Paper Dandy's Horrorgami Marc Hagan-Guirey,2015-09-01 Paper Dandy's Horrorgami features 20 kirigami (cut-and-fold) designs based around haunted houses and scenes from horror films by the creator of the successful Horrorgami blog and exhibition. Each project features step-by-step instructions and a template that you remove from the book. You then follow the lines on the template, cutting and folding to make your own kirigami model. All you need is a scalpel, a cutting mat and a ruler. Clear cutting tips help you with the tricky stages and give you an order in which to complete your work, while photos of the finished model show you the final design. Suitable for folding experts and beginners alike, Paper Dandy's Horrorgami makes the perfect Halloween activity.

**Mighty Fitz** Michael Schumacher,2008-12-01 The disappearance of the Edmund Fitzgerald remains one of the great unsolved mysteries in maritime history. Michael Schumacher relays in vivid detail the story of the Edmund Fitzgerald, its many productive years on the waters of the Great Lakes, its tragic demise, the search effort and investigation, as well as the speculation and the controversy that followed in the wake of the disaster. Michael Schumacher is the author of six books. He has written 25 documentaries on Great Lakes shipwrecks, including three about the Edmund Fitzgerald. In his ballad, Mr. Lightfoot sang about the Fitz's final tense moments, when the waves turn minutes to hours: Now the hours have lengthened into years and years into decades- but the allure of this doomed ship and its missing men remains as strong as ever.-Wall Street Journal

**Music Scenes** Andy Bennett,Richard A. Peterson,2004 While more than 80 percent of the world's commercial music is controlled by four multinational firms, most music is made and enjoyed in diverse situations divorced from such corporate behemoths. These fourteen original essays examine the fascinating world of music scenes, those largely inconspicuous sites where clusters of musicians, producers, and fans explore their common musical tastes and distinctive lifestyle choices. Although most music scenes come and go with hardly a trace, they nevertheless give immense satisfaction to their participants, and a few - New York bop jazz, Merseybeat, Memphis rockabilly, London punk, Bronx hip-hop - achieve fame and spur musical innovations. To date, serious study of the scenes phenomenon has focused mainly on specific music scenes while paying less attention to recurrent dynamics of scene life, such as how individuals construct and negotiate scenes to the various activities. This volume remedies that neglect. The editors distinguish between three types of scenes - local, translocal, and virtual - which provide the organizing framework for the essays. Aspects of local

scenes, which are confined to specific areas, are explored through essays on Chicago blues, rave, karaoke, teen pop, and salsa. The section on translocal scenes, which involve the coming together of scattered local scenes around a particular type of music and lifestyle, includes articles on Riot Grrrls, goths, art music, and anarcho-punk. Aspects of virtual scenes, in which fans communicate via the internet, are illustrated using alternative country, the Canterbury sound, postrock, and Kate Bush fans. Also included is an essay that shows how the social conditions in places where jazz was made influenced that music's development.

*From Cave Man to Cave Martian* Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

**Millionaire by Thirty** Douglas R. Andrew, Emron Andrew, Aaron Andrew, 2008-04-30 The definitive, easy to understand and breakthrough guide on how young people can take their limited first income and turn it into a small fortune by the time they turn thirty from an expert financial planner. Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be too much month left at the end of their money. Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

**The Great International Paper Airplane Book** Jerry Mander, Howard Luck Gossage, George Dippel, 1998-08 Paper airplanes as serious science? No longer shamefully relegated to the back rows of elementary-school sports stadiums, paper airplanes come into their own with this amusing -- and instructive -- book. The *Great International Paper Airplane Book* documents the proceedings of the first (and possibly only) International Paper Airplane Competition conducted by *Scientific American*. In addition to the behind-the-scenes story and official records of the Competition, readers will discover intriguing mini-essays on the historical, aesthetic, technological, and folkloric aspects of the paper airplane and on its startling implications for the future of aviation. Best of all, there are dozens of cut-fold-and-fly-them-yourself planes to experiment with. Combining real science with outright fun, this book appeals to

paper airplane enthusiasts and would-be aviators of every age.
