chosen and designed, and they are extensively explored by different authors having specific knowledge in each area.

Assessing Conventional Army Demands and Requirements for Ultra-light Tactical Mobility Matthew E. Boyer,Michael Shurkin,Jonathan P. Wong,Ryan Schwankhart,Adam Albrich,Matthew W. Lewis,Christopher G. Pernin,2015 The Army often uses vehicles informally classified as ultra-light tactical mobility (UTM). This report assesses the demands, requirements, current ad hoc capabilities, and key considerations for developing and sustaining established Army UTM fleets.

The Targeter Nada Bakos,2019-06-04 A CIA analyst's revealing and utterly engrossing account of the world of high-stakes foreign intelligence and her role within the campaign to stop top-tier targets inside Al-Qaida (Joby Warrick). In 1999, 30-year-old Nada Bakos moved from her lifelong home in Montana to Washington, D.C., to join the CIA. Quickly realizing her affinity for intelligence work, Nada was determined to rise through the ranks of the agency first as an analyst and then as a Targeting Officer, eventually finding herself on the frontline of America's war against Islamic extremists. In this role, Nada was charged with determining if Iraq had a relationship with 9/11 and Al-Qaida, and finding the mastermind behind this terrorist activity: Abu Musab al-Zarqawi. Her team's analysis stood the test of time, but it was not satisfactory for some members of the Administration. In a tight, tension-packed narrative that takes the reader from Langley deep into Iraq, Bakos reveals the inner workings of the Agency and the largely hidden world of intelligence gathering post 9/11. Entrenched in the world of the CIA, Bakos, along with her colleagues, focused on leading U.S. Special Operations Forces to the doorstep of one of the world's most wanted terrorists. Filled with on-the-ground insights and poignant personal anecdotes, The Targeter shows us the great personal sacrifice that comes with intelligence work. This is Nada's story, but it is also an intimate chronicle of how a group of determined, ambitious men and women worked tirelessly in the heart of the CIA to ensure our nation's safety at home and abroad.

Vanguard of Valor Combat Studies Institute Press,2012-02 From the foreword by Genral (ret.) David Petraeus: In 2010, as the scale and tempo of Coalition operations in Afghanistan increased, so did the need for historical accounts of small-unit actions. As commander of the International Security Assistance Force (ISAF), I commissioned the Combat Studies Institute to research and write the cases collected in this volume and in those that will follow. By capturing key insights from both lethal and non-lethal operations, I hoped these accounts would be of immediate utility to sergeants and lieutenants at the center of future operations. The eight actions described in these pages take the reader through a wide range of platoon-level operations, from an intense firefight near Kandahar to an intricate civic action project in Kunar Province. Drawing from dozens of Soldier interviews, these accounts vividly depict the actions themselves and offer critical insights of greatest benefit to the small-unit actions leaders of today and tomorrow. The US Army always has prided itself as an institution of constant learning, strongly committed to drawing lessons from its past. This volume from the Combat Studies Institute is an excellent example of that long and honorable tradition. I hope that you will find the actions n Vanguard of Valor to be both instructive and compelling. I am sure that you will find them to be inspirational.

The Transformation of the Armed Forces Michele Nones,Alessandro Marrone,2012 Information technology (IT) has had, and will continue to have, a deep impact on the defence sector. The most advanced countries, not only the U.S. but also France, Great Britain and Italy, over the past few years have undergone a transormation of their armed forces aimed at exploiting the strategic advantages of IT. The goal pursued in Europe, and also promoted by NATO, is Network Enabled Capability (NEC). That is combining equipment and soldiers, as well as different doctrinal, procedural, technical and organizational elements, into a single network to obtain their interaction in order to achieve substantial strategic superiority. In practice, this also occurs with a strong, efficient and secure telecommunications network, and through netcentric modernization of armed forces' capability and systems aimed at connecting them to the net. This research paper analyzes the military netcentric modernization and transformation programs - still in progress - in France, Britain and Italy, with special focus on the joint program led by the Italian army called Forza NEC. Opportunities and challenges of Forza NEC have been considered according to the Italian armed force's requirements, developed during two decades of experience in

international military operations, as well as in the light of the evolution of strategic doctrine at a European and transatlantic level. Particular attention has been devoted to the interaction between industry and the armed forces, and to the involvement of many Italian companies in different Forza NEC activities, as it represents one of the pillars of the procurement program.

Handbook of Military Industrial Engineering Adedeji B. Badiru, Marlin U. Thomas, 2009-02-25 In light of increasing economic and international threats, military operations must be examined with a critical eye in terms of process design, management, improvement, and control. Although the Pentagon and militaries around the world have utilized industrial engineering (IE) concepts to achieve this goal for decades, there has been no single reso

Policing the Planet Jordan T. Camp, Christina Heatherton, 2016-06-07 How policing became the major political issue of our time Combining firsthand accounts from activists with the research of scholars and reflections from artists, *Policing the Planet* traces the global spread of the broken-windows policing strategy, first established in New York City under Police Commissioner William Bratton. It's a doctrine that has vastly broadened police power the world over—to deadly effect. With contributions from #BlackLivesMatter cofounder Patrisse Cullors, Ferguson activist and Law Professor Justin Hansford, Director of New York-based Communities United for Police Reform Joo-Hyun Kang, poet Martín Espada, and journalist Anjali Kamat, as well as articles from leading scholars Ruth Wilson Gilmore, Robin D. G. Kelley, Naomi Murakawa, Vijay Prashad, and more, *Policing the Planet* describes ongoing struggles from New York to Baltimore to Los Angeles, London, San Juan, San Salvador, and beyond.

Paper Works Shaoqiang Wang, 2012 From classic Mexican papel picado to the art of origami, paper has long been a source of inspiration to artists and designers across the globe. *Paper Works* brings together an eclectic mix of designs and techniques, taking the reader on a visual journey of progression and transformation. Featuring sculptural carved book arts and installation art to avant-garde paper couture fashion, and examining the work of artists such as Jen Stark and Nikki McClure, this is an essential guide to one of the most fundamental, versatile but often overlooked materials.

The 2008 Battle of Sadr City David E. Johnson, M. Wade Markel, Brian Shannon, 2013-12-18 In 2008, U.S. and Iraqi forces defeated an uprising in Sadr City, a district of Baghdad with ~2.4 million residents. Coalition forces' success in this battle helped consolidate the Government of Iraq's authority, contributing significantly to the attainment of contemporary U.S. operational objectives in Iraq. U.S. forces' conduct of the battle illustrates a new paradigm for urban combat and indicates capabilities the Army will need in the future.

Our History Is the Future Nick Estes, 2019-03-05 Winner of the Oakland "Blue Collar" PEN Award A work of history, a manifesto, and an intergenerational story of resistance that shows how two centuries of Indigenous struggle created the movement proclaiming "Water is Life" In 2016, a small protest encampment at the Standing Rock reservation in North Dakota, initially established to block construction of the Dakota Access oil pipeline, grew to be the largest Indigenous protest movement in the twenty-first century, attracting tens of thousands of Indigenous and non-Native allies from around the world. Its slogan "Mni Wiconi"—Water is Life—was about more than just a pipeline. Water Protectors knew this battle for Native sovereignty had already been fought many times before, and that, even after the encampment was gone, their anti-colonial struggle would continue. In *Our History is the Future*, Nick Estes traces traditions of Indigenous resistance leading to the #NoDAPL movement from the days of the Missouri River trading forts through the Indian Wars, the Pick-Sloan dams, the American Indian Movement, and the campaign for Indigenous rights at the United Nations. While a historian by trade, Estes also draws on observations from the encampments and from growing up as a citizen of the Ojibwe (the Nation of the Seven Council Fires), making *Our History is the Future* at once a work of history, a personal story, and a manifesto.

Phenolic Resins: A Century of Progress Louis Pilato, 2010-03-10 The legacy of Leo Hendrik Baekeland and his development of phenol formaldehyde resins are recognized as the cornerstone of the Plastics Industry in the early twentieth century, and phenolic resins continue to flourish after a century of robust growth. On July 13, 1907, Baekeland filed his "heat and pressure" patent related to the processing of phenol formaldehyde resins and identified their unique utility in a plethora of applications. The year 2010 marks the Centennial Year of the production of phenolic resins by Leo Baekeland. In 1910, Baekeland formed Bakelite GmbH and launched the manufacture of phenolic resins in Erkner in May 1910. In October 1910, General Bakelite began producing resins in Perth Amboy, New Jersey. Lastly, Baekeland collaborated with Dr. Takamine to manufacture phenolic resins in Japan in 1911. These events were instrumental in establishing the Plastics Industry and in tracing the identity to the brilliance of Dr. Leo Baekeland. Phenolic resins remain as a versatile resin system featuring either a stable, thermoplastic novolak composition that cures with a latent source of formaldehyde (hexa) or a heat reactive and perishable resole composition that cures thermally or under acidic or special basic conditions. Phenolic resins are a very large volume resin system with a worldwide volume in excess of 5 million tons/year, and its growth is related to the gross national product (GNP) growth rate globally.

Lung Transplantation Ganesh Raghu, Roberto G. Carbone, 2018-07-28 This book details all aspects of lung transplantation and equips the general pulmonologist/physician with the necessary tools and knowledge to

assist patients with the preparation for and care post lung transplantation. Written by global experts, chapters present general principles and history; indications and eligibility for lung transplantation, including screening for COPD, cystic fibrosis, scleroderma, Idiopathic pulmonary fibrosis (IPF) and idiopathic pulmonary arterial hypertension; approach to and complications of lung transplantation, such as prognostic markers, radiological approach, and immunology and rejection; and medical and surgical guidelines for lung transplantation. The goal of lung transplantation is to increase survival and to provide a greater quality of life for patients with untreatable end-stage lung disease and this book serves to best prepare clinicians in achieving that goal. Lung Transplantation: Evolving knowledge and New horizons offers valuable insights into this modality and is an authoritative resource for multidisciplinary services that include experts in pulmonary diseases, critical care, cardiology, thoracic surgery, infection diseases, internal medicine, radiology , immunology, nephrology, rehabilitation, psychology /psychiatry, nurses, social workers and nutritionists.

Predator Empire Ian G. R. Shaw,2016-08-15 What does it mean for human beings to exist in an era of dronified state violence? How can we understand the rise of robotic systems of power and domination? Focusing on U.S. drone warfare and its broader implications as no other book has to date, Predator Empire argues that we are witnessing a transition from a labor-intensive “American empire” to a machine-intensive “Predator Empire.” Moving from the Vietnam War to the War on Terror and beyond, Ian G. R. Shaw reveals how changes in military strategy, domestic policing, and state surveillance have come together to enclose our planet in a robotic system of control. The rise of drones presents a series of “existential crises,” he suggests, that are reengineering not only spaces of violence but also the character of the modern state. Positioning drone warfare as part of a much longer project to watch and enclose the human species, he shows that for decades—centuries even—human existence has slowly but surely been brought within the artificial worlds of “technological civilization.” Instead of incarcerating us in prisons or colonizing territory directly, the Predator Empire locks us inside a worldwide system of electromagnetic enclosure—in which democratic ideals give way to a system of totalitarian control, a machinic “rule by Nobody.” As accessibly written as it is theoretically ambitious, Predator Empire provides up-to-date information about U.S. drone warfare, as well as an in-depth history of the rise of drones.

Evolutionary Acquisition Mark A. Lorell,Julia Lowell,Obaid Younossi,2006 So far, EA implementation of military space programs has produced mixed results. The capabilities and requirements definition and management processes are major challenges in all EA programs. EA programs require an evolutionary costing approach; most cost analysts interviewed expressed generally positive views about EA.--BOOK JACKET.

The Counterrevolution Bernard E. Harcourt,2018-02-27 A distinguished political theorist sounds the alarm about the counterinsurgency strategies used to govern Americans Militarized police officers with tanks and drones. Pervasive government surveillance and profiling. Social media that distract and track us. All of these, contends Bernard E. Harcourt, are facets of a new and radical governing paradigm in the United States--one rooted in the modes of warfare originally developed to suppress anticolonial revolutions and, more recently, to prosecute the war on terror. The Counterrevolution is a penetrating and disturbing account of the rise of counterinsurgency, first as a military strategy but increasingly as a way of ruling ordinary Americans. Harcourt shows how counterinsurgency's principles--bulk intelligence collection, ruthless targeting of minorities, pacifying propaganda--have taken hold domestically despite the absence of any radical uprising. This counterrevolution against phantom enemies, he argues, is the tyranny of our age. Seeing it clearly is the first step to resisting it effectively.

FM 21-11 First Aid for Soldiers United States. War Department,2018-10-20 FM 21-11 1943: Basic field manual, first aid for soldiers.(OBSOLETE) The purpose of this manual is to teach the soldier what he can do for himself or a fellow soldier if injury or sickness occurs when no medical officer or Medical Department soldier is nearby. Information is also given concerning the use of certain supplies which are for the purpose of helping to keep well. This field manual addresses wounds, fractures/dislocations/ sprains, common emergencies and health measures, effects of severe cold and heat, measures for use in the jungle/tropics and in aircraft and tank injuries, transportation of sick and injured, war gases, and description and uses of first-aid kits and packets.

Aeromedical Evacuation William W. Hurd,John G. Jernigan,2003 The definitive treatment on the medical evacuation and management of injured patients in both peace- and wartime. Edited by eminent experts in the field, this text brings together medical specialists from all four branches of the armed services. It discusses the history of aeromedical evacuation, triage and staging of the injured patient, evacuation from site of injury to medical facility, air-frame capabilities, medical capabilities in-flight, response to in-flight emergencies, and mass emergency evacuation. Specific medical conditions are addressed in detail, including such general surgical casualties as abdominal wounds and soft tissue, vascular, maxillofacial, head and spinal cord injuries, ophthalmologic, orthopaedic, pediatric, obstetric-gynecologic casualties, burns, and more. Over 80 illustrations provide a

review of transport equipment and both medical and surgical treatment. A must-have reference for all armed forced physicians and flight surgeons, for general and trauma surgeons, internists, intensive care specialists, orthopaedic surgeons, and public health service physicians.
