Database Management Systems Raghu Ramakrishnan,Johannes Gehrke,2000 Database Management Systems provides comprehensive and up-to-date coverage of the fundamentals of database systems. Coherent explanations and practical examples have made this one of the leading texts in the field. The third edition continues in this tradition, enhancing it with more practical material. The new edition has been reorganized to allow more flexibility in the way the course is taught. Now, instructors can easily choose whether they would like to teach a course which emphasizes database application development or a course that emphasizes database systems issues. New overview chapters at the beginning of parts make it possible to skip other chapters in the part if you don't want the detail. More applications and examples have been added throughout the book, including SQL and Oracle examples. The applied flavor is further enhanced by the two new database applications chapters.

The Lives of the Sophists Philostratus (the Athenian),1921 PHILOSTRATUS AND EUNAPIUS. (a) Of the distinguished Lemnian family of Philostrati, Flavius Philostratus, 'the Athenian', was a Greek sophist (professor), c. A.D. 170-205, who studied at Athens and later lived in Rome. He was author of the admirable Life of Apollonius of Tyana (Loeb Nos. 16 and 17) and Lives of the Sophists (which are really impressions of investigators alert but less fond of scientific method and discovery than of stylish presentation or things known), one part concerning some older, the other some later 'provessors'. Other extant works of this Philostratus are Letters and Gymnasticus, but the Heroicus or Heroica is apparently by another Philostratus, and the Eikones (Imagines, skilful descriptions of pictures, Loeb No. 256) were probably by two Philostrati, on being the son of Nervianus and born c. A.D. 190, the other his grandson who wrote c. AD. 300. (b) The Greek Sophist and historian Eunapius was born at Sardis in A.D. 347, but went to Athens to study and lived much of his life there teaching rhetoric and possibly medicine. He was initiated into the 'mysteries' and was hostile to Christians. Lost is his historical work (covering the years A.D. 270-404) but for excerpts and the use of it made by Zosimmus, but we have his Lives of Philosophers and Sophists mainly contemporary whth himself. Eunapius is our only source of our knowledge of Neo-Platonism in the latter part of the fourth century A.D.

Envisioning Eternal Empire Yuri Pines,2009-01-01 This ambitious book looks into the reasons for the exceptional durability of the Chinese empire, which lasted for more than two millennia (221 B.C.E.-1911 C.E.). Yuri Pines identifies the roots of the empire's longevity in the activities of thinkers of the Warring States period (453-221 B.C.E.), who, in their search for solutions to an ongoing political crisis, developed ideals, values, and perceptions that would become essential for the future imperial polity. In marked distinction to similar empires worldwide, the Chinese empire was envisioned and to a certain extent preplanned long before it came into being. As a result, it was not only a military and administrative construct, but also an intellectual one. Pines makes the argument that it was precisely its ideological appeal that allowed the survival and regeneration of the empire after repeated periods of turmoil. Envisioning Eternal Empire presents a panoptic survey of philosophical and social conflicts in Warring States political culture. By examining the extant corpus of preimperial literature, including transmitted texts and manuscripts uncovered at archaeological sites, Pines locates the common ideas of competing thinkers that underlie their ideological controversies. This bold approach allows him to transcend the once fashionable perspective of competing schools of thought and show that beneath the immense pluralism of Warring States thought one may identify common ideological choices that eventually shaped traditional Chinese political culture

The Science of Solar System Ices Murthy S. Gudipati,Julie Castillo-Rogez,2012-07-28 The role of laboratory research and simulations in advancing our understanding of solar system ices (including satellites, KBOs, comets, and giant planets) is becoming increasingly important. Understanding ice surface radiation processing, particle and radiation penetration depths, surface and subsurface chemistry, morphology, phases, density, conductivity, etc., are only a few examples of the inventory of issues that are being addressed by Earth-based laboratory research. As a response to the growing need for cross-disciplinary dialog and communication in the Planetary Ices science community, this book aims to achieve direct dialog and foster focused collaborations among the observational, modeling, and laboratory research communities.

Geometry and Complexity Theory J. M. Landsberg,2017-09-28 Two central problems in computer science are P vs NP and the complexity of matrix multiplication. The first is also a leading candidate for the greatest unsolved problem in mathematics. The second is of enormous practical and theoretical importance. Algebraic geometry and representation theory provide fertile ground for advancing work on these problems and others in complexity. This introduction to algebraic complexity theory for graduate students and researchers in computer science and mathematics features concrete examples that demonstrate the application of geometric techniques to real world problems. Written by a noted expert in the field, it offers numerous open questions to motivate future research. Complexity theory has rejuvenated classical geometric questions and brought different areas of mathematics together in new ways. This book will show the beautiful, interesting, and important questions that have arisen as a result.

Ninth House Leigh Bardugo,2019-10-08 The best fantasy novel I've read in years, because it's about real people... Impossible to put down. —Stephen King The smash New York Times bestseller from Leigh Bardugo, a mesmerizing tale of power, privilege, and dark magic set among the Ivy League elite. Goodreads Choice Award Winner Locus Finalist Galaxy “Alex” Stern is the most unlikely member of Yale’s freshman class. Raised in the Los Angeles hinterlands by a hippie mom, Alex dropped out of school early and into a world of shady drug-dealer boyfriends, dead-end jobs, and much, much worse. In fact, by age twenty, she is the sole survivor of a horrific, unsolved multiple homicide. Some might say she’s thrown her life away. But at her hospital bed, Alex is offered a second chance: to attend one of the world’s most prestigious universities on a full ride. What’s the catch, and why her? Still searching for answers, Alex arrives in New Haven tasked by her mysterious benefactors with monitoring the activities of Yale’s secret societies. Their eight windowless “tombs” are the well-known haunts of the rich and powerful, from high-ranking politicians to Wall Street’s biggest players. But their occult activities are more sinister and more extraordinary than any paranoid imagination might conceive. They

tamper with forbidden magic. They raise the dead. And, sometimes, they prey on the living. Don't miss the highly-anticipated sequel, Hell Bent.
