Paper, Scissors, Sculpt! Ben A. Gonzales, 2006-08 Score the paper, make a cut, and give it a fold; that's gupit-gupit, the art of creating amazing three-dimensional sculptures. The name comes from Tagalog, the national language of the Philippines, and it means cut cut." Master Ben A. Gonzales, a native Filipino, illustrates all the techniques in this unique collection of paper animals--and both kids and adults will love constructing them. It's easy: Each creature is made from only a single sheet, directions are laid out in a straightforward manner, and the nice large patterns proceed logically from simple forms to the more complicated. (The number of stars next to each project gives the level of difficulty.) Choose from a butterfly, bear, kangaroo, swan, squirrel, Tyrannosaurus rex, whale, and many others.

Introductory Grammar of Amharic Wolf Leslau, 2000 This book closes the gap for beginners who

want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Star Wars Origami ,2012-08-07 Kids love origami—and what could be cooler than transforming a

piece of paper into Boba Fett, Princess Leia, Yoda, or R2-D2? And not just any paper, but custom-designed paper illustrated with art from the movies. Star Wars® Origami marries the fun of paper folding with the obsession of Star Wars. Like *The Joy of Origami* and *Origami on the Go*, this book puts an original spin on an ancient art. And like Star Wars® Scanimation® and Star Wars® Fandex®, it's a fresh take on Star Wars mania. Chris Alexander is a master folder and founder of the popular website StarWarsOrigami.com, and here are 36 models, clearly explained, that range in difficulty from Youngling (easy) to Padawan (medium), Jedi Knight (difficult), and Jedi Master (tricky!). A front section introduces origami definitions and basic folds. Bound in the back is the book's unique folding paper, two sheets for each figure. Illustrated with original art, it makes each creation—the essential lightsabers, the Death Star, and much more—true to the movies. Star Wars Origami includes a foreword by Tom Angleberger, author of the New York Times bestsellers *The Strange Case of Origami Yoda* and *Darth Paper Strikes Back*, and is scheduled to be published at the same time as Angleberger's upcoming book, *The Secret of the Fortune Wookiee*.

The Art of Paper Quilling Kit Cecelia Louie,2023-09-05 An exquisite paper art kit featuring instructions on basic quilling techniques and the materials to make 10 whimsical flora and fauna designs. Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of

land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Arthur, the Lion Lee Mahan, 1997 A growing young lion meets all the animals of the jungle who will be a part of his Kingdom. When he grows up and has his own family, he is prepared to teach his cubs all that he learned in his youth.

Quilted Diamonds Jane Austin, Jane Stickle and Friends Linda Franz, 2001-09 In the world of quilting, few quilts have elicited greater followings than those of Jane Austen (circa 1812) and

Jane Stickle (circa 1863). Now award-winning quiltmaker, Linda Franz continues this tradition with over 200 fabulous diamond-shaped blocks inspired by both of the Jane quilts, and the friendships that have developed among Jane lovers. Especially for those who want to indulge their passions for hand-piecing using freezer paper techniques, these blocks are designed to help quiltmakers discover the intrigue, portability, and charm of these diamonds, most sized at 4 x 7. All of the blocks in *Quilted Diamonds* are found in the author's own stunning blue and white quilt, *Love and Friendship*. A pullout pattern for the quilt's center medallion is included along with diamond patterns, tips for making the quilt's fabulous scalloped border, and quilting suggestions. Whether you make a few diamonds, or all of them, this book invites you to join the sisterhood of Jane aficionados who share a lasting quilting heritage.

Evolution: the Grand Experiment Dr. Carl Werner, Carl Werner, 2007 Darwin's book on evolution admitted that intermediate links were perhaps the most obvious and serious objection to the theory of evolution. Darwin recognized that the fossils collected by scientists prior to 1859 did not correspond with his theory of evolution, but he predicted that his theory would be confirmed as more and more

fossils were found. One hundred and fifty years later, *Evolution: The Grand Experiment* critically examines the viability of Darwin's theory--

Goodnight Dune Julia Yu,2021-09-16 In a great green room, tucked away in bed, a young bunny gazes upon the two remaining moons of Arrakis...This book is inspired by Frank Herbert's 1965 science fiction novel *Dune*. Many of the visual motifs come from the 1984 David Lynch movie adaptation of *Dune*, and drawn in the style of Margaret Wise Brown / Clement Hurd's classic children's book *Goodnight Moon*. Originally created in 2011, (finally) updated in 2021.

The World's Oldest Alphabet Douglas Petrovich,2016 For about 150 years, scholars have attempted to identify the language of the world's first alphabetic script, and to translate some of the inscriptions that use it. Until now, their attempts have accomplished little more than identifying most of the pictographic letters and translating a few of the Semitic words. With the publication of *The World's Oldest Alphabet*, a new day has dawned. All of the disputed letters have been resolved, while the

language has been identified conclusively as Hebrew, allowing for the translation of 16 inscriptions that date from 1842 to 1446 BC. It is the author's reading that these inscriptions expressly name three biblical figures (Asenath, Ahisamach, and Moses) and greatly illuminate the earliest Israelite history in a way that no other book has achieved, apart from the Bible.

Hover Car Racer Matthew Reilly, 2021 In the world of the near future, the most popular sport in the world is hover car racing. Super fast and dangerous, its heroes are the racers: part fighter pilot, part race - car driver, all superstar. But to get to the Pro Circuit, you must first pass through the International Race School, a brutal cauldron of wild races on even wilder courses, where only the best of the best will survive. This is the story of Jason Chaser, a talented young racer selected to attend the Race School. He's younger than the other students. He's smaller. His trusty car, the Argonaut, is older. But Jason Chaser is no ordinary racer. And as he races against the best drivers in the world he will learn that at Race School winning is everything, that not everyone in this world fights fair, and that you never ever have any friends on the track.
