Introductory Grammar of Amharic Wolf Leslau,2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

The Marriage of Heaven and Earth Marlin Watling,2016-10-07 On the lookout for a mind-blowing new perspective on the nature of God and humanity's place in the world today? Dive into *The Marriage of Heaven and Earth*, and enter the mind of a veritable rock star of contemporary theology-N. T. Wright. Marlin Watling takes abstract and complex ideas and grounds them in simple terms through his unique combination of readable summaries and fifty accompanying illustrations. He distills a lifetime of complex theological analysis and data into easy-to-consume sketches with explanations to provide one thing: universal access to a brilliant mind. Watling's guide comprises four parts ♦ An introduction to N. T. Wright ♦ Summaries of Wright's four key concepts ♦ Wright's proposal of a new worldview ♦ An overview of humanity's mission, with an eye toward the end times Following in the footsteps of reformer Martin Luther, N. T. Wright makes the old story new again with his paradigm-shifting worldview. And in *The Marriage of Heaven and Earth*, Watling does something equally novel. He enters the ivory tower, strips away the pomp and ceremony of untouchable academia, and presents to believers of all interest levels Wright's theology as it's truly meant to be: easy to understand and full of grace.

Woody Guthrie and his passionate social politics are as crucial today as they have ever been. Business History and International Business Peter Buckley,2014-01-02 Business History and International Business are cognate subjects. There are few, if any, studies of international business that do not require a proper study of context. International business decision making must be made relevant by a considered evaluation of the circumstances surrounding that decision. This often means putting it into its historical context. The contributions that the study of international business can make to business history are the input of appropriate theory and appropriate research methods. The best international business theory can illuminate the seemingly disparate strategies of firms in given historical circumstances and can provide an integrated, overarching conceptual structure of the study of business history. The research methods used in international business are also worthy of scrutiny by business historians. The proposition of this book is that international business theory and method can complement business history. This cross-fertilization has been occurring with increasing regularity over the past few decades and this book brings together some of the fruits of this conjunction of two important intellectual domains. This book was published as a special issue of *Business History*.

Facts of Consciousness Johann Fichte,2017-11-06 Facts of Consciousness (German: Die Thatsachen des Bewusstseyns) by Johann Gottlieb Fichte was origianally published in 1817, and translated into English by Adolph Ernst Kroeger in 1868. The pathway from the world of sense to the world above sense is laid by the experimental knowledge of the human mind. The Facts of Consciousness must be investigated, for they are the measure of the true essence of the soul. These facts of consciousness are not, however, those of the ordinary psychologist. We must take the mind of humanity at large, in the fullness of its ideal life (theoretical, artistic, ethical, and religious), and in the might of its preternatural activity, as the real starting-point. In addition to thiB, we must weigh carefully even those facts which are rare and exceptional. These spring from a source lying within the region of preconsciousness. For the soul is preconscious and preexistent.
