The Adult Learner Malcolm S. Knowles, Elwood F. Holton III, Richard A. Swanson, Petra A. Robinson, 2020-12-21 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

Stiff: The Curious Lives of Human Cadavers Mary Roach, 2004-05-17 Beloved, best-selling science writer Mary Roach's "acutely entertaining, morbidly fascinating" (Susan Adams, *Forbes*) classic, now with a new epilogue. For two thousand years, cadavers – some willingly, some unwittingly – have been involved in science's boldest strides and weirdest undertakings. They've tested France's first guillotines, ridden the NASA Space Shuttle, been crucified in a Parisian laboratory to test the authenticity of the Shroud of Turin, and helped solve the mystery of TWA Flight 800. For every new surgical procedure, from heart transplants to gender confirmation surgery, cadavers have helped make history in their quiet way. "Delightful—though never disrespectful" (Les Simpson, *Time Out New York*), *Stiff* investigates the strange lives of our bodies postmortem and answers the question: What should we do after we die? "This quirky, funny read offers perspective and insight about life, death and the medical profession. . . . You can close this book with an appreciation of the miracle that the human body really is." —Tara Parker-Pope, *Wall Street Journal* "Gross, educational, and unexpectedly sidesplitting." —*Entertainment Weekly*

The WEIRDest People in the World Joseph Henrich, 2020-09-08 A New York Times Notable Book of 2020 A Bloomberg Best Non-Fiction Book of 2020 A Behavioral Scientist Notable Book of 2020 A Human Behavior & Evolution Society Must-Read Popular Evolution Book of 2020 A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you're rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In *The WEIRDest People in the World*, Joseph Henrich draws on cutting-edge

research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, *The WEIRDest People in the World* explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Includes black-and-white illustrations.

Dark Ecology Timothy Morton, 2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in *Blade Runner* (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

Dimensions of Human Behavior Elizabeth D. Hutchison, 2018-07-26 Updated Edition of a Best Seller! *Dimensions of Human Behavior: Person and Environment* presents a current and comprehensive examination of human behavior using a multidimensional framework. Author Elizabeth D. Hutchison explores the biological dimension and the social factors that affect human development and behavior, encouraging readers to connect their own personal experiences with social trends in order to recognize the unity of person and environment. Aligned with the 2015 curriculum guidelines set forth by the Council on Social Work Education (CSWE), the substantially updated Sixth Edition includes a greater emphasis on culture and diversity, immigration, neuroscience, and the impact of technology. Twelve new case studies illustrate a balanced breadth and depth of coverage to help readers apply theory and general social work knowledge to unique practice situations. The companion volume, *Dimensions of Human Behavior: The Changing Life Course*, Sixth Edition, builds on the dimensions of person and environment with the dimension of time and demonstrates how they work together to produce patterns in life course journeys.

After Virtue Alasdair MacIntyre, 2013-10-21 Highly controversial when it was first published in 1981, Alasdair MacIntyre's *After Virtue* has since established itself as a landmark work in contemporary moral philosophy. In this book, MacIntyre sought to address a crisis in moral language that he traced back to a European Enlightenment that had made the formulation of moral principles increasingly difficult. In the search for a way out of this impasse, MacIntyre returns to an earlier strand of ethical thinking, that of Aristotle, who emphasised the importance of 'virtue' to the ethical life. More than thirty years after its original publication, *After Virtue* remains a work that is impossible to ignore for anyone interested in our understanding of ethics and morality today.

Nudge Richard H. Thaler, Cass R. Sunstein, 2009-02-24 Now available: *Nudge: The Final Edition* The original edition of the multimillion-copy New York Times bestseller by the winner of the Nobel Prize in Economics, Richard H. Thaler, and Cass R. Sunstein: a revelatory look at how we make

decisions—for fans of Malcolm Gladwell's *Blink*, Charles Duhigg's *The Power of Habit*, James Clear's *Atomic Habits*, and Daniel Kahneman's *Thinking, Fast and Slow* Named a Best Book of the Year by *The Economist* and the *Financial Times* Every day we make choices—about what to buy or eat, about financial investments or our children's health and education, even about the causes we champion or the planet itself. Unfortunately, we often choose poorly. *Nudge* is about how we make these choices and how we can make better ones. Using dozens of eye-opening examples and drawing on decades of behavioral science research, Nobel Prize winner Richard H. Thaler and Harvard Law School professor Cass R. Sunstein show that no choice is ever presented to us in a neutral way, and that we are all susceptible to biases that can lead us to make bad decisions. But by knowing how people think, we can use sensible "choice architecture" to nudge people toward the best decisions for ourselves, our families, and our society, without restricting our freedom of choice.

Invention in Rhetoric and Composition Janice M. Lauer, 2004 *Invention in Rhetoric and Composition* examines issues that have surrounded historical and contemporary theories and pedagogies of rhetorical invention, citing a wide array of positions on these issues in both primary rhetorical texts and secondary interpretations. It presents theoretical disagreements over the nature, purpose, and epistemology of invention and pedagogical debates over such issues as the relative importance of art, talent, imitation, and practice in teaching discourse. After a discussion of treatments of invention from the Sophists to the nineteenth century, *Invention in Rhetoric and Composition* introduces a range of early twentieth-century multidisciplinary theories and calls for invention's awakening in the field of English studies. It then showcases inventional theories and pedagogies that have emerged in the field of Rhetoric and Composition over the last four decades, including the ensuing research, critiques, and implementations of this inventional work. As a reference guide, the text offers a glossary of terms, an annotated bibliography of selected texts, and an extensive bibliography. Janice M. Lauer is Professor of English, Emerita at Purdue University, where she was the Reece McGee Distinguished Professor of English. In 1998, she received the College Composition and Communication Conference's Exemplar Award. Her publications include *Four Worlds of Writing: Inquiry and Action in Context*, *Composition Research: Empirical Designs*, and *New Perspectives on Rhetorical Invention*, as well as essays on rhetorical invention, disciplinarity, writing as inquiry, composition pedagogy, historical rhetoric, and empirical research.

Counter-Statement Kenneth Burke, 1968-05 A valuable feature of the second edition (1953) of *Counter-Statement* was the *Curriculum Criticum* in which the author placed the book in terms of his later work. For this new paperback edition, Mr. Burke continues his curve of development in an Addendum which surveys the course of his thought in subsequent books (up to the publication of his *Collected Poems, 1915 - 1967*) and work-in-progress.

Burke and Hare Owen Dudley-Edwards, 2014-10-01 In a boarding house in West Port, an old army pensioner dies of natural causes. He owes the landlord rent. Instead of burying the body, the landlord, William Hare, and his friend, William Burke, fill the coffin with bark and sell the corpse to Dr. Robert Knox, an ambitious Edinburgh anatomist. They make a profit of GBP3 and 10 shillings. After this encouraging outcome, Burke and Hare decide to suffocate another sickly tenant. So begins the criminal career of the most notorious double act in serial killing. Here is the unvarnished, human story behind the infamous Burke and Hare murders. We delve into their past, their personalities and the circumstances that made them resort to murder as a money-making scheme. It's a tale of desperation and greed, of outsiders, ambition, corruption and betrayal. And it's all true!

The Armed Forces Officer Richard Moody Swain, Albert C. Pierce, 2017 In 1950, when he commissioned the first edition of *The Armed Forces Officer*, Secretary of Defense George C. Marshall told its author, S.L.A. Marshall, that American military officers, of whatever service, should share common ground ethically and morally. In this new edition, the authors methodically explore that common ground, reflecting on the basics of the Profession of Arms, and the officer's special place and distinctive obligations within that profession and especially to the Constitution.

Eat Pray Love Elizabeth Gilbert, 2010-06-29 A celebrated writer pens an irresistible, candid, and

eloquent account of her pursuit of worldly pleasure, spiritual devotion, and what she really wanted out of life.

The Willpower Instinct Kelly McGonigal, 2013-12-31 Based on Stanford University psychologist Kelly McGonigal's wildly popular course *The Science of Willpower*, *The Willpower Instinct* is the first book to explain the science of self-control and how it can be harnessed to improve our health, happiness, and productivity. Informed by the latest research and combining cutting-edge insights from psychology, economics, neuroscience, and medicine, *The Willpower Instinct* explains exactly what willpower is, how it works, and why it matters. For example, readers will learn: • Willpower is a mind-body response, not a virtue. It is a biological function that can be improved through mindfulness, exercise, nutrition, and sleep. • Willpower is not an unlimited resource. Too much self-control can actually be bad for your health. • Temptation and stress hijack the brain's systems of self-control, but the brain can be trained for greater willpower • Guilt and shame over your setbacks lead to giving in again, but self-forgiveness and self-compassion boost self-control. • Giving up control is sometimes the only way to gain self-control. • Willpower failures are contagious—you can catch the desire to overspend or overeat from your friends—but you can also catch self-control from the right role models. In the groundbreaking tradition of *Getting Things Done*, *The Willpower Instinct* combines life-changing prescriptive advice and complementary exercises to help readers with goals ranging from losing weight to more patient parenting, less procrastination, better health, and greater productivity at work.

The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC), 2022-05-19 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

Bodies That Matter Judith Butler, 2014-09-03 In *Bodies That Matter*, Judith Butler further develops her distinctive theory of gender by examining the workings of power at the most material dimensions of sex and sexuality. Deepening the inquiries she began in *Gender Trouble*, Butler offers an original reformulation of the materiality of bodies, examining how the power of heterosexual hegemony forms the matter of bodies, sex, and gender. Butler argues that power operates to constrain sex from the start, delimiting what counts as a viable sex. She offers a clarification of the notion of performativity introduced in *Gender Trouble* and explores the meaning of a citational politics. The text includes readings of Plato, Irigaray, Lacan, and Freud on the formation of materiality and bodily boundaries; *Paris is Burning*, Nella Larsen's *Passing*, and short stories by Willa Cather; along with a reconsideration of performativity and politics in feminist, queer, and radical democratic theory.

A Theory of Intergenerational Justice Joerg Chet Tremmel, 2009-12 This highly accessible book provides an extensive and comprehensive overview of current research and theory about why and how we should protect future generations. It exposes how and why the interests of people today and those of future generations are often in conflict and what can be done. It rebuts critical concepts such as Parfit's non-identity paradox and Beckerman's denial of any possibility of intergenerational justice. The core of the book is the lucid application of a veil of ignorance to derive principles of intergenerational justice which show that our duties to posterity are stronger than is often supposed. Tremmel's approach demands that each generation both consider and improve the well-being of

future generations. To measure the well-being of future generations Tremmel employs the Human Development Index rather than the metrics of utilitarian subjective happiness. The book thus answers in detailed, concrete terms the two most important questions of every theory of intergenerational justice: what to sustain? and how much to sustain?

A Human Error Approach to Aviation Accident Analysis Professor Scott A Shappell, Professor Douglas A Wiegmann, 2012-10-01 This comprehensive book provides the knowledge and tools required to conduct a human error analysis of accidents.
