Television, Nation, and Culture in Indonesia Philip Kitley, 2014-07-31 The culture of television in Indonesia began with its establishment in 1962 as a public broadcasting service. From that time, through the deregulation of television broadcasting in 1990 and the establishment of commercial channels, television can be understood, Philip Kitley argues, as a part of the New Order's national culture project, designed to legitimate

an idealized Indonesian national cultural identity. But Professor Kitley suggests that it also has become a site for the contestation of elements of the New Order's cultural policies. Based on his studies, he further speculates on the increasingly significant role that television is destined to play as a site of cultural and political struggle.

*Dyslexia in Practice* Janet Townend, Martin

Turner, 2012-12-06 Dyslexia is a specific learning difficulty that hinders the learning of literacy skills. This problem with managing verbal codes in memory is neurologically based and tends to run in families. Other symbolic systems, such as mathematics and musical notation, can also be affected. Dyslexia can occur at any level of intellectual ability. It can accompany, but is not a result of, lack of motivation, emotional disturbance, sensory impairment or meagre opportunities. The effects of dyslexia can be alleviated by skilled specialist teaching and committed learning. Moreover many dyslexic people

have visual and spatial abilities which enable them to be successful in a wide range of careers. The appearance of this book .. is to be welcomed. It represents a full statement of the best practice to be found in the many kinds of intervention that are conducted with dyslexic students. It addresses some fundamental questions that are seldom asked and much of what the skilled teacher knows and does is set down here in print for the first time. From the Preface:

`Collectively, the chapters provide a synthesis of current practice focusing on how to assess and treat the symptoms of dyslexia, guided by a proper understanding of the cognitive and linguistic weaknesses that underpin the condition. The book makes clear that the backbone of intervention for dyslexia is a highly structured multisensory approach that teaches reading and spelling skills at the appropriate rate. However, it is also explicit in pointing out that such a programme must be delivered with due attention to individual differences in the other cognitive skills that contribute to literacy development, and take account of the learner's style, interests and not least their confidence and self-esteem. This book provides an important resource for teachers who wish to become competent in the skills required for the assessment, teaching, supporting and counselling of dyslexic people in a variety of settings. It promises to reach many teachers and in turn, their students and families'. Margaret J. Snowling, University of York, UK

*Grammatical Number in Welsh* Silva Nurmio, 2020 Nominal morphology and morphosyntax have been relatively neglected topics in Welsh, with diachronic studies dealing mostly with syntax and phonology, and with some work on verbal morphology. Searchable text corpora have been created relatively recently, both for Middle and Modern Welsh, which have made this study possible and allowed me to quantify and test earlier assumptions and theories. This book is the first monograph-length treatment of grammatical number in Welsh and it is aimed at Celticists as well as linguists interested in number more generally. It explores questions such as 'does Middle Welsh have number values other than singular and plural?', 'does Middle Welsh have a dual?', 'does Welsh have collective nouns?', 'why are there so many different plural endings in Welsh?', 'why do adjectives sometimes, but not always, agree with a plural noun?', and 'why do we use the singular with numerals in Welsh?' The following linguistic concepts are used to shed new light on the development of Welsh: animacy and the animacy hierarchy; markedness; minor numbers; the loss of the dual as a grammatical number; the interface between derivation and inflection; and language contact (with Latin and English at different periods)--
